

Über dieses Buch

Dies ist ein digitales Exemplar eines Buches, das seit Generationen in den Regalen der Bibliotheken aufbewahrt wurde, bevor es von Google im Rahmen eines Projekts, mit dem die Bücher dieser Welt online verfügbar gemacht werden sollen, sorgfältig gescannt wurde.

Das Buch hat das Urheberrecht überdauert und kann nun öffentlich zugänglich gemacht werden. Ein öffentlich zugängliches Buch ist ein Buch, das niemals Urheberrechten unterlag oder bei dem die Schutzfrist des Urheberrechts abgelaufen ist. Ob ein Buch öffentlich zugänglich ist, kann von Land zu Land unterschiedlich sein. Öffentlich zugängliche Bücher sind unser Tor zur Vergangenheit und stellen ein geschichtliches, kulturelles und wissenschaftliches Vermögen dar, das häufig nur schwierig zu entdecken ist.

Gebrauchsspuren, Anmerkungen und andere Randbemerkungen, die im Originalband enthalten sind, finden sich auch in dieser Datei – eine Erinnerung an die lange Reise, die das Buch vom Verleger zu einer Bibliothek und weiter zu Ihnen hinter sich gebracht hat.

Nutzungsrichtlinien

Google ist stolz, mit Bibliotheken in partnerschaftlicher Zusammenarbeit öffentlich zugängliches Material zu digitalisieren und einer breiten Masse zugänglich zu machen. Öffentlich zugängliche Bücher gehören der Öffentlichkeit, und wir sind nur ihre Hüter. Nichtsdestotrotz ist diese Arbeit kostspielig. Um diese Ressource weiterhin zur Verfügung stellen zu können, haben wir Schritte unternommen, um den Missbrauch durch kommerzielle Parteien zu verhindern. Dazu gehören technische Einschränkungen für automatisierte Abfragen.

Wir bitten Sie um Einhaltung folgender Richtlinien:

- + *Nutzung der Dateien zu nichtkommerziellen Zwecken* Wir haben Google Buchsuche für Endanwender konzipiert und möchten, dass Sie diese Dateien nur für persönliche, nichtkommerzielle Zwecke verwenden.
- + *Keine automatisierten Abfragen* Senden Sie keine automatisierten Abfragen irgendwelcher Art an das Google-System. Wenn Sie Recherchen über maschinelle Übersetzung, optische Zeichenerkennung oder andere Bereiche durchführen, in denen der Zugang zu Text in großen Mengen nützlich ist, wenden Sie sich bitte an uns. Wir fördern die Nutzung des öffentlich zugänglichen Materials für diese Zwecke und können Ihnen unter Umständen helfen.
- + *Beibehaltung von Google-Markenelementen* Das "Wasserzeichen" von Google, das Sie in jeder Datei finden, ist wichtig zur Information über dieses Projekt und hilft den Anwendern weiteres Material über Google Buchsuche zu finden. Bitte entfernen Sie das Wasserzeichen nicht.
- + *Bewegen Sie sich innerhalb der Legalität* Unabhängig von Ihrem Verwendungszweck müssen Sie sich Ihrer Verantwortung bewusst sein, sicherzustellen, dass Ihre Nutzung legal ist. Gehen Sie nicht davon aus, dass ein Buch, das nach unserem Dafürhalten für Nutzer in den USA öffentlich zugänglich ist, auch für Nutzer in anderen Ländern öffentlich zugänglich ist. Ob ein Buch noch dem Urheberrecht unterliegt, ist von Land zu Land verschieden. Wir können keine Beratung leisten, ob eine bestimmte Nutzung eines bestimmten Buches gesetzlich zulässig ist. Gehen Sie nicht davon aus, dass das Erscheinen eines Buchs in Google Buchsuche bedeutet, dass es in jeder Form und überall auf der Welt verwendet werden kann. Eine Urheberrechtsverletzung kann schwerwiegende Folgen haben.

Über Google Buchsuche

Das Ziel von Google besteht darin, die weltweiten Informationen zu organisieren und allgemein nutzbar und zugänglich zu machen. Google Buchsuche hilft Lesern dabei, die Bücher dieser Welt zu entdecken, und unterstützt Autoren und Verleger dabei, neue Zielgruppen zu erreichen. Den gesamten Buchtext können Sie im Internet unter <http://books.google.com> durchsuchen.

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

THE EASTERN QUESTION: THE ROOM IN WHICH THE PRELIMINARY CONFERENCES WERE HELD, AT CONSTANTINOPLE.
FROM A SKETCH BY OUR SPECIAL ARTIST.

This is not the way, however, which England should take with any hope of gaining the heart of India. The Orientals may be fond of shows, but then they regard them as shows. They may be slow to appreciate the higher political and moral benefits of Western civilisation

but give them continuously security of property and of personal liberty; give them a free scope for the exercise of such abilities as they can command; protect their native rights from intrusion; and watch over, as far as may be, the external calamities to which they may be exposed;—and experience has proved that, after a time, such a government will commend itself to them by its results. Human nature differs from itself in no parts of the world. Essentially the same motives elicit the same response. This is the real way of England to India's confidence, and this, no doubt, is the normal rule long since adopted and practised by the Government at Calcutta. The main object of the Imperial assemblage at Delhi may be said to have been twofold. The Proclamation of her Majesty Queen Victoria as Empress of India aimed at linking together into political union all the scattered authorities, great and small, which cover the face of the Peninsula. To evoke something like national life and to stamp unity upon it seemed to be the process best adapted to quicken and nurture national sentiment. For some years to come the task will, no doubt, be found a comparatively unfruitful and certainly a difficult one. However, it is not therefore to be regarded as impossible. There is hope that British dominion conscientiously wielded will succeed in giving to India a history of her own, an ambition of her own, an emergence from the *débris* of former Governments into a oneness of life and purpose to which she can hardly be said as yet to have attained. She comprises many races of people. She has within her many different forms of government. She has many ways—and many of them expert ways—of finding her own ends; and it does not seem improbable that the gentle overruling of all by a mild but irresistible authority may, in course of time, generate and sustain patriotic feelings which will have regard to the Empire as such, and be less restricted to mere local interests and relations.

But there was a second object, no doubt, in the formality of the Queen's Proclamation at Delhi. She is the fountain of honour there, as well as at home, she visibly unstopped that fountain on the occasion, and gratified the social cravings of those who were around her Viceroy. There may have been some reason which we cannot discern for the institution of a second order of merit. At any rate, her Majesty was publicly commended to the Indian people as the sole distributor of political rewards. This will tend to work into the hands of the former purpose to which we have adverted. We hope it will be permitted to us to join our fellow-subjects in India in responding to the Proclamation "*God save the Empress!*"

THE COURT.

The Queen, accompanied by Princess Beatrice, drove to Taplow Court, on Saturday last, and visited Lady Caroline Lascelles and Mrs. Grenfell. On the previous day Prince and Princess Christian and the Hon. Thomas G. Grosvenor, C.B. (lately returned from China), dined with the Queen.

On Sunday her Majesty and Princess Beatrice attended Divine service in the private chapel of Windsor Castle. The Rev. James Fleming, B.D., Vicar of St. Michael's, Chester-square, officiated.

Princess Christian, Princes Christian Victor and Albert, and Princesses Victoria and Louise of Schleswig-Holstein visited her Majesty at the castle, on Monday, to congratulate the Queen on the New Year. The Duke of Connaught and Strathearn arrived at the castle, and her Majesty conferred the Grand Cross of the Star of India on his Royal Highness on the occasion of the proclamation in India, on New-Year's Day, of the Queen as Empress of India. Prince and Princess Christian, the Earl of Beaconsfield, Lord George Hamilton (Under-Secretary of State for India), and Major-General H. and the Hon. Mrs. Ponsonby dined with her Majesty. Her Majesty's annual distribution of food to 814 poor persons of the Windsor and Clewer parishes took place in the riding-school of the castle, under the direction of the Hon. and Very Rev. the Dean of Windsor, the clergy of Windsor and Clewer, and the district visitors for the relief of the poor. Under the supervision of Mr. C. Green, the clerk in the Royal kitchen, each recipient selected his or her portion, 3207 lb. of beef being carried away. At the same time, 1196½ cwt. of coals were given away, in parcels of from 3 cwt. to 1 cwt., and delivered at the houses of the poor. The members of the clothing club (established under her Majesty's patronage) received, subsequently, articles of clothing according to the amount of their contributions, as on former occasions, with the additions provided by the Queen.

A concert was given in St. George's Hall on Tuesday by the Windsor and Eton Amateur Madrigal Society, under the management of the Rev. T. M. Everett, hon. secretary. The Queen, accompanied by Princess Christian, Princess Beatrice, and the Duke of Connaught and Strathearn, entered St. George's Hall at six o'clock, where the ladies and gentlemen in waiting had already assembled, when the concert, conducted by Sir George J. Elvey, Mus. Doc., commenced. The programme consisted of madrigals and part-songs. The following received invitations—Madame Van de Weyer and Miss Eleanor Van de Weyer, Lady Cowell, Major-General H. Ponsonby and the Misses Ponsonby, the Hon. and Rev. the Dean of Windsor, and Mr. Arthur Wellesley. The servants of the household were also present.

The Duke of Connaught and Strathearn came to London on Wednesday, returning in the afternoon to the castle.

Her Majesty, with the members of the Royal family, has walked and driven out daily.

The Queen has presented a drinking-fountain to the parish of Esher.

Her Majesty, as president of St. George's Hospital, has appointed the Duke of Grafton, Lord Leonfield, and Mr. Charles Hawkins vice-presidents of this institution, to fill vacancies caused by death. The number of vice-presidents, exclusive of the Royal family, is limited to seven.

Lady Abercromby has succeeded the Marchioness Dowager of Ely as Lady in Waiting. Lady Ely remains at the castle. Lord Paget and Rear-Admiral Sir Edmund Commerell, K.C.B., have succeeded the Earl of Dunmore and Colonel the Hon. Augustus Liddell as Lord and Groom in Waiting; and Colonel Du Plat and Colonel the Hon. H. Byng have succeeded Major-

General H. Ponsonby and Colonel McNeill, V.C., C.B., as Equerries in Waiting to her Majesty.

Captain Hugh Campbell is appointed to the Royal yacht Victoria and Albert, vice Prince Leiningen, promoted.

THE PRINCE AND PRINCESS OF WALES.

The Prince and Princess of Wales, with Prince Edward of Saxe-Weimar, drove to the meet of the West Norfolk Hounds, at Harpley Mills, on Thursday week. Princess Louise of Lorne and the Marquis of Lorne arrived at Sandringham House on a visit to their Royal Highnesses. The Prince and Princess, with Princess Louise of Lorne and their other guests, attended Divine service, on Sunday, at Sandringham church.

On New-Year's Day a deputation of the clergy and tenantry of the Royal estate waited on the Prince and presented his Royal Highness with a silver casket (designed and manufactured by Mr. Emanuel, of Portsea), to commemorate his safe return from British India. The Prince, in acknowledgment, expressed his strong desire for a continuance of the good feeling which existed between himself and the clergy and tenantry on the Royal estate. The day was celebrated with its accustomed meet of the West Norfolk Hounds on the lawn in front of the Royal residence. There was a large "field," and the Prince and Princess entertained the leading members of the hunt. After drawing several woods on the Royal estate blank, a fine run of thirty minutes was begun at Castle Rising and finished at Hillington.

After several days' good shooting through the Royal preserves the party broke up at Sandringham on Tuesday, and the Prince left for Eastwell Park, the Duke of Edinburgh's seat in Kent, for a few days' shooting; the Princess, with her children, remaining at Sandringham. Lieutenant-Colonel Teesdale has succeeded Major Russell as Equerry in Waiting to the Prince.

The infant daughter of the Duke and Duchess of Edinburgh was christened, on New-Year's Day, at the San Antonio Palace, and the names given to her are Victoria Melita. The British Naval Chaplain officiated at the ceremony. A select party was afterwards invited to luncheon at the palace.

Prince and Princess Christian are about to visit Earl and Countess Dudley at Witley Court.

The Duke of Cambridge presented in person, on Saturday last, his annual Christmas gifts to the keepers and men employed on the Coombe estate. There were a large number of gentlemen present to meet his Royal Highness. The gifts consisted of blankets, flannel, and coats.

His Excellency the Minister of the United States and Mrs. Pierpont have gone to visit Sir Stafford and Lady Northcote at their seat, The Pynes, Devon.

The Duke and Duchess of Abercorn have left town for Lambton Castle on a visit to the Earl of Durham.

The Marchioness of Ormonde, who was safely delivered of a daughter, on Thursday week, at Grosvenor House, is, together with her infant, doing well.

The Duchess of Westminster arrived at Grosvenor House, the next day, from Eaton Hall, Chester.

The Countess of Lichfield has arrived at Lambton Castle.

The Earl of Malmesbury has arrived in town from Paris.

Viscount and Viscountess de Vesci, accompanied by the Viscountess Dowager de Vesci and the Hon. Miss Vesey, have left Carlton House-terrace for Abbey Leix, Queen's County.

The Right Hon. Hugh Childers, M.P., and Miss Louise Childers have returned to Princes-gardens from North America and the West Indies.

FASHIONABLE MARRIAGES.

The marriage of Viscount Maidstone, only son of the Earl of Winchelsea and Nottingham, with Louisa Augusta, youngest daughter of Sir George Jenkinson, Bart., M.P., was solemnised, on Thursday week, at St. Margaret's Church, Westminster.

The marriage of Mr. Gerald Cecil Stewart Paget, fourth son of Major-General Lord Alfred Paget, and Lucy Annie Emily Gardner, younger daughter of the late Mr. Richard Gardner, M.P., and Mrs. Gardner (née Comtesse de Mandelsloh), was solemnised at St. Peter's Church, Eaton-square, on Tuesday. The bridesmaids were the Hon. Evelyn Paget and Miss Violet Paget, sisters of the bridegroom; Miss Gardner, sister of the bride; the Hon. Lily Harbord, Miss Margaret Cadogan, and Lady Isabel Stewart. Captain Arthur Paget, Scots Fusilier Guards, brother of the bridegroom, was best man. The bride, who was given away by the Hon. Ashley Ponsonby, wore a dress of white satin trimmed with lace, with plissés of muslin. She wore also a pearl and diamond necklace, the gift of the bridegroom. The bridesmaids' dresses were of cream-coloured brocade; and each wore a heart-shaped pearl ring, surrounded by a knot of diamonds, the gift of the bridegroom. The ceremony was performed by the Hon. and Very Rev. Gerald Wellesley, Dean of Windsor, and the Rev. George Howard Wilkinson, Vicar of St. Peter's. After the breakfast the bride and bridegroom left for Dover, en route for Paris.

The *Morning Post* states that the Hereditary Grand Duke of Mecklenburg-Strelitz is about to marry Princess Elizabeth, eldest daughter of the Duke of Anhalt-Dessau. The Princess is in her twentieth and the Duke in his twenty-ninth year.

The marriage of Lieutenant-Colonel E. Chaplin, M.P., and Lady Gwendolen Talbot is fixed to take place at Ingestre on the 18th inst.

A marriage is arranged to take place early in next month between Sir John Murray, Bart., of Philiphaugh, and Miss Charlotte Burgess, third daughter of the Rev. Richard Burgess, Prebendary of St. Paul's, and Rector of Ickworth-cum-Horringer, Suffolk.

At the marriage of the Marchioness of Camden and Captain Philip Green, of the 5th Lancers, noted in our last, the Marchioness was given away by her father, the Duke of Marlborough. Among the wedding presents were—from Prince Leopold a pair of silver candlesticks, from the Bayham tenantry a gold bracelet set with pearls and diamond stars, from the Bayham workpeople a gilt inkstand and candlesticks, and other gifts from the servants at Bayham and members of the Bayham Clothing Club.

Captain Hughes, deputy-chairman of the Anglesey Quarter Sessions, was, on Tuesday, elected Chief Constable of Anglesey.

Mr. Bright was present, on Tuesday night, at a soirée in connection with the Rochdale Working Men's Club. In his speech he made a brief reference to the Eastern Question. He remarked that by the latest news affairs were in a very critical position, but he was glad to find that the policy of the Government was more in accordance with the policy indicated by public opinion than it was a few months ago. He did not blame the Government for having adopted that policy originally, although it was one of which he had always disapproved, and he had been much condemned for doing so at the time of the Crimean War; but he rejoiced that it was now abandoned for a course more consistent with the true interests of this country. The right hon. gentleman then reviewed the present position of the working classes, and attributed their prosperity to the abolition of the protective laws which crippled the industry of the country thirty years ago.

CHRISTMAS WITH POOR JACK AT THE SEAMEN'S HOSPITAL, GREENWICH.

Few, if any, of the charitable institutions of London are better deserving extended public support than the Seamen's Hospital at Greenwich. Established in 1821 as a floating hospital for the use of sick and suffering sailors of all nations, the Admiralty of the day evinced their sympathy with a commendable movement by granting to the society an old 50-gun ship, the *Grampus*. She was soon replaced by the old *Dreadnought*, 104-gun ship, a name which will ever occupy an important position in the annals of the society. This grand old ship eventually gave place to a still larger line-of-battle ship—the *Caledonia*, of 120 guns; but the old name had become so endeared to all who had any concern with the charity that the *Caledonia* was rechristened the *Dreadnought*. So long as the stately hospital-ship lay at its moorings between Deptford and Greenwich the claim of the society upon a maritime country was always tangibly before the public; but when, on sanitary and other important grounds, it was decided, in 1870, to discontinue the hospital afloat and to accept the offer of the Admiralty to occupy the old Admiralty of Greenwich Hospital, the society, though greatly increasing its capacity for good, was placed in one respect in a position of disadvantage. Out of sight, out of mind; no sooner had the removal been effected than it was found that there was an immediate falling off in the donations and bequests on which they had before relied for no inconsiderable proportion of their annual revenue. Though partly due to the absence of the floating hospital, which no one could pass up or down the river without seeing, another cause operated to produce this unfortunate falling off in funds when, from the increased scale of the society's operations, they were more than ever needed, viz., the erroneous belief that the cost of the hospital had been assumed by the Government. Beyond liberally giving the use of the building at a nominal rent, the Government gives no aid to the funds of the hospital. The cosmopolitan character of the charity may be best appreciated by a bare enumeration of the nationality of the in-patients now enjoying the benefits of the hospital:—English, 98; Scotch, 9; Irish, 4; Welsh, 5; Australians, 2; French, 2; Germans, 6; Austrians, 2; Swedes, 14; Norwegians, 17; Greeks, 6; East Indians, 2; West Indians, 7; Americans, 8; Danes, 6; Portuguese, 1; Dutch, 1; Italians, 2; Maltese, 2; Canadians, 2; Russian, 1; Finlanders, 6; Spaniards, 1: making a total of 204.

During the year which recently came to its close 2701 in-patients and 2650 out-patients were treated, with marked success; and when to this is added the fact that, since the opening of the hospital, in 1821, no less than 116,823 in-patients have been received in its wards, ample statistical proof is afforded of the deserving character of this institution.

An opportunity was afforded the patients during the late festive season of visibly testifying their feelings of gratitude in the form of reasonable decoration, and the thoroughness and profusion of the unprompted display showed how completely their hearts were in the work. Every corridor and ward was ablaze with the festive display: holly, evergreens, flags, vases, flowers, and festoons of paper, scrolls, ribbons, and bannerols bearing texts, mottoes, and verses—for amongst the grateful tars were some with the poetic, and others with artistic, instincts well developed—met the eye at every turn. In one of the dining-rooms the prominent feature was the emblazoned text, of letters patiently cut out from coloured paper, "He shall gather his people from all nations"—appropriate enough, considering that twenty-five different nationalities were represented at the Christmas festival. The feeling entertained of the officials found vent in special designs in honour of the surgeons and physicians, the matron and the secretary. These were laboriously written or formed of letters cut out from coloured paper on cardboard which is enframed in evergreen. One man, a Russian belonging to Riga, had expended much time and no mean amount of skill in illuminating texts and mottoes of his choice, surrounding them with painted floral decorations, the design and colouring of which seem to indicate a taste acquired in Japan. An Italian patient had converted the fireplace in his dormitory into a representation of the Nativity. The manger at Bethlehem was the central point of a grotto formed of holly and evergreens, pleasing enough, though hardly a faithful presentment of the somewhat arid characteristics of the Holy Land; the principal figures being cut out of potatoes, while paper sheep and shepherds were perched on impossible slopes of verdure. In the corridor leading to the chapel two well-chosen texts hung on each hand, one being "Let us go to the house of the Lord," and the other, "Walk ye in it." Loyal mottoes were numerous, showing that among the maritime portion of her Majesty's subjects attachment to the reigning family is strong. In one floral sentiment, occupying the post of honour in the dining-room of a ward, every one may fairly join, for it was "May the Seamen's Hospital Society flourish."

The Duke of Northumberland has given £200 to be expended in coals for distribution amongst the poor of Alnwick.

A statue of the late Mr. William Rathbone, the father of the present Liberal member for Liverpool, was unveiled, on Monday, in the Sefton Park. Mr. Rathbone took an active part in public affairs in the borough from about the year 1817 to his death, in 1868. The statue was unveiled by the senior magistrate of the borough, Mr. James Aikin, and was received on the part of the town by the Mayor, Mr. Alderman Walker.

The first meeting for the year of the Surrey magistrates took place at the Sessions House, Newington-causeway, on Tuesday—Mr. E. H. L. Penrhyn presiding. The report of the Governor from the County Gaol stated that the total number in custody up to Dec. 22 was 109 males and thirty-three females. The committee had directed the Governor to take the necessary steps for having similar arrangements for the execution of criminals as had recently been adopted at Newgate and other prisons. These alterations had been carried out at a cost of £100. The House of Correction was reported to be in a very satisfactory condition. There were 677 males and 149 females in custody. Six cases of insanity had been removed to Froberton House Asylum. The boys were all healthy at the reformatory school at Byfleet. To the farm school two boys had been sent; to the ship Corwall, two; to the Surrey Reformatory, one girl; and to Amos Court Reformatory, one girl. The finance committee reported that for the quarter ending November the receipts had been £52,596, and the expenditure £22,491. There had been an increase in the county expenditure of £4941 over the previous year, principally caused for services required for the lunatic asylums. The receipts, however, had increased so far as to make the actual increase over the previous year's expenditure not more than £1400. The committee considered that a county rate of three farthings in the pound, which would produce £20,581, would be sufficient. The report from the Brockwood Asylum showed that there were 419 male and 551 female patients. At the Wandsworth Asylum there was reported to be room for forty-six patients. The patients numbered 1037—viz., 421 males and 616 females. These reports were adopted.

LORD NEAVES.

The Hon. Lord Neaves, one of the Judges of the Court of Session in Scotland, died on the 23rd ult. at Charlotte-square, Edinburgh. He was born in 1800, the son of Charles Neaves, Esq., a Procurator of the Scottish Court of Admiralty, and was educated at the High School and at the University of Edinburgh. He was called to the Bar of Scotland in 1822, and was, successively, Advocate Depute, 1841; Sheriff of Orkney and Shetland, 1845; and Solicitor-General for Scotland, 1852. In 1854 he was appointed a Lord of Session, with the title of Lord Neaves, and in 1858 became a Judge of the Court of Justiciary. He was twice elected Lord Rector of St. Andrew's University—in 1872 and 1873. His Lordship married Miss Macdonald, daughter of Coll Macdonald, Esq., of Dalness. Lord Neaves held a prominent place amongst the literati of Edinburgh. Our portrait is from a photograph taken by Mr. John Horsburgh, of Edinburgh.

THE LATE LORD NEAVES.

THE FIRE AT BROOKLYN THEATRE.

What playgoer has not read and trembled at the details of the terrible fire and panic which threw New York into mourning on the night of Tuesday, Dec. 5 last? The melodrama of "The Two Orphans" had attracted about 900 persons to the Brooklyn Theatre on the night in question, and the fire caught the flies during the last act. Three hundred perished. The gallery contained 425 persons. These, in rushing down a narrow staircase, broke away the balustrade, and were precipitated in a heap to the cellar of the building, where most of them miserably perished of suffocation and fire. More than 200 bodies were found in one charred heap, hardly recognisable. This was in the lobby of the theatre, to which the gallery stairs descended. Two actors, Mr. Claude Burrows and Mr. H. S. Murdock, perished. In one

case an entire family was lost, leaving the house absolutely vacant. In another case, one man who is lost leaves a family of eight, quite helpless. A nurse, who had been permitted to take two small children with her to the theatre, was found with them tightly clasped in her arms, all three burned to a cinder. The scenes at the two Morgues were indescribably horrible and affecting. Thousands of persons stood in a line before the doors eager to enter to identify friends who, it was feared, had perished. Within, there were as many as the rooms would hold—men, women, and children—bending over the charred remains in the hope of identifying some one. Fully one half of the entire number burned were, however, beyond recognition, and in some cases persons disputed the possession of a body. The bodies of the unrecognised victims had a public funeral on Saturday, Dec. 9. One hundred and three bodies were buried in a large circular grave on Battle-hill, in the Greenwood Cemetery, and there were also thirty private funerals. One thousand troops, with a large civic procession, escorted the hearse bearing the coffins. Buildings were generally draped with mourning emblems, and business was entirely suspended. A relief committee in New York reported 177 cases of destitution among the relatives of the victims. Large subscriptions were made for their benefit. A monument will be erected in Greenwood Cemetery. The bodies of Murdock and Burrows, the actors, who were burnt in the theatre, were buried on Sunday, the 10th ult., the theatrical profession attending.

Further portions of the general digest of endowed charities have been issued, from which we learn that the total gross income of charitable endowments in Merionethshire is £1057, of which £558 is devoted to educational purposes; and the total in Denbighshire £6426, of which £2508 is applied to educational purposes.

BURNING OF THE BROOKLYN THEATRE: THE RUINS.

CHRISTMAS WITH POOR JACK AT THE SEAMEN'S HOSPITAL (LATE DREADNOUGHT), GREENWICH.

FOREIGN AND COLONIAL NEWS.

FRANCE.

(From our Correspondent in Paris.)

Thursday, Jan. 4.

The great annual fête of the Jour de l'An has come and gone. The weather, for a wonder, was extremely fine, and during the afternoon, when the Boulevards were crowded with promenaders, the occupants of the numerous *barraques*, which always make their appearance at this season of the year, did a remarkably brisk trade. In the evening the theatres and masked balls reaped golden gains, and the first day of the new year passed away amidst general festivity. There were the customary official receptions, both at Versailles and Paris; but their only noteworthy feature consisted in the fact that Marshal MacMahon received the visits of the Presidents of the Senate and the Chamber of Deputies without previously calling upon those functionaries. This change in the New Year ceremonial is one of the natural consequences of the Constitution voted last February.

The dispute between the Senate and the Chamber, apropos of their respective financial prerogatives, has terminated by a compromise. Certain credits, which had been negatived by the Chamber and adopted by the Senate, have now been accepted by the former assembly, notably the grant for the maintenance of the military chaplains and the allowance accorded to the Canons of St. Denis. Other credits, including several of a military character, were, however, again rejected by the Chamber; but the Senate did not push matters to extremes, and unanimously adopted the Budget with the alterations consented to by the Lower House. The debate on this subject in the Chamber was an interesting one, and M. Gambetta spoke forcibly in defence of the rights claimed by most of the Republican deputies. M. Jules Simon changed, however, the current of opinion by a remarkably subtle speech, and a compromise was eventually determined on. Of course, the Monarchical organs chronicle the victory of the Senate with no small delight. The Legislature has been prorogued until the 9th inst., and it is expected that the coming Parliamentary Session will open, in accordance with Constitutional usages, with a Message from Marshal MacMahon.

There was an extensive fire on Friday night at a large composite candle manufactory on the road to St. Denis. Owing to the large stock of stearine, palm oil, and other inflammable materials the fire spread rapidly, and soon lighted up the whole of the north of Paris. As on the occasion of the recent conflagration in the Rue Martel, there was a deficiency of water, and many of the fire-engines were from this cause unable to render any assistance. Indeed, the fire was only extinguished late on Saturday morning. Fortunately, no lives were lost, but the damage done is estimated at £100,000.

M. de Germiny, who, it is said, has fled to Belgium, has been sentenced to two months' imprisonment by default; his accomplice, who is in the hands of the police, being only condemned to a fortnight's confinement.

M. Philippe Ferrari, the son of the late Duc de Galliera, whose princely gifts to the city of Genoa will be well recollected, has sent £800 to M. Greppo, president of the committee organised to succour the families of the transported Communists. It is announced that M. Ferrari, who is a naturalised Frenchman, and refused any allowance from his father during the latter's lifetime—supporting himself by acting as tutor at the College Chapal—will come forward as a Radical candidate when a suitable Parliamentary vacancy occurs.

The Duchess of Galliera has offered the celebrated "Magdalen," by Canova, to the Museum of the Louvre.

The theatrical event of the week is the production, at the Théâtre Historique, of "Un Drame au Fond de la Mer," by M. Ferdinand Dugué, in which the spectator is made acquainted with many of the mysteries of the deep. In the principal tableau of the play, which represents the bottom of the ocean, gigantic crabs, a monster octopus, and other huge denizens of the deep glide onward through arcades of coral and amidst thick vegetation, while shoals of fish with glittering scales dart through the water like flights of birds in the air. The optical illusion is perfect, and the piece is a great success.

Lord Lyons presided, yesterday, at a fête given to the inmates of Miss Leigh's home for English children, 35, Boulevard Bineau. There was a superb Christmas-tree, heavily laden with choice bonbons, the gift of well-wishers to the institution. In addition, handsome dolls and toys were given to all the children, each being called up by name, and Lord Lyons smiled and nodded to them as they defiled before him with their prizes. After a prayer, speeches by the Rev. Mr. Forbes and Mr. Mansel, the singing of "God Save the Queen," three cheers for M. Galignani, the donor of the building, and three more for Lord Lyons, the children (waited on by ladies) had a sumptuous tea.

PORTUGAL.

The Portuguese Chambers were opened on Tuesday. His Majesty, in his speech from the throne, alluded to the visit of the Prince of Wales to Lisbon, which, he said, had a favourable influence upon the relations with England. The speech also mentioned various measures of reform in the Administration of the colonies which the Government will submit to the Legislature in the course of the Session. Queen Maria Pia was present with the King at the inaugural ceremony.

In aid of the proposed scientific expedition for the exploration of Central Africa the Government has granted £20,000.

ITALY.

The diplomatic body presented their felicitations to the King at the Quirinal on Sunday morning.

The Pope has received an address from the Roman nobility presenting their congratulations upon the new year. His Holiness, in the course of his reply, said:—"Formerly I willingly frequented aristocratic circles, but now I am obliged to remain in the Vatican. I cannot enter those circles for social intercourse, because I am prevented by circumstances." The Pope has also received Monsignor Stonor and Captain Teeling, secretary of the Catholic Union of Ireland, who, on behalf of the Irish Catholics, presented to his Holiness a magnificently illuminated copy of the Bull of the Immaculate Conception. It formed a thick folio volume, with a crimson velvet cover, ornamented with medallions and precious stones, and gold clasps set in diamonds. His Holiness graciously accepted the offering, and bestowed his special benediction on all who were in any way connected with the gift.

Accounts from Sicily are worse than ever. Telegrams which have reached Rome from Girgenti announce the capture by three brigands of a child, the son of a certain Antonio Reina, for whom they have demanded a ransom of 5000*l*. They had sent previously a requisition to Reina for a sum of money, and, this not having been paid, the child was captured in revenge. On Tuesday night the postal diligence between Palermo and Sciacca was assailed by brigands. The horses of the vehicle were shot, and a soldier of the mounted escort was killed. The solitary passenger inside was unhurt. The post-bag, containing 4000 *lire*, was carried off by the brigands.

GERMANY.

New-Year's Day being the seventieth anniversary of the beginning of the Emperor William's military career, his Majesty held a reception of all the commanding officers of the German Army. The weather being too doubtful for a parade, the celebration was confined to indoor ceremonies.

The Crown Prince, congratulating the Emperor, addressed him in a speech in which he described his Majesty as the type of all soldierly virtues, and the creator of the military organisation which had contributed once more firmly to consolidate Prussia for the purpose of raising Germany to her former greatness. Some years ago, on a similar occasion, his Majesty had received the congratulations of the army and people of Prussia, but to-day it was the army and the united forces of Germany that paid him honour as a victorious General and her restorer. A retrospective glance at the commencement of his military career recalled times of the most profound distress, but it also brought to their memory the restoration which had come at last, and deeds which in the history of the world will ever be inseparably united with the name of the Emperor William. The German army firmly united for the defence of the Fatherland was the guardian of freedom and unity, and since the introduction by the Emperor of the organisation which had enabled the Prussian army to fulfil its mission, it had become in the last terrible war the common property of the nation. As in those anxious days when a hostile attack was threatening, the German Princes and people had flocked round the King, willing and eager to fight to the death under his leadership, until the German Empire arose again in new splendour and the hereditary Imperial crown was presented to his Majesty on the field of battle, so, to-day, the German people, firmly united and prepared for defence, were inspired by ardent wishes for the preserver and protector of peace.

The Emperor delivered the following reply:—

If all the gentlemen whose presence here to-day affords me especial pleasure agree with the sentiments expressed by my son, I may esteem myself all the more happy, and I first tender you my thanks on that account. When I look back upon the day when I entered the army, I cannot but remember the state of affairs which then existed, and therefore from the moment when my father's hand led me into the army, and throughout my life up to the pleasurable occasion afforded me to-day, my first thought has been to give humble thanks to the Arbiter of our destinies. My position has led to the greater part of my life being devoted to the army. My gratitude is consequently due to all those who have accompanied me in my military career and seconded my efforts. I always remember them with pleasure. I have to thank the valour, devotion, and constancy of the army for the position which I now occupy. From Fehrbellin to the last gloriously-ended war, the deeds of the Brandenburg-Prussian army are enrolled imperishably in the annals of the world's history. Prussia has become what she is chiefly through the army. I beg those who represent the army in my presence to-day to convey to all those whom they represent my personal thanks, which they well merit, as I have been able to convince myself for a long time past of the sentiment and spirit by which the army is animated—a spirit which, in conjunction with that of the German troops, has been successful in creating a united Germany and a united army.

The eldest son of the Crown Prince of Germany has received from the King of Portugal, by the hands of the Portuguese Envoy at Berlin, the order of the Tower and Sword, which has been conferred on him.

Dr. Friedberg has been appointed Secretary of State to the Imperial Administration of Justice under the appellation of Actual Privy Councillor and with the title of Excellency.

The Imperial Privy Councillor, Dr. Michaelis, of the Imperial Chancellery, has been nominated director of that department.

AUSTRO-HUNGARY.

Urgent representations by the Hungarian as well as Austrian Minister of Finance were made at a Cabinet Council recently held in Vienna. The condition of both halves of the empire is such that further calls upon taxpayers are strongly objected to.

AMERICA.

The political dead-lock continues. In Louisiana both parties have a Legislature, each of which has named a Governor of the State. Some particulars of the doings in Louisiana are supplied by the *Times'* correspondent at Philadelphia in a telegram dated Jan. 2:—

Two Governments are established in Louisiana. Governor Kellogg has organised the State House with police, refusing to admit any members of the Legislature (excepting those holding Returning Board certificates). The Democrats marched to the State House, demanding admission. General Badger, commanding the police, refused to admit them, and the Democrats withdrew, amid cheers from the crowd, after reading a protest.

The Republican Legislature organised in the State House, and the Democratic in St. Patrick's Hall. Each Legislature claims to be a quorum. The Republicans elected Michael Hahn Speaker; the Democrats elected Louis Bush. The Republican Senate being without a quorum, waited till the Democratic Senate sent the usual committee to the Governor to receive his message, when the sergeant-at-arms captured one Democratic senator, and brought him into the Chamber. Thereupon the Republican Senate was organised, and immediately passed resolutions seating two men named Kelso and Baker, provided the Senators returned as elected from their districts did not present themselves.

Governor Kellogg sent his message to the Republican Legislature, which passed a resolution declaring that armed resistance existed in Louisiana, and calling upon the President for military interference. Quietness prevailed. Chairman Hewitt, of the Democratic committee, sent a telegram to New Orleans exhorting the Democrats to maintain a peaceful attitude. The Federal troops remained under arms in their barracks, communicating with the State House by a private passage; but they were not called out. The Republicans declare Packard as Governor, the Democrats announce Nicholas. The taxpayers generally declare they will pay taxes to the Democratic Government only.

Mr. Drew (Democrat) has been inaugurated in the office of Governor of Florida.

Mr. Tilden, in his speech on the occasion of installing the new Governor of New York, dwelt impressively upon the reforms effected in New York. He made no allusion to national political questions.

The public debt of the States was increased during December, 1876, by 3,585,000 *dols*. The coin in the treasury amounts to 96,517,000 *dols*, and the currency to 9,494,000 *dols*.

Another American bank robbery is reported in a despatch from Cincinnati published in the New York papers. On the 13th ult. the banking house of William M. Ream, at Somerset, Perry county, was entered by four masked men, and over 10,000 *dols* stolen. Mr. Ream was awakened about one a.m. by two masked men, who seized his wrists, while two others stood at the foot of the bed with revolvers. He was compelled to accompany three of the men to the vault, and to unlock the door, when the thieves took 10,200 *dols*, leaving gold and silver coin and bonds untouched. Mr. Ream was then gagged and bound to a chair; and the fourth robber, who had been watching Mrs. Ream, to prevent her giving an alarm, having been summoned, the whole party went away. Mr. Ream was not released until nearly daylight, his wife expecting to be killed if she gave the alarm. It is supposed that one of the robbers gained an entrance to the house early in the evening, and afterwards admitted his associates, as no doors were forced.

A disastrous railway accident has happened in Ohio, on the Lake Shore Railroad, at Ashtabula, Northern Ohio. About eight o'clock, on Friday evening, last week, a Pacific express train going west in a heavy snowstorm, with seven cars drawn by two locomotives, was behind time. The train, while on an iron bridge over the Ashtabula Creek, just before reaching the station, broke through, and the entire train fell into the creek, which is here six feet deep. The work of rescue of the hurt and recovery of the bodies had to be prosecuted in intense cold and deep snow. The bridge which fell was an iron truss bridge, eleven years old, 150 ft. span, 69 ft. above the creek.

The train was moving slowly preparatory to stopping at the station. The railway officials declare that the bridge was recently examined and was in sound condition. Of 19 persons in the train only seven escaped unhurt; fifty-two others were saved alive, more or less injured, and 120 were killed on the spot. About fifty bodies were taken from the wreck, burnt and mangled so horribly that only three were recognisable. The stories of the survivors give heartrending details. Except the leading locomotive, every car was wrecked. The ice covering the creek also gave way under the weight of the fallen train, the carriages caught fire, and the wreck burnt till midnight, and the storm raged till the next morning, preventing relief reaching the spot. A train sent from Cleveland, fifty-five miles west, with physicians and nurses, did not reach Ashtabula till next morning. The snow had been falling for two days, and an almost incessant fierce gale blew from Lake Erie. The intense cold of the night—one of the worst ever experienced—caused dreadful sufferings to the wounded and dying.

The British ship *Circassian*, which had gone ashore on the coast of Long Island, went to pieces on Friday night, last week. The captain, the third mate, ten of the crew, and sixteen wreckers were drowned.

CANADA.

The Ontario Legislative Assembly was opened on Wednesday.

A strike of all the engineers on the Grand Trunk Railway has taken place, and at Belleville the military has been called out to assist the civil power. But it is announced from Toronto that the strike is at an end.

CHINA.

The following private telegram, dated Peking, Dec. 16, has been received in London:—"Chung-Shih, Governor of Shung-ching, dead—his brother, Chung-How, succeeding him. Two new Ministers appointed to Yamèn—Li-Hung-Tsao, tutor to late Emperor, and Ching-Lien, personal friend of present Emperor's father. Both are members of Grand Secretariat. All members of Grand Secretariat are now members of Yamèn of Foreign Affairs. Tso-Chung-T'ang making considerable headway against Yakoub Beg."

Sir Thomas Wade, in reply to an address which was presented to him on the occasion of his leaving Shanghai, after having been a British Representative in China for thirty-four years, referred to the Chefoo agreement, and admitted that, in the recommendations submitted to the English Government, he had been influenced by other considerations than those of trade. He wished also to prevent the recurrence of outrages, for it was from such events as the Yunnan affair that they had to apprehend misunderstandings prejudicial to British interests in China, whether moral or material. He felt convinced that, when the barriers between China and foreign nations were removed, there would be nothing to hinder the Chinese from becoming in intelligence and strength the equals of the greatest Powers on earth.

The Melbourne Eleven played the English cricketers, last Saturday, and won.

The Belgian Ministry of War has ordered four cupola ships for the defence of the Scheldt.

It is stated in a special telegram from Egypt to the *Daily News* that the December receipts of the New Public Debt Office amount to £750,000 sterling.

The King of Denmark has consented to become the "protector" and the Crown Prince the "president" of the Geographical Society of Copenhagen.

The *Morning Post* states that Mr. F. P. Barlee, Colonial Secretary of Western Australia, has been appointed Lieutenant-Governor of British Honduras.

The death of the Russian Rear-Admiral Alexander von Moeller is announced. Admiral von Moeller took part in all the principal naval campaigns of Russia since 1823. He fought in the battle of Navarino and served at the blockade of the Dardanelles. From 1823 to 1826 he accompanied Admiral von Kotzebue in his cruise round the world.

The following emigrant-vessels have been dispatched from London by the Agent-General for New Zealand in December:—The Fernglan, with 254 emigrants for Hawkes Bay, and the Northampton, with 331 for Wellington and Westland. The ships Rangitiki for Canterbury, the Jessie Osborne for Auckland, the Waitara for Hawkes Bay, and the Oamaru for Otago, which were dispatched, during September last, with a total number of 1079 emigrants, are all reported as having arrived at their destinations, all well.

Some particulars are telegraphed by the correspondent of the *Times* at Delhi of the fatal accident to Captain Clayton, of the 9th Lancers, of which we heard last week. Various accounts are given of the cause of the accident. One attributes it to a collision with another player; another statement is that the pony, rearing, threw its rider, who, when picked up, was found to have sustained severe injury to the spine. He lingered in a state of unconsciousness for some hours, and died during the night. He was buried with military honours.

A native merchant, by name Narain Rungiah Chetty, living at Prodaher, in the Cuddapah district, has for more than two months past been feeding at his own expense upwards of 2000 people daily. He commenced by giving cooked rice, and the number of applicants for his bounty rose to 8000. After a fortnight he discontinued giving rice and substituted a paste made of ragib, known in Tamil as "kooloo." This, it is stated, he is continuing to supply at considerable cost. Narain Rungiah Chetty has no stored grain with him, but purchases what he requires in the Madras market at six measures the rupee, and it is carried by rail to Prodaher. The *Madras Athenaeum* expresses its opinion that a kind word or a brief friendly recognition from Government to Narain Rungiah Chetty would not be out of place.

A very exhaustive report on the railway system of New South Wales has been made to the Parliament of the colony by Mr. John Rae, the Commissioner of Railways there. It enters fully into the history of the construction and capacity of the various lines, and deals with the minutest incidents connected with their working in a way which at least serves to measure the pride of the colonists in their possessions. New South Wales has three railways—the Great Southern, the Great Western, and the Great Northern; and at the end of 1875 they had an aggregate length of 437 miles in operation, while a further 251 miles were in process of construction. The cost of constructing these 437 miles of railway, including rolling stock, machinery, and workshops, was £7,215,379, or £16,579 per mile. In 1875 the traffic yielded a net revenue on this capital of £4 7s. 11d. per cent, the gross receipts being £614,648, and the working expenses £296,174. This return does not quite meet the interest which the colony has to pay on its debt raised to build these railways, most of it having been contracted at 5 per cent; but, considering the incompleteness of everything in a newly-opened country, it is not unsatisfactory. If the extensions pay as well, the colonists will have no reason to be dissatisfied, and hitherto each extension appears to have justified itself by results.

THE EASTERN QUESTION.

A CABINET COUNCIL IN DOWNING-STREET.

We are enabled, through the privileges accorded to our Artists, to print this week faithful pictures of the rooms in which the preliminary and full Conferences have been held in Constantinople, and of the room in which the Cabinet Councils of our own Government take place in Downing-street.

Only second in importance to the momentous Conference of the Plenipotentiaries of the leading European Powers at the Capital of Turkey may the recent deliberations of Lord Beaconsfield and his colleagues be considered. The Cabinet Council, on New-Year's Day, was attended by all the Cabinet Ministers save the Marquis of Salisbury, whose despatches on the action of the Turkish Government in all probability formed the principal theme of discussion, if discussion there was. There is something characteristic of the practical and business-like nature of our Government in the plain and unpretentious appearance of the small house in Downing-street, which serves as the official residence of the First Lord of the Treasury and as the place where the Cabinet Councils are held. Many in the crowd that assembled in Downing-street on Monday last to watch the Ministers as they arrived must have been struck with the meanness of the exterior of the Prime Minister's residence, compared with the palatial edifices of the adjacent Foreign Office and Treasury. Yet the interior is apparently comfortable and roomy enough, to judge from the illustration, drawn by our Artist, who was courteously permitted to make a sketch of the sanctum sanctorum, and to whom the positions occupied at the table by the Cabinet when in Council were pointed out. So business-like are the appointments of this apartment, that a visitor is reminded of the board-room of an important company. As will be observed, it is of good dimensions and absolutely free from luxury of any kind. Every care is taken, of course, to secure secrecy. Thus there are double doors and double windows, the latter looking upon St. James's Park. A quiet tone pervades the room. The Brussels carpet is neither too new nor too old. The walls are painted a light tint of green; and the two pairs of pillars, with Corinthian capitals, at the further end are white. On the marble mantelpiece are a clock in a plain oak case, an almanack in a plain frame, and a date-recorder. Facing each seat at the green-baize-covered table is a large blotting-pad, with pens and ink, for every Minister; and at each end is a stationery-case, well supplied with note-paper and envelopes. As for the statesmen seated round the table, they look to the full as business-like as their surroundings. They will be readily recognised. On the right hand side sits the Earl of Beaconsfield, having to his left the Earl of Derby (Secretary of State for Foreign Affairs), and to his right Lord Cairns (the Lord Chancellor); next to whom is the Duke of Richmond (President of the Council). The chair at the end of the table nearest the spectator is filled by the Earl of Carnarvon (Colonial Secretary), who is faced by the Right Hon. R. A. Cross (Home Secretary); the Ministers on the left-hand side of the table, counting them from Lord Carnarvon's end, being respectively Lord John Manners (Postmaster-General), the Right Hon. Ward Hunt (First Lord of the Admiralty), Sir Stafford Northcote (Chancellor of the Exchequer), and the Right Hon. Gathorne Hardy (Secretary for War).

We may add that, so critical was the state of affairs in the East deemed to be during the last fortnight of 1876, that both the Prime Minister and Lord Derby remained in town over the Christmas Holidays; and that, in fact, ever since the prorogation of Parliament, the Earl of Beaconsfield and the Foreign Secretary have had scant relaxation.

THE PRELIMINARY CONFERENCE AT CONSTANTINOPLE.

Of the representatives of the Great Powers who assembled at the Russian Embassy, to arrive, if possible, at an amicable settlement of the Eastern Question, was unattended by any of the Turkish Ministers. It was confined to the Plenipotentiaries of the Foreign Powers concerned in the Treaty of Paris, and was held, early in December, in the room of the Russian Embassy, sketched by our Special Artist, Mr. Melton Prior. General Ignatieff, the Russian Ambassador, presided, as the senior Minister at Constantinople. The General is represented in our front Engraving seated to the left of the Marquis of Salisbury, her Majesty's special Delegate, who is standing. The portrait above General Ignatieff is a likeness of the Emperor of Russia. The remaining members of this preliminary Conference, taking them from the left of the Chairman, are respectively, the Comte de Chaudordy and the Comte de Bourgoing (the former French Ambassador at Madrid, the latter French Ambassador at Constantinople, joint representatives of the French Republic), Count Zichy (the Austrian Ambassador), Baron Werther (Ambassador of Germany), Baron Calice (the Austrian Agent at Bucharest), Count Corti (the Italian Minister), and Sir Henry Elliot (British Ambassador at Constantinople); behind whom is seated the Secretary of the Conference, M. de Morny.

At the close of the preliminary Conference the recommendations of the Plenipotentiaries are said to have been summed up in the proposal that the insurgent provinces should have "an administrative autonomy, the introduction of which was to be controlled by a European Commission, supported by a foreign armed force, endowed with the functions of an international police." A more particular account states that the union of Bosnia and Herzegovina, and the division of Bulgaria into two, were recommended, the three governments to be placed under the authority of Christian rulers, nominated by the Porte, but "subject to the advice and approval of the Powers." A Mixed International Commission was proposed for the purpose of watching over the execution of such reforms as were proposed in the Andrassy Note and the Berlin Memorandum. Another point in the recommendations related to the protection of this International Commission of Supervision by a corps of military gendarmerie, "recruited from volunteers of neutral States, placed under the orders of the provincial governors, wearing the Turkish cockade and badge, paid by Turkey or by her reformed provinces, and destined to complete and reinforce the corps of Zaptiehs."

An earlier despatch from the *Daily Telegraph's* Correspondent had it that "The definite result of the *pourparlers* has been that Russia, in conformity with the views expressed by no Ambassador so strongly as by Lord Salisbury, has abandoned all intention of proposing the occupation by the Emperor's troops of Bulgaria. But General Ignatieff has substituted for this proposition a scheme that includes a temporary occupation by a Belgian force. The project has been discussed by the Ambassadors of all the Powers, and has been approved by all of them—Lord Salisbury's adhesion being understood to be *ad referendum*. The British Ambassador has telegraphed to London for fresh instructions in connection with the new scheme; and Count Schouvaloff, I am informed, has been instructed to go to Brussels for the purpose of conferring with the King of the Belgians. As far as I can learn here, the present decision of the Porte is that the Belgian device is absolutely inadmissible, and the same view has been taken about a Swiss occupation—an idea that has also been contemplated."

THE PLENARY CONFERENCE AT CONSTANTINOPLE.

An illustration of the Full Conference, also from the sketches of Mr. Melton Prior, our Special Artist, forms the Extra Supplement issued with this week's Number. It was opened in the grand saloon of the Turkish Admiralty, on Saturday, Dec. 23 last. This palace of the Turkish Minister of Marine was shown in an Engraving printed on page 596 of the *Illustrated London News* for Dec. 23. It is a substantial, square building looking on the Golden Horn; and adjoining it is the naval arsenal. The luxury of the Conference saloon forms the greatest possible contrast to the homely chamber which is the scene of the Cabinet Councils in Downing-street. A mere glance at our two Engravings will make this manifest. Whilst the furniture in Downing-street is studiously plain, this magnificent apartment in the Turkish Admiralty is radiant with colour and embellished to a high degree, the painted ceiling glowing with all the colours of the rainbow; the brilliant chandeliers being of red and white, to match the dark red, and white lace, curtains that veil the windows; the hues of the luxurious Turkish carpet, and of the chairs with red-silk linings, contrasting richly with the cream-coloured walls; and many-hued vases resting on the white-marble mantelpiece, above which is a lofty mirror. Seated at the round table, it will be noted, are Safvet Pasha (Turkish Minister for Foreign Affairs) and Edhem Pasha (Turkish Ambassador at Berlin), as representatives of the Sublime Porte; Baron Werther, the Resident German Ambassador at Constantinople; Count Zichy, the Resident Ambassador of Austria; Baron Calice, the Austrian Agent at Bucharest; the Comte de Bourgoing, the Resident Ambassador of France; the Comte de Chaudordy, French Ambassador at Madrid; Sir Henry Elliot, Resident Ambassador of England; the Marquis of Salisbury, the Special Plenipotentiary from England; Count Corti, the Resident Minister of Italy; and General Ignatieff, the Resident Ambassador of Russia. At the small table near the windows are seated the three secretaries of the Conference, one of whom, M. de Morny, is also included in our Special Artist's sketch of the Preliminary Conference.

Coming to the deliberations of the Conference, we were informed by Baron Reuter's agent at Constantinople that, at the first meeting, on Dec. 23,

Safvet Pasha, in opening the proceedings, made reference to the liberal views of the Sublime Porte, which, he said, was ready to grant its subjects all privileges that were not contrary to the dignity and integrity of the empire. The Conference first proceeded to verify the full powers of the Plenipotentiaries. A short time after the opening of the Conference saloons of artillery were heard, and Safvet Pasha explained that the salutes announced the promulgation of the Constitution, which would effect a complete change in the state of Turkey. An analysis of the results of the labours of the preliminary conferences was afterwards presented to Safvet Pasha, who asked for time to enable him to examine the documents.

The description of the first sitting given by the correspondent of the *Daily News* further informed us that

Safvet Pasha read an address to the Powers most conciliatory in its nature, in which he proved conclusively that no atrocities were ever committed in Bulgaria—that Europe has been unfortunately deceived, imposed on by travellers, who had no other object in view but to malign the gentle and compassionate Turk. Hereupon Lord Salisbury interrupted, remarking that he reserved his opinion on these matters, and then begged the orator to proceed. Safvet Pasha proceeded, remarking that Serail was violating the armistice, and doing other very improper things. Whereupon Lord Salisbury again interrupted, and wished to know what this had to do with the question before them. Then the Turkish delegates, seeing no pre-arranged reasons for the measures of the project, asked if no reasons would be given for the strange revolution proposed; but they were informed that the Conference had none to give.

We were next assured by Reuter's agent that

The Marquis of Salisbury, in his audience of the Sultan, on Dec. 23, informed His Majesty that a complete understanding has been arrived at between the Powers during the preliminary Conferences. This agreement had resulted in a programme being drawn up which had already been semi-officially communicated to the Porte. His Lordship recommended the Sultan to accept the proposals of the Powers. His Majesty replied that he greatly regretted to be compelled to decline giving his adhesion, as his powers were limited by the Constitution. The Marquis then observed that in that case Turkey must not count upon either money or men from England, who would leave Turkey to her fate. The Sultan rejoined that it was useless to press him, since if he accepted the proposals he risked his crown and his life. Lord Salisbury asked his Majesty on what he would rely for his defence in the event of war. His Majesty replied that his army and his people would defend him, but he could not count upon them if he opposed the unanimous wishes of his people. At the close of the interview Lord Salisbury informed the Sultan that he would be compelled to withdraw the British fleet, in order to obviate any erroneous idea that the fleet supported Turkey in resisting the will of Europe.

On leaving the Sultan's presence Lord Salisbury telegraphed to Vice-Admiral Drummond to withdraw his fleet immediately from Turkish waters. The Admiral asked authority to winter at Salonica, but his Lordship not consenting, part of the fleet sailed for the Pireus, while the remainder proceeded to Malta.

The second meeting of the Conference took place on Thursday, Dec. 28. According to the *Times'* advices from Vienna, the prolongation of the armistice for two months was accepted almost without a discussion, and the Turkish Plenipotentiaries declared their readiness to enter into the discussion of the points drawn up by the Conference, but only on the condition that they might bring forward their counter-proposals, which should be placed on a par with the proposals of the Powers, and form, not less than the latter, a basis of discussion at the Conference. This condition was taken *ad referendum* by the Plenipotentiaries.

On Saturday last, Dec. 30, when the Conference met again, the Turks were not ready with their proposals. According to the despatches to the *Telegraph* from Pera,

A period of delay necessarily ensued, and the Comte de Chaudordy seized the occasion to read an explanation to the effect that the Porte seemed to have formed an incorrect conception of the European propositions. The idea of an occupation, he said, had been completely abandoned. The proposal to form a military escort, and which would consist of 2000 troops supplied by a neutral Power, could not possibly be called occupation; nor had the Powers suggested anything that would impugn the independence or honour of the Ottoman Empire. General Ignatieff followed, and urged the Porte to accept the propositions as they stood, adding that his instructions from headquarters justified him in saying that Russia had absolutely reached the limit of her concessions. Lord Salisbury and other Plenipotentiaries enforced the line taken by the Comte de Chaudordy. After waiting some time, as the counter-proposals did not arrive, the Conference adjourned until Monday.

The Ottoman counter-propositions were sent to all the delegates late last Saturday night, and the representative held on Sunday an informal meeting at the house of General Ignatieff, to consider what should be done under the circumstances. The *Telegraph* is informed from Pera that—

The Turks propose a system of administration differing but slightly from that drawn out by the Powers; but the Porte ignores the questions of a gendarmerie and an International Commission; it refuses absolutely an amnesty to the Bulgarian prisoners, also the appointment of Governors for five years, subject to the approval of the Powers, the financial arrangements proposed, and a number of other important provisions. The Porte suggests no guarantee. Some of the Delegates—Russia, Germany, Austria, and France—thereupon sharply declared that they could not act further with the Porte, and seemed inclined to cut short the discussion and pass to measures of a decided nature; but, after they had listened to the moderate counsels of the English delegates, calmer views prevailed. General Ignatieff, however, read to the representatives of the European Powers a telegram from Prince Gortschakoff directing him not to listen to any counter-propositions whatever.

The fourth sitting of the Plenary Conference was held last Monday, and of what occurred we have the following brief statement:—

Lord Salisbury expressed the views of the Plenipotentiaries upon the Turkish counter-proposals. During the discussion which ensued, the Turkish delegates enumerated the points upon which they did not consider they could negotiate. These were chiefly—the organisation of a local gendarmerie with foreign participation, the question of an International Commission, and the extension of Serbian territory. The Plenipotentiaries having asked if this declaration was tantamount to an absolute refusal, the Turkish delegates replied that they must refer to the Porte.

The following reassuring telegram, through Reuter's agency, reached us at the time of going to press with our first edition:—"Constantinople, Jan. 3, six p.m.—The apprehensions of a rupture with the Porte continue to diminish, and it is considered probable, from the more conciliatory feeling now prevalent, that the Porte, at to-morrow's sitting of the Conference, will not reject the proposals of the Powers. The Plenipotentiaries, on their side, appear disposed to make some slight concessions. Should these anticipations be realised, negotiations will be resumed, to-morrow, between the Plenipotentiaries and the Turkish delegates, and will regularly continue. It is believed that a pacific solution may yet be looked for."

PROCLAMATION OF THE NEW TURKISH CONSTITUTION.

We are likewise indebted to our Special Artist at Constantinople for the animated sketch of the ceremony of proclaiming the new Constitution devised by Midhat Pasha for curing the ills of Turkey. The Turkish Constitution proclaimed on Dec. 23 at Constantinople promises complete religious toleration, liberty of the press, and compulsory education. All subjects of the Ottoman Empire are declared equal before the law. A Legislature is to be formed, consisting of a Chamber of Deputies and a Senate. The "initiative in framing the laws is to rest with the Ministers and the deputies." The provincial Government is to be conducted "on the principle of decentralisation."

The ceremony of promulgation, pictured by our Special Artist, took place in front of the Sublime Porte, on Saturday, Dec. 23, the first day of the Conference. The *Globe's* "own correspondent," who had just arrived at Constantinople, gives the following account of the ceremony:—"The Sublime Porte is situated on an eminence of Stamboul, about half a mile from the bridge across the Golden Horn, and commands a splendid view of the Golden Horn and the Bosphorus, Pera, and Scutari. A narrow street leads up to it, over ankle-deep in mud, and just now soaked with the rain which had been falling at intervals since daybreak. The square in front of the Sublime Porte was already tolerably filled when I reached it. Presently the sound of a military band was heard, and soldiers were formed up by companies to keep the ground. Their work was hardly done when a flourish of trumpets announced, in a deluge of rain, the approach of the Grand Vizier's representative. Accompanied by a brilliant staff, he walked in solemn procession from one of the main gates of the building to the huge crimson-covered chair which had been set up for him in front of the centre façade. With difficulty he climbed up into it, not by steps of pearl, and agate, and diamonds, such as we read of in the 'Arabian Nights,' but—believe it, ye sons of the Prophet—by an ordinary commonplace ladder, and with a green silk umbrella held over him by his secretary, commenced reading the Constitution. A solemn silence prevailed during the time he was speaking, broken only once when the soldiers allowed the mob to surge through their ranks. In clear and sonorous tone, in a voice distinctly heard at a considerable distance, he made known to the people the will of their Sultan. The reading of the document occupied some twenty minutes; at its finish he descended from the chair of state amid the clash of music and the fervid ejaculations of the crowd, and, in as orderly a procession as the drenching rain would admit, moved off again with his suite to the interior of the building."

It is mentioned as a curious fact that Midhat Pasha has been the first to violate his own Constitution by revoking the law suspending the interest on the national debt. A correspondent adds, "There is no money to pay the interest, it is true, but there is no law against paying now, which is a concession the bondholders will appreciate."

The Stalybridge Town Council, on Wednesday evening, resolved to apply to the Education Department for the dissolution of the school board for that town.

The Duke of Marlborough will assume the government of Ireland on the 10th inst., and enter the city with a military and civic ceremonial.

The armour-plated ship *Alexandra*, which was commissioned at Chatham Dockyard, on Monday, by Captain Fitzroy, as the new flagship of the Mediterranean Squadron, will be ready for sea about the middle of February.

About a month ago a telegram was received by the Port Admiral at Queenstown, purporting to come from the Admiralty, directing the gun-boat *Goshawk* immediately to proceed to Gibraltar. After she had sailed it was discovered that the order was a forgery, and every effort was made to intercept her. Having put in at Vigo, through stress of weather, the Captain there found a telegram instructing him to return, and telling him that he had been made the victim of a hoax.

The *Era Almanack* for the present year is, perhaps, the best number of the series. Mr. Edward Ledger improves in the conduct of his interesting annual. It contains loads of advertisements, some of them intensely curious, and many instructive articles by Mr. E. L. Blanchard and others—such as his "History of the Adelphi and other Theatres," many theatrical scraps, and anecdotes without end. Its statistical tables are, besides, really valuable. The present number consists of more than a hundred closely-printed pages on many subjects profitable to be understood by professors of the dramatic art.

A town meeting was held at Birmingham, on Wednesday, for the purpose of deciding upon the most fitting tribute to the memory of the late George Dawson. The Mayor presided, and there was an influential attendance. On the motion of Alderman Chamberlain, M.P., seconded by Mr. Thomas Lloyd, it was resolved that it was desirable to recognise and perpetuate the memory of the great and long-continued services rendered, not only to the borough but to the community at large, by the public life and labours of the deceased gentleman. On the motion of Mr. R. W. Dale, it was resolved that the memorial should take the form of a statue. A committee was formed for carrying out the object.

The Queen has conferred the Albert medal of the second class on Mr. Ernest William Owens, second mate of the ship *Compadre*, of Liverpool, for his gallant conduct in jumping overboard and saving the life of Duncan M'Kay, an apprentice, who had been washed overboard during a severe gale off Cape Horn. The occurrence took place on the morning of Aug. 23, 1875, and was attended with considerable danger, as M'Kay, who had been injured, was in a fainting condition, and Mr. Owens wore oilskins and seaboots besides heavy clothing, which was saturated with water. Mr. Owens, whose hands were benumbed with cold, supported M'Kay until a rope was thrown to them, which he with difficulty wound round M'Kay's body and his own wrist, and both were, after several efforts, taken on board the vessel. Charles Pratt, aged twelve years, the son of Mr. R. C. Pratt, J.P., of Kinsale, seeing a little boy nine years of age drowning near the Long Quay, jumped off the quay, a height of ten feet, caught the little fellow in the water, and landed him safely at a slip close by.

THE EASTERN QUESTION: A CABINET

COUNCIL IN DOWNING-STREET.

THE CHURCH.

PREFERRMENTS AND APPOINTMENTS.

Andrew, William, Vicar of Upton, to be Rector of Paston.
Baker, James, Rector of Lanteglos.
Brodrick, Alan; Rector of Broughton-Gifford, Salisbury.
Burnaby, Robert William; Vicar of St. Barnabas, St. Marylebone.
Davies, John; Perpetual Curate of Llangoven with Penyclawdd.
Hobbs, W. H.; Curate; Vicar of Thimington.
Hopkins, H. G.; Vicar of St. Philip and James, Clifton, York.
Keogh, G. P.; Vicar of St. Paul's, Stratford; Rector of Huzgate, Yorkshire.
Machie, J.; Chaplain Bristol Royal Infirmary; Rector of Fylton, Gloucestersh.
Poole, H. J.; Rector of Stowell.
Rendell, Ralph Thomas; Vicar of Bishop's Tachbrook.
Smith, Albert; Vicar; Rural Dean of Wendover.
Smith, A. F.; Curate of Littlebourne; Vicar of Dethersden.
Steele, William; Vicar of St. Mary's, Knutton; Vicar of Wolstanton.
Wycliff, Charles; Perpetual Curate of St. Luke's, Dudley.—*Guardian*.

The Archbishop of Canterbury proposes to leave Addington Park for three weeks. Letters for his Grace to be addressed to the chaplain, Lambeth Palace. All communications respecting the diocese of Truro to be addressed to the Vicar-General's Office, Doctors'-commons.

The *Guardian* has been informed that the Government have determined to bring in a bill for the foundation of four new bishoprics, and that the Archbishops of Canterbury and York have been requested to name which, in their opinion, are the most pressing cases.

Christ Church, West Bromwich, was reopened, on Thursday week, after repairs estimated at about £3000, inclusive of a new organ, valued at £500. At the luncheon the Bishop of Lichfield urged the necessity not only of a division of his extensive diocese, but also of the archdeaconry of Stafford.

St. Mary's, Huntingdon, was reopened, on Tuesday week, by the Bishop of Ely, after a restoration which included a splendid stained-glass window in the chancel, given by Archdeacon Bathurst; a new oak roof to the chancel; and a stone pulpit by the lay rector, the Earl of Sandwich. The church has been entirely rescaled, and a new peal of eight bells has been provided by Mr. E. M. Maile, the parish warden.

Lord Ebury has written to contradict a statement which has been published that he intended to join the religious body known as the Free Church of England. The statement seems to have been founded on a letter which Lord Ebury wrote to the Bishop of Rochester refusing to subscribe towards the establishment of the see of St. Albans and the restoration of the abbey on account of the prevalence of Ritualism in the Church. In the letter Lord Ebury had avowed that he had "seen with interest" the rise of the religious body in question.

Two memorial windows have been lately fixed in the old Norman church of St. Mary Hurley, Berks—one of them being in memory of the late Vicar, the Rev. F. J. Wethered, who died in 1867. The glass is painted by Messrs. Clayton and Bell. Another stained-glass window of unusual beauty has been erected in All Saints' Church, Upper Norwood, to the memory of Mr. and Mrs. John Dixon. It is a three-light window, representing "The Journey of the Kings," "The Adoration," and "The Flight into Egypt," and is from the studio of Messrs. Mayer and Co.

The chancel of Wickhambreux church, Kent, was reopened, on St. Thomas's Day, after extensive restoration. The walls of the chancel and nave have also been tiled to a height of six feet from the ground, and the nave roof and walls extensively coloured in the style of some old work found. An organ-chamber has been added, and new fittings to the chancel. The works have been carried out under Mr. Ralph Nevill, F.S.A., of South-square, Gray's-inn, and a large amount of the money raised has been contributed by the Misses Robertson out of the profits of concerts given by them for the purpose.

The following testimonials to clergymen are reported in the *Guardian*:—The Rev. J. W. Corbet, B.A., on his leaving the sole charge of Newham-with-Mapedurwell, Hants—an elegant inkstand, with glass shade and stand; also a gold pen, with silver telescopic pen and pencil-holder, with an appropriate address. The Rev. Dr. Finch (many years curate in charge of St. James's, Garlick-Hithe)—a silver inkstand, by the churchwardens and parishioners of St. Leonard's, Shoreditch, as a testimony of their esteem and affection, and as a mark of their appreciation of his efficient and careful discharge of his duties during his connection with that parish.

St. James's Church, Hatcham, was crowded by an immense congregation on Sunday morning, when the sermon was preached by the Rev. Arthur Tooth, the inhibited Vicar. During a portion of the service much excitement was caused by a small body of persons shouting "Go to Rome!" "No Popery!" and other cries. Some scuffles took place. It has been ascertained that the Bishop of Rochester will not take any action with reference to the Rev. Arthur Tooth's contumacious defiance of the law, and that he leaves the parishioners to take their own course in the matter. Application will therefore be made by the complainants in the case to the Court of Arches at an early date to enforce obedience to its judgment.

THE UNIVERSITIES AND PUBLIC SCHOOLS.

CAMBRIDGE.

The mathematical tripos examination began on Monday morning. There are 110 candidates, who are distributed among the various colleges thus:—St. Peter's, 4; Pembroke, 6; Clare, 3; Caius, 3; Trinity Hall, 4; Corpus, 6; King's, 2; Queen's, 6; St. Catherine's, 4; Jesus, 5; Christ's, 9; St. John's, 22; Trinity, 22; Emmanuel, 7; Sidney, 4; Downing, 3; non-collegiate, 1. The first part of the examination will extend over four days this week. The candidates deserving honours will go in again for "place" on the 15th inst.

Mr. C. F. Findley, B.A., bracketed tenth wrangler, 1876, has been elected to a fellowship at Trinity Hall.

The Vice-Chancellor gives notice that the adjudicators of the Hulsean Prize will give a premium of about £75 this year for the best dissertation on "Montanism: its History and Teaching." Candidates, who must be under the standing of M.A., are to send their essay by October.

The late pupils of Canon Farrar at Marlborough have raised the sum of £250 for a testimonial for presentation to their distinguished master. In accordance with his wish, over £100 has been invested to found "the Farrar prize," for the best examination in English language and literature. A full-sized portrait of the late Rev. Dr. Wilkinson, the first master of the college, has been presented to the college. It was painted by Sir William Boxall, and will be placed in the hall. Gilbert Elliot, a pupil at the College School, Stratford-on-Avon, has been elected to a scholarship at Marlborough School, gaining eighth place out of sixty-eight candidates.

The Rev. Edward Harris, one of the higher assistant masters in Clifton College, has been chosen Head Master of the Exeter Grammar School.

Salisbury School has recently been established, under the wardenship of the Rev. W. Baker, M.A. The school is intended "to supply, at moderate terms, a thoroughly sound

education, in accordance with the requirements of the present day." The Higher School consists of a Classical and a Modern side, and every pupil above the age of fourteen is required to decide under which he shall be classed. The Head Master is the Rev. W. H. A. Emra. The religious teaching is in accordance with the Church of England.

A scheme by which several charities at Sevenoaks, Kent, are consolidated as the Sevenoaks Grammar School has been proposed. Provision is also made for an elementary school.

ADDRESS TO CHILDREN BY DEAN STANLEY.

As usual on Innocents' Day, a special service for children was held in Westminster Abbey, and was very numerously attended. Dean Stanley gave an address to the children and to those by whom they were accompanied, selecting as the foundation of his remarks three texts—the second verse of the 8th Psalm, "Out of the mouth of babes and sucklings hast thou ordained strength;" the fourth verse of the 127th Psalm, "As arrows are in the hand of a mighty man, so are children of the youth;" and the first verse of the 15th Psalm, "Lord, who shall abide in Thy Tabernacle? who shall dwell in Thy holy hill?"

The Very Rev. Dean said.—When, year by year, we see this congregation of children with their parents assembled, it is, or ought to be, a joy and comfort to those who feel the burden of life, the darkening shades of sorrow, and the weight of care. Why is this? Why is the sight of children a consolation? Parents, perhaps, will understand best what I have to say at first, although I shall also have to say something which children will understand for themselves. I have taken these verses from the three psalms which we have sung, to express what I mean.

The first is from the 8th Psalm. That is a psalm which almost certainly was written by David. He wishes to unravel his thoughts, and to have a clear idea of God; and he finds it in two things—in the moon and the stars, which we see in the sky on a cloudless night, and which cause him to think of the order with which He has arranged this great universe, and in the bright faces and the blameless talk of little children. Little children give him an idea of what man, who was born in the image of God, was meant to be. No doubt there are bad children—naughty children; and, even in good children, there is something which may become very bad. Still, in children there is an innocence, a lightness of heart, an ignorance of evil, a joyousness, and a simplicity, which ought to be refreshing to everyone. It was this which made our Saviour so fond of them—taking them up in His arms, and saying, "Of such is the kingdom of heaven;" and it is this which is well expressed by an English poet, who says, as he looks back regretfully to his childhood:—

"Happy those early days, when I
Shined in my angel-infancy;
Before I taught my tongue to wound
My conscience with a sinful sound;
Or had the black art to dispense
A several sin to every sense,
But felt through all this fleshly dress
Bright shoots of everlastingness."

And this it is, also, which gives such a soothing thought to any who have lost their dearest in infancy or in early childhood. Their lives were complete. They had shown us the glory of God in their dear little ways. They have gone to be with Him. We do not count by months or years where they have gone to dwell.

May I read to you the words of a great scholar and philosopher after the death of a sweet daughter? Parents may take the words to themselves, and children may know from them what a comfort they may be for their parents if they have been good and gentle and diligent. "As soon as her last breath was gone I was able to thank God that He had taken my child into His arms, where she is safe for ever from all the troubles and the sorrows of life. The first chapter of her existence has closed. Who knows what troubles might have been in store for her; but she was found worthy to enter the kingdom of Heaven as a little child. Here we have toil for many years, and are troubled with many questionings, but what is the end of it all? We must learn to become simple again like little children. That is all we have a right to be; for this life was meant to be the childhood of our souls, and the more we try to be wiser we are meant to be the better for us. Let us use the powers of our minds with the greatest freedom and love of truth; but let us never forget that we are, as Newton said, 'Like children playing on the seashore while the great ocean of truth lies undiscovered before us.'"

But we must not, in thinking of children, think only of them in the past. We must think of their future; and here let us look at the other Psalm, the 127th, a Psalm which some of the Jewish teachers long ago thought might have been written by the great King Solomon. At any rate, it well expresses what a man of vast experience of human life might well have said. It tells us that we must console ourselves in the sorrows and troubles of the present time by thinking of what the children who stand around us may be in the time which is coming. They are like the arrows which a mighty archer can shoot far away into the distance and the darkness, and which strike a target that we, perhaps, can hardly see, but which, if these little arrows are winged with good thoughts and filled with good resolves, and nurtured in a good training, they will surely reach.

We may sometimes, as we look towards our immediate future, think regretfully, perhaps, of how few there are of any great characters or glorious gifts to enlighten the close of this nineteenth century, as we and our fathers were enlightened by the great characters and the glorious gifts of those who adorned its beginning. But our consolation may be that those who are children of this generation shall grow up to fill this void, and to comfort those who are still unborn. Amongst the children who are now present here, there must be many who will live to the twentieth century. Let them remember, when the first year of the next century shall dawn upon them, that they were called upon in this abbey to take their part in rendering their country a great, a happy, and a Christian nation. Where we have failed, let them succeed; where we have succeeded, let them improve; where we have lost, let them recover. Happy is that country which has its quiver full of good, strong, active, honest, Christian children. She shall not be afraid when she speaks with her enemies in the gate. There is a long, long day before most of you. Make the very most of it. Let us feel assured that when we die and pass away we have left our country, our religion, and our honour safe in your hands.

And this brings me to the third lesson which we may take from these Psalms. The 15th Psalm is also most certainly written by David. It was what he wrote, we may suppose, when he had conquered Jerusalem, and asked who was worthy to live in the holy city. What are the characters that God loves and wishes to be with Him? There is no difficulty in understanding what David says in the verses which follow the first; and, when people talk of the difficulty of teaching religion to children, let them remember these different verses of the 15th Psalm. They will find how very easily they can be learned, and how very easily they can be applied. I will try to apply them now; and so I turn to you, my children, and, having told you how much we and your country expect from you, I will tell you who it is that shall be thought worthy of the house of God and His holy hill, and I will ask those who are parents and friends, or who have any influence over any of these children, to try to make a good atmosphere round about them, so that these conditions may become possible and easy for them.

What, then, is it that we may recommend to all children if they would wish to please their parents, to please God, and to go to Heaven? Love honest work. Love to get knowledge. Never be ashamed of saying your prayers regularly. It will help you to be good all through the day. Always keep your promises. Do not pick up foolish and dirty stories. Never, never tell a lie. Never strike, or hurt, or be rude to a woman or a girl, or to anyone weaker or younger than yourselves. Be ready even to risk your own lives to save a friend, or a companion, or a brother, or a sister. Be ever kind to poor dumb animals. Never put them to pain. They are God's creatures as well as you; and if you hurt them you will become brutal and base yourselves.

Remember always to be gentle and attentive to older people. Listen, and do not interrupt when they are talking. If you have an old father or grandfather, or a sick uncle or aunt, remember not to disturb them by loud talking or rough speaking. Be careful and tender to them. You cannot think what good it does them. And if it should happen that any amongst you have poor fathers or poor mothers who have to get up early in order to go about their business, and to earn their bread and your bread, remember what a pleasure it will be to them to find that their little boy or their little girl has been out of bed before them on a cold winter morning, and lighted a bright, blazing fire, so as to give them a warm cup of tea. Think what pleasure it will be to them, if they are sick, or if they are deaf, or if they are blind, to find a little boy or a little girl to speak to them, to read to them, and to lead them about. But there is not only the comfort which is experienced in being thus helped; there is the still greater comfort of knowing that they have a good little son or a good little daughter who is anxious to assist them, and who, they feel sure, will be a joy, and not a trouble, to them by day and by night. No Christmas present can be so welcome to any father and mother as the belief that their children are growing up truthful, manly, courageous, courteous, unselfish, and religious. And do not think that any of these things are too much for any of you.

I know that many of you may have great temptations. Perhaps you may have homes where it is difficult to be tidy and clean. Perhaps, as you go to school along the streets, there may be wicked people who endeavour to lead you astray, and who try to make you swear. Yet I am sure that, if you do your best, you will find such delight in so doing your duty that you will go on in what is good. Let the good frighten the bad; let the light drive away the darkness; let the whole world know that there are little English boys and girls who are determined to do their duty, whatever befalls them.

Some of you may remember that, last year, I spoke with the gallant boys who behaved so well on board the *Goliath* ship when it was on fire. Well,

these same boys have just begun their training over again. It was only on Tuesday last that they got on board their new ship, the *Exmouth*; and they are working for their country once more. God bless and prosper them, and may they still be examples to all of us. It was only the other day also that I heard a brave, modest little boy—Hammond Parker was his name—who was only just fourteen years of age, but who had saved, at different times, the lives of no fewer than four other boys by plunging into the rough sea after them on the coast of Norfolk.

Now, that shows what you may all do—not, perhaps, by plunging into the stormy sea, but, at any rate, by saving little brothers or little sisters from going wrong. You can do far more for them than, perhaps, any one else, because you are always with them. Stand by them; protect them; stand by each other; and then the foolish, wicked, and cruel people who want to mislead you will very soon run away. Bad people are always afraid of good people, even though the good are much fewer—even, indeed, though the good may be only a little child. I knew once a very famous man, who lived to be eighty-eight years old, and who was the delight of every one about him. He always stood up for what was right. His eye was like the eagle's when it flashed fire against what was wrong; and how early, do you think, he began to do this? I have an old grammar which belonged to him, all tattered and torn, which he had when he was a little boy at school; and what do I find written in his own hand on the first page of it? I find these words, "Still in thy right hand carry gentle peace, to silence vicious tongues. Be just and fear not." That was his rule all through life, and he was loved and honoured down to the day when he was borne to his grave. Be just, be good, and fear not. Let that be your rule; and God and Jesus Christ will be with you now and always.

METROPOLITAN NEWS.

The *Morning Advertiser* publishes a list of subscriptions to the Licensed Victuallers' Asylum. The amount is £3225.

The Lord Mayor presided, yesterday week, at the annual dinner of the Commercial Travellers' Benevolent Institution, when £865 was subscribed towards its funds.

The mortgagees of the Alexandra Palace announce that the palace and park will be sold by auction, with the sanction of the Chancery Division of the High Court of Justice, on Feb. 8.

The old railway station at Greenwich, which has been in use during thirty-nine years, has been abandoned, a far more commodious station having been opened.

It was resolved at a Grand Lodge of Freemasons, on Wednesday night, to hand over to the National Life-Boat Institution £1000 to establish and endow two life-boats as a permanent memorial of the Prince of Wales's visit to India.

When Vice-Chancellor Hall ordered Dr. Kenealy to give up possession of his chambers in Gray's Inn to the Benchers, he allowed him till Monday last to appeal against his decision. There has, however, been no appeal, Dr. Kenealy having given up possession some weeks ago.

On Tuesday evening the annual gathering in support of the Pastors' College in connection with the Metropolitan Tabernacle took place at Newington. The tea was followed by an address from Mr. Spurgeon, entitled "Strange Scenes." The number of students in the college is now 353.

On Wednesday evening the theatre of the Society of Arts was crowded, chiefly with young people, who went to hear Mr. R. A. Proctor give a popular explanation of the size, positions, motions, and structure of the Sun and his Family. A second lecture, for the 10th inst., on Comets, Meteors, and the Stars, was announced, amid much cheering.

The Lady Mayoress has issued invitations to a ball at the Mansion House, on Wednesday, the 10th inst., in celebration of the coming of age of her sister, Miss Florence White, and she proposes to give the usual juvenile ball on Tuesday, the 20th inst. The Lord Mayor will entertain the officers of his household at dinner, on Plough Monday, Jan. 8, and the members of the Court of Aldermen, on Tuesday, the 16th inst.

The weekly return of metropolitan pauperism shows that the total number of paupers last week (the fourth week of December, 1876) was 83,531, of whom 38,122 were in workhouses and 45,409 received outdoor relief. Compared with the corresponding weeks in 1875, 1874, and 1873, these figures show a decrease of 4476, 13,825 and 23,348 respectively. The number of vagrants relieved on the last day of the week was 706, of whom 558 were men, 121 women, and 27 children.

The Loan Collection of Scientific Apparatus was closed last Saturday. A circular has been issued by the department to the exhibitors to the effect that this step has been taken owing to the funds at its disposal having been exhausted. It is added that arrangements are being made for the safe custody of all objects which may be left on loan to the museum, pending the decision by her Majesty's Government on the offer made by the Royal Commissioners of the exhibition building for the establishment of a permanent science museum.

Two or three bank dividends are announced. The London and Westminster Bank will pay a dividend of 7 per cent for the past half-year, which, the previous dividend, makes 14 per cent 1876. The rest, or surplus fund, will then stand at £770,465. The dividend for the last half of 1875 was 5 per cent.—The Union Bank of London will pay a dividend at the rate of 12½ per cent per annum, carrying forward a balance of £10,600. The dividend in the corresponding period of 1875 was 15 per cent.—The National Discount Company (Limited) will pay a dividend of 10 per cent per annum, free of income tax, and carry £10,000 to the reserve fund out of the profits of the past half year.—The directors of the Alliance Bank (Limited) recommend a dividend of six per cent per annum, with an addition of £5000 to the reserve fund, including £3160 realised from the assets of the old bank. These two latter dividends are at the same rate as a year ago.

Last Tuesday and Wednesday, the rank and file, so to speak, of the City of London Police, with their wives and other eligible members of their families, were entertained at a ball in what is called the Great Hall, Primrose-street, Bishopsgate. The necessary arrangements were made by a special committee; Mr. Alfred de Rothschild, Mr. Edwin Freshfield (one of the eminent firm of solicitors to the Bank of England), and the Rev. W. Rogers, M.A., Rector of Bishopsgate, acting, as usual, in the capacity of treasurers. On both occasions there was a concert in the Great Hall, lasting, with intervals, until eight o'clock, when dancing began to the music of a quadrille band, led by Mr. Rattray. The ball and general entertainments were honoured on Wednesday by the presence of the Lord Mayor, the Lady Mayoress, the Under-Secretary of State for the Home Department, and other visitors of distinction. In the course of a brief congratulatory address, Mr. Liddell complimented the body on their excellent discipline and efficient services.

LITERARY AND SCIENTIFIC INSTITUTIONS.

Last Saturday evening a New-Year's soirée was held at the Artisans' Institute, in Castle-street, Upper St. Martin's-lane, W.C., when there was a large gathering of the members and their friends. The object of the institute—the trustees of which are Mr. S. Morley, M.P., Sir Harcourt Johnstone, M.P., and Mr. Hodgson Pratt—is to assist skilled workmen and apprentices to pursue the study of history, political economy, moral philosophy, literature, science, and art—including mathematics, physiology, chemistry, drawing, &c.—and foreign languages; and, at the same time, to enable them to complete their technical education, with a special view to the manipulative department of their various trades, thus promoting general

culture, moral improvement, and technical skill. The means employed to attain these ends are lectures, classes, discussions, reading and conversation meetings, a library, workshops, exhibitions of skill and industry, and the fine arts, with conversaziones. The technical classes are under the management of a committee, consisting of skilled workmen and the Principal, with any professional gentlemen competent to promote their usefulness.

The winter term of the Birkbeck Literary and Scientific Institution will begin on Monday next. The classes, which are open to both ladies and gentlemen, embrace languages, mathematics; natural, applied, and mental science; law, literature, history, drawing, painting, music, &c. In addition to the prizes which have been already announced, the Chancellor of the Exchequer has offered an English essay prize of 10s.; Mr. Staveley Hill, M.P., a prize of 5s. for mental arithmetic; Mr. Douglas Straight two essay prizes of £5 each; the Royal Historical Society an essay prize of 5s.; and Mr. R. J. Quin and Mr. Shirley Shirley prizes for law.

The classes and night schools of the Working Men's College, Blackfriars-road, will resume work next Monday. New classes are forming in drawing, French, German, English grammar, arithmetic, and history. The class for preparing candidates for Civil Service examinations meets three times weekly. It is proposed to establish technical classes especially adapted to various trades—such as masons, carpenters, bricklayers, &c. The night schools for men and women meet three evenings weekly. All the classes are open alike to men and women. There is also a day school for children, and an evening French class for children only.

At the presentation of prizes to the students of the Metropolitan Drawing Classes, which was made at the Cannon-street Hotel, on Wednesday evening, the chairman, Sir J. C. Lawrence, M.P., held out a hope that in a short time a project will be issued by the livery companies of London, having for its object the encouragement of technical education.

BIRTHS AND DEATHS IN LONDON.

Last week 1978 births and 1510 deaths were registered in London. Allowing for increase of population, the births were 195, and the deaths 263, below the average numbers in the corresponding week of the last ten years. The annual death-rate from all causes, which in the two preceding weeks had been equal to 21.6 and 21.8 per 1000, further rose to 22.6. The 1510 deaths included 75 from smallpox, 40 from measles, 29 from scarlet fever, 9 from diphtheria, 31 from whooping-cough, 27 from different forms of fever, and 21 from diarrhoea; thus to the seven principal diseases of the zymotic class 235 deaths were referred, against 236 and 237 in the two preceding weeks. During the fifty-two weeks of last year 755 deaths from smallpox were registered in London, of which 7, 26, 110, and 592 were, respectively, returned in the four quarters. During the thirty-one years 1846-76, the annual number of deaths from smallpox in London averaged 808, and ranged from 151 in 1857, to 1864 in 1844, and 2012 in 1863. The fatal cases in the epidemic year 1871 rose to 7876, and in 1872 they were 1781; in 1873-4-5 they declined to 115, 56, and 75 respectively. With respect to the 75 deaths from smallpox in London last week, it is pointed out by the Registrar-General that 31 were certified as unvaccinated, 22 as vaccinated, and in the remaining 22 cases the medical certificates did not furnish any information on this subject. The 75 fatal cases included 36 in the hospitals at Hammersmith, Stockwell, and Hampstead, one in Highgate Hospital, and one in the North-street Infirmary, Poplar; the remaining 37, or 49 per cent of the total cases, occurred in private dwellings. Fourteen of the deceased patients resided in Hackney, 12 in Lambeth, 6 in Camberwell, 5 in Poplar, and 3 in Bow; in all (excluding one case of which the previous residence was unknown), 6 belonged to the west, 22 to the north, 18 to the east, 28 to the south, and not one to the Central groups of districts. The hospitals contained 823 patients on Saturday last, against numbers increasing steadily from 185 to 737 in the nine preceding weeks. How to meet the smallpox epidemic, and the action of the Local Government Board thereon, formed the principal subject of discussion at the fortnightly meeting of the managers of the Metropolitan Asylums on Saturday last. The reports from the various hospitals were of an alarming nature, and resolutions were passed having for their object the provision of proper means to meet the emergency. A meeting of the Metropolitan Asylums managers was held on Wednesday, when measures were taken for providing additional accommodation for smallpox patients.

Last week, at the Royal Observatory, Greenwich, the mean temperature was 43 deg., or 5 deg. above the average. Under the influence of the recent unseasonably mild weather only 1254 deaths were, in London, referred to diseases of the respiratory organs during the four weeks ending last Saturday; this number was 682 below the corrected average for the corresponding week in the last ten years.

There were 71 deaths from violence in London last week. Sixty were the result of negligence or accident, including 11 from fractures and contusions, 13 from burns and scalds, 3 from drowning, and 22 of infants under one year of age from suffocation. Two deaths were caused by horses or vehicles.

STORMS AND FLOODS.

Severe gales have done great damage on various parts of the coast, as well as inland. Continued rain, together with the melting of snow, has caused the floods to increase; and the combined effect of inundation and furious winds has been calamitous in many districts. At Dover great damage was done to the Admiralty Pier. At Brighton the gale was accompanied by a very high tide, and a previously-existing breach in the sea-wall was thus increased. Many of the shops in the King's-road had to be closed, in order to prevent the windows from being blown in. At Cliftonville, during the height of the storm, the waves washed over the roofs of three-storied houses. At Eastbourne the sea carried away about 150 yards of the pier.

From the Orkney Islands, all along the east coast, from the Channel, from both sides of the Irish Sea, tidings come of a renewed and heavy gale. Piers and sea-walls have been destroyed, vessels wrecked, wharves flooded, and the basement of houses that were thought at a safe distance from the sea have been filled with water by the last tides. In the interior, a heavy rainfall is recorded, while snow has fallen in Yorkshire, and the destruction to the crops has been immense. In many parts the only possible communication is by boat. Wide and low-lying flats, deep valleys, and mountainous districts appear to have suffered in almost equal degree, whether from the rising of rivers, as in Huntingdonshire, or from the descent of torrents, as in Wales and other hilly parts of the kingdom.

The storm which prevailed in Scotland for a fortnight, and which it was hoped had passed away, was renewed, on Wednesday, with great severity. Quite a gale from the east ward raged all along the north coast, and the sea was very rough. In the night snow fell heavily in blinding showers.

The floods which came, on Monday night, into the cellars and lower rooms of the houses on the south side of the Thames in London were renewed at subsequent tides. After the people had made great efforts to get rid of the water their precautions against a return of the calamity have been washed away. All along the southern side of the river there is much suffering. The people are crowding in neighbours' houses, where they cannot be accommodated in the mission churches and school-rooms, which have been opened and soon fitted for the temporary shelter of the homeless. The loss of furniture, clothes, and domestic articles by the poorest classes has been very great. Several local committees, headed by the clergymen of the neighbourhoods, have been formed to collect subscriptions for the alleviation of the distress amongst those rendered temporarily homeless.

A tremendous gale raged, last Tuesday, on the Atlantic coast of France. The cable to this country was broken, houses were destroyed, and some Custom House officers were drowned.

LIFE-BOAT SERVICES IN 1876.

The life-boats of the National Life-Boat Institution during the storms of the year which has just closed rendered signal services in saving life from shipwreck on various parts of the coasts of the United Kingdom, as will be seen from the following list:—

Barque Ingleborough, of Hull, 13; schooner Margarita, of Newquay, 4; schooner St. Elwine, of Falmouth, 6; s.s. Cybele, of Glasgow, and schooner Exhibition, of Colchester, rendered assistance; schooner Bellalie, of Nantes, 6; brig Union, of Guernsey, 3; schooner Eliza, of Sunderland, and sloop Firm, of London, assisted to save vessels and crews; 8; barque Clifton, of Liverpool, 10; dandy Frank, of Grimsby, 10; brig Speed, of Sunderland, assisted to save vessel and crew, 9; three-masted schooner, George Smed, of Rochester, rendered assistance; barque Brothers' Pride, of St. John's, N.B., 11; schooner Claudine, of Antwerp, rendered assistance; schooner Tweed, of Greenock, 6; brig Fred Thompson, of Dundee, remained by vessel; s.s. Gustaf, of Gothenburg, 14; barque Mignonette, of London, 14; barque Emily, of Shields, 17; brigantine Trader, of Portaferry, 4; ship Turkestan, of Liverpool, 22; schooner Augusta, of Sunderland, 4; brigantine Lapwing, of Liverpool, assisted to save vessel; schooner Iona, of Belfast, 3; s.s. Rubens, of Liverpool, and barque Conanto, of London, remained by vessels; fishing-smack William, of Wexford, 6; barque Walker Hall, of Sunderland, 11; ketch William Pitt, of Poole, 1; fishing-boat Edith, of Lowestoft, assisted to save vessel and 10; schooner Resolute, of Peterhead, 6; brig A. E. M., of Nantes, 8; schooner Lion, of Goole, saved vessel and 6; brig Linwood, of Maryport, rendered assistance; s.s. Belvidere, of Newcastle-on-Tyne, 15; schooner Lizzie Morton, of St. Ives, saved vessel and 15; schooner Killin, of Greenock, 5; schooner Anna, of Rendsburg, 4; ship County of Ayr, of Glasgow, 2; smack Victory, of Hull, 5; three fishing-cobles, of Staithes, rendered assistance; schooner Wyre, of Fleetwood, 2; schooner Tobina, of Gode Teken, 5; schooner Elizabeth, of Llanelli, 5; schooner Alana, of Goole, 2; ketch Elizabeth, of Goole, 2; barque Atlantic, of Swansea, assisted to save vessel and 16; schooner Wells, of Goole, assisted to save vessel and 5; Ferryden fishing-boats, rendered assistance; steam-vessel Bavington, of Newcastle, 4; schooner John, of Runcorn, 3; barque Ilmarin, of Finland, 15; Whitley fishing-boats, 12; ship McNeary, of Boston, U.S., assisted to save vessel; barque Roycroft, of Annapolis, N.S., rendered assistance; pleasure-boat Eagle, of Llandudno, 5; brigantine Bridget, of Dungannon, 8; fishing-boat of Llanabhai, 3; fishing-yawl Providence, of Lowestoft, rendered assistance; dandy Dawn, of Grimsby, saved vessel and 3; s.s. Cingalee, of London, remained by vessel; fishing-boat Vivid, of Ferryden, assisted to save vessel and 6; fishing-boat Gem, of Eymouth, saved vessel and 6; schooner Brothers, of Sunderland, rendered assistance; fishing-boat of West Hartlepool, 3; Arbroath fishing-boats, rendered assistance; brig Macedonia, of Blyth, 7; brig Robert Stevenson, of North Shields, 9; brigantine Maxim, of St. John's, N.B., 8; brig Mary Ann, of Whitehaven, 10; Cultercoats fishing-cobles, rendered assistance; brig Leonie, of Charlotte Town, P. E. I., 4; schooner Maid of Kent, of London, assisted to save vessel and 5; yacht Dragon, of Swansea, 2; three-masted schooner Psyche, of Swansea, assisted to save vessel and 7; fishing-coble Morning Star, of Redcar, saved vessel and 3; other Redcar fishing-cobles, rendered assistance; barque Auldredy, of Sunderland, 3; schooner Lady Mary, of Irvine, 4; Prussian schooner Katrina, 4; fishing-coble Palestine, of Cultercoats, rendered assistance; dandy Phoebe, of Great Yarmouth, 6; smack Arics, of Cowes, rendered assistance; schooner Tom Mawr, of Ewney, saved vessel and 5; ketch Germ, of Goole, 4; barque J. W. Fetterwall, of Stockholm, remained by vessel; brig Vulcan, of Whitehaven, 10; schooner Gleaner, of Preston, 3; brig Camilla, of Portsmouth, 4; schooner Emerald, of Montrose, 6; barque Mentor, rendered assistance; brig Sinai, of Nantes, 6; barque Elias, of Spezzia, remained by vessel; Ferryden fishing-boats, rendered assistance; schooner Rover, of Wexford, rendered assistance; fishing-boat of Llanrhystid, saved boat and 3; s.s. Clan Alpine, of Leith, 4; fishing-coble George, of Cultercoats, 1; barque Octavia, of Holmestrand, rendered assistance; schooner Adjuvant, of Stavanger, rendered assistance; schooner Jenny Lind, of Whitehaven, 5; a fishing-boat of Teignmouth, 3; barque Beecher Stowe, of South Shields, 10; barque Excelsior, of Sunderland, 11. This long list shows a total of 468 lives rescued by the society's life-boats during the year, in addition to eighteen vessels saved from destruction. In the same period the Life-Boat Institution granted rewards for saving eighty-five lives by fishing and other boats, making a total of 583 lives saved last year, mainly through its instrumentality.

Altogether, since its formation the society has contributed to the saving of 24,752 shipwrecked persons, for which services it has granted 988 gold and silver medals, besides pecuniary rewards to the amount of £50,020.

It is most gratifying to know that, notwithstanding the peril and exposure incurred by the gallant crews last year, only one life was lost from the 256 life-boats of the society, although about 12,000 men were out in them during the twelve months. We feel assured that an institution so truly national and benevolent in its character will maintain its firm hold on British sympathy and support; and that, while it continues to pursue its course of usefulness with unabated vigour, the support and appreciation of the public will be proportionately liberal. Contributions in aid of the important work of the National Life-Boat Institution, are received by all the bankers throughout the United Kingdom, and by the secretary, at the Institution, 14, John-street, Adelphi, London.

At a meeting of the National Life-Boat Institution, held on Thursday, at its house, John-street, Adelphi, the thanks of the institution, inscribed on vellum, were voted to the Rev. Henry R. Wilson, Curate of Drumbeg, for going out in the Ballywalter life-boat, during a very strong gale from the S.E. and in a heavy sea, on the 15th ult., when she was the means of saving the crew of five men from the brigantine Jenny Lind, of Whitehaven, stranded on the rocks of Ballywalter; and to Mr. Donald Montgomery, farmer, of Dunglass, N.B., and to Mr. Daniel Dempsey, for assisting to rescue the crew of sixteen men of the barque Faith, of Irvine, which had gone ashore in Pollywellan Bay, Cantyre, during a gale from the S.E., on Nov. 11. The sum of £12 19s. 6d. was granted to pay the expenses of that life-boat service. Other rewards, amounting to upwards of £400, were granted to the crews of various life-boats of the institution for gallant services during the late long-continued storms. Several rewards were granted to the crews of shore-boats for saving life from wrecks, and payments to the amount of £3700 were ordered to be made on the 256 life-boat establishments of the society. The receipt of various contributions and legacies was announced. New life-boats have recently been sent by the institution to Lowestoft and New Brighton; the first-named boat was publicly launched at its station on Dec. 21. Its cost had been defrayed from the Plimsoll life-boat funds; and Mr. Plimsoll, M.P., and many of his friends attended the launch, the boat being named by Mrs. Plimsoll. Reports were read from the inspector and assistant-inspectors of life-boats to the institution on their recent visits to the coast. A cordial vote of thanks to Mr. Thomas Chapman, and to Sir Edward Perrott, Bart., for their able conduct in the chair at the meetings of the institution during the past year.

Lord Redesdale's elevation to an earldom of the United Kingdom is gazetted.

THE RAILWAY ACCIDENT AT ARLESEY.

Christmas was ushered in by an accident on the Great Northern Railway, the severity of which recalls that at Abbot's Rinton in the early part of the year. There is a dreadful simplicity about the details. At a quarter to four on Saturday afternoon, Dec. 23, in shunting a luggage-train at Arlesley siding, four miles from Hitchin, two of the trucks got off the metals; and before the line could be cleared the Manchester express, with thirteen carriages full of passengers, came up at full speed, with results that may only be too readily guessed. The express-engine literally jumped over the truck with which it came into contact, and left many yards in its rear the "bogey frame" upon which its leading portion travelled. Four or five of the carriages were smashed to pieces, and the fragments piled up in a heap 20 ft. high. It would be difficult to convey an adequate description of the scene. For a moment all was hushed, but presently there arose from underneath the ruined carriages the cries of the wounded and imprisoned passengers. In one of the compartments of a leading second-class carriage in the down express was travelling Monk, a police officer in the service of the company, who, not having suffered seriously from the shock, immediately made his way to the signal-box, where he assisted the officers in stopping by signal all up and down traffic, and at the same time kept a crowd of excited though uninjured passengers from invading the signal-box. Help was immediately telegraphed for, but before its arrival the local platelayers who had fled at the moment of the collision, and had thus saved themselves, worked with a will, and succeeded in rescuing several of the passengers. Among the earliest to reach the station was Mr. Percival, a resident in the neighbourhood, and the Rev. R. Ffolliott Scott, M.A., Vicar of Arlesley, both of whom rendered their ready aid. The medical men of the neighbourhood were soon on the spot, and among them may be mentioned as particularly active in their exertions Mr. Shillitoe, Mr. Foster, and Mr. Grellet, of Hitchin, and Mr. Prager, of the infirmary in that town; Dr. Burnett, Mr. Stevens, Dr. Young, and Mr. Fisher, of Biggleswade; and Dr. Swain, Mr. Rogers, and Mr. Keble, medical officers of the Three Counties Lunatic Asylum at Arlesley.

Several wonderful escapes occurred. One gentleman was hurled through the roof of his carriage and alighted on a sand-bank, escaping with a severe scalp wound. In the next compartment two were killed. Some passengers in the carriages that were totally destroyed escaped unhurt.

Five persons were killed, namely, the driver and stoker of the express-train, and three passengers—Miss Lucy Thompson, of Grantham; Miss Helen Longstaffe, lady's-maid to Mrs. Lett, of Dulwich House, Dulwich; and Morris Michael, a German tailor, of Gouleton-street, Whitechapel.

An inquiry before a Coroner's court is being held into the causes of the lamentable accident.

LORD NORTHBROOK ON ART-EDUCATION.

Lord Northbrook presented the annual prizes to the successful students of the Ryde School of Art at the Townhall, Ryde, last week. Mr. Clifford, M.P., and Mr. Baillie Cochrane, M.P., also addressed the meeting.

In addressing the large company assembled, Lord Northbrook said he had no technical knowledge of art, and was therefore disinclined to speak on the subject, and his remarks would be in the point of view of an outsider who took an interest in art. He congratulated the school on R. W. Tatey having won the Queen's prize in the national competitions. These schools of art were somewhat new in this country, but deserving of every encouragement from those who took an interest in the welfare of the country generally. Now they existed in almost every town in the country, and appeared to be taking hold of the country. The merit of starting them was due, he believed, in the main, to some artist who lived fifty or sixty years ago, and whose name was well-nigh forgotten. There was an artist named Barry, and a most remarkable man of considerable genius, Benjamin Robert Haydon, whose autobiography by Tom Taylor some might have read. Haydon was not successful in life. But he had held of a grand idea—that there was a necessity for art-education in England—not only the education of painters, but of workmen and artisans. Haydon urged his views with pertinacity on Ministers and the public, and it was remarkable how what he aimed at had been accomplished; for there was a central school at South Kensington, and a collection superior to any, probably, in the world of both old and modern pictures; and there were, besides, specimens of furniture in every kind of art, which would give to the artist or artisan, &c., the fullest information on any kind of art in any period of history. The person to whom the greatest merit was due in connection with this collection was Henry Cole. If any of them went to London and had an hour or two to spare, the best advice he could give them was to go to the South Kensington Museum, and educate their taste by seeing what really good things were. Besides, the loans from the South Kensington School of Art were spread all over the country, which was exactly what Haydon aimed at—that the humblest workman might have a scientific knowledge of the principles of his work. Then the Prince Consort coming from the Continent saw at once that we did not pay sufficient attention to these matters here, and took up the work, applying all his energies to it.

Speaking as an outsider and an amateur, he (Lord Northbrook) could not conceive any country in the world where there was greater inducement to education in art. There never was a country where higher prizes were given for pictures, such as £2500 for an ordinary portrait. It was as much as pictures as was paid during the highest time of art in Italy. He did not think even masters of any schools of art would say that the result was at all adequate to the encouragement of art. There was ample room for great portrait-painters. There was hardly such a thing now in any country, and other painters of great fame in England were not so numerous as not to leave plenty of room for any ambitious young man to get to the top of his profession. To the artisan he would say that, as regarded decorative art, we had made great advances in England during the last ten or fifteen years. He now saw traces of it in furniture and all kinds of decoration, and the improvement was very much owing to schools of art. Let them compare the iron gates made 200 or 300 years ago with those made now, and it must be seen that, though the work was not more in one than the other, there was a fine opening for any artisan who got the mastery of his pencil and colours. There was immense room for improvement in the decorative furniture. Bernini, of Italy, said success in art did not depend on the beauty of the picture or excellence of ideas and conception so much as upon real hard work. He could tell them of a head done so that they could see every single hair drawn, and of a Holy Family done so that each figure appeared as if alive. Still, theirs was genius for design, &c. It was not enough for those before him to think they were very clever and could make beautiful sketches. Work was the only thing by which they could succeed. He was very glad to be told that so many working men in Ryde attended this school. If the foremen of the labourer or clerk of works could show plans and build a good house he became a master. It was not enough to have an idea in one's head. These schools did not give anyone an opportunity of great success in life; it depended on good fortune, but he had a chance more than those who did not come to school. Then, as to amateurs, who did not paint as a profession, he said they received the best instruction in a most agreeable occupation. Twenty years ago instruction for amateurs was as bad as it possibly could be.

He had always been exceedingly fond of art and looking at good pictures, and should like to see English art in a higher condition. It was progressing, he believed. There were pictures which people admired which were not anything like on an equality with those of the first great Dutch or Italian schools. It was well we should feel this, and that it was only by hard work we should acquire a high place in the history of the art. In India there was extraordinary genius for art, which spread over the whole country and extended to other parts of the East. It appeared to be impossible that a mistake could be made either in colour or design in regard to any works of art. By some kind of instinct the design and colour were beautiful, whether it was a shawl or piece of work in gold or silver. There were schools of art in different parts. He had brought with him a couple of specimens of the work of native students to present to the Ryde School of Art—studies from leaves and life. By those specimens they would see that a competition might come from the Eastern Empire, and that we must work hard in England to keep up to the standard in India.

The list of members of the Institution of Civil Engineers now contains the names of fourteen honorary members, 832 members, 1608 associates, and 433 students; together 2937.

Sir Henry Lake, Chief Commissioner of the Dublin Police, has ordered a survey of the city theatres to be made, to ascertain the means of egress possessed by each in the event of fire.

THE RAILWAY ACCIDENT AT ARLESEY.
FROM A SKETCH BY A PASSENGER.

GUILLEMOTS AT THE BRIGHTON AQUARIUM.

SEA-LIONS AT THE BRIGHTON AQUARIUM.

CURIOSITIES AT BRIGHTON AQUARIUM.

A favourite lounge in the Brighton Season is the far-famed Aquarium on the beach. The acute manager, Mr. G. Reeves Smith, keeps up a constant succession of attractions. Now it is a porpoise that he has taken captive and "tanked," then a rare anemone; next he has succeeded in catching a sweet songstress to fill with sweet notes the concert-room, which might be under the sea, so suggestive is it of grottoes and submarine surroundings.

The Sea Lions, from San Francisco, illustrated in our present Number, are old favourites, scarcely so accomplished yet as the docile Sea Lion whom M. Lecomte has trained to go through performances which are the delight of holiday folk at the Zoo, but, nevertheless, intelligent enough when their attendant produces a tid-bit in the shape of a toothsome whiting. These Sea Lions had a long journey by land and water to undergo before they were located in Sea Cave at the Brighton Aquarium. From San Francisco they were taken by rail to New York, thence by sea to Bremen, and therefrom re-shipped and conveyed to Brighton via London. One is a male, the other a female; and they have been at the Aquarium since October, 1875.

The Guillemots (*Uria troile*), later addition to the Brighton Aquarium, are as much at home in the water as penguins, it would appear, from the drawing of Mr. R. W. Moore. They were presented by Mr. E. T. Booth. Natives of the Firth of Forth, and found occasionally on the Bass Rock and the Fern Islands, these interesting birds are quickly disappearing from our shores. Guillemots, as may be generally known, belong to the order of waterfowl, and to that division known as "divers;" but it may not be so generally known to what extent they indulge in the habit of making sub-aqueous peregrinations—a fact which may now be learnt with advantage at the Brighton Aquarium. Plunging beneath the surface, they use both their legs and wings as a means of propulsion, and swim—or fly, should we say?—through the water at express speed, remaining submerged for several minutes at a time. This extraordinary feat can be witnessed at feeding-time. The Guillemots readily respond to the call of their keeper, who has only to fling a sprat or two into the water to induce an "exhibition." The birds are instantly on the scent. Diving with a rapidity that causes their bodies to gleam like burnished silver, they swim hither and thither until the coveted morsel is secured. Their plumage is brown above the body, and a beautiful white beneath; and their heads are small, with a sharp-pointed beak. In the same tank are some cod-fish (as represented in our illustration), and some mammoth skates, caught off Brighton. The Guillemots, however, show no respect even to their colossal neighbours, but dive and play about them without the least signs of dismay or diffidence.

LAW AND POLICE.

As an encouragement to the students of the Middle Temple the Benchers have, in addition to the studentships and prizes awarded by the Council of Legal Education, recently established eight scholarships—four of 50 gs. each and four of 100 gs. each—the competitors being the students of the Middle Temple. The examination for the four 50-gs. scholarships of this year is to be held on Feb. 1 next, and for the four 100-gs. scholarships on June 19.

The number of original applications to be admitted solicitors of the High Court of Justice for the ensuing Hilary sittings are sixty-five, besides a number of renewals. The term "attorney" is abolished.

Alexander Kay, who was charged, a few days ago, with threatening the Lord Mayor and using abusive language to him, was again brought up, on Tuesday, at the Guildhall before Mr. Alderman Carter. The surgeon of Newgate having certified that Kay was insane, he was handed over to the care of a relieving officer of the City of London Union.

Mr. Robert Davey, the proprietor of *Sporting Opinion*, pleaded guilty, at the Guildhall, on Wednesday, to keeping a betting-house, and was fined £100 and costs, besides being bound over in heavy sureties to be of good behaviour for twelve months.

The investigation of the charge against Sir Edward Cunyngame, Mr. Charles de Chastelain, and Mr. Nathan Wetherall, of conspiring to defraud Mr. William le Hunt Doyle by obtaining his signature to an agreement to pay £500 while he was in a state of intoxication was resumed at Bow-street, on Tuesday, by Mr. Vaughan. Evidence was given to show that the defendant Wetherall had overdrawn his account at his bankers, and Mr. Cottam, who was formerly partner with Wetherall in the wine business in Burleigh-street, was examined and cross-examined at some length as to the character of that business. The counsel for the defendants then addressed the Court, contending that Mr. Doyle when he signed the bill was "not more drunk than usual," and that if he had any grievance against the defendants he had his remedy in civil proceedings. Mr. Vaughan said the question whether criminal or civil proceedings should have been taken in the case was not before him. The facts proved in the evidence were simply that three needy persons, without means or credit, had combined to make the prosecutor, a person of weak mind, intoxicated, and then had inveigled him to sign a document by which he would have sacrificed a large amount of money. He was satisfied, even from the evidence of Mr. Cottam, that the wine business was a mere phantom one, and the statement

of Mr. Doyle had been completely confirmed by the evidence of his servant. He committed the three defendants to trial, and accepted bail in £300 personal recognisances, and two sureties of £150 each.

Many of the paupers in receipt of casual relief and shelter at St. Giles's Workhouse were, on Monday, placed before Sir James Ingham, at Bow-street, on charges of destroying the clothes with which they were supplied, in accordance with the regulations of the union. Most of the prisoners were able-bodied men and youths, and they were sentenced to various terms of imprisonment, with hard labour.

A lady who had taken her maid-servant, when attacked with smallpox, through the streets, with a view of procuring medical assistance for her, has been fined £3 by the Clerkenwell police magistrate, for having improperly exposed a person who was thus suffering from an infectious disease.

Two cabmen were summoned at Clerkenwell Police Court, on Tuesday—one for furious driving and one for demanding more than his legal fare. The former was fined £2, and his license was suspended for a month; the latter was sent to prison to undergo a month's hard labour. At Hammersmith Police Court a cabman's license was suspended on account of the possessor being frequently drunk.

At the Quarter Sessions at Tewkesbury, yesterday week, Henry Thomas Porter, coal merchant, of Bredon, was sentenced to twelve months' imprisonment, with hard labour, for receiving £13 14s. 2d., after he had filed a petition in the Cheltenham County Court for liquidation of his affairs under the Bankruptcy Act, 1869, and not accounting for the same to the trustee of his estate.

Michael McConnon, the private in the 2nd battalion of the Grenadier Guards who is charged with having murdered Noah Johnson, a private in the 1st battalion of the same regiment, in the guard-room cell at Chelsea Barracks, on Christmas night, was, on Tuesday, committed for trial.

Isaac Marks, who shot Mr. F. Barnard in Penton-place, Newington, was hanged, on Tuesday morning, in Horsefonger-lane Gaol.

MIDHAT PASHA.

The new Turkish Grand Vizier, according to an account taken from a Swiss journal, was born at Constantinople in 1822, and was educated there. His father was a Cadi, and at the age of twelve Midhat entered the public service. When nineteen years old he accompanied Faik Efendi, member of the Audit Office, to Syria, as his secretary. After three years' stay in Syria he returned to his office at Constantinople, and was shortly appointed Secretary to the Governors of Konia and Castamuni, in Asia Minor. He next became Chief Reporting Clerk to the Council of Justice at Constantinople. A few years later he was again sent to Syria on a financial mission; and, on his return, became Second Secretary to the Council of Justice. During the Crimean War he was sent to put down brigandage on the east coast of Roumelia, and was completely successful. In 1857 he was sent to inquire into the conduct of the ex-Governors of Rutchuk and Widin, and to pacify Bulgaria. He now obtained a short leave of absence, during which he visited London, Paris, &c.; and on his return was made First Secretary of the Council of Justice. In the end of 1860 he was made a Pasha, with rank of Vizier, being named Governor of Nish, to which were subsequently added the districts of Uskup and Prizrid. In 1864 he was appointed Governor-General of the Vilayet of the Danube (geographical Bulgaria). Subsequently he became Governor-General of Bagdad, then member and President of the Council of Justice, and later still, for a short time, Grand Vizier. On his resumption of the Presidency of the Council, the part he played in deposing Abdul Aziz and his escape from the assassin of Hussein Avni Pasha are too recent to be forgotten.

NATIONAL INSTITUTION FOR DISEASES OF THE SKIN. Gray's Inn-road and Mitre-street, London. Established 1894. Physician, Dr. Barr Meadows, 47, Victoria-street, S.W. Free to the necessitous. Payment required from other applicants.

Separate rooms for Ladies.—Apply to Mr. Smart as above.

KINAHAN'S LL WHISKY. KINAHAN and CO., London, finding that, through the recommendation of the Medical Profession, the demand for their OLD LL WHISKY for purely medicinal purposes is very great, submit with pleasure the following analysis by Dr. Hassall:—"I have very carefully and fully analysed samples of this well-known and popular Whisky. The samples were soft and mellow to the taste, aromatic and ethereal to the smell. The Whisky must be pronounced to be pure, well-matured, and of very excellent quality. The medical profession may feel full confidence in the purity and quality of this Whisky."

CACAOINE (Cocoa-Nib Powder).—Cacaoine contains all the theobromine or essential principle of the cacao (cocoa) nibs, giving it a delicious, exhilarating taste, character, with a fine chocolate flavour, but without that production of over-richness, all the grosser oily particles having been removed by most ingenious processes. Cacaoine is the only preparation of cacao (cocoa) that is found acceptable in all states of the palate. Cacaoine, being pure cacao, without sugar, keeps good in any climate. Each tin is labelled JAMES EPPS and CO., HOMOEOPATHIC CHEMISTS, 48, Threadneedle-street; and 170, Piccadilly.

BROWN & POLSON'S CORN FLOUR HAS TWENTY YEARS' WORLD-WIDE REPUTATION, and is unequalled for uniformity superior Q is it.

EVERYONE WHO HAS A GARDEN SHOULD READ
SUTTON'S AMATEUR'S GUIDE IN
HORTICULTURE.—This popular Guide to the Kitchen and Flower Garden now appears in a new form, and is devoted entirely to Gardening matters. The seed List forms a separate book. It has been considerably enlarged, and is published in a convenient form for keeping as a book of reference. The articles on cultivation are invaluable. It is beautifully illustrated with coloured and other Engravings, and is the most complete and practical work yet published. The "Farmer's" of Dec. 25, says:—"It would be difficult to find any work so thoroughly and essentially to Amateur Gardeners as this. It may be described as a plain and easy guide to all who want to succeed. The instructions are all clear, sound, and complete. It is a most valuable book, and is a gem in the hands of a gardener."
SUTTON'S AMATEUR'S GUIDE IN HORTICULTURE may be had, post-free, for 14 stamps, and
SUTTON'S DESCRIPTIVE SPRING CATALOGUE AND PRICE CURRENT OF SEEDS, gratis and post-free.

VALUABLE DISCOVERY for the HAIR. If your hair is turning grey, or white, or falling off, use "The Mexican Hair Renewer," for it will positively restore in every case Grey or White Hair to its original colour, without leaving the disagreeable smell of most hair restorers. It makes the hair charmingly beautiful, and, as well as promoting the growth of the hair on bald spots where the glands are not decayed. Ask any Chemist for "The Mexican Hair Renewer," price 3s. 6d. Prepared by HENRY C. GALLUP, 493, Oxford-street, London.

FLORILINE.—For the Teeth and Breath Is the best Liquid Dentifrice in the world; it thoroughly cleanses partially-decayed teeth from all parasites or living "animalcules," leaving them pearly white, imparting a delightful fragrance to the breath, and, as well as promoting the growth of the hair, removing instantly all odours arising from a foul stomach or tobacco smoke, being partly composed of honey, soda, and extracts of sweet herbs and plants. It is perfectly harmless and delicious as a cherry. Prepared by HENRY C. GALLUP, 493, Oxford-street, London. Retailers everywhere.

HUNYADI JANOS' HUNGARIAN APPARENT WATER.—Most valuable.—Prof. Attkin, F.R.S., writes:—"Prof. Hunyadi's Water is a most valuable remedy for all ailments, and, as well as promoting the growth of the hair, removing instantly all odours arising from a foul stomach or tobacco smoke, being partly composed of honey, soda, and extracts of sweet herbs and plants. It is perfectly harmless and delicious as a cherry. Prepared by HENRY C. GALLUP, 493, Oxford-street, London. Retailers everywhere."

ROSSETTER'S HAIR RESTORER. CERTAIN—HARMLESS—REFRESHING. N.B.—Its success having led to many spurious imitations, the public are cautioned against substitutes.

BREIDENBACH'S WOOD VIOLET PERFUME, fresh as morning-gathered flowers, 2s. 6d., 6s., 10s. per Bottle. Breidenbach's YACASSAINE, invaluable for preserving the Growth of the Hair, 2s. 6d., 5s. per Bottle. Of all Chemists, and the Makers, 157, New Bond-street, W.

JOHN GOSNELL and CO'S CHERRY TOOTH PASTE gives a beautiful Set of Teeth, makes the Teeth of pearl-like whiteness, and protects the enamel from decay.—Of all Chemists and Perfumers, at 1s. 6d. per pot.

GOLDEN HAIR.—ROBARE'S AUREOLINE produces the beautiful Golden Colour so much admired. Warranted not to injure the hair. Price 5s. 6d. and 10s. 6d. of all Perfumers. Wholesale, ROVENDEN and SONS, 5, 6, Marlborough-st., W.; and 33 and 35, City-road, E.C. London; Pinaud and Meyer, 37, Boulevard de Strasbourg, Paris; 31, Graben, Vienna; 44, Rue des Longs Chariots, Brussels.

DOES YOUR HAIR TURN GREY? Then use HERRING'S PATENT MAGNETIC BRUSHES and COMBS. Brushes, 10s. and 15s. each. Combs, 2s. 6d., 5s., 7s. 6d., 10s., 15s., and 20s. each. Pamphlets upon application.—1, Great Marlborough-st., W.; 93 and 95, City-road; and of all Perfumers.

DR. LOCOCK'S PULMONIC WAFERS. From Mr. Shaw, 8, Charles-street, Hull:—"They are an unfailing remedy for all disorders of the breath and lungs." Sold at 1s. 10d. per Box.

THROAT AFFECTIONS and HOARSENESS.—All suffering from Irritation of the Throat and Hoarse voice will be agreeably surprised at the almost immediate relief afforded by the use of BROWN'S BRONCHIAL TROCHES. These famous Lozenges are now sold by most respectable Chemists in this country at 1s. 10d. per Box. People troubled with a hacking Cough, slight Cold, or Bronchial Affections, cannot try them too soon, as similar troubles, if allowed to progress, result in serious Pulmonary and Asthmatic affections.—Depot, 493, Oxford-street, London.

DR. LELIEVRE'S ICELAND MOSS POULTICE (Patented) is exempt from all the inconveniences inseparable from Poultices made with Linseed or Bread. These spoil the linen, bedding, &c., dry up on the legs, rapidly ferment, leaving a most unpleasant odour; and no dependence can be placed on the quality and freshness of the linseed meal. This New Poultice is instantaneous, for it is ready in a few seconds. Sold retail by all Chemists. Wholesale, BIGGLOT and CO., 82, Southwark-street, London.

THROAT IRRITATION. EPPE'S GLYCERINE JUJUBES. Sold only in boxes, 6d. and 1s., 1s. 10d. JAMES EPPE and CO., HOMEOPATHIC CHEMISTS, 48, Threadneedle-street, and 170, Piccadilly.

GOUT and RHEUMATISM.—The excruciating pain of Gout or Rheumatism is quickly relieved and cured in a few days by this celebrated Medicine, BLAIR'S GOUT and RHEUMATIC PILLS. They require no restraint of diet or confinement during their use, and are certain to prevent the disease attacking any vital part.

D. R. DE JONGH'S. KNIGHT OF THE LEGION OF HONOUR, KNIGHT OF THE ORDER OF LEOPOLD OF BELGIUM, LIGHT-BROWN COD-LIVER OIL. Proved by twenty-five years' medical experience to be THE PUREST. THE MOST PALATABLE. THE MOST EASILY DIGESTED. THE MOST RAPIDLY EFFICACIOUS.

DR. DE JONGH'S LIGHT-BROWN COD-LIVER OIL. THE ONLY KIND which produces the full curative effects in CONSUMPTION and DISEASES OF THE CHEST—CHRONIC BRONCHITIS, WINTER COUGH, DEBILITY OF ADULTS AND CHILDREN. SELECT MEDICAL OPINIONS.

Sir G. DUNCAN GIBB, Bart., M.D., Physician to the Westminster Hospital.
"The value of Dr. DE JONGH'S LIGHT-BROWN COD-LIVER OIL as a therapeutic agent in a number of diseases, chiefly of an exaltative character, has been admitted by the world of medicine; but, in addition, I have found it a remedy of great power in the treatment of many Affections of the Throat and Larynx, especially in Consumption of the latter, where it will sustain life when everything else fails."

DR. SINCLAIR COGHILL, Physician to the Royal Hospital for Consumption, Ventnor.
"I have convinced myself that in Tubercular and the various forms of Strumous Disease, Dr. DE JONGH'S LIGHT-BROWN COD-LIVER OIL possesses greater therapeutic efficacy than any other Cod-Liver Oil with which I am acquainted. Dr. DE JONGH'S OIL is now the only Cod-Liver Oil used in the Royal National Hospital for Consumption and Diseases of the Chest."

Dr. PROSSER JAMES, Lecturer on Materia Medica, London Hospital.

"DR. DE JONGH'S LIGHT-BROWN COD-LIVER OIL contains the whole of the active ingredients of the remedy, and is easily digested. Hence its value, not only in Diseases of the Throat and Lungs, but in a great number of cases to which the Profession is extending its use."

DR. HARDWICKE, Medical Officer of Health, Farringdon.

"In the class of Tubercular Diseases, including Consumption, so prevalent in our great central population, the use of Dr. DE JONGH'S LIGHT-BROWN COD-LIVER OIL is attended with manifold advantages; and I know of no therapeutic agent which, in connection with hygienic and sanitary measures, is better calculated to stay the ravages of these great consuming plagues of the British Islands."

NEW MUSIC.

CHAPPELL and CO'S ALEXANDRE
ORGANS. The best imitation of real pipe organs yet pro-
duced. From 20s. to 120 ga. A number of these instruments
returned from hire to be sold at greatly reduced prices for cash.
Full descriptive Catalogue free by post.
CHAPPELL and Co., 50, New Bond-street.

CHAPPELL and CO'S ALEXANDRE
CHURCH MODEL HARMONIUMS, with two rows of
keys and 24 octaves of pedals, from 45 ga. to 150 ga.
SHOW-ROOMS—49, 50, and 51, NEW BOND-STREET.

BOOSEY and CO'S PIANOFORTE ROOMS,
285, REGENT-STREET (80's Address).
Instruments by all the great makers, English and Continental,
Upright and Grand. Second-hand, from £17; New, from £21. The
best price is marked upon each Piano in plain figures, and the
terms of purchase upon the "Three-Years' System."
A great variety of Short Iron Grands, by Kaps and others,
from £30.

BOOSEY and CO'S SHORT IRON GRAND
PIANOFORTE, 5 ft. long, seven octaves, trichord through-
out, very durable, and with excellent tone. Cash price, £35; or,
on the three-years' system, £5 10s. per quarter.
(Sole Address) 285, Regent-street.

PRATTEN'S PERFECTED FLUTES,
Cylinder and Case, commencing at 4s. The Piccama
Flute and the Boehm Old and New System of Fingering. Partic-
ulars of all these instruments upon application to the
Manufacturers, BOOSEY and CO., 285, Regent-street, W.

BOOSEY and CO'S BRASS
INSTRUMENTS for AMATEURS, &c.
DISTIN'S CORNET-A-PISTON, from 2s. 10d. to 10s.
DISTIN'S MINIAURE CORNET-A-PISTON, 9 ga.
DISTIN'S BALLAD HORN, 9 ga.
DISTIN'S DRAG and POST HORNS and BAND INSTRU-
MENTS, at all prices.
DISTIN'S MONTHLY BRASS BAND JOURNAL, 10s. 6d. per
annum.
Estimates for Bands of all sizes, also Illustrations and Prices of
individual Instruments, to be had of the Sole Manufacturers,
BOOSEY and CO., 285, Regent-street, London.

CRAMER'S GRAND PIANOFORTES,
75 ga., 85 ga., 95 ga., and 105 ga.
Regent-street and Moorgate-street.

CRAMER'S PIANETTES,
from 35 ga. to 50 ga.
Regent-street and Moorgate-street.

CRAMER'S INDIAN PIANOFORTES,
45 ga. to 75 ga.
Regent-street and Moorgate-street.

CRAMER'S THREE-YEARS' SYSTEM of
HIRE, applicable to all large instruments—Pianofortes,
Harp, Organs for Church or Chamber, &c.
Regent-street and Moorgate-street.

PIANOS, £1 per Month, on the Three-Years'

THE LATE STORMS: THE MOUTH OF THE TYNE.

WRECK OF THE ALBION AT PRIOR'S HAVEN, NORTH PIER.

THE CLAREMONT AND FENELLA ASHORE NEAR THE SOUTH PIER.

ENTRANCE TO THE TYNE AFTER THE GALE.

PROCLAMATION OF THE EMPIRE IN INDIA.

Her Majesty Queen Victoria was, on Monday last (New-Year's Day), proclaimed Empress of India at Calcutta, Bombay, Madras, and Delhi. It was at the last-named place, however, that the principal ceremony took place—Lord Lytton, the Viceroy, presiding at a magnificent assemblage, including sixty-three ruling chiefs. But, before describing this grand event, we continue from our last issue some account of the preliminary doings at Delhi at the close of last week.

Lord Lytton received visits, on Thursday week, from the Muscat Embassy, the Prince of Arcot (Prince Azim Jah), and thirteen other distinguished persons. His Excellency afterwards returned the visits of Scindia and Holkar, the Maharajah of Rewa, the Begum of Bhopal, and twelve other native dignitaries. The Maharajahs of Cashmere and Scindia were appointed Generals in the British Army. The Viceroy held a general Levée in the evening, which was attended by upwards of 2000 persons.

On the following day the Khan of Khelat, the Prince of Tanjore, and a number of minor chiefs and rajahs visited the Viceroy. His Excellency paid visits to the Guicowar of Baroda, the Maharajah of Mysore, the Khan of Khelat, and six other native Princes. In the evening medals were presented to the members of the Governor-General's Council and the heads of departments in the Indian Administration at Calcutta. The Governors of Madras and Bombay, the Lieutenant-Governor of Bengal, and the Governors of the other provinces were presented with banners and medals. The Maharajahs of Cashmere, Scindia, Holkar, Travancore, and Jeypore; the Rajah of Jheend, and the Maha Rao Rajah of Bhondee were created Councillors to the Empress.

The Consuls-General and Consuls of the foreign European Powers, together with a large number of minor chiefs and rajahs, visited the Viceroy last Saturday. Medals were presented to each prince or chief. The Viceroy afterwards visited the Nizam of Hyderabad, the Prince of Arcot (Prince Azim Jah), and her Highness the Princess of Tanjore.

Each chief got a commemorative medal—gold for greater princes, silver for those of inferior rank. The Viceroy himself hung it round each chief's neck, while the Foreign Secretary made a short speech in Hindustani to the effect that this was a personal gift from her Majesty in honour of her assumption of the Imperial title. The medal, which is large and handsome, bears on one side the Queen's head, and on the other words "Kaiser I. Hind," in Arabic and Sanscrit characters. Each of the greater chiefs also received a heavy and beautifully-worked banner, emblazoned with the arms of his House, and carried on a gilt pole, which bore the inscription, "From Victoria, Empress of India. 1st January, 1877." Two stalwart Highlanders supported the banner before the Throne; and the Viceroy, rising and grasping the pole, addressed to his visitor some such words as these:—"Whenever this banner is unfurled, let it remind you of the relations between your Princely House and the Paramount Power." We give an engraving of this banner, which was designed by Dr. Birdwood, of the India Office (who has been nominated a Companion of the Order of the Star of India), and executed by Messrs. Elkington and Co.

The culminating scene, on Monday, was one of great splendour. The Governors, the Lieutenant-Governors, the State officials, and sixty-three ruling chiefs, attended by their suites and standard-bearers, with magnificent memorial banners, were grouped in a semicircle in front of the throne. Behind them the vast amphitheatre was filled with the foreign Embassies, and the native nobility and gentry who had received invitations; and further in the rear was the vast concourse of spectators who had assembled to witness the ceremony. The whole presented a scene of unprecedented brilliancy. To the south of the dais 15,000 troops were drawn up under arms, including contingents from the Madras and Bombay armies, and the Punjab frontier force. To the north were ranged the minor chiefs, with their troops and retinues. The Viceroy arrived at the Camp at about half-past twelve, and at once ascended the throne. His Excellency's arrival was heralded by flourishes of trumpets and by a fanfare from the massed bands of the various regiments present. A grand march was played, followed by the National Anthem. Major Barnes, the chief herald, then read the Proclamation. This part of the ceremony was preceded and followed by flourishes of trumpets, and the Imperial standard was then hoisted. The Proclamation was followed by a salute of 101 salvos of artillery of six guns each, and a *few de joie* from the troops, the bands playing the National Anthem.

The Viceroy then addressed the assemblage. His Excellency referred to the promises contained in the Queen's Proclamation of November, 1858, and fully confirmed them. The Princes and peoples had found full security under her Majesty's rule. The Viceroy proceeded to explain the reasons for the assumption of the title of Empress, which was intended to be to the Princes and peoples of India a symbol of the union of their interests and a claim upon their loyal allegiance; the Imperial power giving them a guarantee of impartial protection. The Viceroy then severally addressed the civil and military services, and the officers and soldiers of the army and volunteers, conveying to them her Majesty's cordial sentiments of esteem and honour. He announced also that her Majesty, with the object of noting public services and private worth, had sanctioned an increase in the number of members of the Order of the Star of India in British India, and had instituted a new order entitled the Order of the Indian Empire. Addressing the Princes and chiefs, the Viceroy bid them welcome, and said he regarded their presence as evidence of their attachment to the Imperial rule. His Excellency, proceeding to address the natives generally, recognised their claim to participate largely in the administration of the country, and counselled the adoption of the only system of education that would enable them to comprehend and practise the principles of the Queen's Government. Referring to the possibility of an invasion, the Viceroy said that no enemy could attack the Empire in India without assailing the whole Empire, and pointed out that the fidelity of her Majesty's allies provided ample power to repel and punish assailants. The Viceroy concluded by reading the following telegraphic message from the Queen:—

"We, Victoria, by the grace of God, of the United Kingdom, Queen, Empress of India, send through our Viceroy to all our officers, civil and military, and to all Princes, chiefs, and peoples now at Delhi assembled, our Royal and Imperial greeting, and assure them of the deep interest and earnest affection with which we regard the people of our Indian Empire. We have witnessed with heartfelt satisfaction the reception which they have accorded to our beloved son, and have been touched by the evidence of their loyalty and attachment to our house and throne. We trust that the present occasion may tend to unite in bonds of yet closer affection ourselves and our subjects, that, from the highest to the humblest, all may feel that, under our rule, the great principles of liberty, equity, and justice are secured to them, and that to promote their happiness, to add to their prosperity, and advance their welfare, are the ever present aims and objects of our Empire."

The address was received with general and prolonged cheering, and after three cheers from the troops, the Viceroy declared the assemblage dissolved. The ceremony of the proclamation was performed with all the pomp of heraldry by the

Chief Herald, Major Barnes, and his assistants. The whole assemblage was encircled by an unbroken line of elephants with gorgeous trappings, and the vast masses of spectators presented a brilliant spectacle. The weather was splendid. Most of the camps, in addition to their other decorations, displayed the Danish colours, in honour of the Princess of Wales.

After the great ceremony at Delhi on Monday the Maharajah Scindia and the native chiefs sent a telegraphic message to the Queen congratulating her on the assumption of the title of Empress of India. It is stated that on the occasion of the proclamation of the new title 15,988 good-conduct prisoners were liberated.

There were races on Tuesday at Delhi, which were attended by the principal native chiefs and by the Viceroy in state.

The proclamation of the Queen as Empress of India was made at Calcutta, on Monday, in English, Bengali, and Hindustani, at a durbar which was held on the Maidan, at noon. Mr. O. E. Buckland presided by commission of the Lieutenant-Governor of the Bengal Presidency. The proclamation was followed by a *feu de joie*, and the National Anthem was played by the bands of the troops present. An address was then delivered in the three languages, and certificates of honour were presented to sixty-one native gentlemen. The ceremony was concluded by a march past of the troops.

At Madras her Majesty's title of Empress of India was officially proclaimed by the President of the Council, from the steps of the Townhall. The reading of the Proclamation was followed by a Royal salute. A reception was held at the Government House in the evening, and there was a grand display of fireworks, the city being brilliantly illuminated and the streets gaily decorated in honour of the occasion. Loyal addresses to the Empress were drawn up by the Corporation and the Hindoo community. There was a grand parade of the troops on the island.

ONE OF THE IMPERIAL STANDARDS PRESENTED TO THE FEUDATORY PRINCES AT DELHI.

The proclamation of her Majesty's title of Empress of India was made at Bombay by the Hon. Alexander Rogers, senior member of the Council of the Governor. The reading of the Proclamation was followed by a Royal salute. The good-conduct prisoners, and those deserving of consideration, both European and native, of the Poona district and Yerowda gaols have been released. A similar act of mercy has been extended to the Bombay and other Presidency gaols. The houses were decorated and illuminated in honour of the occasion, and all the public offices are closed from Dec. 25 to Jan. 4, inclusive. The Corporation voted 5000 rupees for the festivities and illuminations, and the remainder of the expense was provided for by public subscriptions.

An Extraordinary Gazette, published on Monday night, contains the following announcement of official honours and appointments bestowed by her Majesty on the occasion of the proclamation of her new title at Delhi:—

WAR OFFICE, Pall-Mall, Jan. 1.—The Queen has been graciously pleased, on the occasion of the proclamation this day at Delhi, of the addition of Empress of India to her Majesty's Royal style and titles, to approve of the honorary rank of General in the Army being conferred on his Highness Jijoi Rao Scindia, Maharajah of Gwalior, G.C.S.I.; and his Highness Ranbir Singh, Maharajah of Jammu and Cashmere, G.C.S.I. Jan. 1, 1877. The Queen has been graciously pleased, on the occasion of the proclamation this day, at Delhi, of the addition of Empress of India to her Majesty's Royal style and titles, to give orders for the appointment of General his Highness Jijoi Rao Scindia, Maharajah of Gwalior, G.C.S.I., to be an Honorary Member of the Military Division of the First Class, or Knights Grand Cross of the Most Honourable Order of the Bath.

THE ORDER OF THE STAR OF INDIA.

INDIA OFFICE, Jan. 1.—The Queen has been graciously pleased, on the occasion of the Proclamation, this day, at Delhi, of the addition of Empress of India to her Majesty's Royal style and titles, to nominate his Royal Highness Arthur William Patrick Albert, Duke of Connaught and Strathearn, K.G., K.T., K.P., G.C.M.G., an Extra Knight Grand Commander of the Most Exalted Order of the Star of India, and to make the following appointments to the First, Second, and Third Classes of the said Most Exalted Order:—

TO BE KNIGHTS GRAND COMMANDERS.

His Highness Ram Singh Maharaj, Raja of Bundi.
His Highness Jawant Singh, Maharaja of Bhurtpore.
His Highness Ishri Prasad Narain Singh, Maharaja of Benares.
His Highness Asim Jah Zahir-ud-dowla Bahadur, Prince of Arcot.

TO BE KNIGHTS COMMANDERS.

His Highness Shivaji Chattrapati, Raja of Kohlapore.
James Fitzjames Stephen, Esq., one of her Majesty's Counsel, late member of the Council of the Governor-General of India.
His Highness Raja Anand Rao Tuar of Dhar.

Arthur Hobhouse, Esq., one of her Majesty's Counsel, Second Ordinary Member of the Council of the Governor-General of India.
His Highness Man Singjee Raj Sahib of Drangdra.
Edward Clive Bayley, Esq., C.S.I., Bengal Civil Service, Third Ordinary Member of the Council of the Governor-General of India.
His Highness The Jam Shri Vibhajee of Naunagar.
Sir George Ebenezer Wilson Couper, Bart., C.B., Bengal Civil Service, Lieutenant-Governor of the North-Western Provinces.
Rear-Admiral Reginald John Macdonald, Commander-in-Chief of her Majesty's Naval Forces in the East Indies.

TO BE COMPANIONS.

Said Fateh Ali Khan Bahadur, Nawab of Bunganapilly.
John Henry Morris, Esq., Bengal Civil Service, Chief Commissioner, Central Provinces.
Jowala Sohai, Dewan of Cashmere.
Whitley Stokes, Esq., Secretary to the Government of India, Legislative Department.
Rao Sahib Wishwanath Narayan Mandlik, Member of the Council of the Governor of Bombay for making Laws and Regulations.
George Thornhill, Esq., Madras Civil Service, First Member of the Board of Revenue, Madras.
B. Krishnalingar, Officiating Deputy Commissioner, Mysore.
Augustus Rivers Thompson, Esq., Bengal Civil Service, Acting Chief Commissioner, British Burmah.
Azam Gowrisanker Ude Sankar, Joint Administrator of Bhaunagar.
Thomas Henry Thornton, Esq., Bengal Civil Service, Acting Secretary to the Government of India, Foreign Department.
Shaahla Shastri, Dewan of Travancore.
Alexander M'Laurin Montesth, Esq., Bengal Civil Service, Director-General of the Post Office.
Bukachee Khoman Singh, Commander of the Forces of his Highness the Maharaja Holkar of Indore.
Theodore Cracraft Hope, Esq., Bombay Civil Service, Acting Secretary to the Government of India Revenue, Agriculture, and Commerce Department.
Husrut Nur Khan, Minister of Jowrah.
Charles Theophilus Metcalfe, Esq., Bengal Civil Service, Acting Commissioner of Police, Calcutta.
Govind Das, Seth of Muttra.
Major Thomas Candy, Bombay Invalid Establishment.
Deobhai Framjee, Second Police Magistrate, Bombay.
Major Robert Groves Sandeman, Bengal Staff Corps.
Captain Leopold John Herbert Grey, Bengal Staff Corps.
Captain Pierre Louis Napoleon Cavaignar, Bengal Staff Corps, Deputy Commissioner, Kohat.
George Christopher Molesworth Birdwood, Esq., M.D. Edin., late Bombay Medical Service.
George Welsh Kellner, Esq., Accountant-General, Military Department, Calcutta.
Edwin Arnold, Esq., late Principal, Poona College, Bombay.

WRECKS AT THE MOUTH OF THE TYNE.

The severity of the gales which ushered out the Old Year is illustrated by the sketches we have engraved of the effects of the late storms at the mouth of the Tyne, the Volunteer Life Brigade whereof particularly deserved the seasonable wish of a "Merry Christmas and a Happy New Year" for their strenuous endeavours to save life while the tempest was at its height. About three o'clock on Thursday morning, Dec. 21, the steamer *Claremont* (Captain Worth), from Hull for Newcastle, drove ashore on the south side of the South Pier at Shields. The crew, consisting of nineteen hands, with the second engineer's wife and child, were rescued by the Life Brigade. About seven, a large steam-ship was observed making for the harbour, when suddenly she drove against the pier end and carried gearing away. The Life Brigade proceeded to the vessel, and on reaching her found that the sea was making a complete breach over her. Striking heavily on the rocks, she heeled, filled, and sank, drowning several of the crew. The remainder took to the rigging, calling piteously for help. Rockets were repeatedly fired over the steamer; but, owing to the position of the vessel's crew, they were unable to make use of the apparatus speedily. The masts were carried away, and those of the crew who were in the rigging, were drowned. The vessel was the steam-ship *Tyne*, belonging to George Otto, North Shields, from London. The captain was Andrew Lunnen. The vessel had a crew of sixteen, all of whom perished. The casualty caused great excitement, and the pier was crowded with thousands of persons. Shortly afterwards the steam-ship *Fenella*, of London, while making for the Tyne, drove ashore on the south side of the South Pier. The *Fenella* and the *Claremont* are shown in one of the Engravings as they appeared on the morrow, side by side, high up on the sands, whither they had been carried by a gigantic wave; and in the same view the wreck of the *Tyne* is indicated at the end of the South Shields Pier.

Further casualties and loss of life are recorded in connection with the gale off the Tyne. A schooner, in endeavouring to enter the harbour, was overwhelmed at the entrance by the huge seas, and foundered with all hands. She was the *New Cornwall*, belonging to Barnstaple. While the schooner *Albion*, of Faversham, Captain Paris, from Gravesend, in ballast, was running to the Tyne, she was struck by heavy seas and driven ashore at Tynemouth. The crew were rescued by the brigade, but the captain and Charles Willox (a seaman) were injured. The wreck of the *Albion* is also represented by our Artist.

The remaining sketch of the entrance to the Tyne was made from the South Shields Pier when the great storm had partially subsided, though it was still somewhat difficult to make the harbour. A glimpse of Tynemouth, with its castle and priory, is given; and our Artist has included in his view the north pier, one of two which have been in course of construction upwards of twenty years, for the protection of the mouth of the Tyne.

The sergeants of the Royal Marine Light Infantry (Portsmouth Division) recently presented to Colour-Sergeant W. Wood, who served in the Alert on the late Arctic expedition, with a handsome ormolu timepiece, "as a mark of esteem, and in admiration of the gallantry and fortitude displayed by him when on a sledging expedition for eighty-four days."

Sir Richard Baggallay, one of her Majesty's Judges of Appeal of the Supreme Court of Judicature, was presented with an address, last Saturday, by the Mayor of Hereford, Mr. Philip Ralph, on the part of the Corporation magistrates of the city and county of Hereford and a number of influential citizens. The presentation was made in a waiting-room at the station on Sir Richard's arrival from London. It is nearly twelve years since his Lordship represented Hereford in Parliament in the Conservative interest.

The proprietor of the *Publishers' Circular* has completed a synoptical table of the publications of the last year, by which it appears there were issued:—Theology, sermons, Biblical, 477 new publications, 216 new editions; educational, classical, philological, 278 and 192; juvenile works, tales, &c., 244 and 175; novels, tales, and other works of fiction, 452 and 405; law, jurisprudence, &c., 101 and 63; political and social economy, trade and commerce, 271 and 106; arts, sciences, and illustrated works, 152 and 100; voyages, travels, geographical research, 177 and 93; history, biography, &c., 288 and 119; poetry, drama, musical, &c., 170 and 152; year books, serials in volumes, 157 and 136; medicine, surgery, &c., 108 and 73; belles lettres, essays, monographs, &c., 100 and 76, miscellaneous, including pamphlets not sermons, 116 new publication, and 60 new editions. The fortnightly issue of the *Publishers' Circular* gives the full title, amounting together to nearly 6000 new books and new editions and importations issued during the past year.

ROYAL INSTITUTION LECTURES.

OLD AND NEW IDEAS OF FIRE.

Dr. John H. Gladstone, F.R.S., the Fallerian Professor of Chemistry, gave the first of the Christmas course of six lectures on the Chemistry of Fire on Thursday week, Dec. 28. Beginning his experiments with the production of a large flame of ignited wood-shavings, he observed that it was very natural that our ancestors should imagine fire to be something which came out of the consumed body; and, in fact, the early philosophers of China and India regarded it as one of five elements. In the earliest Chinese classic, the "Shoo King" (about 1000 B.C.), we read of water, fire, wood, metal, and earth as elements; while the Hindoo lawgiver, Menu, gives ether, air, light or fire, water, and earth. The Greeks adopted four elements, which Dr. Gladstone illustrated by the combustion of wood, in which fire, moisture, air or gas, and ash or earth were shown to be produced. After alluding to the notions of the alchemists respecting sulphur and mercury in relation to fire, he described how the phenomena of combustion came to be regarded as the key to the composition of bodies, which eventually led to the promulgation of two rival theories—one, that when a substance is burnt, something (termed phlogiston) goes out of it; the other, that something goes into it. Hooke and Mayow, in the seventeenth century, discovered that this latter something was a material existing in the atmosphere and in nitre; and that metals were increased in weight by burning, through combination with this unknown material. The problem was solved in 1774, when Priestley separated from the calx of mercury a gas now termed oxygen, and which was proved to be the supporter of combustion and respiration. Lavoisier soon after obtained it from our atmosphere, and proved that fire is only a result of intense chemical combination. The lecture was elucidated by numerous experiments. Sulphur, phosphorus, charcoal, and other substances were shown to burn with far greater brilliancy in oxygen than in air; coal-gas was burnt in oxygen and oxygen in coal gas; and the power of some bodies to separate oxygen from its compounds was illustrated. Thus charcoal extracted it from nitre, and a piece of potassium laid on ice burst into flame by abstracting its oxygen. The lecture concluded with the brilliant combustion of molten iron in oxygen.

PROPERTIES OF OXYGEN.

Professor Gladstone began his second lecture, on Saturday last, by experiments proving that oxygen is not necessary for the production of fire, although the combustions with which we are most acquainted are due to its chemical agency. Thus, light and heat were evolved by the combination of sulphur with copper, and chlorine with antimony. He then exhibited a jar of oxygen, describing its character as a colourless gas, without taste or odour, and which has resisted every attempt to liquefy it. It is one tenth part heavier than air, of which it forms nearly a fourth part; and constitutes eight ninths of water, and about one half of the solids of the earth and of most animal and vegetable bodies. After showing how oxygen may be readily obtained from some of its compounds, especially from chloride of potassium and oxide of manganese, he gave several examples of its remarkable power of combination. Very finely divided lead and iron, liquid zinc-ethyl, and phosphuretted hydrogen, took fire when poured into the air at the ordinary temperature; while other bodies needed to be more or less heated in the first instance, after which they continued to burn by the agency of the oxygen in the air. It was next shown that some of the combinations of oxygen cause changes of colour without the evolution of much heat. The heat of the pale flame of hydrogen-gas was shown to be greatly increased when fed with oxygen, which enabled it to burn steel; and the intensely brilliant lime-light was produced by placing in the flame a piece of lime, which could be neither melted nor burnt. The explosive character of a mixture of oxygen and hydrogen was especially shown by means of soap-bubbles brought in contact with flame. The lecture was concluded with experiments upon the properties of the chlorate and nitrate of potassium, salts which contain a very large amount of oxygen. When these are mixed with combustible substances and heated they burn with great violence, producing large quantities of gas, and causing explosions, of which gunpowder is an instance. Gun-cotton and nitro-glycerine are not mixtures, but true chemical combinations, and may be made to burn slowly or quickly, or detonate, according to the mode of ignition.

NATURE OF FLAME—THE SAFETY-LAMP.

Professor Gladstone, in his second lecture, given on Tuesday last, after exhibiting on the screen the moving shadows of heated gases, explained how flame is produced when a gas is so strongly heated as to become luminous. Taking an ordinary gas flame as an example, he demonstrated that the flame consisted of three parts—1, the interior, which contained unconsumed gas or vapour, and which was so cool that phosphorus and gunpowder remained unburnt within it; 2, the luminous envelope (blue below and white above) where the chemical combination of the gas with the oxygen of the air took place; and 3, the outer film, consisting of the products of combustion, watery vapour, and carbonic acid gas, which, being heavy, descended, while the hot flame rose, being lighter than the atmosphere. The combustion of candles of tallow, wax, and paraffin was shown to be due to the liquefaction of the solid material, its absorption by the wick by capillary attraction, and its transformation into gas by heat; and the improved light of the Argand burner was shown to be due to the introduction of air into the middle of the flame, whereby smoke, due to unburnt fuel, is prevented. Mr. Silber's improved gas-burners were also exhibited and explained; and the powers of the blow-pipe were shown. In the Bunsen burner very great heat is obtained by air being well mixed with the gas; and what has been termed "a solid cone of fire" is produced. The latter part of the lecture was devoted to an interesting description of the way in which Sir Humphry Davy succeeded, after many experiments, in inventing a method of, in some degree, preventing the awfully destructive accidents in mines, occasioned by flame coming in contact with the explosive gas fire-damp. After ascertaining that flame will not pass through narrow tubes, through the dispersion of the heat, he constructed his first safety-lamp, in which the air entered and the products of combustion went out through such tubes. Further research taught him that wire gauze of a certain thickness was sufficient to prevent the passage of flame; and he then formed a lamp by inclosing the wick in a cylinder of such gauze, the prototype of the "Improved Davy," still in use. Professor Gladstone exhibited much of Davy's original apparatus, plunging one of his simplest lamps, with a flame, into explosive gas with perfect safety; and he illustrated the principle by literally filtering burning turpentine. When he poured it on wire gauze the flame was extinguished, and the liquid passed through.

Professor W. F. Barrett, F.C.S., lectured, last Saturday evening, to a crowded audience at the South Kensington Museum, aided by a large collection of scientific instruments from the recently-closed loan collection, which, it is to be hoped, has suggested the propriety of having a national gallery

for science as well as for art. The learned gentleman chose for his subject some practical applications of electricity, illustrating it by experiments, and delighting the assembly by making visible on the screen, by means of oxy-hydrogen light, some of the most interesting of the processes.

On Monday evening Professor Barrett lectured, at the London Institution, on the subject of the analogy of sound and light. The lecture was illustrated with many beautiful experiments, in which the electric lamp and sensitive flames were employed. After remarking on the differences between the vibrations of light and those of sound, Professor Barrett passed on to treat of the analogy of law which they displayed. The extinction of luminous and sonorous sounds was effected in a similar way to that in which two pendulums swinging in opposite directions from a bar mutually counteracted, with regard to the bar, the effect which either would have produced. Two luminous waves of different direction uniting would produce darkness, two sonorous waves would produce silence, and two water waves would produce stillness. Light reflected from a mirror gathered into a focus, and sounds also had their focal distance from which they affected a sensitive flame. There was a striking analogy between music and colour; the rate of vibration in sounds gave rise to the gamut, and in colours the rate of vibration, in like manner, gave rise to the notes forming the spectrum. The colours of the spectrum showed a sequence analogous to the sequence of pitch in the gamut. Newton thought that there might be a correspondence between the length of the spectrum colours and the vibrations of musical sounds; but the true relationship was between the vibrating pitch of colour and the vibrating pitch of sound. The extreme limits of the spectrum embraced an octave in music. Calling red 100, the proportionate vibration of orange was 89, that of yellow 81, that of green 75, that of blue 69, that of indigo 64, that of violet 60, that of ultra-violet 53, and an obscure or extreme violet 50. The vibration of C in music corresponded to that of red in colour, and taking C as 100, the vibration of D was 89, that of E 80, that of F 75, that of G 67, that of A 60, that of B 53, and that of C 50. The vibration of unison, rendered visible, produced on a screen the figure of a circle, that of an octave formed a figure resembling 8, and combinations of figure formed by the visible reflection of intervals of a fourth, a sixth, &c., were proportionately complicated. This was shown by the lecturer by means of tuning forks and sensitive flames; and it was noteworthy that the figure of a discord was as perplexing to the eye as the sound was objectionable to the ear. The exquisite colour produced by permanganate of potash was composed of red and blue, colours which were in harmony, and this corresponded to a fifth in music. One experiment was specially worth recording. Newton's rings had been referred to, and the explanation had been given of the interference of one wave of light, half a wave length behind another producing no effect of light—i.e., darkness—and the successive concentric dark lines thus produced were pointed out. The experiment was the usual one shown on a screen. The analogy of this in sound, the way in which one sound-wave half a wave length behind another produced no sound was thus illustrated. There were two notes sounded with wave lengths exactly coinciding, the sounds being produced in each case through a sort of trombone sounded from a wind-bag. The drawing out of one of the tubes caused one to give out sounds half a wave length behind the other, and the result of this interference of sound was silence. Drawing the tube still further out, till again one was a whole wave length behind the other, the wave lengths again coincided and a note, as before, was produced. In concluding his lecture, which was listened to with great attention, Professor Barrett said that one of the most pregnant results of scientific investigation was the revelation it contained of order in all phenomena, so that the student of nature felt sure that its right interpretation could never put anyone to intellectual confusion.

"CABBY."

Mr. John Dennistoun, honorary secretary to the Cabmen's Shelter Fund, writes to us, under date Dec. 28:—"The introduction of the cabmen's shelters in the west end of London has been very successful. Fifteen are now established, and are all self-supporting. The committee are endeavouring to raise a fund to enable them to erect some in the east end of town, where there are none at present. Donations or annual subscriptions (however small) will be thankfully received by me at the Union Club, Charing-cross. Bankers—Union Bank of London, Chancery-lane, and Messrs. Ransom, Bouverie, and Co."

An appeal is also made on behalf of the Cabdrivers' Benevolent Association. The society will have completed its seventh year in April next, and has now to its credit and in capital invested upwards of £2300. Since its operations have begun about £60 has been given as gifts; £225 has been paid to pensioners, of whom there are eleven at the present time on the society's books, their ages varying from sixty-six years to seventy-nine; and £375 granted as loans, which are regularly and punctually repaid by the borrowers. The loans so granted are much appreciated by the men, who prefer this mode of obtaining help to that of receiving a gift. Nor is the latter ever asked for unless the applicant is in the extreme of distress. Another object the committee have in view is the establishment of a Cabman's Home, where those drivers who are aged and unable to work may pass their remaining days. The cabmen are most anxious to see this object accomplished, and, in response to an appeal from the committee, are daily paying their subscription of ten shillings each member towards this fund. Upwards of £150 has in this manner been received; and a gentleman has kindly promised £100 to supplement the drivers' efforts, provided all the members subscribe. Contributions in aid either of the annuity fund or the building fund of the Cabman's Home may be sent either to the society's bankers, Union Bank, Charing-cross; or to Mr. G. Stormont Murphy, hon. sec., 15, Soho-square, W.

The official return respecting deserters from the Army places the number at 7759 during the year 1876. The number of men who enlisted at Woolwich during the past three years were respectively, 1295, 610, and 897.

During the past year the total receipts of the three Masonic charitable institutions amounted to £39,335 7s. 6d. Of this sum £15,359 5s. 4d. was received by the boys' school, £12,540 15s. 7d. by the benevolent institution, and £11,435 6s. 7d. by the girls' school. These are the largest totals ever yet reached, and the aggregate amount exceeds that of the former year by £7000. Great efforts are being made by the secretaries of the institutions to obtain in the present year even a larger total, and they come before the craft with an excellent plea that the claims on their institution are daily increasing. The benevolent institution paid in the past year £2972 in annuities to ancient Masons and widows; the boys' school maintains, clothes, and educates 189 boys; and the girls' school 162 girls. These figures, however, do not represent a fixed maximum, but are constantly increased.

EDUCATION.

A circular has been sent by the Lords of the Committee on Education to the clerks of the various School Boards, to the effect that the Education Department have had under consideration the regulations to be made by them with respect to certificates of age, proficiency, and school attendance. These regulations will be laid on the table of both Houses when Parliament meets; and, when approved, will be communicated to the school boards throughout the country. The circular further reminds the boards of the duty which devolves upon them (under the 7th section), to "publish the provisions of the Act within their jurisdiction in such a manner as they think best calculated for making these provisions known," and adds that the Lords of the Committee would be glad to be informed in what way the boards have provided, or propose to provide, for the fulfilment of the requirements of the 7th section.—The Education Department has also issued a circular to boroughs without school boards.

In connection with the invitation of the London School Board to the other school boards of the county to join them in asking the Government to appoint a Royal Commission to inquire into the subject of English spelling with a view to simplifying it, we understand that the following school boards have already agreed to co-operate with the London School Board in this matter:—The School Boards of Liverpool, Birmingham, Bradford, Wolverhampton, Rochdale, with many other boards in the smaller towns and country districts. The council of the Society of Arts have also resolved to join in the requisition; the National Union of Elementary Teachers having, some months since, at their annual conference at Liverpool, adopted a resolution to the same effect. In consequence of the encouragement received so far to the proposal, it is contemplated to hold a conference on the subject at the Society of Arts as soon as arrangements can be completed. Several eminent persons have given in their names as conveners of the proposed conference, among whom may be mentioned Professor Max Müller, of Oxford, and Sir Walter O. Trevelyan. The conveners are not committed to any particular scheme of reform, the object being a thorough ventilation of the question. The Bristol School Board has resolved that it is inexpedient that the question of the present method of spelling should be referred to a Special Commission, and that they are not prepared to unite in any representation to the Education Department on the subject.

A resolution was passed by the Preston Town Council, last Monday, appointing a school attendance committee to carry out the Elementary Education Act of 1876. It was stated that Captain Elgee, Government Inspector of Police, had given it as his opinion that the police ought to assist the committee in enforcing the attendance of children at school.

Mr. Thomas E. Smith, M.P., presided at a public meeting held at North Shields, yesterday week, in connection with the Tynemouth School Board election. He expressed himself favourable to the adoption in this country of the system of education established in Boston, U.S., where public elementary schools were attended by every class of society.

The Warrington Town Council, on Tuesday, appointed a school attendance committee, consisting of twelve members of the Council, to carry out the provisions of the Elementary Education Act.

We have already given the instructions issued by the School Board explaining the liabilities of parents under the amended Education Act. The Board has also intimated to employers the regulations affecting them, it being premised that, in the eye of the law, a parent employing his own child for any purpose of "trade" or "gain" is an employer. The summary of the statute is as follows:—

No person may employ, in the year 1877, any child who is under the age of nine years, or in subsequent years any child who is under the age of ten years. No person may employ a child within certain limits of age, unless the child shall have obtained either a certificate of proficiency that he has reached the fourth standard of the Code of 1876, or a certificate that he has previously made 250 attendances, at least, in not more than two schools, during each year for a certain number of years, whether consecutive or not, as follows:—In 1877, children between nine and twelve, with the exception of those who were eleven before Jan. 1, 1877, who have attained the fourth standard of 1876, or made due attendance for the previous two years; in 1878, children between ten and thirteen, with the exception of those who were eleven before Jan. 1, 1877, who have reached the fourth standard of 1876, or made the two previous years due attendance; in 1879, children between ten and fourteen, with the exceptions before stated, and they must also have attained to the fourth standard or have made the three previous years due attendances; in 1880 children between ten and fourteen, with the exception of those who have passed the fourth standard or have made the four previous years due attendances; in 1881 and subsequent years, children between ten and fourteen who have passed the fourth standard or have made the five previous years due attendances.

The penalty incurred by an employer who acts in contravention of the above provisions is a sum not exceeding 40s., but no penalty will be incurred by the employer—(a) if the child was lawfully employed on Aug. 15, 1876; (b) if the child obtains efficient instruction by attendance at school for full time or in some other equally efficient manner; (c) if the employment be during a specified time allowed by the school board for the purposes of hui-bandy, &c., and if the child be over eight years of age and be so employed; (d) if the child be employed and be attending school in accordance with the provisions of the Factory Acts, or of the by-laws of the School Board; (e) if the employer be bona fide deceived as to the age of the child or as to his having obtained a certificate, or if some agent, without the knowledge of the employer, shall have employed the child, in which latter case the agent will be liable to the penalty. Although the employer be exempt from penalty when the child is lawfully employed under the above regulations, the parent will still be liable for any breach of the by-laws where the latter are more stringent.

Under the head of "Regulations as to the Payment or Remission of Fees," it is stated, "If a parent is unable, from poverty, to pay the school fee of his child, he may apply either to the guardians of the poor for the parish where he lives, or to the School Board. The guardians, if satisfied of the poverty of the parent, must pay the school fee, not exceeding three-pence a week, of the child in any public elementary school which the parent may select. If the parent select a board school, the school board, on his application, may, if they think fit, remit the school fee. The payment or remission of the school fee will not submit the parent to any disability." In respect to "free instruction," it is stated:—"Subject to conditions to be made by an order of the Education Department, a child under eleven years of age who obtains a certificate that he has attended a public elementary school 350 times a year, for two, three, four, or five years, according to circumstances, and also that he has attained a standard (to be fixed by the department) in reading, writing, and arithmetic, will be entitled to have his school fees paid for him by the Education Department at a public elementary school for three years more."

It appears from the annual returns of the volunteer force for the year just ended that the enrolled strength has increased from 181,080 in 1875 to 185,501 in 1876, the number of efficient being raised from 163,709 to 174,184, and the percentage of efficiency to enrolled strength from 93.16 to 93.89. The number actually present at the official inspections was 151,753, being 81.80 per cent of those enrolled. The officers and sergeants holding certificates of proficiency have also increased from 14,869 last year to 15,525 at the present time.

The Times began yesterday (Friday) to issue a weekly edition of the Times, price twopence, "containing all that is of special or permanent interest in the editions of the six previous days, and printed in a form suitable for binding as an annual volume, or for postal transmission abroad." Two other weekly papers, *Mayfair* and *Truth* (said to be offshoots from the *World*), begin their existence this week.—Another of those powerful machines, the Walter press, has been added to the machinery by which the *Daily News* is printed, being the seventh Walter press now in that office. These seven machines work at the rate of 12,000 per hour each.

THE EASTERN QUESTION: PROCLAIMING THE CONSTITUTION AT CONSTANTINOPLE.
FROM A SKETCH BY OUR SPECIAL ARTIST.

THE RIGHT REV. E. W. BENSON, BISHOP OF TRURO.

THE LATE CAPTAIN G. F. DAY, R.N., V.C.

THE RIGHT REV. E. R. JOHNSON, BISHOP OF CALCUTTA.

THE BISHOP OF TRURO.

The Order in Council respecting the Bishop of Truro having been duly published in the *London Gazette*, the nomination of the Rev. Edward White Benson, D.D., Chancellor of Lincoln Cathedral, as first Bishop of Truro, soon followed. The Right Rev. Dr. Benson was born about the year 1830, and was educated at Trinity College, Cambridge, of which he was successively Scholar and Fellow, and where he graduated B.A. in 1852, as a first class in Classical Honours, and Senior Chancellor's Medallist, obtaining also the place of a Senior Optime in the Mathematical Tripos. He was ordained deacon in 1853, by the Bishop of Manchester, and admitted into priest's orders four years later by the Bishop of Ely. He was for some years an assistant master in Rugby School, and held the head mastership of Wellington College from its first opening down to 1872, when he was appointed to a residentiary canonry in, and the

chancellorship of, Lincoln Cathedral, having been a prebendary of the same cathedral for three years previously. He was a select preacher at Cambridge in 1864-71, and again appointed in 1875. He was nominated Honorary Chaplain in Ordinary to her Majesty in 1873. He was examining chaplain to the Bishop of Lincoln, and is known as one of the contributors to the "Speaker's Commentary." Dr. Benson married, in 1859, Mary, daughter of the late Rev. William Sidgwick, of Skipton, Yorkshire. Our portrait of the first Bishop of Truro is taken from a photograph by Mayall, of King's-road, Brighton.

CAPTAIN DAY, R.N.

Captain George Flott Day, V.C., C.B., &c, entered the Navy in 1833. Before he obtained his commission as Lieutenant he saw active service on board the *Benbow*, Captain Houston Stewart, in the Mediterranean, and commanded the barge of

his ship in the attack on the town of Tortosa, on the coast of Syria, and was present in the *Benbow* at the bombardment of St. Jean d'Acre in 1840. He was appointed Lieutenant, Dec. 13, 1845, and, after various services was, in November, 1851, appointed Lieutenant-Commander of H.M.S. *Locust*, with which he served in the Baltic Fleet, under Sir Charles Napier, in 1854. In the following year he joined the Mediterranean Fleet, where he was appointed Lieutenant-Commander of the *Recruit*, in which ship he gained the highest distinction for his gallantry. He distinguished himself by his gallantry performed, on Sept. 17 and 21, in the Sea of Azov, for which he was decorated with the Victoria Cross, and was among the first recipients of that honoured decoration, and was promoted to the rank of Commander. In May, 1856, he was appointed Commander of H.M.S. *Firefly*, in which he was employed on the West Coast of Africa. He subsequently commanded H.M.S. *Sphinx* during the Chinese War. He was promoted Post Captain in August, 1861; but, in consequence

THE RECENT ELECTION TROUBLES IN SOUTH CAROLINA: SCENE IN THE HOUSE OF REPRESENTATIVES AT COLUMBIA.

of impaired health, was compelled to decline active employment, and, in February, 1867, was placed on the captain's retired list. In further recognition of his valuable services, he was nominated a Companion of the Bath in May, 1875. He would have shortly attained flag rank. He married, in 1858, Mary, third daughter of the late James Ruddell-Todd, Esq., formerly M.P. for Houniton, who survives him, and has left a family of three daughters. Captain Day's portrait is from a photograph by Mr. Charles Wootton, of Taunton.

THE BISHOP OF CALCUTTA.

The Right Rev. Edward Ralph Johnson, fifth son of William Ponsonby Johnson, of Castlesteads, in the county of Cumberland, was born at Castlesteads, on Feb. 17, 1828; was educated at Rugby, and at Wadham College, Oxford; graduated Bachelor of Arts, 1850, and Master of Arts, 1860. He was ordained deacon and priest by the Bishop of Worcester—deacon, with a title to the curacy of Farnborough, in the county of Warwick—in 1851. He was appointed, in 1860, to a minor canonry in the Cathedral of Chester, and to the curacy of the cathedral parish of St. Oswald. In 1866 the Dean and Chapter appointed him to the rectory of Northenden, in the county of Chester, where he succeeded the late Archdeacon Woolrough. He was selected by the Bishop of Chester, in 1871, to fill the post of Archdeacon of Chester, upon the resignation of the late Archdeacon Pollock. It was towards the close of 1876 that he was appointed to the bishopric of Calcutta, vacant by the death of the late Dr. Robert Milman. The portrait of the new Bishop is taken from a photograph by Messrs. Maull and Co., of Piccadilly and Cheapside.

THE PRESIDENTIAL ELECTION IN AMERICA.

Our American cousins have found it a difficult task to decide "under which king" or President—Mr. Tilden or Mr. Hayes—they will serve during the next four years. The election of electors to decide this vexed question caused the Constitution of the United States to be stretched to its utmost tension in South Carolina. It is one of the critical scenes in the State Legislative Assembly of South Carolina at Columbia which our Artist illustrates. South Carolina became, in fact, the battle-ground of the Democratic and Republican parties; and the political contest was waged with great fury in November last. A special correspondent of the *Times*, writing from Columbia, Dec. 16, says:—"In the cases of the counties Laurens and Edgefield the Democratic candidates, had, on the face of the returns, majorities of votes which gave them a *prima facie* right to take their seats in the House of Representatives and the Senate. The Board of Canvassers 'went behind' these returns, and decided, on evidence obtained independently and outside of them, that the majorities were due to fraud and intimidation, and refused to make the usual statement which would have entitled the candidates to certificates of membership." Thereupon, it will be remembered, the Board of State Canvassers were committed to prison for contempt of the Supreme Court, "on account of having assumed judicial functions in defiance of the decisions and orders of the Court, and issued certificates of election to the Hayes presidential electors and to the Republican members of the Legislature in those cases where grave questions had arisen, and adjourned *sine die* at the very instant almost that the Supreme Court was issuing a peremptory mandamus directing the board to issue certificates of election to the senators and representatives of the General Assembly ascertained by the board to have received the highest number of votes. A fine of 1500 dols. was also imposed on each member of the Board of Canvassers. Party excitement then ran so high that the House of Assembly at Columbia was guarded by United States troops on Nov. 28 and 29. On the latter date the scene pictured in our Illustration occurred. The Democratic members, headed by the representatives from Edgefield and Laurens, were refused admission to the House on the 28th, when the Republicans, were in possession, and elected Mr. E. W. Mackey, of Charleston, as their Speaker. Retiring to the space in front of the Capitol, the Democrats read aloud a protest against the action of the military, whereupon the vast concourse of citizens outside showed signs of agitation, and General Hampton, "the handsomest man of his State," had to appeal to the people to preserve the peace. In the evening the Democrats held a caucus in the South Carolina Hall, and appointed General Wallace as their Speaker; on the morrow, Nov. 29, the troops admitted them to the House of Assembly, which they entered in a body, after a vain resistance on the part of the doorkeepers. General Wallace forthwith took the chair. The scene of confusion that ensued is delineated in our Engraving, and is described in those terms by an American contemporary:—"Another lull now ensued, and the hour was about eleven a.m., when all eyes were attracted to the door of the House by the entrance of E. W. M. Mackey, who was accompanied by the coloured Clerk of the House, A. M. S. Marshall, and Detective Hubbard, of the State Constabulary. Mackey's face turned ghastly white with rage when he took in the situation. He proceeded to the stand, trembling with excitement as he went, and, running up the steps, followed by the Clerk, demanded that General Wallace should vacate his seat. Each speaker claimed to have been legally chosen by legally elected legislators, and, as neither would retire, the singular spectacle was presented of two deliberative assemblies attempting to conduct public business in the same room and at the same time. The Sergeant-at-Arms of each party was ordered to clear the hall, but they were unable to do so. The Speaker of each party called upon members who had not been sworn to come forward for that purpose, but none advanced. Alleged members, rising and addressing their respective Speakers, were called to order by their antagonists, but refused obedience. Mr. Thomas (coloured), Chairman of the Committee on Privileges and Elections, in response to Mr. Mackey's request, succeeded in sandwiching between the outbreaks a prayer, and a few men got in either exciting or calming speeches. The session of the dual Legislature continued all day and night, and up to noon on Friday, when motions were offered by each side to adjourn, and, each being put by the Speakers, was carried."

The gold medal for the Royal Artillery Institution prize essay has been awarded to Colonel H. A. Smyth.

Mr. Chamberlain, M.P., brought before the Birmingham Town Council, on Tuesday, his scheme for a new licensing system, and replied to Mr. Lowe's article in the *Fortnightly Review*. A resolution approving of the scheme was adopted.

At the quarter sessions of the county of Huntingdon it was stated that, while the population of the county has decreased, the amount of lunacy within its boundaries has increased. It was resolved to take steps, in conjunction with the counties of Bedfordshire and Hertfordshire, to enlarge the Three Counties Asylum at Arlesey.

BOOKS ABOUT FLORENCE.

As the honest Athenian was, by his own confession, provoked into ostracising Aristides, whose praises had been sung even to nauscouness, so, it is to be feared, a long-suffering generation may be goaded into flat blasphemy by the incessant eulogies heaped upon that fair city, whose glorification is the theme of *The Makers of Florence*, by Mrs. Oliphant (Macmillan and Co.), a handsome volume, with upwards of fifty-five illustrations, themselves sufficient to claim no little attention and to excite no reluctant admiration. And, perhaps, a better case might be made against Florence than was forthcoming in the case of the just man of Athens. A great deal depends upon the circumstances under which, and the state of mind in which, you proceed to form your estimate. Say that you are at Florence in the month of May—such a May, in all its soft loveliness and with all its freshness of verdure as, notwithstanding Mrs. Oliphant's insinuations, has been known, even within the memory of living men, in Merry England; say that you are not pressed for time or money; say that you have the leisure and the intelligence to indulge in quiet, regulated contemplation of whatsoever is most beautiful, where nearly everything is beautiful, in architecture, and in sculpture, and in painting; say that you are possessed by the spirit of veneration for antiquity; say that you are well primed with reminiscences, poetical and romantic, from the works of Dante and Petrarch and Boccaccio; say that you are familiar with what has been written by Guicciardini and by Vasari; and say that, on some morning of such a May as has been supposed, you have mounted to the celebrated hill whence there bursts upon your gaze a full view of the fair city and the glories of it, with the Duomo and the Campanile, and the Arno, flowing like a stream of silver beneath its bridges;—then, indeed, as the recollections of many ages crowd upon you, mingled with the grand reality beneath your eyes, you may be touched by an enthusiasm similar to that of Mrs. Oliphant, and may fancy that what you see is a vision of the earthly paradise. But let your visit be at another period—either when the Arno has dwindled down to a few spoonfuls of what looks like pea-soup, whence the dire mosquito ascends to sound his nightly trumpet in your ears and plunge his venomous weapon into your skin; or when the river, swollen past restraint, overleaps the parapets of its bridges, whilst the bitter wind sweeps down the Lung' Arno, as if it were fain to cut you in two; and Florence will wear a different aspect. Especially if your time be short and you have fallen among friends with lionising propensities. Then you will compare the Duomo unfavourably with St. Paul's Cathedral; then the grim palaces will remind you of Newgate prison; then the churches will appear to you overdone, both in number and decoration; then you will have your eyes opened to the nuisances of the streets; then the sturdy beggars will impress you rather with their importunity than with their picturesqueness; then the Florentines will appear to you to make but a poor show either in the way of gardens or of a racecourse; and, as for their painters, you will think that it had been good for you if Andrea del Sarto, at any rate, with his perpetual Madonna and Child, had never been born. If you would be constant in your love of Florence—a love, that is, without alloy—it were best to remain at home and read such books as Mrs. Oliphant's, wherein the tone is enthusiastic and affectionate even to a pathetic extent, and the colour is almost altogether rosy, save where historical fact requires that the rosiness should be deepened to the crimson hue of blood. She has not written a history of Florence, but biographical sketches of those whom she is pleased to term "the makers of Florence." First comes the poet Dante; then we are introduced to the "cathedral builders," to Arnolfo, Giotto, Ghiberti, Donatello, Brunelleschi. Under the title of "a peaceful citizen," Agnolo Pandolfini is held up as an example of how a good citizen and shopkeeper could manage to "increase and prosper, and add scudo to scudo, and get himself a peaceful villa in the neighbourhood," amidst "all the turbulence and agitation of such a life as that of Florence" in the fifteenth century. Then come the "monks of San Marco," beginning with Fra Angelico and ending with Fra Bartolommeo—the tragic story of Savonarola, of course, intervening. And, lastly, there is a short account of the stupendous Michel Angelo; an account which, if it had seemed good, might have been made more complete and more interesting by supplementary information derived from the most recently published life of that mighty genius, of whom it may be said that there were giants in the land in his day, and that he stood as conspicuously high among the giants as Saul among the men of Israel. Whether Savonarola can be properly classed with the "makers" of Florence, and whether, as he was not a native Florentine and has had his memory kept pretty green by works as popular as the "Romola" of George Eliot, he may not be considered to occupy an unnecessarily large number of Mrs. Oliphant's pages, is a question about which there will probably be a difference of opinion, though there can be no such difference touching the excellence of the narrative and the sympathetic spirit in which it is written. If to that or to any other portion of the book an objection were to be made, the burden of it would most likely be a charge of verbosity.

For a full, true, and extremely particular account of Florence and her fortunes, as affected by the family of the Medici, the inquirer must be referred to the two huge volumes entitled *Lorenzo de' Medici*, translated, by Mr. Robert Harrison, from the German of Herr von Reumont (Smith, Elder, and Co.), two volumes in which it is clear that the author works with a double portion of that spirit of minute research, patient industry, microscopical investigation, and methodical arrangement which has made his countrymen proverbial. That such a writer, if he did not begin his task of biography from Genesis, would go very gradually and preparatorily to work, was only to be expected; and therefore no astonishment is likely to be felt at the announcement that Lorenzo the Magnificent is not even born until one arrives at the hundred and sixty-eighth page of the first volume, the preceding pages having been devoted to paving the way for a proper appreciation of that event by an elaborate essay relating to "Florence and the Medici to the Death of Cosimo the Elder," who was gratefully commemorated as "pater patriæ." When Cosimo died he left but one legitimate son, Piero the Gouty, whose eldest son was Lorenzo, to be known afterwards, and perhaps for ever, as the Magnificent. "Nature," it appears, had given Lorenzo "strength, but not beauty;" and, "to judge from his exterior, one might have promised him a long life, but not a brilliant one." The promise, however, would have been rash; for his life was, on the contrary, brilliant but short, inasmuch as he died at the age of forty-three, having lived but a brief span "for such manifold activity and such lasting fame." When Herr von Reumont has once started us upon the pursuit of Lorenzo's career, there is still no symptom of hurry; the pace is as deliberate as ever; and constant halts are made for the thorough investigation of the smallest details appertaining to the family of the Medici and to the influence which that family exercised over the fate of Florence, as regards domestic matters or foreign affairs, in peace and in war, in the various domains of politics, finance, literature, and

art. The best idea of the comprehensive manner in which Herr von Reumont has dealt with his subject may be gathered from a bare statement of the plan upon which he has divided his work. The first volume contains three "books" and the first part of a fourth, devoted, respectively, to a study of "Florence and the Medici to the Death of Cosimo the Elder;" of "Piero de' Medici and the first years of Lorenzo the Magnificent;" of "the conspiracy of the Pazzi and the war with Rome and Naples;" and of "the Medici in relation to literature and art." The second volume begins with a continuation of the fourth "book," the literary and artistic theme whereof is prosecuted continuously, and exhaustively completed in three distinct parts; and a fifth and sixth "book," bringing the volume to a conclusion, save for the additional information afforded by chronological, genealogical, and other appendices, are appropriated respectively to tracing the "development of the supremacy of the Medici," and to reproducing the picture presented by the "later years of Lorenzo de' Medici's life." There are, moreover, the usual subdivisions into chapters, in each of which some particular event or group of events, whether it be Lorenzo's appearance at a tournament, or his marriage, or his behaviour at his brother's murder, or anything else, are entered into and set forth with the most unsparring pains and diligent accumulation of facts; whilst the general aspect of contemporaneous history, so far as it has any bearing upon Florence and the Medici, receives an ample amount of consideration. Herr von Reumont, in fact, worked with that circumstantial regard for the smallest detail which is noticeable in those who perform a labour of love and gratitude; nor is the secret of the feelings which prompted him difficult to discover. It is revealed in the words of his own preface, words in which he acknowledges how much he owes to Cino Capponi, the historian, to whom he has inscribed his book, and through whom Florence became to him "a second home." The character of Lorenzo the Magnificent has given rise to no little disputation, but it is summed up by Herr von Reumont, at considerable length, with a reasonableness, if not an impartiality, which can hardly fail to command acquiescence, if not assent. That Lorenzo was "the most brilliant representative of a remarkable time" nobody, perhaps, would care to deny; that "he had all the qualities of poet and statesman, connoisseur and patron of learning, citizen and prince," is a statement which contains so much of truth that it is hardly worth while, at this distance of time, to call any part of it in question. And certainly no contradiction will be given to the assertion that "he was not without the weaknesses and vices of his time," which are pleaded as the obstructive influences which "cramped his policy." As for his "arbitrary proceedings in money matters," the best excuse that can be offered is but a lame one; and not much more can be said for the defence made against those who have accused him of aiming "at becoming a recognised prince." Touching the latter point, the early age at which he was removed is not without significance. As to the religious sentiments of Lorenzo, and the two contradictory stories concerning his dying interview with Savonarola, the reader will not appeal to Herr von Reumont's pages in vain, though no satisfactory conclusion may be derived therefrom. Perhaps one of the most astonishing facts recorded about Lorenzo is contained in the following passage:—"He was entirely destitute of the sense of smell, and his voice was harsh. These natural defects he conquered with equal skill and perseverance." What amount of skill and perseverance can supply the absent sense of smell—though they can, no doubt, reduce a harshness of voice—it is impossible to conceive; and, what is more, the sense of smell is just that, perhaps, which one would be most content to lack in Florence.

MUSIC.

The suspension of our important serial concerts, usual at Christmas time, has been but brief, some being already resumed, and others on the point of renewal.

The earliest performance of 1877 was that of "The Messiah," under the direction of Mr. William Carter, at the Royal Albert Hall, on Thursday evening; the solo-singers announced having been Mesdames Lemmens-Sherrington and Patey, Mr. E. Lloyd, and Signor Foli.

Yesterday (Friday) evening "Elijah" was to be performed by the Sacred Harmonic Society, with Mesdames Sherrington and Patey, Misses Jessie Jones and Hancock, Mr. Wilford Morgan, Mr. Carter, Mr. Chaplin Henry, and Mr. George Fox as solo vocalists.

This (Saturday) afternoon, the London Ballad Concerts, directed by Mr. John Boosey, open their eleventh season at St. James's Hall, where the nineteenth season of the Monday Popular Concerts will be resumed on Monday evening.

At the Crystal Palace the attraction of the pantomime will prevent the resumption of the Saturday afternoon concerts until Feb. 3, when the occasion will be rendered commemorative of the birthday of Mendelssohn by the performance of a selection from his works.

MUSICAL PUBLICATIONS.

"Songs composed, and in part written, by the late Rev. John Park, D.D." (Leeds, Archibald Ramsden; London, Hutchings and Romer), is a goodly-sized and handsome volume, containing upwards of sixty vocal pieces (with pianoforte accompaniment), in various styles, sacred and secular. The composer of the music and author of some of the words, was minister of the first charge of St. Andrew's; and his estimable, amiable, and intellectual character, and unobtrusively pious career, are eloquently sketched by Principal Shairp, of St. Andrew's, in a prefatory memoir. The music is generally far above the average of amateur productions, being of a very melodious character, and written with evidence of a sound study of the laws of harmony. The original words, too, flow smoothly, and reflect much poetical feeling. The borrowed lines are from various great poets, ancient and modern.

Mr. Lonsdale, of Old Bond-street, has just published Handel's "Water Music," arranged for the pianoforte and edited by Mr. Pittman, the eminent organist of the Royal Italian Opera. This *pièce d'occasion*, which was composed in 1714 for performance during a Royal progress on the Thames, consists of an overture followed by a series of movements, some in dance form (including a hornpipe), all impressed with the power of the master. It has been asserted that this was the first work in which French horns were used. Mr. Pittman's arrangement is excellent, and enables the player to realise all the essential features of the score.

Mr. Charles Salaman's setting of Mrs. Hemans's lines, "Oh, linger on the oar" (Messrs. J. B. Cramer and Co.), and of Lord Byron's verses from "The Corsair," "Without thine ear to listen to my lay" (Messrs. Lamborn Cock and Co.), are distinguished by much grace of character both in the vocal portion and in the accompaniment. The singer in each case need not possess a voice of very extensive compass, but some declamatory power is desirable.

OBITUARY OF EMINENT PERSONS.

SIR R. GORE-BOOTH, BART.

Sir Robert Gore-Booth, fourth Baronet, of Lissadell, in the county of Sligo, M.P. and Lord Lieutenant for that county, died at Lissadell, on the 21st ult. He was born Aug. 25, 1805, the elder son of Sir Robert Newcomen Gore-Booth, by Hannah, his wife, daughter of Henry Irwin, Esq., of Streamstown, in the county of Sligo, and succeeded his father, when only nine years of age, Oct. 23, 1814. He was educated at Westminster, and at Queen's College, Cambridge, where he graduated M.A., 1822, being subsequently admitted, ad eundem, at Trinity College, Dublin. Sir Robert sat in Parliament for the county of Sligo, in the Conservative interest, from 1850 to the time of his death, and served as High Sheriff for that county in 1830. He married, first, March 23, 1827, Caroline, second daughter of Robert Edward, first Viscount Lorton, by whom (who died in the January of the following year) he had no issue. He married, secondly, April 2, 1830, Caroline Susan, second daughter of the late Thomas Gould, Esq., of Dublin, Master in Chancery, by whom (who died Jan. 16, 1855) he had two sons—Robert Newcomen, who died 1861, and his successor, now Sir Henry William Gore-Booth, fifth Baronet, who was born in 1843; married, in 1867, Georgina Mary, only daughter of Colonel and Lady Frances Hill, of Tickhill Castle, Yorkshire, and niece of the present Earl of Scarborough; and has a son and three daughters. The Gores, represented by the Baronet Gore of Lissadell, are a branch of the noble house of Gore, whose chief is the Earl of Arran.

SIR TITUS SALT, BART.

Sir Titus Salt, Bart., of Saltaire and Crow Nest, both in the county of York, died at his seat near Halifax, on the 29th ult., aged seventy-three. He was the son of Daniel Salt, of Bradford, by Grace, his wife, daughter of Isaac Smithies, of The Manor House, Morley, and succeeded, after a career of energy and honourable dealing, in raising himself to be head of the great manufacturing firm of Messrs. Titus Salt, Sons, and Co., of Saltaire, near Bradford. Of that town he became senior Alderman, and served the office of Mayor. From May, 1859, to February, 1861, he was its M.P., and in 1869 was granted the title of Baronet, in recognition of his high commercial position and his extensive philanthropy. The flourishing town of Saltaire is a creation of Sir Titus's munificence. It is stated that he spent more than £100,000 in the promotion of the happiness of his people there, building schools and endowing churches. He was J.P. and D.L. for the West Riding of Yorkshire. Sir Titus married, Aug. 21, 1830, Caroline, daughter of George Whitlam, of Great Grimsby, and had six sons and five daughters. Of the former, the eldest, now Sir William Henry Salt, second Baronet, was born Dec. 5, 1831, married, Dec. 7, 1854, Emma Dove Octaviana, only child of John Dove Harris, Esq., of Ratcliffe Hall, in the county of Leicester, and has a son, Shirley Harris, and a daughter, Constance.

The deaths are also announced of:—

The Hon. Rachael Borthwick, daughter of Archibald Borthwick, banker in Edinburgh, *de jure*, seventeenth Lord Borthwick, on Dec. 28, aged ninety-one.

William Clayton Clayton, Captain in the 9th Lancers, on the 26th ult., from the effects of a fall at polo during the recent great celebrations at Delhi.

Lieutenant-General George Campbell, C.B., late 52nd Light Infantry and Colonel of the 85th Regiment, on the 22nd ult.

Captain George Flott Day, R.N., C.B., V.O., Knight of the Legion of Honour, on the 18th ult., aged fifty-six, fourth son of the late Charles Day, Esq., of Bevis-hill, Southampton.

Edward Dalton, Esq., D.C.L., F.S.A., Barrister-at-Law, of Dunkirk Manor House, a member of the Archaeological Institute and other literary societies, at his seat near Amberley, on the 28th ult., in his ninetyeth year.

George James Farsyde, Esq., of Fylingdales, Yorkshire, J.P. and D.L., Barrister-at-Law, on the 27th ult., aged seventy-three; second son of the late J. Farsyde, Esq., J.P., of Bilton Park, North Riding, who assumed the surname of Watson.

Isabella, Lady Fremantle, widow of Admiral Sir Charles Howe Fremantle, G.C.B., on the 26th ult., in her eighty-first year; she was daughter of David Lyon, Esq., and was first married to James Wedderburn, Esq.

Lady Charlotte Sophia Gordon, second daughter of George, ninth Marquis of Huntly, K.T., by Catherine, his wife, daughter of Sir Charles Cope, Bart., on the 21st ult., in her eighty-first year.

Lieutenant-Colonel Francis Augustus Gould, at The Bury, Herts., on the 24th ult., in his eighty-first year.

General Robert Hawkes, late of H.M. Bengal Cavalry, on the 18th ult., in his eighty-seventh year.

Robert Hills, Esq., of Colne Park, Essex, J.P. and D.L., High Sheriff, 1856, on the 18th ult., in his eighty-first year. He was grandson of Thomas Astle, Keeper of the Records in the Tower of London, and son of Philip Astle, Esq., of Colney Park, who assumed the surname of Hills, in 1790, on inheriting the estate of Michael Robert Hills, Esq.

The Rev. Luke Jackson, M.A., at Hucknall, Torkard, Notts on the 23rd ult., in his ninetyeth year.

James John Kinloch, Esq., late of Kair, Kincardineshire, D.L., for many years attached to her Majesty's household, on the 27th ult., aged seventy-two.

Colonel Peter W. Luard, Bengal S.O. and late Colonel 21st Punjab Light Infantry (grandson of the late Captain Peter John Luard, 4th Dragoons, of Blyborough, in the county of Lincoln), on the 21st ult., aged fifty-nine.

John Rolt, Esq., of Osleworth Park, Gloucestershire, from a fall out hunting, on the 23rd ult., aged forty-three. He was eldest son of the late Right Hon. Sir John Rolt, M.P., Attorney-General and, finally, Lord Justice of Appeal.

The Rev. John Henry Augustus Rudd, formerly Chaplain in Bengal, and for fifteen years Rector of Elstow, Bedfordshire (youngest son of the late Rev. Eric Rudd, Vicar of Thorne, Yorkshire), on the 23rd ult., aged sixty-seven.

Mrs. Thomson-Sinclair, of Freshwick, and Dunbeath Castle, Caithness, widow of William Thomson-Sinclair, Esq., J.P. and D.L., and eldest daughter of William Sinclair, Esq., of Freshwick, on the 28th ult., in her sixty-seventh year.

Annie, Lady Waller, wife of Sir Edmund Arthur Waller, Bart., and daughter of George Parsons, Esq.

CHESS.

J.B. (Borford).—We cannot undertake to examine problems unaccompanied by the author's solutions. There would be a grievous waste of time if, as frequently happens, there is no solution according to the conditions. If you send the solution your problem shall have our best attention.

GULMAO.—Your Knight's tour is a very elementary one; and, besides, although it is a highly interesting and even scientific problem, it is not chess.

DELTA (Dulkeith).—We have inquired about the game referred to and hope to receive it in the course of a week or two.

T.B. (Clevedon).—Thanks for the games. They shall have early attention.

A READER OF TWENTY YEARS (Leicester).—Please to furnish us with the names of the players. We require such information, not for publication, but for our own satisfaction.

A.B. (West Brompton).—We shall be obliged if you will forward us copies of the problems referred to.

PROBLEMS received from W. Coates, J. Pierce, C.M. Baxter, G.L. de Boer, J.G. Finch, and J.W. Abbott are acknowledged, with thanks.

CONCISE SOLUTIONS OF PROBLEM No. 1715 received from T.L. Radwaner, B. Caril, Mibudad, B. Lewy, T. Shippen, Timmins.

CONCISE SOLUTIONS OF PROBLEM No. 1716 received from J.K. Woolwich Chess Club, Olive Cray, J. de H. Cant, East Marden, J. Northwich, W.F. Payne, Bailey Zion, Honny Dundee, W. Thomson, W. Nelson, S. Lamb, J.S.W. J.B.T. Yankee, and Alfred. The correspondents who assert that there is a solution to this problem by K to Q 3rd, K to K 3rd, &c., have apparently overlooked Black's resource on the second move, B to Q 7th, after which White cannot mate on the next move.

WHITE. BLACK. WHITE. BLACK.
1. B to K 3rd B takes B (ch) S. Q or Kt mates accordingly.
2. K takes B Any move.

PROBLEM No. 1716.

By J. PIERCE, M.A.

BLACK.

WHITE.
White to play, and mate in two moves.

CHESS IN LONDON.

The two following Games were played at Simpson's Divan between Mr. BODEN and the late Herr LOWENTHAL in December, 1872.

(King's Gambit declined.)

WHITE (Herr L.) BLACK (Mr. B.)
1. P to K 4th P to K 4th
2. P to K 4th P to K 4th
3. Kt to K 3rd P to Q 3rd
4. P to B 3rd B to Kt 5th
5. P to Q 4th
On the third move White might have resolved the opening into a variation of the Vienna Game by playing 3. Kt to Q 3rd. At this point it is advisable to play B to K 2nd before advancing the Q P.
6. P takes P P takes Kt
7. P takes B B takes Kt
8. K to K 2nd B to Kt 3rd
9. B to K 3rd Kt to K 2nd
10. Q to Q 2nd P to K 4th
11. P to K 2nd Q to R 4th
12. P to K 5th P takes P
13. K B P takes P Q Kt to B 3rd
Mr. Boden's method of conducting this phase of the King's Gambit declined is always marked by originality and vigour. He now threatens to castle on the Queen's side, with an overpowering attack on the adverse centre.
14. Kt to R 3rd
This is plainly inefficient, but already White's game appears to be hopeless.

WHITE (Herr L.) BLACK (Mr. B.)
14. Kt to B 4th Castles, Q R
15. Kt to B 4th B takes P
16. Q to B 2nd Kt to Q 4th
17. B to Kt 3rd K R to K sq
18. B to Kt 2nd P to K 3rd
19. B to B 2nd Kt takes P
20. Kt takes Kt
Apparently his best move. If he play B takes B, White takes Kt with Kt, discovering check, and wins easily.
21. K to B sq Q takes Kt (ch)
22. B takes Kt Kt to K 6th (ch)
23. Q to K 2nd Q to Kt 4th (ch)
24. K takes Q B takes P (ch)
25. K to B sq R takes B (ch)
26. B to K sq R to Q 7th
27. B takes B P takes B
28. P to K 3rd R to K 7th (ch)
29. K to Kt sq B to Q 5th
30. K to R 2nd B to K 4th (ch)
31. K to Kt sq B to Kt 6th
The coup de grace. White is absolutely without resource, and consequently resigns.

Between the same Players.—(Evans's Gambit.)

WHITE (Herr L.) BLACK (Mr. B.)
1. P to K 4th P to K 4th
2. Kt to K 3rd Kt to Q 3rd
3. B to B 4th B to B 4th
4. P to Q 4th B takes Kt P
5. P to B 3rd B to R 4th
6. P to Q 4th P takes P
7. Castles P takes P
8. Q to Kt 3rd Q to K 3rd
9. P to K 5th Q to Kt 3rd
10. Kt takes P K Kt to K 2nd
11. B to Q Kt 2nd
White may also play R to K sq, or B to R 3rd, or better than either, Kt to K 2nd. The move in the text is frequently played by Mr. Boden, and here the engineer appears lost with his own petard.
11. Castles
12. Q R to Q sq P to Q Kt 3rd
13. B to Q 3rd Q to R 4th
14. Kt to K 4th
Kt to K 3rd appears stronger, because the Kt can then be posted at B 4th or Kt 3rd, as may be found expedient.
14. Kt to B 4th

CHESS IN SCOTLAND.

An offhand Skirmish in which the well-known Scottish amateur, DELTA, gives the odds of Q R.

(King's Gambit declined. Remove White's Q R from the board.)

WHITE (Delta). BLACK (Capt. L.).
1. P to K 4th P to K 4th
2. P to K 4th P to K 4th
3. Kt to K 3rd P takes P
The opening moves of a player receiving the odds of a look scarcely call for comment of any kind. The young player may be bold, however, that the correct move at this juncture is P to B 3rd.
4. P to Q 4th B to Kt 3rd
5. B takes P Kt to K 3rd
6. P to K 5th Kt to Kt 5th
7. B to B 4th Q to K 2nd
8. Castles Castles
9. Kt to Kt 5th Kt to K 3rd
10. P to Q 3rd B to R 4th
11. Q to Q 3rd P to K Kt 3rd

WHITE (Delta). BLACK (Capt. L.).
12. Q to R 3rd K to Kt 2nd
13. R to B 3rd P to Q Kt 4th
14. B to K 2nd
B to Q 3rd would be more effective against better play; but White obviously anticipates the worst.
14. Q takes Kt (ch) B to Kt 2nd
15. Kt to K 6th (dis. K to B 4th ch)
Black's game is, of course, past surgery, and P to Kt 4th would be of no avail against K to B 3rd (ch), B to Q 3rd (ch), &c.
17. R to R 3rd. Mate.

DEATH OF HERR KLING.—We regret to announce the death of one of our oldest contributors, Herr Jacob Kling, the famous problem composer. Herr Kling was a native of Mainz, Hesse-Darmstadt, where he achieved some local celebrity as a practical musician. He came to England in 1844, and practised for some years in London as a teacher of instrumental music. His chess problems—some of the earliest of which appeared originally in this column—rank among the first productions of our time in that branch of chess; and the collection of "Chess Studies" he produced, with the co-operation of Herr Horwitz, is universally regarded as the best work of the kind that has yet been issued from the press. Herr Kling died on Dec. 9 last, in the sixty-sixth year of his age.

WILLS AND BEQUESTS.

The will, with two codicils, all dated Feb. 9, 1875, of Sir Henry de Hoghton, Bart., late of Hoghton Tower, Lancashire, who died on the 2nd ult., at No. 4, Lancaster-street, Hyde Park, was proved on the 23rd ult. by Sir Charles de Hoghton, Bart., and Richard de Hoghton, brothers of the deceased, and Richard John Flowerdew, the executors, the personal estate being sworn under £200,000. The testator confirms the settlements made on his wife, whereby she takes £1200 per annum for life in the event of her surviving him; and bequeaths upon trust for his daughter, Eleanor Isabel de Hoghton, £10,000; to Florence, Lady Eardley, an annuity of £1500; to his brother Richard an annuity of £600; to Thomas de Hoghton a legacy of £10,000; to his brothers Charles and Richard, £5000 each; and there are other legacies and annuities to half brothers and sisters, executors, servants, and others. The testator devises all his real estate to the use of his brother Charles (who has succeeded him in the baronetcy) for life, with remainder to his first and every other son successively, according to their respective seniorities in tail male. All his copyhold and leasehold estates and the residue of his personality are settled upon trusts similar to the uses declared of his real estate. In the directions which the deceased Baronet gives respecting his funeral he desires that the usual shell inclosing his body may be inclosed in a leaden coffin weighing not less than seven pounds to the square foot.

The will, dated Sept. 7, 1876, of the Chevalier Francois de Rosaz, late of No. 51, Upper Bedford-place, and of No. 1, Arundel-terrace, Brighton, who died on Sept. 21 last, was proved on the 8th ult. by Mr. Henry Abbey, the present Mayor of Brighton, the Very Rev. Henry Rymer, the Rev. John Julius Hannah, Francis Bradley Archer, Hamilton Ross, Thomas William Womfor, and the Rev. Samuel Johnston, the executors, the personal estate being sworn under £45,000. The testator, in speaking of the several members of his family, says:—"I beg and supplicate our merciful Redeemer to receive every one of us in his holy paradise. I supplicate our very holy mother, the Virgin Mary, the very holy mother of God, and all the angels and archangels, all cherubim and seraphim, all the thrones and dominations, all the dominions and virtues of the heavens, all the saints, and the seven million martyrs, of the prosecution (so in will) against our very holy religion, and all the inhabitants of the heavens, to obtain pity, mercy, and pardon of God for all our beloved family." The will is long and intricate. So far as can be gathered from a single perusal, he bequeaths to his wife, Madame Julia de Rosaz, all his furniture, plate, pictures, jewellery, horses, and carriages, absolutely; certain of his books to the Public Library at Brighton; and all his valuable astronomical and other instruments to the Museum of Brighton. The rest of his property he gives to his wife for life, and upon her death certain French and Italian Five per cent Rentes are to be set aside as a provision for seven charities at Montmelian, in France, including the asylum for thirty orphan girls, all of which have either been founded or supported by him; and the entire residue of his property is then to be applied in founding at Brighton a Catholic asylum for thirty orphan girls, a Protestant asylum for thirty orphan girls, and charities for the relief of the infirm and distressed in the order named; and he particularly wishes that the Catholic asylum for thirty orphan girls shall hereafter be established at his house, No. 1, Arundel-terrace.

The will of Mr. John Broughton, late of Peterborough, who died on May 24 last, was proved on the 12th ult. by Mrs. Sarah Broughton, the widow, and George Wyman, the executors, the personal estate being sworn under £45,000. The testator gives to his wife all his real estate, his furniture and household effects, and £1000; to the Peterborough Infirmary £200, free of legacy duty; and there are numerous legacies and annuities to relations and others. The residue of his property he leaves to his wife for life, and then, subject to her power of appointment over one third, to certain of his nephews and nieces.

The will, dated Oct. 14, 1859, and one codicil, dated July 5, 1876, of Robert Burnett Brander, Esq., of Belmore, West Grinstead, Sussex, who died on Nov. 7, was proved on Dec. 8 by Lieutenant-Colonel Edward John Bunney, Percy Sanden Godman, Esq., and Nathaniel Philip Tyrwhitt, Captain R.N. The personal estate was sworn under £35,000. Among other legacies, testator gives £200 to the British and Foreign Bible Society; £500 each to his nieces, Maud and Charlotte St. John; and all the remainder of his real and personal property on trust to his only child, Mary St. John Bunney, of Slinfold, in addition to her settlement. He also directs that his son-in-law should take the surname of St. John (his wife's maiden name).

The will, dated April 1, 1874, of Mr. Gilbert Robert Blount, late of No. 1, Montagu-place, Montagu-square, who died on Nov. 15 last, was proved on the 1st ult. by Mrs. Sophia Margaret Blount, the widow, and Charles Joseph Brown, the acting executors, the personal estate being sworn under £30,000. The testator bequeaths to his executors £100 each; and the income of the whole of the rest of his property to his wife for life; in the event of her marrying again she is to have the interest of £5000 only. Subject to these bequests, he gives the residue of his property to his children.

The will, dated Oct. 18, 1875, of Mr. Alfred Chapman, late of No. 91, Eaton-place, who died on Nov. 9 last, was proved on the 9th ult. by Stuart Macnaghten and Abel Chapman, the executors, the personal estate being sworn under £30,000. With the exception of legacies of £100 each, free of duty, to his executors, the trusts of the will are entirely in favour of testator's children.

The Leeds Town Council decided, on Monday, to have the accounts of the Corporation audited for the past ten years, at a cost of £500. This step has been taken on account of recent defalcations at Hull. Mr. W.P. Denison, M.P., was appointed borough treasurer.

The Yorkshire Post mentions a proposal of Dr. Carr, a native of Leeds, well known in London as an eminent medical practitioner, to establish in perpetuity four free medical scholarships for educating as medical men foundation scholars of the Royal Medical Benevolent College, Epsom. The sum required is £7000, of which £5000 has already been contributed.

A fracture has been discovered in the steel lining of the 81-ton gun. The thickness of the steel at the point of injury is about 4 in.; and the crack, which is at present scarcely perceptible, is situated at some distance from the powder-chamber, and is of small extent. The fracture will not interfere with the conclusion of the experiments against the armour-plate at Shoeburyness.

Alderman Tarpey was on Monday duly constituted Lord Mayor of Dublin with the usual ceremony. Alderman Campbell was constituted High Sheriff, and Sir George B. Owens, the retiring Lord Mayor, was, according to custom, appointed president of the Court of Conscience. In Waterford, Alderman Purcell; in Clonmel, Alderman Edmund Woods; in Limerick, Mr. James Spaight; in Wexford, Alderman J. J. Walsh; in Cork, Mr. Barry J. Sheehan; in Belfast, Alderman J. Preston; in Drogheda, Alderman George Knaggs; and in Kilkenny, Mr. Simeon Morris, were sworn in as Mayors.

NEW MUSIC.

THE FALL OF DELHI. March for the Piano-forte. Composed by STEPHEN GLOVER. 2s. post-free, 18 stamps. Illustrated title.

CHRISTMAS PRESENTS.—J. J. MECHI has a beautiful assortment of NOVELTIES for the SEASON, which are exhibited in his splendid show-room, and are open to the inspection of all. His superior fitted Drawing Rooms and Cases form most appropriate Wedding Gifts. A large collection of Birthday and New-Year's Gifts. Catalogues post-free. 112, Regent-street, W.

AUTOMATIC CHARACTER of the NEW WILCOX AND GIBBS SILENT SEWING MACHINE IS SEEN IN ITS SELF-REGULATING TENSION, SELF-ACTING THREAD PULL-OFF, SELF-REGISTERING STITCH-INDICATOR, SELF-HELPING FEED, SELF-DETERMINING GUIDE-TABLE, for Needle, Thread, and Stitch. SELF-ADJUSTING NEEDLE, SELF-CONTROLLING WHEEL-BRAKE.

These and many other carefully-considered devices, combine to render the NEW WILCOX and GIBBS beyond all comparison the NEAREST APPROACH yet made in Sewing Machinery to practical "AUTOMATISM."

NO OTHER SEWING MACHINE approaches it in all DESIRABLE QUALITIES as an instrument for DOMESTIC SEWING. No other is so carefully, thoroughly, and perfectly constructed. No other is so easily and quickly learned and used, or with so satisfactory results.

SILENT, RAPID, ALMOST SELF-ACTING, is, beyond anything heretofore known, efficient in the work-room and welcome in the household.

A MONTH'S FREE TRIAL IN YOUR OWN HOME BEFORE PURCHASE. CARRIAGE PAID. PRICE-LISTS POST-FREE.

WILCOX and GIBBS SEWING-MACHINE COMPANY, NEW YORK. Chief Office for Europe, 100, CHEAPSIDE, E.C. LONDON. West-End Branch—145, REGENT-STREET, W. LONDON.

ALTO DOURO, fine old Port, 30s. per dozen. Matured seven years in wood. Pure and genuine, excellent for invalids, and unequalled at the price. Recommended with confidence. Railway paid. Estab. 1829. HENRY BRETT and CO., 20 and 27, High Holborn.

NATURAL MINERAL WATERS OF VICHY. Property of the French Government. CELESTINS.—The water of this spring is very agreeable, sparkling and slightly acidulated. Remedy for Complaints of the Kidneys, Gravel, Gout, Diabetes, Rheumatism, &c. HAUTERIVE.—This spring contains a greater quantity of carbonic acid, and is especially recommended as a table water. GRANDE-GRILLE.—For Complaints of the Liver and Biliary Organs, Indigestion, &c. HOPITAL.—For Stomach Complaints, &c. VICHY WATERS are pleasant to the taste, and may be drunk pure or mixed with wine or spirits.

LIEBIG COMPANY'S EXTRACT OF MEAT.—Finest Meat-flavouring Stock for Soups, Made Dishes, and Sauces. Caution.—Genuine ONLY with facsimile of Baron Liebig's Signature across Label. In consequence of Spurious Imitations of LEA and PERRINS' SAUCE, which are calculated to deceive the Public, Lea and Perrins have adopted a NEW LABEL, bearing their signature, "LEA and PERRINS," which signature is placed on every bottle of WORCESTERSHIRE SAUCE, and without which none is genuine. Sold wholesale by the Proprietors, Worcester; Cross and Blackwell, London; and Export Oilmen generally. Retail, by Dealers in Sauces throughout the World.

COCKS' READING SAUCE is the best and most economical Sauce ever manufactured FOR FISH, ENGLISH SOUPS, GRAVIES, &c. It only requires a trial to convince the purchaser of its excellence.

CAUTION.—The genuine is protected by Trade Mark—viz., CHARLES COCKS'S Signature on a white ground across the Reading Arms.

AMERICAN CENTENNIAL PRIZE MEDAL. FRY'S CARACAS COCOA. Its pure flavour, delicate aroma, and invigorating qualities have established its position as a first-class dietetic article.

"The Caracas Cocoa of such choice quality."—Food, Water, and Air (Dr. Hassall). "A most delicious and valuable article."—Standard.

FRY'S EXTRACT OF COCOA, "than which, if properly prepared, there is no nicer or more wholesome preparation of Cocoa."—Food, Water, and Air. Edited by Dr. Hassall.

TENTH INTERNATIONAL MEDAL awarded to J. S. FRY and SON.

"THIS IS THE BEST SOAP MADE," says Dr. TILBURY FOX, Physician for the Skin at University Hospital.

THE ILLUSTRATED LONDON NEWS.

LONDON: SATURDAY, JANUARY 13, 1877.

The talk of the week has been of the weather, more even than of the Conference at Constantinople. Both have the same element of uncertainty in them, but the one is nearer to us than the other. We think it was Adam Smith who said that the least hurt of an Englishman's little finger would be more feelingly regarded by him than the loss of the Chinese Empire. The saying is hyperbolic, of course; but at the bottom of it is a truth which hardly needs denial. It is rare, indeed, for imagination to exert the same force as even a trivial fact just at hand. The facts of the week which have most interest for us are the most palpable, and make the directest appeal to our senses. There are floods everywhere—North, South, East, and West. The beds of all the rivers and rivulets are too narrow to contain within their banks the streams which are poured into them from the overcharged skies, and the neighbouring country has been turned into inland seas. We get but a glimpse of the sun now and then, and just when we begin to hope our hopes are extinguished within us by a succeeding downpour. We are all made to feel our helplessness. We have no resource but in patience, and we are bound to take what has been provided for us in superabundance with this sole alleviation, that, possibly, we shall be better for it some day.

It must be allowed that there is something quite exceptional in the atmospheric condition of the winter this season. What the cause of it may be we must leave to scientific meteorologists to determine—if they can. It seems to affect, more or less in the same way, the whole Northern Hemisphere. It is no mere local disturbance. Some trace it to a default in the Sun; some to a deflection of the Gulf Stream; some to frigid currents from the Pole coming in contact with supersaturated south-western airs, and precipitating their excess of moisture, as men may squeeze a sponge. For ourselves, we have no great faith in the general causes said to rule these atmospheric changes. They are interesting themes of speculation; they can hardly be set down among the items of trustworthy knowledge. One conclusion, however, rests upon more solid evidence than any of the conjectures to which we have adverted. It is a fact ascertained by actual experience that, whatever may be the cause or causes of the excess of moisture in the air, rain does not pass away from the sur-

face of the earth as quietly as it once did. The immense extent to which land-draining has been carried gives a more concentrated direction to the form in which it finds its way to the sea. Percolation is, in great part at least, superseded by the more artificial methods now in use, and every stream that comes down from the higher regions of cultivated property pours itself unspent, because unabsorbed, into the channels furnished for it by the natural courses of the river beds. We are in a state of transition. We have interfered, and wisely so, with the distribution of waters as originally provided by nature. We have not yet completed our experiment. We have not succeeded as yet in separating the good from the evil of it. We realise more than we may hope some day to do of the latter, and the present effect, undoubtedly, may be seen in the swift and wide inundations by which parts of the country are swept.

The effects produced by the persistency of wet weather are already grave, and cast a gloomy hue over the year upon which we have just entered. We take no note now of the local distress the graphic accounts of which crowd our daily journals. There are localities in which floods do but little harm; but, alas! in how many are not only the broad acres, but the snug homes of agriculturists, submerged beneath the spreading floods! There is something rare and picturesque in the inhabitants of urban outskirts finding their way from house to house in boats, and receiving their daily necessary supplies into their first-floor windows—where, indeed, first floors avail them. But, after all, the reality is a disastrous one, and, besides the anxieties it inflicts, commonly leaves behind it an ample seed-plot of sickness. Nay, the very fields, we understand, have already sustained immense injury. Springing corn has been torn from the soil. Seed has rotted where it had already begun to germinate. There is a bad look-out for the next harvest. Large breadths of wealth in the shape of autumn labour and early preparations have been destroyed, and one does not feel at all confident that political quiet will come to restore productive enterprise during the course of the present year, or, indeed, if it do, that it will succeed in obliterating the traces of the mischief which has already been done.

It is a not uninteresting fact connected with the present meteorological disturbances that, apart from what may be regarded as local and accidental, the public health has not suffered as might naturally have been anticipated. Members of the medical profession, we believe, will admit that their practice during the passing winter has not been by any means heavy. The physical energies of all are depressed, and hence a readier susceptibility than usual to infectious complaints. But nervous depression, however hard to bear, may be borne generally without fatal result; whereas, if the season had been a pinching cold one, or even if it should become so, which is not at all impossible, all those diseases which affect the respiratory organs would have had, or may have, full scope for their deadliest assaults. Even relief, therefore, for the majority may come in the shape of suffering and death to a much larger minority. Happily, the choice of an alternative is not ours, for we should scarcely dare to exercise the responsibility of making one. We must do as men and women have done before our time—resign ourselves to such ills as are inevitable, and try to lessen them with such watchful assiduity as may be available. We may trim the fringes of our present condition to a small, and perhaps an appreciable, degree. The substance of it we cannot alter. Brighter days, in a physical sense, certainly, are yet in store for us; and in the sunlight of the coming summer it is by no means impossible that we shall forget the wretchedness to which we are now exposed.

The First Lord of the Admiralty has conferred the good-service pension of £150 a year for Captains of the Royal Navy on Captain John Clark Soady, R.N., in the room of Captain the Hon. F. Foley, promoted to the rank of Rear-Admiral.

After an eloquent address from the Earl of Carnarvon, at a meeting in the Newbury Corn Exchange, on Tuesday, a resolution was proposed and carried with the purpose of raising funds for the erection of a monument to Lord Falkland, who fell in battle close to the town.

The Isle of Man Archaeological Commission was lately appointed by Mr. H. B. Loch, Lieutenant-Governor, to investigate the monuments of antiquity in that island, the Runic crosses and inscriptions, the barrows, and other Celtic or Norse remains. It began its work at a preliminary meeting last week, Mr. T. M. Jeffcott being chairman of the commission. We may here notice the publication of a new "Popular Guide to the Isle of Man," with a map and seventy illustrations. It is published at the office of the *Isle of Man Times*, at Douglas, but it is the joint work of many contributors particularly well acquainted with the several districts, or with special departments of local knowledge.

The senate of the University of Dublin, at a special meeting, last Saturday, discussed and adopted a scheme for the retirement of Fellows incapacitated by age or infirmity from discharging their duties. It provides that such retirements are not to be compulsory, and that to each Fellow so retiring there shall be given annually, out of the sum paid to Trinity College under the Church Disestablishment Act, as compensation for loss of the right of presentation to the livings formerly in its gift, a sum equal to the emoluments of his fellowship, not including those of any professorship or other collegiate office he may hold. Arrangements are also made for the retirement of incapacitated Professors on two thirds of their salary. The retirements are to be in all cases voluntary, and to be approved by the visitors. The senate also adopted a congratulatory address to the Duke of Marlborough on his assuming the Viceroyalty of Ireland.

THE COURT.

The Queen's dinner party at Windsor Castle, on Wednesday week, included Prince and Princess Christian of Schleswig-Holstein, Princess Beatrice, the Duke of Connaught and Strathearn, the Prince of Leiningen, Lady Abercromby, the Dean of Windsor and the Hon. Mrs. Wellesley, and Lord Bagot. The Duke of Connaught and Strathearn, the Prince of Leiningen, and Prince Edward of Saxe-Weimar (who came from London) went out shooting the next day in Windsor Great Park. The Prince of Leiningen left the castle in the afternoon for London.

The Queen and Princess Beatrice were present, yesterday week, at a small entertainment given by Sir T. M. and the Hon. Lady Biddulph. Count and Countess Gleichen arrived at the castle, and, with Sir T. M. and the Hon. Lady Biddulph, dined with her Majesty.

The Queen and Princess Beatrice drove to New Lodge and visited Princess Louise of Lorne and the Marquis of Lorne, who are staying there. Count and Countess Gleichen left the castle. Prince and Princess Christian and the Right Hon. the Chancellor of the Exchequer and Lady Northcote dined with her Majesty.

The Queen, Princess Beatrice, and the Duke of Connaught attended Divine service, on Sunday, in the private chapel of the castle. The Rev. F. Ponsonby, M.A., Rector of Brington, Northants, officiated. Her Majesty's dinner party included the Right Hon. the Chancellor of the Exchequer and Lady Northcote, and the Hon. and Very Rev. the Dean of Windsor and the Hon. Mrs. Wellesley.

The Duke of Connaught and Strathearn left the castle, on Monday, for Sandringham. Sir Stafford and Lady Northcote also left the castle.

Captain Hugh Campbell, R.N., was presented to the Queen on Tuesday by Lieutenant-General Sir T. M. Biddulph, on his appointment as Captain of her Majesty's Royal yacht *Victoria* and *Albert*, in succession to the Prince of Leiningen, who resigned the command of the Royal yacht on promotion. The Duke and Duchess of Abercorn and Lady Georgiana Hamilton, his Excellency Sir T. Wade (her Majesty's Minister in China) and Lady Wade, and Major-General H. Ponsonby dined with her Majesty.

The Queen is one of the sponsors to her grand-daughter Princess Victoria Melita of Edinburgh.

Her Majesty, with the members of the Royal family, has walked and driven out daily.

The Hon. Mary Pitt and the Hon. Ethel Cadogan have succeeded the Hon. Harriet Phipps and the Hon. Mary Lascelles as Maids of Honour in Waiting to her Majesty.

THE PRINCE AND PRINCESS OF WALES.

The Princess of Wales and Prince Albert Victor and George of Wales attended Divine service, on Sunday, at Sandringham church. The Rev. W. Lake Onslow officiated. Prince Albert Victor of Wales attained his thirteenth year on Monday. The Prince of Wales returned to Sandringham from Eastwell Park, Kent, where he had passed several days shooting. The Duke of Connaught and Strathearn also arrived at Sandringham from Windsor Castle. The birthday was celebrated at Sandringham with the customary festivities. The Prince and Princess and the Duke of Connaught drove to Houghton Hall, the seat of the Marquis of Cholmondeley, on Wednesday, and attended a meet of the West Norfolk Hounds.

Prince and Princess Christian of Schleswig-Holstein arrived at Witley Court last Monday, on a visit to Earl and Countess Dudley.

His Excellency Count Beust returned, on Thursday, to the Austrian Embassy, Belgrave-square, from the Continent.

His Excellency the Lord Lieutenant of Ireland and the Duchess of Marlborough, with Lady Rosamond Churchill and the younger branches of the family, accompanied by Lord and Lady Randolph Churchill and Sir Ivor and Lady Cornelia Guest, entered Dublin in state, on Wednesday, and were escorted with the customary pageant to the castle.

The Marquis and Marchioness of Abergavenny entertained a distinguished party at Eridge Castle, on Thursday week, at some private theatricals. In "Cinderella," the Ladies Alice, Idina, Rose, and Violet Nevill, with their cousin, Miss Perry, as the Baroness, took a prominent part, and Lord William Nevill was the Fairy Godmother. In the comic farce of "The Area Belle" Mrs. Eastwood, Lord William Nevill, Lord George Nevill, and Mr. Hodgkin took part. A grand tableau, in which a ship arrived laden with New-Year's gifts for the audience, terminated the performance. The entertainment ended with a supper, followed by a dance.

The Right Hon. Sir Charles and the Hon. Lady Adderley had amateur theatricals last week, at Hams, their seat in Warwickshire, the second night ending in a ball.

The High Sheriff for Bucks and Lady Clayton gave a fancy-dress dance at their country house on Thursday.

FASHIONABLE MARRIAGES.

The marriage of Mr. Villiers Lister, Assistant Under Secretary of State for Foreign Affairs, son of the late Mr. Thomas and Lady Theresa Lister, with Miss Florence Selina Hamilton, second daughter of the late Mr. William J. and the Hon. Mrs. Hamilton, was solemnised, on Wednesday, at St. Paul's, Knightsbridge. The Hon. Henry Elliot acted as best man. The bridesmaids were Miss Meta Hamilton, her sister; the Hon. Beatrix Lister; Miss Mary and Miss Lillian Hamilton, her nieces; Miss Borthwick, Miss Florence Halford, and Miss Mary Stephenson. The bride, who was given away by her brother, Lieutenant-Colonel R. W. Hamilton (late Grenadier Guards), wore a dress of ivory satin, trimmed with lace flowers and bouquets of orange-flowers; a wreath of orange-flowers and lace veil. The elder bridesmaids wore cream-coloured damask princess dresses, trimmed with pale blue and Valenciennes lace, cream-coloured Rubens plush hats and blue feathers. The younger bridesmaids were attired in white angola dresses, trimmed with fur, and white fur caps. The religious rite was performed by the Hon. and Rev. Algernon C. Stanley, M.A., cousin of the bride, assisted by the Rev. H. Villiers, M.A., cousin of the bridegroom, and the Rev. Robert Eytton, M.A., Curate of St. Paul's. After the breakfast at Eaton House, Colleshill-street, the bride and bridegroom left for Combe Hurst, Kingston-hill. The bride's travelling-dress was of ruby velvet trimmed with dark fur.

The marriage of Hugh Maitland Fitzroy, youngest son of the late Rev. Augustus Fitzroy, and grandson of the late Lord Henry Fitzroy, to Bertha, only child of the late Major J. F. Kearney, of the 15th Hussars, was celebrated, on Thursday week, at Hatfield church, by the Hon. and Rev. William Whitworth Chetwynd Talbot, assisted by the Rev. Gilbert Coventry, uncles of the bride. The wedding party was confined to the nearest relatives of both families, owing to a recent death in the bride's family. She was given away by her uncle, Mr. G. Coventry. The breakfast was given at the rectory, Hatfield, by the Hon. Mr. and Mrs. Talbot, uncle and aunt of the bride. The bride and bridegroom left for London en route for the Continent.

The *Morning Post* states that the marriage of Captain

Drummond Moray to Lady Georgina Seymour will take place at St. Peter's, Eaton-square, on Tuesday, the 23rd inst.; and that marriages are arranged between the Hon. Robert Marsham, uncle of the present and brother of the late Earl of Romney, and Miss Clara Paley, second daughter of the Rev. G. B. Paley, Rector of Freckenham, Suffolk; and between Sir Edmund Hardinge, Bart., of Boudes Park, Tunbridge Wells, and Miss Maberly, second daughter of General Maberly, C.B., Royal Artillery, of Avonmouth House, Christchurch, Hants.

M. JULES SIMON.

The new Prime Minister of the French Republic, chosen by the President, Marshal MacMahon, to put an end to the perilous crisis of that Government in the middle of December, is a man of thorough Liberal principles, and a philosophical advocate of social reforms, but not the enthusiastic champion of any Utopian democratic schemes. He has been a distinguished Professor in the University of Paris, and is the author of several treatises upon moral philosophy, the condition of the labouring classes, and political science. He told the Chambers in his short and well-poised address on assuming office, that although his Ministry had no programme, yet he was profoundly Republican, but at the same time profoundly Conservative; that he had a profound respect for religion, yet one equally profound for liberty of conscience. These were *beaux sentiments*, suited to both sides of the Chamber, and they elicited cheers alternately from each party. But whatever M. Jules Simon may be, he is not a dangerous man, in a political sense. Violent measures are no part of his character, which inclines him more to be complaisant to all parties than to incur the sharp hostility of any. Still, it will be difficult, even for a man of his temperament, to maintain his equilibrium under the influences to which he will be subject, and with which he will have to reckon. There is a caricature exhibiting just now on the boulevards, in which M. Thiers, M. Gambetta, and M. Jules Simon are represented, during the late crisis, pulling with all their might at the strings behind the scenes; the common object, for the moment, of the two former being to force their colleague, or their instrument, M. Jules Simon, upon the unwilling acceptance of the Marshal-President of the Republic. "For the moment" the object was common, and the success has been complete. But how long will the understanding last? And how long will the "profound Republican" and the "profound Conservative" be able to turn the balance between the exigencies, which, in the views of some at least of his supporters, those two phases of opinion exact? The portrait of M. Jules Simon is from a photograph by Pierre Petit, of Paris.

THE PANTOMIMES AT DRURY-LANE AND COVENT-GARDEN.

We present this week Illustrations of the Pantomimes at Drury-Lane and Covent-Garden, both of which have been produced on a scale of splendour which has ensured the approbation of exceptionally large audiences. Neither of the pictures represents a sensible portion of the story of either production, and prefers to the general action some comic scenes which are supplied rather by the artistes engaged than by the dramatist. In the group presented of the Drury-Lane pantomimists, the most distinguishable figure is that of Mr. Frederick Vokes, whose legs fly over the heads of his companions, and are a perpetual surprise to the audience. His sisters are also distinctively engaged, pirouetting in the most marvellous manner, suggesting all manner of ideas to the excited spectator. Here, moreover, is the wonderful donkey, but in a state of quiescence which he seldom is, indeed, in the actual representation itself. We may suppose him admiring the superior agility of his owners and taking an interest in their proceedings. So much for the lively episode in "The Forty Thieves," supplied by this clever family. In like manner, the tale of "Robinson Crusoe" is varied and enriched by the introduction of the savages discovered on the island, and who are so cleverly depicted by Mr. Ted Lauri, Mr. J. H. Doughty, and Mr. J. H. Rogers. No description of this is contained in the book of the play, which refers the reader for information to "the principal performers," who can be seen "every Monday, Wednesday, and Saturday morning, and every evening, until further notice." We are compelled to imitate the example of the writer of the libretto, simply stating that our Picture gives only a slight symbol of the great variety of business composing the scene to which it belongs. The whole is full of bizarre incident, merely indicated by the group before us, who surprise and entertain poor Crusoe, and thus relieve the solitude of his island hut. The spectator will be more amused even than the celebrated hero of the wild scene which our Artist has endeavoured to suggest, leaving the greater portion of necessity to the imagination of the reader.

The annual meeting of the members of the Birmingham and Midland Institute was held, on Monday night, in the lecture theatre; Mr. J. Thackray Bunce, vice-president, in the chair.

Colonel Steble, the late Mayor of Liverpool, has offered to present to the town a fountain of the value of £1000, to be placed opposite the Art Gallery and the Picton Reading-Room.

It was reported, last week, that a crack had been discovered in the inner tube of the 81-ton gun; but careful subsequent investigation has shown that the flaw is unimportant.

Three of the crew of a Whitby life-boat were drowned, on Wednesday, by the capsizing of their boat while they were rendering aid to a stranded ship.

The income of the National Bible Society of Scotland last year amounted to nearly £14,000; and by its agencies upwards of 100,000 complete copies, or parts of copies, of the Scriptures were put in circulation.

The prizes connected with the Romsey district of the Labourers' Encouragement Association were distributed, on Wednesday, in the Corn Exchange of that town. Lord Shaftesbury presided, and there were present many of the gentry of the neighbourhood, including Mr. Cowper-Temple and the Hon. Ralph Dutton. The prizes were distributed by Mr. Cowper-Temple, and afterwards the prizeholders were addressed by Lord Shaftesbury. He counselled them to be economical and prudent, and they would not be obliged when sickness came upon them to depend upon charity for help.

In presenting the prizes to the successful students at the Dover School of Art, on Wednesday, Earl Granville addressed himself to a refutation of the Rev. Mark Patteson's opinion that taste in art is decaying in this country. As proofs that taste is improving, the noble Earl pointed to our churches, country houses, manufactories, needlework, children's books, and bouquet arranging, as so many indications that much positive progress has been made within the last thirty years.—At the annual meeting of the Dover Hospital, on Wednesday, a new wing was opened by Earl Granville, who presided. There being a deficiency of £200 in meeting the cost of the enlargement, Mr. Freshfield, M.P., gave £100, and the other £100 was guaranteed in the room.

CHRISTMAS PANTOMIMES.

THE EASTERN QUESTION.

The Conference of Plenipotentiaries of the European Powers at Constantinople has been almost brought to a dead-lock by the steadfast refusal of Turkey, in the sittings held each day since our last week's report, to assent to the joint resolutions of Great Britain and Russia and the other Foreign Powers. Thursday last was expected to be the crisis of this momentous diplomatic conflict; but it was impossible at the time of our going to press with the sheet now before our readers to say what would be the immediate result of that day's sitting. It was rumoured that the Turkish Government would endeavour to meet the proposals of the Conference with a new project based on Count Andrassy's Note for the pacification of Bosnia and the Herzegovina a twelvemonth ago. The Ministers of the Sultan, represented by Safvet Pasha, object to the appointment of an International Commission, for one year, to superintend the execution of the proposed reforms; and they also resist the employment even of a very small number of foreign troops, either to serve as a nucleus for the creation of a native armed police force, consisting equally of Christian and Mussulman subjects of Turkey, or to serve as a body-guard for the International Commission visiting the different provinces of the Empire. The leading part in advocating the resolutions already sanctioned by the Foreign Powers, but disputed by Turkey, has latterly been sustained by Count Corti, the Italian Special Envoy; while General Ignatieff, the Russian Ambassador, has preserved an attitude of studied moderation, and Lord Salisbury has warmly supported those resolutions, urging the Sultan, in a spirit of friendly candour, not to oppose the will of united Europe. The German Ambassador seems to have displayed a certain degree of indifference, at least of coolness, which has led some French politicians to accuse Prince Bismarck of wishing to provoke a European war. The French Envoy Extraordinary, Count Chaudordy, is reported to have said that Turkey, in his opinion, would be justified in her refusal of the measures proposed by the Conference. But the general disposition of the foreign members of the Conference is still most conciliatory, and the Russian Government shows a less warlike inclination than before.

General Ignatieff is stated to have recently suggested that the reforms proposed by the Powers should be extended to Macedonia, Epirus, and Thessaly. The British Plenipotentiary is understood to have replied that such a proposal did not come within the scope of his instructions.

It was stated a few days since that Roumania had withdrawn her allegiance from the Porte on account of an article in the new Turkish Constitution infringing her rights. This statement is now, however, modified. Roumania, it appears, has merely protested against the article in question, and declared that were any attempt made to enforce it, she should consider herself released from her vassalage to the Porte. We at the same time learn that the attempt is not likely to be made. The Turkish Government has officially declared that the provisions of the Constitution are not meant to apply to the Principality, the rights of which are guaranteed by international treaties. In a late sitting of the Roumanian Senate a motion was carried affirming the determination of the House to maintain all the rights of the country as guaranteed by the Treaty of Paris, and calling upon the Government to act in this sense.

Prince Milan of Serbia has withdrawn his troops from the Bosnian frontier, having received an intimation from St. Petersburg that he must renounce his pretensions to that province. The action of Austria, on account of which this withdrawal is thought to have taken place, will also be aroused by the threatened expulsion of the Jews from Semendria.

In Bulgaria, it is said, the Christian inhabitants are still plundered and ill-treated by the Turks; while the author of some of the worst massacres, Chekret Pasha, acquitted by the Court of Philippopolis, has come back triumphantly to Constantinople. Proofs of his wilful murder of many inoffensive persons, even independently of any orders he may have received by the Government, could easily be brought against him in any mixed or international court of law free from intimidation.

FOREIGN AND COLONIAL NEWS.

FRANCE.

(From our own Correspondent in Paris.)

Thursday, Jan. 11.

After a brief New-Year's holiday, the Legislature has again assembled, and the Duc d'Audiffret-Pasquier and M. Grévy have been re-elected Presidents of the Senate and the Chamber of Deputies. The message which was expected from Marshal MacMahon has not been forthcoming, the Government considering that the communication of a formal Ministerial programme is unnecessary after the emphatic declarations made by M. Jules Simon on taking office. These declarations have been followed by the removal of ten of the most obnoxious préfets, and in a few days fresh decrees will appear eliminating the Bonapartist element from other branches of the public service. The Marshal, who has recently been shooting at Sully-sur-Loire with the Count de Bethune, has been also persuaded, it is said, to sacrifice Admiral Fourichon, the Minister of Marine, whom the Republican party propose to replace by Admiral Pothuan or Admiral Jauréguiberry. The Chief of the State appears to have completely reconciled himself to the situation, and the hopes which the anti-Republican party founded on his reported aversion for M. Jules Simon are now scarcely likely to be realised.

Billoir, the man who has been under arrest for some weeks past on suspicion of being the murderer of the woman Le Manach the discovery of whose mutilated remains in the Seine caused such a profound sensation in Paris, has at length made a partial confession of his guilt. He pretends that one evening, at the commencement of November, the deceased returned home intoxicated, and during a quarrel which ensued broke a glass which he greatly prized. Losing all control over himself, he gave her a kick as she stooped down to pick up the fragments. She fell to the ground insensible, and all his efforts to restore her to animation proved unsuccessful. He spent the night with the corpse, and it was only late on the following day that he resolved to cut up the body and throw it into the Seine. He strenuously endeavoured to impress upon the Judge d'Instruction that the crime was unpremeditated, and that when he kicked the unfortunate woman he had no intention whatever of causing her death. Whether this is true or not we shall perhaps learn hereafter; but at all events his confession, incomplete as it may be, shows that the police were correct in their surmise. The discovery of the culprit was beset with innumerable difficulties, and it is greatly to the credit of M. Jacob, the chef de la sûreté, that he should have succeeded in pointing upon the right man.

A celebrity of the so-called "generation of July," Henri Monnier, author, actor, and artist, has passed away this week, at the ripe age of seventy-eight. As a caricaturist Monnier was the rival of Gavarni, and as a writer many of the types he portrayed were worthy of Balzac's pen. His most celebrated creation, "M. Joseph Prudhomme," the narrow-minded, egotistical, serio-comic bourgeois of the reign of Louis Philippe,

will certainly survive him, for since the time of Molière there has probably not been so humorous, and withal so truthful, a delineation of the middle class Frenchman. Monnier identified himself in a measure with this celebrated character, acting the part of Prudhomme in a play he wrote descriptive of his grandeur and decay, and which was performed at the Porte St. Martin 150 consecutive nights. Among Monnier's other works, especial attention may be called to "Le Roman chez la Portière" and his "Scènes de la Vie Intime." He was unconscious for three days prior to his death, and for some time back his faculties had been reduced to a low ebb. The funeral service, at the Church of St. Roch, was attended by numerous representatives of the literary, artistic, and theatrical worlds of Paris.

M. Clement Duvernois—a clever journalist under the late Empire, who became the mouthpiece of Napoleon III., and worked his way into the last Ministry formed before the catastrophe of Sedan, and who under the Republic was sentenced to a term of imprisonment for certain financial escapades—is about to publish a history of the Second Empire, in which some curious revelations are looked for.

ITALY.

The Roman correspondent of the *Daily News* telegraphs that Menelik, King of Shoa, has written a letter to King Victor Emmanuel acknowledging the gifts sent to him through the Marquis Antinori, and promising protection to the Italian exploring expedition while in his dominions, also volunteering assistance on the way to the equatorial lakes.

Count Luigi Mastai, the nephew of the Pope, died on Monday afternoon at San Benedetto, near Sinigaglia, whither he had gone in quest of health. The Count, who was born in 1814, was the son of the Pope's brother Gabriel, and was married to one of the Princesses del Drago.

The Pope has received an address from some pilgrims, to whom he made a speech, asserting that Italy was not so prosperous now as she was before her unity.

Sir A. Paget, the British Ambassador at Rome, has fallen from his horse while hunting and dislocated one of his wrists.

Professor Palmieri, writing from the Observatory on Mount Vesuvius, says that for the last two days the instruments have shown evident signs of agitation. The smoke from the mountain is issuing with greater force and increased volume.

SPAIN.

The session of the Cortes closed yesterday week, the bill relating to the re-establishment of constitutional guarantees having been passed without any amendment. There was no speech from the Throne, but Señor Canovas del Castillo read a Royal decree proroguing the Chamber.

It is stated that the Minister at Peking has broken off diplomatic relations with the Chinese Government, and that a fleet has, in consequence, been ordered to China.

GERMANY.

The general election for the new Imperial Parliament was held, on Wednesday, throughout Germany.

This year's German squadron of evolution, which is to begin practice on May 7, will be composed of the ironclad frigates Kaiser, Deutschland, Preussen, and the aviso Falk.

AMERICA.

Subsequently to a Cabinet Council at Washington, on Tuesday, orders were sent to the Federal commander at New Orleans to preserve peace without recognising either the Democratic or the Republican Governor. The Republican Governor and the Legislature of New Orleans are blockaded by the Democratic militia in the State House; but no bloodshed has occurred. Both the Republican and Democratic Legislatures have elected United States senators. The rival Governors of Louisiana were inaugurated in office, on Monday, by their respective partisans. No disturbance occurred. On Sunday Democratic mass meetings were held at Washington, Richmond, and several northern towns, when resolutions were passed that the counting of the presidential electoral roll lay with both Houses of Congress, and that the President of the Senate had no power in the matter.

The Committee of the House of Representatives appointed to examine the question of the Presidential electoral returns has decided that the President of the Senate has no power in the matter, and that the counting of the returns can only be made in the manner approved by the House, whose authority in this respect is equal to that of the Senate.

President Grant has sent to the European Governments a report urging the desirability of constructing an inter-oceanic canal across the Isthmus of Panama by the Nicaragua route.

President Grant is said to have expressed an opinion that the United States should retain the nine millions of dollars, the balance of the Geneva award after paying all the direct claims. This surplus, he thought, should be devoted to the restoration of the American mercantile marine. The original award of 15,500,000 dols. was invested in American Five per Cents, and the interest increased it to about 18,500,000.

There were 22,408 applications at the United States Patent Office for grants of patents in the year ending Sept. 30, 1876, and the number issued in the year (including reissues and designs) was 15,911, being 1681 more than in the preceding year. There were also 1029 trade marks and 499 labels registered in the year 1875-6.

Mr. Bennett, the proprietor of the *New York Herald*, fought a duel, on Monday, in the State of Delaware with Mr. Frederick May. Neither combatant was wounded.

Mr. Vanderbilt, who is better known as Commodore Vanderbilt, is dead.

The American journals contain details of the disastrous accident on the Lake Shore Railway on the 29th ult. Some particulars will be found at page 46.

INDIA.

As a penultimate scene in the Delhi fête there was, on Thursday night, Jan. 4, a display of fireworks, witnessed by an immense concourse, on the plain between the fort and the Jumna Musjid. It is understood to have been the "largest and grandest spectacle of the kind ever seen in India." The chief feature was a set piece having reference to the proclamation of the Queen as Empress of India. Delhi was illuminated. The final scene was a grand review on the following day, attended by the Viceroy, the civil and military authorities, and a number of native Princes, with their retinues. All the troops assembled at Delhi, numbering 20,000 men, were on the ground. A salute of artillery was fired at sunset, and with this the festivities terminated.

The Punjab College has been raised to the status of a University, and is empowered to grant degrees.

The Canadian Government has issued orders that no trains are to be run on Sundays, except in cases of great emergency, of which the authorities are to be the judge.

We learn by telegraph that the English cricket team in Australia played a drawn match with the Ballarat eleven on Thursday week, and that on Monday last they played the Geelong eleven, winning easily.

Mohammedans settled in the Russian Caucasus are reported to be emigrating in great numbers into Turkey.

The Court of Aix has set aside a lady's will because she was under the influence of a belief in Spiritualism.

At the general meeting of the Suez Canal Company, held in Paris on Wednesday, the convention with the maritime Powers was sanctioned, by which the company undertakes to expend one million francs annually for thirty years on the improvement of the canal.

The results of the Census of Paris have been published. The total population is 1,986,748 persons. In 1872 it was 1,852,792 persons. The increase has been chiefly, as was to be expected, in the outlying arrondissements, and is strongest in Popincourt, Montmartre, Batignolles, Monceau, and Passy.

Intelligence from Mexico reached New York, on Monday, to the effect that five more States have declared in favour of Porfirio Diaz, in whose absence General Mendez is acting as President; and that several regiments have deserted from Iglesias.

It is officially announced in the *Gazette* that the Queen has sanctioned the appointment of Mr. William Wellington Cairns (now Governor of Queensland) to be Governor and Commander-in-Chief of South Australia and its dependencies; and of Sir Arthur Edward Kennedy (now Governor of Hong-Kong) to be Governor of Queensland.

A special telegram to the *Daily News* from Alexandria says that, the contractors for the harbour works not having been paid a large sum due, Sir George Elliot has attached the money remitted to England for the January coupons. By the same means we learn that the Post Office, Telegraph Office, and other buildings at Cairo have been destroyed by fire. The documents were saved, and no lives were lost.

The Cape mail, which arrived at Plymouth on Sunday, brings news from the Transvaal that a field cornet named Erasmus, with a party, attacked some friendly natives, killing about forty of them; it is added that others not of the party protested against this conduct. Sir T. Shepstone was on his way to the Transvaal. The appointment of Colonel Eustace as Resident with Krelh had been well received by the native chiefs and people. Krelh had, however, postponed the consideration of the boundary question.

Letters from Zanzibar, dated the 11th ult., report everything quiet there and on the mainland. An Arab slaver had shown itself near the island of Pemba, and had fired on one of our cruisers' boats, slightly wounding four men. Legitimate trade was on the increase, and promised further extension. His Highness the Sultan, having been made acquainted with the African scheme under the presidency of his Majesty the King of the Belgians, and also with the meeting held at Glasgow about two months ago for promoting commercial enterprise and civilisation on the African continent, has written to England expressing his cordial approval of the design and stating that he will afford the agents authorised to carry it out every assistance in his power. He is also causing inquiries to be made as to the best point on the coast of the mainland, within his own territories, for making a highway to the inland lake district.

THE MAGAZINES.

"Erema" remains the leading feature of the *Cornhill*, and a very attractive feature too, replete with the interest of character as well as of incident, and thoughtful as well as stirring writing. From this highly-developed stage of the novel it is suggestive to look back, as the writer of an excellent paper on Spanish *picaresque* fiction invites us to do, to the novel in its early and by no means precocious immaturity. It is, nevertheless, easy to show that the rich complication of modern fiction exists in such compositions as "Guzman de Alfarache," rude and artless as they appear in the evolution of feeling from incident; and we are quite prepared to accept the writer's suggestion that stories of the "Guy Livingstone" class indicate reversion to a primitive type. "From Stratford to London" is a meritorious attempt to reproduce the aspect of English highway travel in Shakespeare's day; and "Heroes and Valets" embodies an emphatic and, unfortunately, a seasonable protest against recent invasions of the sanctity of private life by low-class newspapers. "Dual Consciousness" is an investigation of the perplexing question whether the brain is actually double, illustrated by some well authenticated instances of abnormal cerebral states in which the patient seems to have alternately led two lives, forgetting while in one condition what he had acted or thought in the other.

The inexhaustible Mrs. Oliphant commences a new fiction in *Macmillan*, and it must be said displays in "Young Musgrave" no declension from the very respectable level of merit which she has now for so long maintained. There is none of the power exhibited in the first chapters of her romance in the *Cornhill*, but neither is there any such subsequent lapse into anything lower than the cheerful, winning cleverness which it seems ungracious to style mediocrity. In a forcible essay, Mr. Goldwin Smith considers the probable effect of the acceptance of the doctrine of evolution and its corollaries upon the average morality of mankind. There is much that well deserves attention in Mr. Smith's remarks; while it may be thought that he overlooks the new and potent reinforcement to the ordinary motives to right-doing contributed by the discovery of the hereditary transmission of character. Such a motive, it may be said, would have no influence on inferior samples of human nature; but neither would any other, short of the legal and social restraints which are not likely to be impaired by any progress of scientific discovery. Dr. Petermann, in a letter on "The Eastern Polar Basin," addressed to the President of the Royal Geographical Society, volunteers a handsome certificate to Sir George Nares. Mr. T. Hughes answers Mr. Crosskey on the subject of national education. Neither party to the controversy seems to have grasped the principle that the question is rather municipal than Imperial; that, subject to certain obvious conditions, each district has a moral right to educate its children as it thinks best. "Two Sonnets by Two Sisters" are full of touching beauty.

Fraser has one very remarkable contribution—the autobiography of a modern Icelander, written in English, pretty and piquant, with its quaint imperfection. The narrative is also a very interesting one: the history of an honest, industrious, intelligent, ingenious man; admirable in his struggle with the conditions of a hard and unprosperous lot. It also conveys a vivid picture of the inclemency of the Icelandic climate, even in favourable circumstances, and, though not written or published with that end in view, should do much to stimulate compassion for the people in their present heavy trials. A singular contrast is afforded by another paper describing with great picturesqueness the rich strips of tropical cultivation in the watered ravines which intersect the arid table-land of Southern India. The plateau itself is sufficiently wild and barren, and dotted with ancient sepulchres, resembling Druidical cromlechs. There are also interesting papers on

the trade of the Austrian Empire, on La Fontaine, and on the "tree of existence" of Teutonic and Scandinavian mythology.

"The Shadow of the Door" is a welcome accession to the already long and brilliant series of "Tales from Blackwood." The scene is laid in America; the subject is a cunning and ruthless murder; and it is impossible not to admire the art by which the criminal, without a single extenuating circumstance in his crime, is yet kept sufficiently within the pale of human sympathy for the novelist's purpose. By far the most interesting of the miscellaneous articles is an admirable criticism on George Sand, distinguished by true insight and generous sympathy. The number is concluded by a review of the political prospects of the new year, from which we learn, at any rate, that her Majesty's Ministers may alter their foreign policy as often as they like without the slightest fear of appearing inconsistent in the eyes of *Blackwood*.

Mr. Chamberlain's speech at Birmingham has already familiarised the public with the keen criticism on the Gothenburg system of making public-houses over to the municipality conveyed in Mr. Lowe's article in the *Fortnightly Review*. Without sympathising with Mr. Lowe's cynical tone, we must say that his arguments against Mr. Chamberlain's proposal, on the ground of the facilities it would offer to jobbery and undue political influence, appear to us absolutely unanswerable. The remedy would be far worse than the disease. Mr. Chamberlain, however, appears to advantage in a powerful and logical plea for gratuitous primary instruction; and the cause of small landowners is no less ably supported by Mr. Shaw Lefevre. Mr. A. C. Lyall contributes an able and learned paper on the formation of clans in India, and the transition from clanship into caste under the influence of religious ideas. He thinks that symptoms may be discerned of the decay of caste prejudice, and a reaction in the direction of the religious mysticism which regards all external distinctions as immaterial. Sir H. Havelock is so deeply impressed with the importance of Constantinople to England, that one wonders to find him contemplating the arrival of a Russian army under its walls as a desirable contingency, in any case.

The *Contemporary Review* opens with an article on "Modern Atheism: its attitude towards Morality" full beyond all precedent of the "simplys," "surelys," "quite clears," and the like phrases which betray the writer's instinctive misgiving that his argument is neither simple, clear, nor sure. Professor Clifford, from the opposite point of view, reads believers a lecture on the exceeding sinfulness of belief in certain cases; which is probably intended seriously by the writer, but which will be received by the audience as a *mauvaise plaisanterie*. By far the most important contribution to the number is Mr. Rhys David's analysis of the vexed problem of the Buddhist Nirvana. In Mr. David's opinion Nirvana does not, as usually understood, denote annihilation, but a holy and blessed state in the present life: involving, however, exemption from re-birth, and consequently implying the cessation of existence. Mr. Edwards' paper on friendly societies is also very valuable; and Sir A. Musgrave's heresies on free trade and protection deserve attention as a sample of the political economy which finds favour in Australia.

There is little worthy of note in this month's *Atlantic Monthly*, except pretty pieces of verse by Longfellow and Russell Lowell; nor anything in *The Month*, save the continuation of the biography of Columbus and a history of the Greek Revolution. "The Captain's Last Love," in *Belphevre*, is a striking story, and "Finding His Level" an amusing one. "An Amateur Assassin" has nothing to do with murder, but is a lively record of the experience of a hashish-eater. The *Argosy* and *Tinsley's* are fairly readable, but contain no matter of special mark.

The *Gentleman's Magazine* inaugurates the new year with a story of unusual promise by Mr. Justin MacCarthy. "Miss Misanthrope" is a young lady who, in spite of her unprepossessing designation, captivates the reader's sympathy by her genuine love of liberty and the intrepidity with which she launches forth upon the great world of London. The other moiety of the plot is at present less interesting, but in every passage we have occasion to admire Mr. MacCarthy's consummate skill and literary practice. "Personal Adventures in War Time," understood to be from the pen of Colonel Valentine Baker, illustrate the catastrophe of the French army at Sedan. Mr. Thornbury's sketch of Athens under King Otho was never worth printing, and is still less worth reprinting. Dr. Hueffer's interesting essay is rather a contribution to the study of Prince Bismarck's personal character than of his "literary faculty," which seems nowise different from that of other strong men whose imperious despotism is tempered by a dash of humour of the grim sort. "Deep-Sea Exploration" is a highly interesting account of the problems in marine zoology solved or raised by the researches of the Challenger.

London Society also begins the New Year with a new serial story. "Proud Maisie" is in some sense a counterpart of "Miss Misanthrope," the leading motive being here again the longing for freedom and impatience of conventionality which animates the accomplished young ladies of the period quite as powerfully as their male relatives. Maisie is a most captivating heroine, and her adventures are so far narrated with a most unusual degree of gaiety and sprightliness. The other contents of the magazine are also very entertaining.

We have further to acknowledge Good Words, Cassell's Magazine, Aunt Judy, the New Monthly, the Churchman's Monthly, Potter's American Monthly, Golden Hours, the Monthly Packet, and the Victoria Magazine.

The Admiralty will appoint a Committee, under the presidency of Sir James Hope, to inquire into the outbreak of scurvy in the Arctic Expedition.

The following are the names of the committee appointed by the Admiralty to inquire into the cause of the outbreak of scurvy in the recent Arctic Expedition:—Admiral Sir James Hope, G.C.B. (president), Admiral Sir R. Collinson, K.C.B., Vice-Admiral E. A. Inglefield, C.B., Dr. James Donnet (Inspector of Hospitals, R.N.), and Dr. Fraser, F.R.S.E. Mr. Vansittart Neale has been appointed secretary.—The relics of the Polar Expedition, which were brought to England by Sir George Nares, have been forwarded by the Foreign Office to the United States Government.

The annual report of the Dover National Sailors' Home shows that the heavy gales of last winter brought many destitute crews to this refuge. A curious fact is mentioned with regard to eight distressed sailors who were at the Home on one recent occasion; they were all of different nations—there being a Welshman, an Englishman, a Norwegian, an Austrian, an American, a Russian, a Spaniard, and an Italian. They could not understand each other; but they all knew the signal for breakfast, dinner, and supper. Since the home was established no less than 452 crews, consisting of 4194 men of various maritime nations, have been welcomed within it. They are lodged, boarded, clothed, and sent to their various destinations.

EXHIBITION OF WORKS BY OLD MASTERS AT BURLINGTON HOUSE.

For the eighth year has the Royal Academy made its welcome gathering of Old Masters, the continuance of which display amply attests the art-wealth of the private collections in this country, and the liberality with which such treasures are used for the public good and enjoyment. Though containing no one work of absorbing interest, this selection is marked by an unquestionable quality of tone, which, whilst sustaining the general character of these exhibitions, falls somewhat short of the exceptionally elevated standard attaching to one or two of the early collections seen in these rooms.

As from the schools of Italy and Flanders are mainly drawn the supplies of works for these exhibitions, so, in proportion as the one or the other shall preponderate, have we placed before us the lofty abstractions of the ideal, or the felicitous renderings of realistic nature. In the present instance the latter prevails; and as on the features of the Flemish school the principles of our own are mainly founded, the comparison evoked by the juxtaposition of the works of that school with those of our deceased masters becomes the more exciting. That the result is not unsatisfactory to our position as artists a survey of these galleries will show; and, notwithstanding that Reynolds, Gainsborough, and other high names among us have been seen to better effect than on the present occasion, and some entirely absent, the comparison between the "old" masters and our own "deceased" cannot be drawn to the prejudice of the latter.

In future memories of this collection will be associated the fine examples of Dutch and Flemish art, and the two names of Raeburn and Vincent. Of Sir Henry Raeburn, Limner to the King in Scotland, 1823, little is heard on this side the Tweed, for, though a full member of the English Academy, he painted but few pictures from English sitters, visiting London but thrice in his life; hence the rarity in this country, except among Scottish families, of those examples of his powerful brush by which he is so well known in the northern capital.

Not the least of the services rendered to art by the Royal Academy is the judicious gathering under one roof a sufficient number of the works of some one artist, so as to afford the opportunity for that comparison and analysis of his principles and style essential to the due estimate of his power and rank. For such purpose the portrait works of Raeburn as here seen, though not exceeding twelve in number, are, happily, so selected as to embrace and illustrate the leading elements of his style, manner, and mode of work, and in his powerful sense of individuality, perception of character, breadth of treatment, vigorous precision of handling, and fidelity to local detail, as seen in the pictures here placed before us, are comprised qualities that render the best heads of this artist worthy of rank with those of Reynolds. That the first president of the English school distances the Scottish painter in elegance and variety is beyond doubt; but it is very questionable if, for masculine vigour of brush work and breadth, the hardy Northerner does not surpass the more courtly occupant of the English presidential chair.

In respect of the Flemish and Dutch pictures, for which this exhibition is notable, the Academy have been privileged by her Majesty in the loan of several works from the Royal collection. Other subjects have likewise been graciously lent by the Queen, to the number of eleven.

The selection of works by deceased British artists extend over a list of thirty names, embracing many of world-wide and increasing fame, together with others who, never having risen above the dull level of mediocrity, are now rapidly losing the slender tenure they once held on public interest. Largely contributing to the contents of Gallery No. 1, they attract not only by force of absolute merit, but from the comparison and contrast there offered between them and the product of other schools, and still more from associations identified with the circumstances of their execution. Representative works like Turner's "Lake of Geneva" (8), Constable's "Dedham Vale" (34), Vincent's "Greenwich Hospital" (12), and Wilson's "Cicero's Villa" (16), reflect much of the embodied life work and its surroundings of their respective authors, and in such opportunity as here afforded of viewing them side by side, we learn to recognise the idiosyncrasy of their producers, and read the handwriting of each in his art. Hence the great value of these collections as a means of art-education. A painter is never so well understood as when in parallel or contrast with his fellows—a position most favourable for our acquiring a knowledge either of the morale or technique of the artist.

Exquisite in certain elements of atmospheric effect, though changed in parts by oil-stain and discoloration, Turner's "Lake of Geneva" is highly characteristic of the period of its production, though marred in topographic value by the false proportions of the pine-trees on the foreground in their relation to the rest of the picture. In giving height to the mountains he dwarfed the trees for the sake of contrast. How far the end justifies the means is a question in art as in ethics. In close proximity to Turner's canvas is a work certain of welcome greeting. George Vincent, of the Norwich band of painters, a pupil of old John Crome, in painting "Greenwich Hospital," enlisted our sympathies by his subject and commands our admiration by his power. The Sailors' Home, of other days, has long been a favourite theme with English painters; and, when viewed in connection with its picturesque surroundings of craft and river, is fully worthy, as seen in the work before us, of the best resources of landscape art. At some distance in the picture the building is seen through a luminous atmosphere enveloping grandly drawn cloud forms, while the effulgent gleams of the noon-day sun, coloured to richness by the varying density of the air they penetrate, convert the water immediately beneath into a sheet of shimmering light. Boats and other incidents of the ever-varying traffic on this highway of the Thames are arranged with masterly power of composition and effect, completing a picture of a very high order, but from which we turn with regret and pity at the thought that but two or three others, somewhat similar in type, make up the life work of their gifted but unfortunate author. Pleasant memories arise before John Constable's "Dedham Vale," a spot he so well loved and often painted. Never is he seen so much at ease as in his transcripts of these truly English scenes of his early life, and rarely in greater power than in this, one of his most complete efforts. On an upright canvas of about 5 ft. high he spreads a glowing picture, full of light and freshness, of a locality supplying to him *matériel* for some of his most important and best-known works. Seen from a grassy height surmounted by a picturesque group of trees, the winding stream, under a showery sky, gleams in its course through meadow and hamlet on to the purple distance far away. Villages nestle on its banks, the church tower peeps from among some neighbouring trees, and his father's mill, where he himself had worked, stands in the middle of the canvas, the whole invested with a feeling of quiet and repose, typifying the peaceful disposition of the man. In texture and effect the work is firm and rich, and, though in its execution the palette knife has been freely used, as was common with Constable at this date, it is free from the eccentricities he frequently practised with that instrument at a later period. The works of Wilson, as in numbers

16 and 40, though interesting as marking the transition from the conventionalisms of their time to a later and more enlarged study of nature, have but little to recommend them when judged by a healthy standard of landscape art, beyond the remarkable facility in executive power acquired by the practice of the large number of canvases that passed from his easel.

Grand in impressive power and academic style, Hilton's fine altar-piece, "Christ Crowned with Thorns" (63), stands alone among the British contributions of the year. Should Vandyke's large work, in Gallery No. 3, be placed in rivalry against it, the verdict will, we think, be in favour of Hilton. Unfortunately for the higher walks of art, no demand for such work now exists, and even in the time of its production little more encouragement was offered. In the face of such circumstances we can only the more admire the energy by which the artist carried such an undertaking to completion. It was, however, bought for £1000, in 1823, by the British Institution, a body of gentlemen who performed many generous acts to striving artists in those days, and by whom it was presented to St. Peter's Church, Pimlico. At the destruction of this building, by fire, in 1835, it was saved by being cut from its frame. Reynolds, Gainsborough, and Romney are seen in average power, the last rather to disadvantage by contrast with his more robust competitors. Gainsborough's fondness for a mass of colour of sufficient quantity to give a title to the work, as in the "Blue Boy," may be seen in the "Portrait of the Marquis of Donegall" (23), by the use of a green dress; in that of "The Fifth Duke of Hamilton" (94), red is chosen for a similar purpose; whilst in (123) "Anne, Marchioness of Donegall" supplies the subject for a study in pale blue. Of this artist nineteen works are here shown, of which the portrait of Johan Christian Fisscher (22), the hautboy-player, is in many respects the most remarkable. Gainsborough was a musician as well as a painter, and gave his daughter in marriage to the original of this picture, in the execution of which, viewed by the evidence of the work itself, he bestowed the greatest care. Other noticeable works by this painter are 104, 225, and 69, a small full-length of Thomas Sandby, R.A., and his wife.

Sir Joshua's twenty-one canvases naturally include varying degrees of power; but among the valuable contributions of Lord Methuen are several showing the painter at his best, whether in the simplicity of childhood, the charm of feminine grace, or the dignity of manly vigour. The colour of "Surgeon Percival Pott" (221) points to his study of Titian, as others exhibit to what extent he was held enthralled by the magic of Rembrandt. His "Nelly O'Brien" is charming in its aspect of winning beauty, as the head of Dr. Burney (116) by its vivacity and life. The portrait of himself (210) and Burke (207) have an interest of daily increasing extent. Lawrence in 7, or in the head of Benjamin West (255) is not seen to advantage by contrast with the more vigorous portraiture around. His picture of John Abernethy (7), placed immediately over Raeburn's head of "Mr. Wardrop" (9), and in close proximity also to that of William Broadwood (13), suffers by the comparison. Still finer, by Raeburn, is "John Pitcairn, Esq." (251)—a head which, for lifelike aspect, breadth of modelling, and purity of local colour, is unsurpassed in the exhibition. Of female heads by Raeburn there are three, all especially commendable; but the sweet maternal aspect of the painter's wife (47) tells of her gentle heart and the home she brightened. The painter's old friend, John Clerk, Lord Eldin (15), supplies another admirable work; and the portrait (full length) of Dr. Spens (268), in the costume of the Royal Archers, shows the artist knew how to draw a good bow.

Entering Room No. 2, we are at once arrested by Rubens's powerfully-brilliant sketch of "Cymon and Iphigenia" (45), wherein all the voluptuousness of Boccaccio's story is heightened by the masterly drawing and colour of the great Fleming. Rarely is it so small a work of Rubens's wrought to such high completion, its undoubted authorship contrasting strikingly with a much larger example of very equivocal ascription. Further on is a widely-different example of this painter, in Lord Methuen's "Wolf-Hunt" (55); and in the "Portrait of a Gentleman" (65) is seen a head vividly recalling the manner of Vandyke's treatment of the "Gevartius" in the National Gallery. The post of honour in the great Room No. 3 is occupied by Lord Darnley's large Rubens, "Queen Tomoyris with the Head of Cyrus" (99), a grand gallery picture, well calculated to display the wealth of art its author has lavished upon it. In the "Virgin and Child" (105), also by Rubens, may be seen the influence of surrounding nature on that master in the face of the Virgin—purely Flemish, and one with which we are familiar in his works—doubtless the portrait of his model, and uninfluenced by any attempt at idealisation. Nothing could be more exquisite than certain passages of colour in this work—most notably so the right hand of the Virgin as placed on the side of the Infant Saviour, which figure, though modelled and coloured with the utmost charm, is not divine.

From Rubens to Vandyke the transition seems easy, notwithstanding the distance between the respective genius of each. Power is stamped in every touch of the one, as Refinement marks the work of the other. In the "Allegorical Subject" (284), by Rubens, the impetuous dash of brush is as far beyond the reach of Vandyke as the gentle tenderness of "Henrietta Maria" (100) is without the pale of the sterner mood of his master. This last-named head is one of the most characteristic, as it is one of the finest, works of the painter—an opinion inapplicable to 98, where her Royal husband is represented in armour with the insignia of kingly power. No. 136 represents the same unfortunate Monarch in an equestrian subject of small size, contributed by her Majesty. In the "Henrietta Maria," as in Vandyke's best portraits, is to be seen a quality of flesh-tint rarely found in any other painter, conveying a sense of the delicately varied surface of the skin. Also, as in 138, "Portrait of James Stuart, Duke of Richmond and Lennox," the objects in Vandyke's pictures are seen as under the effect of open daylight; hence their clear, agreeable, silvery tone, as opposed to the coloured medium of Rembrandt. For such large scriptural subjects as "The Betrayal of Christ" (109), Vandyke scarcely proves his competency; the style of composition recalls that of his master, but the handling is his own. To much greater advantage is he seen in "Don Livio Odascalchi" (56), a highly characteristic head, and well deserving of attention; as are also the two representative works of Velasquez—a head of the painter (101), and that of his patron, "Don Gaspar de Gusman, Duque d'Olivares" (96). Here we pause for the present.

Lord Aberdare presented the prizes, on Monday evening, to the school children at Mountain Ash. During the course of an address on the subject of education he said it must be a source of great satisfaction to them, as it was to him, to live in times when the Government showed such a hearty desire to assist in the education of the people, and did so much for the masses in assisting them to overcome difficulties which surrounded poverty. It was a matter of the greatest importance to the nation that a clever boy, whether the son of a poor man or a rich man, should come to the front, so that the nation should have the benefit of his ability.

THE STORMS AND FLOODS: DESTRUCTION OF PART

OF THE ADMIRALTY PIER, AT DOVER, ON NEW-YEAR'S DAY.

HEAVY RAINS AT CONSTANTINOPLE.

The day appointed by the Sultan's Government for the proclamation of the new Constitution for the Turkish Empire was not favoured with auspicious weather. This ceremony, of which we gave an illustration last week, from the sketch by Mr. Melton Prior, our Special Artist, took place in front of the "Sublime Porte," in Stamboul, the Turkish capital, divided from Galata and Pera by the Golden Horn. The first meeting of the European diplomatic Conference was held on the same day at Pera. There was a crowd of people, whose curiosity was excited by these important events, passing to and fro upon the wooden drawbridge between Galata and the suburb of Stamboul. Having arrived at the other side, the crowd was brought to a sudden stoppage by a large quantity of water, evidently caused by the heavy rains of the night before, which entirely prevented those on the bridge getting to terra firma without walking through it, or being carried over it on men's backs. Such, at least, was the awkward plight of the foot passengers. As our Artist passed over in a carriage he could not resist the opportunity of sketching the scene. The Turkish ladies were carried over by men, loudly quarrelling for the fares, and striving who should earn the most money. In the left-hand corner, some one had thrown down a couple of planks; but this was not enough to enable the immense crowd to pass by. Some ladies picked up their petticoats and bravely walked through the flood.

METROPOLITAN NEWS.

The Fishmongers' Company have made a grant of a hundred guineas to the building fund of Girton College.

At the meeting of the Society for the Encouragement of the Fine Arts, on Wednesday evening, Mr. Ferdinand Praeger delivered a lecture on Richard Wagner's Tetralogy.

A pigeon show held at the Crystal Palace this week numbered 1100 specimens, and the value of the birds was appraised by their owners at £10,000.

The following donations, among others, have been received by the treasurers of the Middlesex Hospital:—Lady Louisa Percy (for an hydraulic lift), £500; Messrs. Marshall and Snelgrove, £50.

The jubilee ball of the Licensed Victuallers' Asylum will take place, at St. James's Hall, on Thursday, the 18th inst. This excellent institution consists of 170 houses, chapel, and chaplain's residence.

The annual New-Year's entertainment at the Metropolitan District Asylum for Imbecile Children, Lower Clapton, will be given on Thursday, the 25th inst. A novel feature in the proceedings is that the patients themselves take part in the entertainment.

At the first meeting of the London School Board, on Wednesday, after the Christmas recess, Sir Charles Reed, the chairman, read a letter from Mr. E. N. Buxton expressing regret at the paucity of scholarships to be given away this year and inclosing a cheque for £200 as a partial stop-gap.

The Victoria (Philosophical) Institute held the first meeting of the year in its new apartments on Monday—Mr. C. Brooke, F.R.S., in the chair. Several new members were elected. Papers were read on Materialistic Philosophy by Dr. J. M. Winn, and on the Forms of Causative Energy for Material Creation, by R. Laming, Esq. A discussion followed.

The weekly return of metropolitan pauperism shows that the total number of paupers last week (the first in January, 1877) was 82,956, of whom 38,331 were in workhouses, and 44,625 received outdoor relief. Compared with the corresponding weeks in 1876, 1875, and 1874, these figures show a decrease of 3755, 15,164, and 22,839 respectively. The number of vagrants relieved on the last day of the week was 832, of whom 628 were men, 168 women, and 36 children.

A conference of tea-dealers, scientific gentlemen, and others was held in London on Tuesday, when it was resolved that strong representations should be made to the Board of Trade and sanitary and other authorities, with a view to procure the destruction of all adulterated, faced, or otherwise spurious teas now in bond, and also to induce the Custom House authorities to use due vigilance to prevent such teas from being taken in bond at any future time.

The Council of the Society of Arts have made arrangements for the delivery of six lectures on various scientific subjects, which will take the place of the usual papers and discussions at six Wednesday-evening meetings during the session. The following gentlemen have consented to deliver lectures:—Sir John Lubbock, Bart.; Mr. E. J. Reed, M.P.; Professor W. K. Clifford, Professor Alexander Kennedy, Dr. B. W. Richardson, and Mr. James Baillie Hamilton.

The annual meeting of the Royal Dispensary for Diseases of the Ear, Frith-street, Soho, was held on Monday last. The Secretary read the report for the past year, which showed an increase in the number of patients to the number of one hundred, the total of those who had attended the dispensary during the past year being 3000. The death of the senior surgeon, Mr. William Harvey, was announced; and Dr. Urban Pritchard, F.R.C.S., was elected to fill the vacancy. Dr. Matheson was appointed assistant surgeon. The new premises at 66, Frith-street, have been permanently secured.

On Wednesday evening the prizes gained by the members of the 3rd Middlesex Artillery Volunteers were distributed in St. James's Hall by Lieutenant-Colonel Tolmé, in the absence of Lord Truro, who is the Colonel of the regiment. A ball followed. The programme contained twenty-four dances, the regimental band supplying the necessary music.—The regimental ball of the 9th Middlesex Volunteers was appointed to be held, last evening, at the St. James's Hall—dancing beginning shortly after nine, to the inspiring music of the Grenadier Guards band, conducted by Dan Godfrey.

The winter conversazione of friends and members of the Working Men's College, Great Ormond-street, Bloomsbury, was given on Thursday evening; the classes reopened for the ensuing term on the following night. In addition to the various classes already existing in mathematics, in languages ancient and modern, in history, and in physical science, new classes will be commenced in Spanish, Italian, French, chemistry, moral philosophy, arithmetic, algebra, and geometry. The drawing classes, we understand, have been recently placed under the superintendence of Mr. Arthur Hughes.

On Wednesday evening the Lady Mayoress gave a ball at the Mansion House in celebration of the coming of age of her sister, Miss Florence White. The guests, about five hundred in number, included the aldermen, sheriffs, and others in authority in the City, and the principal families in the county of Essex, where the Lord Mayor has long resided. Dancing, to the music of Gates's band, from Brighton, began about ten o'clock, the Lord Mayor opening the ball with Miss Adelaide White, of South Shields, the Lady Mayoress with Mr. Alderman and Sheriff Hadley, and Miss White with Mr. Sheriff East.

His Excellency the Netherlands Minister, Count van Bylandt, has consented to preside at the anniversary festival of the Society of Friends of Foreigners in Distress, on Wednesday, March 21.

On Wednesday was laid the memorial-stone of a new chapel and school, in connection with Mr. T. B. Stephenson's good work, the Children's Home, Bonner-road, at the east end of London. Mr. Alderman and Sheriff Hadley presided.

The annual meeting of the committees of the Civil Service Life-Boat Fund was held, on Wednesday, at the General Post Office—Mr. W. H. Haines in the chair. A highly satisfactory balance-sheet was laid before the committee by Mr. Charles Turner, and the report of the proceedings of the fund for the year 1876 was read by the honorary secretary, Mr. Charles Dibdin. From this it appears that the name of Lord Hampton has been added to the list of vice-patrons, and that the number of subscribers for the past year has been 3263—an increase of 652 on that for 1875. The life-boats, Civil Service and Charles Dibdin, presented to the Royal National Life-Boat Institution by the fund and still fully supported by it, have up to the present time attended twenty wrecks, saved three vessels and the lives of ninety-eight persons.

The Christmas and New-Year's meetings of the Tonic-Sol-Fa College have been concluded at the Literary Institute, Aldersgate-street. The subjects discussed were chiefly of a practical kind, including voice training, the classification of voices in choirs, the elementary teaching of the pianoforte, the musical training of pupil teachers, conducting, and the various appliances of the tonic-sol-fa method. There were also lectures, illustrated by music, on the Musical Form of the Rondo, Minuet, and Sonata; on Wagner, and on the employment of harmony in congregational music. At the first meeting the corporate seal of the college was attached to the conveyance of a piece of land at Forest-gate, which has been bought for the purpose of erecting buildings, which are imperatively needed for the classes conducted by the college.

A public dinner was given, on Wednesday night, at Willis's Rooms, in support of the Borough Jewish Schools in Walworth-road. Baron Henry de Worms was in the chair. The schools contain 160 children, of whom the majority are girls—a fact due to the success and popularity of the school-mistress, Miss Samuel. The school earned the favourable report of her Majesty's Inspector last year, and also that of Dr. Hermann Adler, who examined the children in Hebrew. The Government grant earned was £80, the school fees come to an equal amount, and the yearly subscriptions are £190. The total annual expenditure, however, is £650, and there is a periodical deficiency, which last night's appeal was designed for a time to supply. In the course of the evening the treasurer, Mr. A. Montefiore Sebag, announced that over £900 had been collected, about half of it by a past president of the committee, Mr. Barnett Meyers.

Seven hundred boys and girls belonging to the training-ships Chichester and Arethusa, farm schools, and London refugees, assembled at the Boys' Refuge, Great Queen-street, Lincoln's-inn-fields, yesterday week, to have their annual New-Year's dinner and receive the prizes which had been awarded them. The inmates of the various institutions at the close of 1875 numbered 1597. In 1876, 483 boys had been placed in situations, and sent out as emigrants, or engaged in the Royal Navy and the merchant service; 64 girls had in 1876 been placed out at service, making a total of 547. Nearly 500 children had been gratuitously educated in the ragged, day, night, and Sunday schools, and in the winter months about 6000 dinners had been given to the ragged-school children. Admiral Sir W. King Hall presided at the distribution, after which he addressed the meeting.—The annual breakfast to above 800 destitute persons, in connection with Gray's-yard Ragged Church, was held on Sunday morning at the Princess Concert-Rooms, Castle-street, Oxford-street, at ten o'clock, when Mr. F. A. Bevan took the chair.

The annual meeting of the governors and subscribers to the British Orphan Asylum, Slough—which is under the patronage of the Queen and several members of the Royal family—was held, on Tuesday, at the Cannon-street Terminus Hotel, under the presidency of Mr. C. Woolston, J.P., the deputy-chairman. The report stated that the year 1877 was the jubilee year of the asylum, and the directors considered that the event ought to be marked by decided efforts to place upon a more permanent basis its usefulness. They recorded with gratitude that the health of the children had been very good during the past year. The report of the official examiners on their education continued to be favourable. Legacies had been received during the year amounting to between £3000 and £4000. The chairman, while moving the adoption of the report, said there were on that occasion eighty-three candidates seeking election to the benefits of the asylum, but the financial condition of the institution would admit of the election of only twenty, and after that day's election there would be 214 orphans on their books. He earnestly appealed for help.

The half-yearly general court of the Royal Humane Society was held, on Tuesday, at the offices in Trafalgar-square—Mr. W. Hawes (treasurer) in the chair. Mr. Lambton Young (secretary) reported that during the year the number of persons who had bathed in the Serpentine was estimated at 305,000, and of these only one had been drowned. At the Waterloo Bridge receiving-house thirty-nine cases were received, and twenty were successfully treated, making, since the foundation of that dépôt, seventy-four persons saved out of nearly 150. The election of officers was then proceeded with, the Duke of Argyll being re-elected president for the ensuing year. The number of persons who had distinguished themselves in the saving of life amounted to five, and in accordance with the rules of the society one of them was awarded the Stanhope Gold Medal. The recipient was Mr. G. W. B. Storey, of Henbury, Tasmania, who rescued three persons from a flood which occurred at that place in August, 1875. Mr. Storey had to swim seventy yards, and succeeded, after battling against the stream for three hours, in conveying each of the persons separately on to dry land. He then with great difficulty managed to reach the house of a friend, distant about two miles, on the opposite side of the river.

According to annual custom on the first Monday after the Epiphany—Plough Monday, as it is generally called—the Lord Mayor went in state from the Mansion House to the Guildhall, to preside at a Grand Court of Wardmote for the reception of the returns from the several civic wards of the results of the election of Common Councilmen on St. Thomas's Day last. The returns showed that in the twenty-six wards 208 Common Councilmen, in all, had been elected—namely, for Farringdon Within and Without, 30; Cripplegate, 16; Bishopsgate, 14; Aldersgate, Aldgate, Billingsgate, Broad-street, Bridge, Broad-street, Castle Baynard, Cheap, Coleman-street, Langborn, Portoken, and Tower, eight each; Candlewick, Cordwainer, Cornhill, Dowgate, Queenhithe, Vintry, and Walbrook, six each; and Bassishaw and Lime-street, four each. There are only six new members of the Court—namely, Mr. J. L. Cross, Mr. Frederick Stanley, Mr. John Corke, Mr.

Walter H. Wilkin, and Mr. John R. W. Luck. There was no opposition to the returns. The City Marshal (Major D. J. P. Campbell) was sworn in the fulfilment of his duties, and the ward beaules, market officers, and other special constables were appointed. In the evening the Lord Mayor and the Lady Mayoress entertained the officers of their household and others at a dinner at the Mansion House.

The fourth meeting of the present session of the Royal Geographical Society was held, on Monday, in the theatre of the London University, Burlington-gardens—Sir Rutherford Alcock, K.C.B., presiding. On the reading of the minutes Sir Mordaunt Wells complained of the arrangements made for the meeting in St. James's Hall. The president ruled that the speaker was out of order, and he added that as there were 6000 persons entitled to be present on the occasion referred to, while it was impossible to accommodate one half the number, inconvenience was unavoidable. Mr. Robert Michell then read a paper on the Russian Expedition to the Alai and Pamir, compiled chiefly from letters written by a Russian officer. The range of country surveyed lies between the seventy-third and seventy-sixth degrees of longitude, on the borders of Turkestan. The features of this mountainous country and the chief characteristics of the tribes that inhabit it were described very fully by Mr. Michell, and a protracted discussion of a technical kind followed the reading of his paper, in which Colonel Yule, Sir Henry Rawlinson, Sir Douglas Forsyth, General E. Strachey, and Sir George Campbell took part. In his concluding remarks the president said that the part of Asia that had been under discussion was, perhaps, less known than any other, and any small modicum of knowledge with regard to it must be gratefully received.

The half-yearly meeting of the governors of the Deaf and Dumb Asylum, Old Kent-road, and Margate, Kent, was held, on Monday, at the Cannon-street Hotel—the Rev. Prebendary Evans in the chair. The subscribers were informed that the venerable treasurer, Mr. Beriah Drew, had recently asked the committee to accept his resignation; and, bearing in mind Mr. Drew's great age, and that the duties of the office involve much attention to the affairs of the charity, the committee had most reluctantly complied with the treasurer's request. A special vote of thanks to Mr. Drew for long and valuable services to the charity was agreed to unanimously. Mr. Drew, it may be mentioned, has been a governor of the charity between seventy and eighty years, and has filled the office of treasurer more than twenty-five years. Mr. Charles Few, a member of the committee, was elected treasurer. During the last year seventy-six children were admitted and sent to the branch asylum at Margate, which was made use of for the first time in August last. The progress made by the children at the branch asylum has been perfectly satisfactory to the managers. Mr. Richard Elliott, an assistant at the Old Kent-road Asylum for thirteen years, has been appointed to the head mastership of the branch asylum. Eighty-one children left the London asylum last year, and thirty-five were apprenticed to various trades. It has been resolved to have the children at both asylums periodically examined by independent examiners. The charity now consists of two large asylums, requiring a considerable annual outlay. The past year had not been, in a financial point of view, so satisfactory as usual. The committee hope that during the year now opening there may be no necessity to limit the operations of the charity for the want of pecuniary assistance from the public generally. The ordinary receipts in 1876, including a balance from the previous year of £1296, amounted to £9354, and the general expenses to £12,055, the deficit having to be met by absorbing the sum of £334 bequeathed as legacies, instead of being funded. After appointing officers for the ensuing year, the election of fifteen boys and ten girls was proceeded with.

PREPARATION FOR PUBLIC SCHOOL TEACHERS.

The desirability of evening training classes being instituted, whereby persons who desire to become successful teachers, and who possess a natural aptitude for the office, as well as the indispensable culture, can receive the requisite technical training, has frequently been advocated in several leading journals.

To meet this desideratum, the Rev. John Rodgers, M.A., vice-chairman of the London School Board, has opened evening classes, under the superintendence of the Rev. Charles Westly Groves, M.A. (Wrangler), at which, for a comparatively small fee, aspirants to the teachers' work can attend nightly lessons and lectures given by six experienced tutors.

The course of instruction is especially designed to aid those who essay to pass the Government examinations, and who subsequently propose to become (if not already) middle-class or elementary public school teachers.

This opportunity is not intended to be embraced by those who can enter a recognised training college, but for such as unfortunately are unable to avail themselves of the privilege.

The new session will be opened at seven p.m. on Monday next, the 15th inst.

LECTURES ON CAPITAL AND LABOUR.

A course of four lectures to the members of working-men's clubs and others, similar to those which created so much interest last winter, will be given by Professor Leone Levi, on Saturday afternoons, at four o'clock. At the close of each lecture an hour will be occupied in discussion and in reply to questions; and, after the conclusion of the course, there will be a written examination for such members of the club affiliated to the Club and Institute Union as may desire to attend. To those who distinguish themselves prizes will be awarded by the council of King's College, in the theatre of which institution the lectures will be delivered. The first lecture will take place next Saturday, the 20th inst., the subject being the Use of Capital in Industry; and Mr. Samuel Morley, M.P., will preside. Tickets of admission for those who are not members of working-men's clubs may be obtained at the office of the Club and Institute Union, 150, Strand.

Yesterday week several members of the Working Men's Club and Institute Union were received at a conversazione by the Dean of Westminster in the Jerusalem Chamber. Amongst these present were Professor Tyndall, Professor Seeley, Sir W. Dainton, Mr. G. Grove, the Rev. H. Solly, Mr. Hodgson Pratt, and several members of the council.

CANADIAN PRODUCE.

There is now to be seen at the offices of the Canadian Government Agency, Canada-buildings, Queen Victoria-street, a collection of the agricultural products of the province of Manitoba, in the dominion of Canada. These consist of specimens of wheat, barley, rye, hops, beet, turnips, onions, mangold wurtzel, and various other items of farm produce, together with some specimens of mineral wealth, including silver, lead, iron, the Canadian amethyst, and other mineral productions. The object of the agency has in view in exhibiting these products is to stimulate British emigration to the north-west territory, where, it is stated, land is to be had for a few shillings an acre. The various specimens of farm produce are represented as emanations from the unmanured and virgin soil of the country, and will repay a visit of inspection. The statistics of the produce are, of course, those furnished by the

agency. Taking some of the leading specimens promiscuously, there are some Swedish turnips yielding, it is said, 35 tons to the acre, ranging from 7 lb. to 24 lb. in weight; there are also some white Dutch turnips yielding from 25 to 30 tons per acre. There are globe and long red mangolds, some gigantic horse-radish, blood-red beets, kohlrabi, red and brown onions, yielding 500 bushels to the acre, without weeding or thinning; specimens of oats, marsh hay, yielding 4 tons per acre; prairie-grass, broad beans, wild hops, early horn carrot, &c. A specimen of the soil of the district, a rich black loam, is also exhibited by Mr. Whellans, at the request of the agent of the Canadian agent in this country.

This is the first occasion on which the farm products of the north-west of the Dominion have been introduced into England, and their inspection might well form an element in determining intending emigrants upon the choice of a locality to which to proceed.

A WEEK'S BIRTHS AND DEATHS.

The total number of births registered in London last week was 2819, and there were 1507 deaths. Allowing for increase of population, the births exceeded by 200, whereas the deaths were 243 below, the average numbers in the corresponding week of the last ten years. The deaths included 116 from smallpox, 28 from measles, 25 from scarlet fever, 12 from diphtheria, 32 from whooping-cough, 22 from different forms of fever, and 18 from diarrhoea; thus to the seven principal diseases of the zymotic class 253 deaths were referred, against 237 and 235 in the two preceding weeks. These deaths were 6 below the corrected average number from the same diseases in the corresponding week of the last ten years. The fatal cases of measles, scarlet fever, and whooping-cough were in the aggregate 83 below the corrected average. The deaths from diphtheria showed an excess. The deaths referred to fever were 18 below the corrected average; 3 were certified as typhus, 14 as enteric or typhoid, and 5 low or simple fever. The 298 deaths referred to diseases of the respiratory organs showed a decline of 54 from the number in the previous week, and were 163 below the corrected average weekly number.

The deaths from smallpox, which had been 75, 97, and 75 in the three preceding weeks, rose last week to 116, the highest weekly number during the present epidemic; 45 were certified as unvaccinated, 40 as vaccinated, and in the remaining 31 cases the medical certificates did not furnish any information as to vaccination. The 116 fatal cases included 47 in the Metropolitan Asylum Hospitals at Homerton, Stockwell, and Hampstead, 5 in the Highgate Smallpox Hospital, 2 in the North-street Infirmary (Poplar), 1 in an ambulance, and 1 in the House of Correction; the remaining 60, or 52 per cent, of the total cases, occurred in private dwellings. The fatal cases showed a marked increase in East and South London. The Metropolitan Asylum Hospitals contained 859 smallpox patients on Saturday last, against numbers increasing steadily from 185 to 823 in the ten preceding weeks; about 200 cases were necessarily refused admission during the week, all the available beds being occupied. In consequence of the increase of smallpox in the metropolitan district, and the inability of the existing hospitals to admit all the applicants, the Asylums Board on Saturday resolved to rent premises in Limehouse for a year, if an agreement can be arranged with the landlords.

Eight deaths were caused by horses in the streets. At the Royal Observatory, Greenwich, last week, the mean temperature was 46 deg., or 10 deg. above the average.

A YEAR'S BIRTHS, DEATHS, AND MARRIAGES.

In the course of the fifty-two weeks of the year 1876 there were 127,015 births registered in London, a number which is equivalent to an annual rate of 36.5 per 1000 inhabitants, that for the previous year being 35.7. Going back to the year 1856, the total is found to be 86,833, so that, in other words, the births in London in 1876 were nearly half as numerous again as they were in 1856. The births in the past year show an excess of 49,604 over the registered deaths; this number, therefore, represents the year's natural growth of the population of the metropolis. In round numbers, it may be said that there were 15 children born in London in every hour, and 9 persons ceased to exist.

During the fifty-two weeks of 1876 there were 77,411 deaths registered in London, a number which is equal to an annual rate of 22.2 per 1000 inhabitants. The rate for 1875 was 21.5, but with this exception there is no earlier record of a satisfactory rate until the year 1856. Of the total deaths in London in the past year, 13,925 took place in workhouses, hospitals, and other public institutions; 5278 were inquired into before coroners; and 2885 represents the number of fatal accidents, or, more strictly, violent deaths. There were 19,893 deaths of infants under one, and 15,512 of adults aged sixty and upwards. The fatal cases of zymotic diseases were:—Smallpox, 735; measles, 1741; scarlet fever, 2297; diphtheria, 359; whooping-cough, 2739; fever, 1176; and diarrhoea, 3518. As compared with the totals of the previous year smallpox shows an increase of 660, measles of 314, and diarrhoea of 320. On the other hand, scarlet fever has declined by 1354 fatal cases, other fevers by 106, diphtheria by 187, and whooping-cough by 493.

According to the Registrar-General's annual report for the year 1876, the date of the last return, there were 33,248 marriages celebrated in London. Of this total 28,910 took place according to the rites of the Church, while 4338 were not in conformity to the rites of the Establishment. Of the 28,910 Church marriages 10 were by special license, 3323 by the ordinary license, 25,514 by banns, 37 were on production of the superintendent registrar's certificate, and in 21 cases the particulars were not stated. Of the 4338 Nonconformist marriages, 1108 were of Roman Catholics, 1285 related to other Christian denominations, 1634 took place in the registrar's office, 4 were of Quakers, and 307 of Jews. The marriages are thus distributed according to seasons:—In the March quarter, 6500; in the June quarter, 8689; in the September quarter, 8883; and in the December quarter, 9176. As to the "civil condition" of the married, it appears that 27,032 marriages were between bachelors and spinsters, 1604 between bachelors and widows, 2907 between widowers and spinsters, and 1705 were of widowers with widows. Altogether there were 4612 widowers married, and 3309 widows. As to the age of the married, it is stated that there were 1531 men married under twenty-one, and 5532 women. There were 1284 cases in which both the man and woman signed by mark, and there were 4488 instances where one of the parties signed in a similar manner. Altogether there were 2708 cases where the man signed by mark, and 4438 of women.

Lady Burdett-Coutts has contributed £300 to the fund for providing a new building for the British Horological Institute.

Mr. Richard Daft, captain of the Nottingham County Eleven of Cricketers, was on Tuesday, entertained at a dinner at Nottingham, and presented with a service of plate, £500, a silver tankard, and a silver hunting-flask. The plate service and money were chiefly the outcome of a match played at Nottingham, in July last, for the benefit of Mr. Daft.

THE CHURCH.

PREFERMENTS AND APPOINTMENTS.

Bennett, J. W., to be Vicar of St. Paul's, Hampstead.
Bulstrode, George; Honorary Canon of Ely Cathedral.
Copley-Brown, George James; Rector of St. Edmund's, Salisbury.
Dowland, Edmund; Rector of Tarrant Keystone, Dorset.
Gardner, Thomas James C.; Perpetual Curate of Baddeley Ennor, Warwick.
Gibson, Hugh Harries; Bishop's Vicar in St. David's Cathedral.
Barrett-Lennard, John; Rector of Crawley, Sussex.
Lumley, W. L.; Chaplain to the Chelmsford County Gaol.
Martin, Walter Willasey; Rector of Shepperton.
Mathwin, J.; Vicar of Tanfield; Vicar of West Pelton, near Chester-le-Street.
Morphe, John Cross; Vicar of Stradsett, Norfolk.
Pelle, W. O.; Rector of Markshall, Essex.
Peplow, Hammer William Webb; Vicar of St. Paul's, Onslow-square.
Philpott, Newman George; Rector of Thwaite All Saints, Norfolk.
Purton, H. B.; Rector of Kinwarton with Chapel of Great Alne.
Richards, H. W. P.; Vicar of Isleworth; Rural Dean of Ealing.
Robinson, Eustace; Vicar of Grimley.
Roxly, Wilfrid; Rector of Thornford, Dorset.
Sharland, George E.; Vicar of Easton-cum-Stow, Songa.
Slaw, John; Minister of St. John's, Chelsea.—*Guardian*.

The Bishop of Exeter is to be presented with a pastoral staff in recognition of his generosity in diverting £800 a year from his income to the see of Truro.

The Rev. Edward Tucker Leake, of Cambridge, has been appointed Canon and Chancellor of Lincoln Cathedral, in the room of Dr. Benson.

A memorial church to the late Bishop Sumner was consecrated, at Farnham, on Tuesday. The Bishop of Winchester and the Bishop of Guildford took part in the ceremony.

The Rev. H. R. Haweis, Incumbent of St. James's, Marylebone, has received a special licence from the Bishop of London to officiate at St. James's Hall, Regent-street, during the repairs in his own church.

On Tuesday week the Bishop of Durham consecrated St. Andrew's Church and burial-ground at Stanley, which is part of the newly-formed parish of Beamish. The total cost has been about £4500, and all the money, except £50, was subscribed before the consecration. The church provides accommodation for 400 people.

The Rev. J. J. Glendinning Nash, M.A., has been elected (out of eight candidates) by the parishioners to the Thursday morning lectureship of St. Peter-upon-Cornhill, founded in 1669. Mr. Nash has arranged for the delivery, on Thursday, of a course of lectures on "The History of St. Paul, viewed in connection with Modern Life."

Sir Michael Hicks-Beach, on Saturday last, laid the foundation-stone of a new church, at Cheltenham, to be dedicated to St. Matthew. The Bishop of Gloucester was present. At a subsequent luncheon Sir Michael expressed his belief that never was the Church of England stronger in the affections of the laity, and that, whatever evils might be in store for her, she would come out purified, strengthened, and enlarged.

A handsome testimonial, consisting of a silver salver, a pair of candelabra, and a set of corner dishes, in value about £300, was presented, on Monday evening, to the Rev. Edward Capel Cure, the recently-appointed Rector of St. George's, Hanover-square, by his old and attached parishioners of St. George's, Bloomsbury. A testimonial from the ladies of Bloomsbury had been previously presented to Mrs. Capel Cure.

Castleacre church, one of the noblest of the Norfolk churches, was reopened by the Bishop of Norwich, on Thursday week, after a thorough and costly restoration. The parish is an interesting one, having been the stronghold of the De Warennes from the time of the Conquest till the reign of Edward III. The ruins of their fortress and of the Cluniac Priory, built by them, are extensive and picturesque, and serve as massive mementoes of departed feudal power.

At a public meeting held in Bristol, on Tuesday, it was resolved to memorialise the Home Secretary to bring in a bill for the reconstitution of the ancient see of Bristol by dividing it from that of Gloucester. It is proposed that the new Bishop should also be Dean of Bristol, by which an income of £1500 would be secured. Dr. Ellicott offers £500 a year, and it is intended to raise £25,000, so as to secure another £1000, or a total of £3000 a year.

Considerable tumult interrupted the ritualistic ceremonies in St. James's Church, at Hatcham, on Sunday. The singing of the Introit was drowned by a chorus of "God Save the Queen," and the noise of an angry crowd outside the edifice continually disturbed the services within. At Blackburn an inhibited clergyman caused some trouble by continuing to preach, and by refusing to give up the keys of his church; but a conflict was averted by the action of the police.

The church of Weston-under-Lyzzard, near Shifnal, having been recently restored, at considerable cost, from plans by Mr. Ewan Christian, by the Earl of Bradford and the Hon. and Rev. J. R. O. Bridgeman, Rector, was reopened by the Bishop of Lichfield on Thursday week. The early portions of the church are of the fourteenth century, and it contains the effigies of two Knights Templars from whom the Earl of Bradford is descended.

The Bishop of Worcester has lately consecrated the new Church of St. George, Redditch. The building, which consists of a nave and aisle, with a chancel, will accommodate 400 worshippers. It is in the Early English style. His Lordship preached on the occasion, and at the lunch congratulated the Vicar of Redditch, the Rev. G. F. Fessey, on the success of his exertions to increase the efficiency of the church in his parish. Till now, Redditch, with a population of 8000 souls, had possessed but a single church.

The Rev. Arthur Majendie, Rector of Woodstock, makes an appeal for help towards the restoration of the church of Woodstock, which, he remarks, is interesting not only on account of its historical associations, but also on account of the beauty it had before it was marred by the bad taste and neglect of ages. The Duke of Marlborough and other members of his family have given nearly £1000 towards the work. The architect, Mr. Arthur Bloomfield, says that £5000 will be required for the proper restoration of the building.

Chiefly through the liberality of Captain Whitmore, the parish church of St. Helen, Gumley, Leicestershire, has been brought into a condition not unworthy of its sacred character. The spire, which had been struck with lightning, has been restored to the perpendicular, and the shabby little chancel of fifty years ago has been rebuilt upon its ancient foundation. In other respects the church has been greatly improved and adorned under the care of Messrs. Bodley and Garner, of Gray's Inn. The church was reopened, on the 1st inst., by the Bishop of Peterborough.

St. Luke's Church, Kilburn, was consecrated by the Bishop of London, on Tuesday, in the presence of a good congregation, composed chiefly of the working classes. It is to provide for the spiritual need of this largely increasing neighbourhood that the church has been built, upwards of 500 persons now living in the district. The church, which has been completed at a cost of £4500, contains 800 free sittings. The building is in the early English style of architecture. All the work has been

carried out by Messrs. Dove Brothers, the church builders, under the direction of Mr. John T. Lee, architect. The Incumbent appointed to the new church is the Rev. Ralph Williams, formerly in charge of Christ's Church, Stepney.

Last Saturday afternoon the Dean of Manchester opened a new church, which has been built at Wilslow by Mr. George Fox, in memory of his wife. It has cost about £3000, and will furnish accommodation for nearly 400 persons. The pastoral care of the district has been assigned to the Rev. W. J. Scarlin, but the services will be conducted alternately by the Rector of St. Bartholomew's and the rev. gentleman until the church is endowed and consecrated. All the sittings are free, and the services are to be kept up by the weekly offertory, it having been the desire of the founder "to provide means of worship and instruction, and, having so done, to leave their maintenance to those who use them."

The trustees under the will of the late Mr. Thomas William Hill have paid over to the Ecclesiastical Commissioners the sum of £10,000 in augmentation of the living of St. Silas, Bristol. They have also paid £25,000 to the trustees of Hill's Almshouses, Berkeley-place; have made arrangements to pay £20,000 to the trustees of the Bristol Royal Infirmary for the maintenance of the wing erected by Mr. Hill; and have also set apart a sum of £5000 as a permanent endowment for providing a curate or curates for the parish of St. Silas. There is, after providing for these bequests, a considerable balance remaining, which, it is understood, will be applied for the benefit of the schools of St. Silas and St. Luke's, Badminton.

The scheme started, last year, by the Rev. Canon Hill, Vicar of Sheffield, to build nine additional churches in that town within five years is making good progress. At a meeting held on Monday the rev. gentleman stated that two churches had been promised, besides donations of money to the amount of £20,000. He also mentioned that a gentleman had purchased the moiety of the advowson of the parish church of Sheffield, with the intention of handing it over to the Simeon trustees. The Archbishop of York presided at the meeting, and expressed himself full of hope at the advance being made by the Church of England in Sheffield.—Yesterday week Sir Gilbert Scott paid a visit to Sheffield for the purpose of inspecting the parish church, with a view to its restoration. The *Sheffield Telegraph* understands that Sir Gilbert expressed himself confident that the edifice could be made worthy of the commanding position it occupied in the centre of the town. The cost of making the necessary alterations is to be borne by Mrs. Thornhill-Gill, of Stanton-in-the-Peak, Derbyshire, whose contribution of £10,000 has been already lodged in the bank.

The well-known excellent little work, "Who's Who," published by A. H. Baily and Co., Cornhill, has been thoroughly revised, and the information contained therein is brought down to the latest possible date.

We announce with regret the death, yesterday week, of Mr. Robert Landells, who was for many years one of the Special Artists of this Journal. A portrait of Mr. Landells will be given in our next issue.

A provision-dealer in Bristol, whose father compounded with his creditors about twenty-five years ago, has just paid not only the balance due on his father's death, but interest up to the time of payment.

The Dorset rifle battalion, under the command of Colonel Steward, met at the Dorsetshire Corn Exchange, on Tuesday, and presented to Colonel G. Mansel, who is retiring from the command, his portrait, painted by Mr. Stephen Pearce, of London. Lord Eldon made the presentation.

Mr. John Morley, in addressing a meeting of the Miners' Association at Hanley, on Monday evening, confined his observations chiefly to the subject of trades unions, pointing out the aims and objects of these organisations, their bearing upon the development of capital and upon the rate of wages, and the unsound nature of the charges brought against them. He strongly advised his hearers to assist the agricultural labourers in forming similar organisations amongst themselves.

The first number of a new weekly penny journal, *The Colonies*, which has grown out of the fortnightly circular hitherto issued under that name by Messrs. Silver and Co., emigration agents, of Cornhill, made its appearance on Saturday last. It contains eight pages of interesting and instructive matter concerning the affairs of each of the British colonies and of India, editorial comments, summaries of colonial news, descriptive essays and sketches, and original correspondence. We consider it likely to be very useful, more especially to intending emigrants and to commercial men.

The following, in the order of merit, are declared by the Civil Service Commissioners to be the successful candidates at the open competition, held in December, 1876, for admission to the Royal Military Academy, Woolwich:—S. Davidson, P. L. O. Roper, R. Leigh, A. S. Wedderburn, S. L. Norris, W. E. Fairholme, P. B. Taylor, E. A. P. Hobday, H. J. Du Cane, C. D. Learoyd, W. W. Baker, J. H. L. Dallas, J. E. Harvey, H. R. Butler, G. R. Darley, E. W. W. Beecher, A. G. Drummond, G. V. Kemball, F. E. Cooper, G. D. A. Alexander, J. H. Balguy, R. L. Heygate, N. D. Findlay, B. B. Russell, L. J. D. Hepenstall, D. A. Mills, A. H. Block, the Hon. R. Tyrwhitt, J. H. Thompson, F. C. L. Manning, H. K. Jackson, H. Mullally, H. E. W. de Roebeck, F. H. Hornblow, J. G. Turner, J. A. Labalmondiere, Viscount Feilding, H. H. Beaver, E. F. Nelson.

The great sea serpent will not be ignored. He has now appeared, by affidavit, in a police court. The captain and crew of a vessel called the *Pauline*, which has arrived in the Mersey from Akyab, report that in July, 1875, off Cape San Roque, on the north-east coast of Brazil, they saw the great sea serpent. On Tuesday the captain, whose name is Drevar, appeared before the stipendiary magistrate of Liverpool, Mr. Raffles, and expressed a wish, on his own behalf and that of his crew, to make a declaration affirming the truth of their statements respecting the serpent. Mr. Raffles desired Captain Drevar to prepare a written declaration and bring it before him. This Captain Drevar did, on Wednesday, accompanied by a number of his crew. The declaration is to the effect that he and others on board the *Pauline*, on July 8, 1875, while in latitude 5 deg. 13 min. S., longitude 35 deg. W., observed three large sperm whales, one of which was gripped round the body with two turns of what appeared to be a huge serpent. The head and tail appeared to have a length, beyond the coils, of about thirty feet, and the girth seemed to be eight or nine feet. The serpent whirled its victim round and round for about fifteen minutes, and then suddenly dragged the whale to the bottom, head first. Again, on July 13, a similar serpent was seen about 200 yards off the *Pauline*, shooting itself along the surface, its head and neck being several feet out of the water. Subsequently the head of the animal was shot sixty feet into the air. The declaration was signed by Captain Drevar, Horatio Thompson (chief officer), John Henderson Landells (second officer), William Lewarn (steward), and Owen Barker (seaman).

HEAVY RAINS AT CONSTANTINOPLE: PEOPLE GOING TO HEAR THE READING OF THE CONSTITUTION.

THE STORMS AND FLOODS.

PARTIAL DESTRUCTION OF EASTBOURNE PIER.

SCENES AT GUILDFORD.

POLITICAL ITEMS.

The coming Session of Parliament is casting its shadows before. We learn that the Address of the House of Lords in reply to the Queen's Speech will be moved by Lord Grey de Wilton and seconded by the Earl of Haddington; and that in the House of Commons the Address will be moved by Lord Galway, member for North Nottinghamshire, and seconded by Mr. Torr, member for Liverpool.

There are other signs of the quickening of political life. Members of Parliament are addressing their constituents, probably rehearsing some of the arguments they intend using in the House of Commons. Most of these addresses were given on Tuesday last.

Addressing his constituents at Kensington Vestry-Hall, Sir Charles Wentworth Dilke expressed a partial agreement only with the criticisms passed on the Government by many Liberals, and said he had marvelled much to see the old denouncers of Russian autocracy now favouring the immediate adoption of the policy of Canon Liddon and the Emperor Alexander. Sir Charles commented strongly on the inconsistent course which Mr. Gladstone and Mr. Bright have pursued.

Mr. J. Holms and Professor Fawcett, the members for Hackney, delivered their annual addresses to their electors in the Shoreditch Townhall. Mr. Holms confined himself chiefly to the questions of the cost of carrying on the business of the country and the condition of the Army. He protested against any increase in our national expenditure, and considered the Army in an unsatisfactory state. Mr. Fawcett's speech was devoted principally to the Eastern Question, respecting which he considered the greatest danger that now hung over Eastern Europe was that a settlement which was not a real settlement might be patched up, and that nothing would be done to remove from the Turkish provinces the misgovernment that had so long afflicted them.

Sir W. V. Harcourt, speaking at the dinner of the Oxford Liberal Associations, declared that the foreign affairs of England have been glaringly mismanaged by the present Government, particularly with regard to the Slave Circular and the Extradition Treaty with America. As to the Eastern Question, he not alone justified the agitation of the past few months, but asserted that it has had the effect of making the Government reverse their policy about Turkey. Now that the Government had been guided into the true path, all that remained was to wish them Godspeed and proper courage to bring their efforts to a right conclusion. He admitted that the conduct pursued by the Marquis of Salisbury had been in every way worthy of that nobleman's high character and his great position. The ultimate problem which still remained for European statesmen to solve was not how the Government of Turkey may be maintained, but how it can be most safely replaced.

Mr. Chamberlain delivered an address on education and the disestablishment question at Leeds. He contended that the Church had been the greatest obstacle to the establishment of a national system of education, and advocated that some of the vast revenue of the Church should be applied to securing a free education for every child in the land, and in doing something to provide better homes for the poor both in cities and villages.

At the annual dinner of the Tynemouth Conservative Association, presided over by Earl Percy, M.P., Mr. J. Lowther defended the policy of the Government.

Several speeches were made by members on Wednesday.

Mr. Lowther, Under Secretary for the Colonies, addressing a gathering at York, denied that the Government ever had any intention of going to war on behalf of Turkey, and maintained that, when the history of the foreign policy of the past six months came to be impartially written, it would be seen that the course pursued by the Administration was calculated to secure the best interests and thoroughly to maintain the dignity of the country.

Sir John Lubbock and Sir Sydney Waterlow met their constituents at Maidstone. The former Hon. Baronet, noticing the statements which have been published respecting the policy of England towards her colonies and other countries, believed that there had hardly been a year in which England had not been at a large and continuous expense for the benefit of those countries; and, so far from England deriving any benefit in the way of revenue, the colonies had gained greater advantages from their connection with us than we had from them.

Mr. Ferguson and Sir Wilfrid Lawson addressed their constituents at Carlisle, and Sir Wilfrid made an amusing speech upon the questions of the day.

Sir J. Hogg, in an address to his constituents at Truro, remarked, respecting the Eastern Question, that the anxieties of the Government had been greatly increased by meetings which had much better not have been held, and far better let alone. He hoped that the Government would take care that no other Power, especially Russia, should take possession of Constantinople, the key to India.

Mr. Marten and Mr. Smollett, made speeches at the annual dinner of the Cambridge Junior Conservative Club, in which they reviewed the events of the past Session, referring specially to the Eastern Question.

LAW AND POLICE.

In consequence of Easter falling so much earlier this year than last, it has been arranged to hold the spring circuits on or about Feb. 15, to enable the Judges, if possible, to finish the business before Good Friday, in which event they will secure a short vacation prior to the commencement of the succeeding sittings, which begin on April 16.

When the Session of the Central Criminal Court was opened, on Monday, the calendar contained the names of fifty-eight male and nineteen female prisoners for trial. Amongst the cases disposed of was a charge against Alicia Smith, a married woman, who pleaded guilty to having obtained £350 by false pretences from the Lombard Deposit Bank. The prisoner took a house belonging to Miss Reed in Frankfort-terrace, Harrow-road, and she and Miss Reed subsequently became very friendly. The prisoner induced Miss Reed to allow her to have possession of the deed relating to the house in Frankfort-terrace, and this she took to the Lombard Bank, and, representing herself to be Miss Reed, obtained a loan of £350. She was sentenced to ten months' hard labour. A bankrupt chemist, named Appleby, who carried on business in Tottenham-court-road, was found guilty of fraudulently concealing property from his creditors; and sentenced to nine months' hard labour. A young woman named Burke was found guilty, on Tuesday, of obtaining £50 from the Post Office by forging the name of a neighbour, whose savings-bank book had been stolen. Sentence was deferred. On Wednesday, a man and his wife, named Jones, who lived at Leyton, were sentenced to eighteen and twelve months' imprisonment for cruel neglect to their infant, which caused its death. Thomas W. Christian, who attempted to poison his landlady, at Charlton, by pouring prussic acid into her mouth as she lay asleep one night, was found guilty of attempting to administer poison, and sentence was deferred. The trial of Sir Edward Cunynghame and his associates for alleged conspiracy was postponed on account of the illness of one of the defendants.

The Assistant Judge, in his charge to the grand jury at the Middlesex Sessions, on Monday, remarked upon the fact that a hundred more persons were convicted at these sessions during the last year than in 1875; that the chief increase is to be found in the number of larcenies and embezzlements by clerks and servants, and that public exhibitions of drunkenness have never been of more frequent occurrence in the metropolis than at the present day. Owen Duffy was, for robbing the Great Western Railway Company of a large quantity of property, sentenced to penal servitude for six years. Thomas Green, charged with assaulting a constable, was declared to be of unsound mind, and ordered to be detained during Her Majesty's pleasure. Samuel Jones, previously convicted, was sentenced to ten years' penal servitude, to be followed by seven years' police supervision, for breaking into a dwelling-house and stealing articles of the value of £9. The grand jury made a presentment pointing out the evil results of goods being exposed outside shops. The Assistant-Judge expressed his concurrence with their views, and promised to forward their presentment to the Home Secretary. On Wednesday a greengrocer, named Jubb, who lives in Tottenham, gave an amusing account of a spirited encounter he had with some burglars in his own house, one night in December. He caught one of them, who was sentenced to nine months' imprisonment. Throble, an omnibus conductor, was sentenced to six months' imprisonment for not accounting for fares received by him for the London General Omnibus Company.

A German, who gave the name of Robert Phillips, was yesterday week sentenced to nine years' penal servitude at the Surrey Sessions for a series of extensive and impudent swindles. He came to this country at the close of the Franco-German war, and, being required in Germany for misdeeds committed there, he promised, on leaving England, to come back and "show them a trick or two," because "England was the place for swindling." At the expiration of his sentence he returned and kept his promise, cheating and defrauding in every direction. A detective said during the trial there were about 500 men of this description now in this country, and added that he could name a dozen of them who rode in their own carriages. Last Monday a sentence of fourteen years' penal servitude was passed upon a man named Charles Cole, well known to the police as the receiver of stolen property.

Cabby is not always in the wrong. Last Saturday a cabdriver was summoned to Guildhall for refusing to take a fare. The defendant stated that the complainant had as luggage two immense boxes, more fitted for a van than a cab, and these he objected to carry unless he received something extra on account thereof. The magistrate held that the cabman was right, and dismissed the summons.—A man who had violently assaulted a cabdriver because the latter had refused to take him as a fare, was, on Wednesday, fined £5 by the Clerkenwell magistrate, with the alternative of two months' imprisonment, with hard labour.

Dramatic copyright was brought into question at the Westminster County Court, on Tuesday, when Mr. Baylis, the Judge, after having heard the case for Mr. John David Bessemer, a dramatic author, against Mr. Alexander Henderson, said he should reserve his judgment in order to consider whether only one penalty should be given. It appeared that the defendant had played a certain piece at

Liverpool in ignorance of the fact that its author, the plaintiff, had left the Dramatic Authors' Society.

Mr. B. Warr, a farmer, of Benthill, Buckingham, was fined £6 and costs at Marylebone, on Tuesday, for having supplied adulterated milk to the Aylesbury Milk Company.—George Shaw, of 9, Richmond-street, St. Luke's, has been fined 7s. 6d. for selling milk adulterated with 25 per cent of water; and Joseph Love, of 26, Ironmonger-row, has been ordered to pay a penalty of 20s., with the cost, for selling as butter an article "the fatty matter thereof being entirely a foreign ingredient."

Remarking on the wonderful fact that victims of such barefaced and old-fashioned impostures as the confidence trick are still to be found, Mr. Hannay, the Worship-street police magistrate, on Tuesday, remanded two men on the charge of stealing a silver watch from a groom, named Robert Jones, in service at Lower Clapton.

Frederick W. Jennings was charged, on remand, at Worship-street, on Wednesday, with stealing a young woman's gold watch. The prosecutrix had for a length of time "kept company" with the prisoner, who took her watch, as he alleged, by way of a joke; but, after being repeatedly asked to return it, admitted that he had pawned it. Since the remand another young woman came forward to say that she also had been courted by the prisoner, and he, in a similar way to that described by the first witness, had taken 16s. from her pocket, which he could never be persuaded to return. As it was said that other ladies might come forward to complain of the conduct of the prisoner, he was remanded.

Defalcations to a considerable amount having been discovered in the accounts of a Foresters' lodge at Brixton, the charge of embezzlement has been preferred against Gilbert Goldfinch, the late secretary, who was brought up on remand last Wednesday, at Lambeth, on a former charge of attempting to commit suicide. He was committed for trial on the evidence of persons connected with the lodge.

The two silly youths who recently put a coat of paint on the statue of the late Lord Derby at Preston were, yesterday week, sentenced to pay the costs of the prosecution, the cost of restoring the statue, and the amount of the reward offered for the detection of the offenders (£20), and also to find sureties for their future good behaviour.

James Williams, a deaf and dumb man, who, at the last Guildford County Bench, was charged with unlawfully soliciting alms, by the presentation of a cleverly-written appeal, and with whom it will be recollected Lord Midleton held a conversation by means of the digital alphabet, which ended in the discharge of the prisoner, was again brought before the Bench, on Saturday, charged with a similar offence. The evidence was communicated to the prisoner with great promptitude by Lord Midleton. In reply, the prisoner said he had broken no law and he relied upon the legal knowledge of the Bench to do him justice by discharging him. Lord Midleton told the prisoner that he feared he was a professional mendicant. The prisoner, with great alacrity, replied on his fingers, "In that you are mistaken. I am an object of sympathy, and kind hearts take compassion upon me." Lord Midleton, with equal digital dexterity, replied, "My former leniency to you was misplaced. You will go to prison for a month." The prisoner, with great animation, replied, "You are an accomplished magistrate; but you have no compassion for an afflicted fellow-creature." He then bowed to the Bench and was removed in custody.

Mr. Stephen Allaway, a deputy lieutenant for Herefordshire, was, yesterday week, sentenced, at the Merionethshire Quarter Sessions, to a month's imprisonment, with hard labour, for obtaining credit under false pretences. He visited an hotel at Barmouth, running up a bill which he paid with a cheque on a Gloucester bank for £80, which was dishonoured.

The Recorder of Dublin, in opening the City Sessions, on Tuesday, drew the attention of the grand jury to the importance of providing wholesome and innocent recreation for the people, and of effecting a radical reform in the mode of constructing their dwellings.

SHANKLIN, ISLE OF WIGHT.—Its climate is mild and genial, so that vegetation is exuberant, myrtles growing in the open air to a size large enough to form walking-sticks. Here we find the renowned Laine, and an Esplanade with a sea-wall without a rival on the island. First class Hotels, comfortable Lodging-Houses, excellent shops, and, above all, ample Church accommodation.

LADIES' BOARDING-SCHOOL OR COLLEGE.—To PARENTS AND GUARDIANS.—MISS BACON, of Belmont House, Lincoln, has REMOVED TO THE OCTAGON, PRINCES-ROAD, near Liverpool. She has selected this position and neighbourhood as combining all the advantages that can be got for carrying on successfully her Establishment. She is near the Parks, in a healthy suburb of a large town, where all educational appliances are within her reach, and she will spare no pains nor expense to make it an institution fully equal to any in the kingdom. She will receive her Pupils on TUESDAY, FEB. 6. For Sympson and Prospectus and References apply to Miss Bacon, The Octagon, 4, Princes-road, Liverpool.

MALVERN COLLEGE.—The First Term for 1877 will begin on MONDAY, JAN. 29.

BOULOGNE COLLEGE, under the direct supervision of the Municipal Council, situated in the healthiest part of the town, has been entirely renovated during the Long Vacation. The Pupils are examined quarterly by Inspectors of the French University, and prepared for the École Polytechnique, Normal, Saint Cyr, Navy, &c. Prospectus and particulars on application to M. HUGUET, Secrétaire, Mairie de Boulogne, President of the Council of Administration; or M. BRET, Head Master.

SMART'S WRITING INSTITUTION, 7, Quadrant, Regent-street (entrance in Swallow-street). Open from Ten till Nine Daily. Persons of all ages received (privately), and taught at any time suiting their own convenience. Lessons one hour each. No classes. No extras. Improvement guaranteed in eight to twelve easy lessons. Separate rooms for Ladies.—Apply to Mr. Smart as above.

EVERYONE WHO HAS A GARDEN SHOULD READ
SUTTON'S AMATEUR'S GUIDE IN HORTICULTURE.—This popular Guide to the Kitchen and Flower Garden now appears in a new form, and is devoted entirely to gardening matters. The seed list forming a separate book. It has been considerably enlarged, and is published in a convenient form for keeping as a book of reference. The articles on cultivation are invaluable. It is beautifully illustrated with coloured and other Engravings, and is the most complete and practical work yet published. The "Farmer" of Dec. 25, says:—"It would be difficult to find any work on gardening more essential to Amateur gardeners—in fact, it may be defined as a plain and easy guide to all who want to know. The instructions are clear, sound, and complete. The Chromolithograph literally glows with beauty, and is a perfect work of high art."

SUTTON'S AMATEUR'S GUIDE IN HORTICULTURE may be had, post-free, for 14 stamps; and **SUTTON'S DESCRIPTIVE SPRING CATALOGUE** AND PRICE CURRENT OF SEEDS, gratis and post-free.
Apply to SUTTON and SONS, the Queen's Seedsmen, Reading, Berks.

THE FLOODS AT LINCOLN.

LINCOLN, FROM BRACEBRIDGE.

A STREET IN LINCOLN.

THE LATE STORMS AND FLOODS.

A brief account was given, in our last week's publication, of the destructive effects of the storm, on New-Year's Day, along the south coast, and on other shores of the British Islands; and likewise of the inundation caused by high tides and high winds, meeting the swollen current of the Thames, in the low-lying quarters of London; as well as the extensive inland floods, which prevailed during several days, in different parts of the country traversed by large rivers. We have selected for the subjects of our Illustrations a few of the more conspicuous disasters upon the late occasion: first, the partial demolition of the Admiralty Pier at Dover, and of the Eastbourne Pier, by the fury of the sea; next, the distressing scenes that took place at Nine Elms, in Lambeth, and in other metropolitan districts, when the river, at high tide on the following day (the 2nd inst.), poured into the lower rooms of many humble dwellings; thirdly, the wide-spreading floods above Richmond, in the meadows about Hampton Court, Teddington, and Kingston-on-Thames, also the inundation of the Wey near Guildford; lastly, the floods at Lincoln, besides which there were similar visitations of the plague of waters at Nottingham, Leicester, and Derby, and in many other towns and counties of provincial England. Windsor and Oxford, as usual, saw the low lands in their neighbourhood become a vast lake, to be ultimately discharged through London.

Our large Engraving, which occupies the two middle pages of this Number, represents the tremendous havoc which the waves of the Channel made of the Admiralty Pier at Dover, in a south-westerly gale of extreme violence, which blew in the forenoon of Monday week. It began about eight o'clock in the morning, but two hours later the full force of the storm was experienced. The Admiralty Pier was almost hidden by the heavy seas, which swept its entire length, and the blinding spray was carried far in shore around the Lord Warden Hotel. The low-lying streets of the town, inhabited by the poorer classes, were completely flooded; many of the residents had to make their escape in boats. At high tide, about noon, the force of the sea was at its height. The massive masonry of the Admiralty Pier suffered great damage. Several hundred yards of the handsome granite promenade were washed away; the repairs will cost at least £30,000. The wreck which the storm produced was an extraordinary sight. Masses of stone and concrete lay about in all directions. One piece of massive masonry, twelve feet in length, by five feet in thickness, and twelve feet in width, was torn off, and hurled upon a block of similar proportions ten yards away—its weight being about sixty tons. The iron rails on which the trains go to take up Continental passengers were twisted and turned as though they were of wire. Happily, the lighthouse recently erected was not injured. The South-Eastern Railway Company's station was completely flooded, and as the tide went down gangs of men were busy clearing away the shingle and rubbish which covered the permanent way. At the Lord Warden Hotel, near the pier, a number of fire engines were kept at work pumping out the water from the basement. Strong timber defences were also erected, as the gale showed but little diminution; and it was feared that at high tide there might be further mischief. At East Cliff very serious injury has been done to the roadway beyond the revetment, where similar damage was sustained last year. It appears that ever since the removal of Round Down Cliff by the South-Eastern Company the sea has been gradually infringing upon Shakespeare's Cliff, and the result is inundation of the western portion of the town. It is considered that some effective mode of sea defence will have to be undertaken here, as well as at East Cliff, where the road has been again destroyed.

At Eastbourne, on the Sussex coast, in the gale of that same morning, crowds of residents and visitors were watching the huge breakers as they neared the shore, and, dashing against the stonework, threw up spray high into the air, sending showers of water upon the spectators. The gates leading to the pier were closed, and the public were not allowed upon it. The pier-master was, however, there at his post, and two men named Barber and French, employed as labourers in the work of enlarging and improving the structure, were standing near the office, about twenty yards from the pier gates. Suddenly the people on shore were startled by a loud crash, followed by another still louder, and in a few moments the sea lifted about 150 yards of the pier—built a few years since at a cost of £13,000—bodily from its supports, the pillars giving way rapidly one after the other. The end to seaward sank, but, rising again, was carried to the eastward at a fearful speed, the waves smashing it up like matchwood; the iron-work was twisted about as if it were merely string or wire. When the first sign of this destruction was observed those upon it ran to the entrance-gates. Before the gates were reached, however, the mass had given way, and was swept out of its position by the waves, which followed in rapid succession. All three men fell with the deck of the pier, which happily parted from the brickwork at the entrance on to the stone parade beneath. In a moment, however, they were scrambling up the woodwork, and, a score of willing hands being held out to assist, they were lifted on to terra firma only a few seconds before the advance of a monster wave. The man Barber was rescued with some difficulty, owing to his leg being jammed in the woodwork. When he was hauled on shore it was found that his thigh was severely injured. The sea was beating furiously upon the parade, and a huge hole, ten yards long by five wide and ten feet deep, had been formed by the sea during the time the destruction of the pier had been going on. At several parts of the parade the sea threatened to undermine and destroy it. The stout iron rails at Splash Point, a favourite spot for visitors to watch the sea, were twisted and broken by the waves; the steps leading to the beach were tossed up on to the parade as if they were so many feathers. All the houses at Marine-parade were more or less damaged by inundation; and Seaside-road was under water and impassable. On the eastern side of the Redoubt the sea made a breach in the sea-wall, and the whole of the Crumbles for a mile and a half was under water. At various parts might be seen large heaps of the wreckage of the pier, which found its way in after being thrown ashore to the westward of the Redoubt. The glacis of the Redoubt also suffered slightly, and a road leading from Christ Church to the fort was entirely swept away.

The gale made itself felt in an alarming manner at Folkestone, where the sea ran very high, and the waves broke with great violence. A breach was made by the sea through the East Pier Head, and some of the rocks which have formed a portion of the foundation since the formation of the harbour were washed away. The new pier which the South-Eastern Railway Company had erected for the Continental traffic was nearly destroyed, and part of the one now standing was greatly damaged, a large quantity of the woodwork and material support of the railway metals being broken and washed away by the sea, and leaving the pier quite unsafe for traffic. The toll-taker's box was broken away from its supports and washed down to the Old Harbour. Several windows of the lighthouse were broken in by the force of the wind and the waves, and a part of the building itself was seriously damaged.

The tidal inundation of the Thames in South London, on

the morning of Tuesday week, was a calamity still more deplorable; causing destruction to house and other property to the amount of, it is estimated, half a million of money, and producing great consternation and actual suffering. The recent heavy rains had swollen all the tributaries of the river to such an extent that, following closely on the heavy gales of Friday and Saturday, a rise of the waters was deemed probable, and was, indeed, looked for on Sunday night. The wind, however, still continuing in the south-west, the tide, though high, was not then sufficiently so to cause any fear; but there was a change in the direction of the wind on the Monday night; it became northerly, which brought the tide up at an alarming rate. At half-past two in the morning the river began to overflow, simultaneously at all points of its course, and a scene of great excitement ensued. In the Nine Elms district of Lambeth, when the water first made its appearance in the roadways, the police and any persons they could get to assist them commenced a vigorous knocking at all the doors of the houses likely to be flooded, at the same time shouting, "Water's over!"—a cry too well known in the neighbourhood. Within ten minutes, where there had before been not a dozen persons, several thousand were to be seen imperfectly clad, many of them striving to put up barriers at the doors of their houses, or at the entrance to narrow streets, lanes, and alleys. The roadways of Nine Elms-lane and the Wandsworth-road were covered, and in the former thoroughfare especially the water was running down the street with the rapidity of a mill-stream. The Nine Elms goods'-yard, which abuts on the river, was soon covered. All the porters engaged there had to retreat, and the place became one pool of water, with boxes, barrels, and all sorts of goods intended for transit floating about. Flowing through the gates, the water crossed the road and poured into the adjacent streets. On all occasions of flood there is a particular street in this district which suffers more than others—Southampton-street—opposite the goods'-yard and below the level of the river. Here the poor people had barely time to get out of the houses when the water rushed in and speedily rose to the ceilings of the first floor. Some persons had moved the little furniture they possessed to more secure quarters, but in most cases their beds and bedding and furniture were destroyed. The houses are now uninhabitable, and must continue so for a long period. In the Wandsworth-road the inhabitants were soon aroused. As the neighbourhood has among its residents several hundreds of men and lads employed in the sheds of the London and South-Western Railway Company, a large number of women and children took shelter in these buildings, having been obliged to leave their homes. Other women and children, not so fortunate, took refuge in coffee-shops or in the houses of kind friends. In Portland-street the water entered at least a hundred houses, and caused a vast amount of distress. Vigorous efforts were made by many on the first appearance of the water to put in practice the schemes which had been devised to resist it; but in no single case, in this district at any rate, do they appear to have been successful. The tradesmen suffered very heavily, most of the cellars having eight and ten feet of water in them; all sorts of goods were destroyed. All the horses belonging to the London and South-Western Railway, whose stables were adjacent, were safely removed. The whole of the works of the London and South-Western Railway Company were covered with water, and hundreds of men were temporarily thrown out of work. During that night numbers of persons, rendered homeless by the floods, had to seek shelter in the workhouses, but many were received in the school-houses in the neighbourhood, which were thrown open to them by the clergy. Here not only was sleeping accommodation provided, but food. By this means much distress, especially among women and young children, was alleviated, and the same shelter was made available so long as the distress continued. Throughout the entire district the clergy have exhibited the heartiest interest in the work of mercy. They visited all the parts inundated, and sought out and obtained full information of the distress, in order to concert measures for its relief. To render their efforts successful, further aid both in money and kind is still greatly needed. Along the whole tidal course of the river great misery has been caused, many persons having lost nearly everything they possessed. Besides the efforts of the clergy, local committees are being organised; and at public meetings strong influence is brought to bear to induce the Metropolitan Board of Works to take such measures as will prevent a recurrence of such a sad disaster.

The inundations of the Wey in the neighbourhood of

Guildford, and of the Thames between Kingston and Richmond, are shown in several of our Illustrations. On Wednesday week the view beheld from Kingston Bridge was very striking. The towing-path was completely submerged; the Home Park, which is Crown property and extends to Hampton Court, was covered with water as far as the eye could reach. It appeared like an immense lake, the surface of which was broken by numerous trees. River traffic was almost entirely stopped. The town of Kingston, being situated on a rather higher level, escaped much damage from the inundations, but the cellars of most of the houses were flooded. A large portion of the parish of East Moulsey was under water, the floods extending from Hampton racecourse to Hampton-Court Bridge, a distance of about a mile; the damage done is considerable. The aits or islets in this part of the river were also submerged. At a meeting of the East Moulsey Local Board, Mr. Harwood, one of the members, stated that he had waded thigh-deep through the water in order to ascertain the extent and probable cause of the mischief. He believed that if an embankment opposite Garrick's Temple, at Hampton, which had been washed away, were kept up, the parish would be almost, if not entirely, preserved from such a disastrous inundation in future. It was resolved to call the attention of the Thames Conservators to the matter. At Richmond many acres of the Old Deer Park were flooded, and the grounds of houses on the banks of the Thames were inundated. At Teddington the tide rose so high as to surround the parish church, a portion of the churchyard being flooded. Watermen drove a brisk trade in conveying City gentlemen to and from their residences in that village.

The floods in the city of Lincoln are thus described by the

Lincolnshire Chronicle of last week:—

"On Saturday both the Witham and Fossdyke were so full

that an overflow appeared imminent. On Sunday the rivers

began to overflow their boundaries, and in the east and west

parts of the city the water found its way into the streets. It

continued gradually to rise; consequently those who inhabited

houses near the water-side became anxious about their own

welfare and also the safety of their goods and chattels. In

many instances the lower rooms were abandoned, and all

movable articles removed to safe quarters. On Monday morn-

ing the water had made great headway, and many persons

awoke to find the lower part of their dwellings flooded with

water. This was more particularly the case along the water-

side in the east and south adjoining the Witham and Sincil

Dyke. The inhabitants of the Great Northern-terrace were

entirely inundated; and such was the case along the banks of

the Sincil Dyke for a considerable distance north and south of

the Monson-street bridge. The roadways in the quarters

mentioned were covered with water to a considerable depth,

and as the water continued rising the excitement of the

inhabitants became more and more intense. In close proximity to the Stamp End Locks matters had assumed even a much more serious aspect, the water rising in some instances up to the window-sills of the houses. Owing to the back-yards of the houses being flooded, some disagreeable sights were to be witnessed in this quarter. Ripon-street and Canwick-road were flooded for a considerable distance, traffic, except by means of vehicles, being entirely stopped. In the west part of the town the state of affairs was not quite so bad, notwithstanding many of the streets leading from the river-side into the principal thoroughfares were quite blocked up with water. The Mayor visited the places flooded on Monday afternoon, and gave instructions for carts and horses to ply along the streets where the water was out, in order to convey working men and others to and from their homes, and to remove those families, resident in the flooded houses, who wished to be taken away. On Monday evening some alarming rumours were afloat, which had the effect of greatly increasing the excitement in many parts of the city. It was reported that, owing to the exceptionally high tides, the large body of water passing from the rivers could not find an outlet in Boston, consequently the extraordinary pressure upon the numerous dykes would cause the banks to give way, and so greatly increase the flood. Fortunately, however, on Monday night the rain abated and a frost set in, and throughout the whole of Tuesday the weather was fine overhead. This, however, had very little effect upon the floods in the city, probably owing to the high tides referred to, for in the morning, in some parts, the depth of water was greater than ever. From an elevated position, the scene presented on Tuesday morning was one without parallel, so far as Lincoln is concerned. In the flooded districts the streets presented the appearance of tributaries of two turbulent streams, whilst below the Stamp End Locks, in the direction of Washingborough, the country was covered with water, the trees alone serving as landmarks. Traffic on the railway in that direction was almost stopped, and the company wisely adopted the plan of discontinuing the heavy goods-train traffic, for fear of an accident. The Witham, in the direction of Bracebridge, had overflowed the bank on both sides, and the fields were flooded for a considerable distance. Some time must elapse before it can be got away, seeing that there is only a very small outlet. The bulk of the water will have to be got rid of by means of pumping, and this cannot be commenced until the lower parts have been relieved. After midday, on Tuesday, the water subsided considerably in the lower part of the city, and hopes were entertained that the climax had been reached. The quick fall of the water, however, was attributed in a great measure to the bursting of the Branston Delf; consequently, the whole of Branston Fen was soon flooded. This appears to be the real solution of the sudden subsidence of water, inasmuch as the height of the water in the Witham, near to Bargate Weir, had not diminished in the least. No rain fell during Tuesday, and the night set in frosty, which was looked upon as a very hopeful sign. On Wednesday, however, the rain again commenced, and continued, with very slight interruption, until about three o'clock on Thursday morning. Indeed, the flood ultimately reached a point 14 in. higher than the inundation of 1852."

According to a statement made by Mr. Glaisher, the rainfall in the month of December was very nearly six inches, there having been no previous instance for sixty-two years of so large a fall during the same period of the year.

A committee at the Mansion House, presided over by the Lord Mayor of London, has opened a subscription for the relief of distress caused by these floods throughout the country. The Royal Bounty Fund has contributed a donation of £250, and the Common Council of London has voted a sum for this purpose. Her Majesty has contributed £50 to the local fund at Windsor.

THE ARLESEY RAILWAY ACCIDENT.

The Coroner's inquest upon the bodies of the five persons who were killed in the railway collision at Arlesey, on Dec. 23, was brought to a close yesterday week, the jury returning the following verdict:—"We are of opinion that Thomas Pepper and John Lovell, the driver and fireman of the 2.45 express on the 23rd ult., met their deaths by jumping from the engine of the said train at Arlesey; that Lucy Thompson, Abigail Longstaff, and Maurice Michael, passengers by the 2.45 express, lost their lives, on the 23rd, at Arlesey, in a collision occasioned by the neglect of the driver to observe his signals, and at that time the inefficient carrying out of the block system on the Great Northern Railway. We beg further to state that, in our opinion, Philip Walters, the station-master, William Graves, the signalman, and the other servants of the company at Arlesey are exonerated from all blame in the matter, as they did all they could under the regulations which they worked." Captain Tyler read his report prepared for the Board of Trade to the jury. The report censured some of the company's regulations, or rather the absence of regulations, for working the block system; and Mr. Henry Oakley, the general manager of the Great Northern Railway, who was one of the witnesses, said that the lesson taught by the accident should not be disregarded, and he detailed some very important emendations and extensions of the absolute block system which had been introduced by the directors since the previous sitting of the jury. Before the court closed the foreman said that the jury wished publicly to thank those medical gentlemen who had so kindly and promptly rendered aid to the wounded at the time of the accident.

Captain Tyler has reported to the Board of Trade that the collision that occurred on the 6th ult. on the London, Tilbury, and Southend Railway, and by which twenty passengers were injured, was caused by inefficiency of the signals at the Upper Abbey Mills Junction. The collision that occurred on the 9th ult. at the St. John's-wood-road station of the Metropolitan and St. John's-wood Railway was caused by a stupid mistake on the part of the signalman.

At a meeting of the Wolverhampton School Board, yesterday week, it was resolved that fifty girls from the board schools should be sent to the School of Cookery for instruction during a term of twenty lessons, at a cost of £20.

It was announced, some few weeks ago (says the *Morning Post*), that the only son of a noble Irish family had enlisted into "a crack cavalry regiment." Lord Berhaven was the nobleman alluded to, and the regiment the 2nd Life Guards, in which his Lordship remains, and has recently been promoted to corporal.

The funeral of Sir Titus Salt took place, yesterday week, at Saltale. There was a procession of upwards of seventy carriages, and amongst those who followed were Mr. Forster, M.P., Lord F. Cavendish, M.P., and Mr. Ripley, M.P. The officiating ministers were the Rev. R. D. Cowan, of Saltale; the Rev. Dr. Campbell, of Bradford; and the Rev. R. Baggallie, of Scarborough. A memoir of Sir Titus Salt was given in our last Number; and his portrait appeared in this Journal Oct. 2, 1869, at the time he was created a Baronet.

ROYAL INSTITUTION LECTURES.

COLOURED FLAMES.—SPECTRUM ANALYSIS.

Professor Gladstone, F.R.S., began his fourth lecture on the Chemistry of Fire, on Thursday week, by showing, by means of wire placed between the poles of a voltaic battery, how some solid bodies, strongly heated, become successively red hot and white hot and then burn; after which he exhibited several combustions of gases and vapours which gave flames differing not only in brightness but also in colour. The flame of sulphur was blue and feebly luminous, that of the metal potassium was violet-coloured, and that of magnesium was an intensely brilliant bluish white. He next showed that various salts impart a special colour to ordinary flames, such as that of coal-gas or spirits of wine; producing green flames by compounds of barium, blue or green by copper, red by lithium or strontium, and yellow by sodium. After exhibiting the beautiful colours produced by passing the electric discharge through tubes containing rarefied gases—such as oxygen, hydrogen, ammonia, and common air—he availed himself of the electric lamp to cast a powerful light upon certain bodies, termed fluorescent, which absorbed light and retained it for a time after the electric light was withdrawn. By means of the lamp he projected a beautiful prismatic spectrum upon a screen, and, after explaining how the different coloured rays which make up white light are bent out of their course in different degrees by passing through a prism, he showed how the gases and the vapours of different bodies, placed between the glowing carbon-points of the lamp, gave different spectra as well as flames; thus, silver vapour gave a green band, and sodium a yellow one. He then illustrated the way in which this "spectrum analysis," by means of which the presence of excessively minute particles of a metal, such as sodium, may be detected in a flame, had become a valuable method of research; since by its means five new metals had been discovered—cesium and rubidium, by Kirchhoff and Bunsen; thallium, by Mr. William Crookes; indium, by Reich and Richter; and gallium, by Lecoq de Boisbaudran (all between 1860 and 1875). The coloured flames and spectra of several of these metals were beautifully shown. Dr. Gladstone further explained how by spectrum analysis we had been enabled to detect the presence of hydrogen, sodium, magnesium, iron, and several other substances in the atmosphere of the sun and of the brighter fixed stars, and even to form some idea of what is taking place in them, such as the rise and fall of excessive brilliancy. His remarks were illustrated by the exhibition of various slides of spectra, lent him by Dr. William Huggins, F.R.S., who has devoted much attention to the spectrum analysis of the light of the heavenly bodies, including the nebulae, comets, and the aurora.

HEAT.—GUNPOWDER.

Professor Gladstone devoted the first part of his fifth lecture, given on Saturday last, to experimental illustrations of the heat produced by chemical combination, especially showing that the temperature at which combining bodies become luminous varies with their nature; that the heat necessary for the ignition of various substances differs greatly (as shown in lighting a fire with paper, wood, and coal); that some flames are much hotter than others; and that the combustion of bodies is much affected by their differing power of conduction of heat. Thus, finely divided iron took fire when cast into a flame, while gunpowder passed through unburnt. A little gun-cotton was set on fire without burning some gunpowder on which it was placed. The pale flame of hydrogen was referred to as much hotter than that of coal gas. Paper enveloping a poker did not ignite on the application of fire through the good conduction of the metal, and our stoves were said to be preserved from combustion through the formation of an oxide and the conducting power of the metal. After showing that a little water poured upon a red-hot body rolled about, not coming into actual contact through the formation of a layer of vapour (which is termed the spheroidal condition of liquids), the Professor said that this explains how the fingers when moist may be dipped with impunity into molten metals, and how red-hot bars may be touched without hurt, adding that this may probably account for the result of many of the ancient ordeals by fire, which he illustrated by bearing some red-hot coal in his hand covered with asbestos, and by dipping his fingers in some melted tin. To do this with safety, the metal must be sufficiently hot to convert moisture into vapour. In the latter part of the lecture Dr. Gladstone illustrated the properties of gunpowder, which was shown to vary in its effects according to the proportions in which the nitre, charcoal, and sulphur are mixed, and the mode in which it is granulated; and he referred to its use in warfare, in the blasting of rocks, and in the manufacture of fireworks. He adverted to its probable use by the Greeks, and to the Chinese fire, probably made about the beginning of the Christian era. Beautiful coloured effects in fireworks were shown to be produced by mixing the powder with various salts. He stated that ordinary gunpowder by explosion is converted into gases, which when cold occupy about 280 times the original bulk, but which are enormously expanded by the heat of ignition. To this is due the propelling force of gunpowder. Gun-cotton and nitro-glycerine are now employed for explosions of great local violence. Many interesting experiments were given after the lecture was concluded. A heated iron ball retained its redness for some time under water. When it cooled the water boiled.

PRODUCTION AND EXTINCTION OF FIRE.

Professor Gladstone began his sixth and concluding lecture, on Tuesday last, with illustrations of the earliest known methods of procuring fire, such as striking flints and the friction of two pieces of wood, and exhibited and used the now old-fashioned flint, steel, and tinder-box, with sulphur-tipped matches. He then explained some of the chemical means invented to obtain a light in the first half of the present century, which were eventually superseded by various forms of the lucifer. These consist essentially of a match tipped with a paste containing a combustible, such as phosphorus, and bodies which readily give up to it their oxygen on friction, such as chlorate of potash. In Bryant and May's matches, which ignite only on the box, the two elements are separated. After commenting on the various ways in which man has made fire his servant, for warmth, light, cooking, reducing ores and working metals, producing and working machinery, the Professor showed how flames, by vibrating tubes, may produce musical notes; and he alluded to the pyrophone, a keyed instrument, resembling an organ, on which tunes can be played, and which has been recently exhibited at South Kensington. He also exhibited the sensitiveness of gas-flames, which literally danced to a tune performed by a musical box. Convincing demonstration was next given of the extreme necessity of proper ventilation, both to supply sufficient air to the fuel in our fires and lamps and to carry off the injurious products of combustion, such as carbonic acid and carbonic oxide. Accidental fires having been noticed and dangerous carelessness censured, some remarks were made on spontaneous combustion, and examples were mentioned of this occurring in hay, cotton-waste, small coal, and iron pyrites; by the slacking of lime, the friction of machinery, lightning, intense sunshine, leakage of gas in houses, domestic animals, and the concentration of the sun's rays by bull's-eyes and globes of water. In

conclusion, the Professor described how fire may be extinguished: either by cutting off the supply of oxygen or by cooling down the burning substance. For both these purposes water is of immense value, because of its remarkable power of absorbing heat while still liquid and while being converted into vapour, and because as steam it excludes the air. Among other illustrations, the Professor set fire to the muslin dress of a large doll, and immediately extinguished the flames by enveloping it in a rug. Another muslin dress was shown to be unflammable, having been steeped in a solution of tungstate of soda. After various chemical processes for producing large quantities of gases that will not support combustion had been noticed, Mr. Sinclair instantaneously put out a large artificial conflagration by means of his "extincteur," one of the processes referred to.

Professor Alfred H. Garrod will, on Tuesday next, the 16th inst., begin a course of ten lectures on the Human Form, its structure in relation to its contour; Dr. C. R. Alder-Wright will, on Thursday next, begin a course of four lectures on the Metals and the chief industrial uses of these bodies and their compounds; and Mr. Ernst Pauer will, on Saturday next, give the first of two lectures on the Nature of Music, the Italian, French, and German schools, with illustrations on the piano-forte. At the first Friday evening meeting of the season, on Jan. 19, Professor Tyndall will give a discourse on a Combat with an Infective Atmosphere.

LONDON INSTITUTION LECTURES.

HISTORY OF THE ENGLISH NOVEL.

Professor Henry Morley gave the first of two lectures on the History of the English Novel, at the London Institution, on the 4th inst. The origin of the modern novel was, he said, a very respectable one, the first novelists being a philosopher and a Bishop; the one an African, who laid his scene in Thessaly, and the other a Thessalian, who laid the scene in Africa. About the middle of the second century the story of "The Golden Ass" was produced by Apuleius. It included the story of "Cupid and Psyche," and was worked in to some extent by Boccaccio and by Cervantes, and was also part of the robber's episode in "Gil Blas." The "Ethiopica" of Heliodorus, Bishop of Thessica, was, in fact, a novel, and began, as G. P. R. James might begin, with:—"On a certain morning on the coast of Egypt certain banditti might have been seen." The origin of the "novel" was traced through "novus" to the diminutive "novella" or "small news." In the twelfth century the romances of Arthur came in, and during the reign of Stephen, Geoffrey of Monmouth made it his province to give the charm of a novel to his "British Chronicle." In the reign of Henry II., Walter Map spiritualised the animalism of these old romances by the introduction of the legend of the "Holy Grail," and from that time the religious element in the Arthurian Romances was impressed on the hearts of the people. Glancing at the Italian poets of the fourteenth century—Dante, Petrarch, and Boccaccio—the lecturer attributed to the "Decameron" of the last mentioned the first general use of the word "novel" in the present sense. Between 1350 and 1400 the line of Spanish romances of chivalry began with "Amadis of Gaul," by Vasco de Lobeira, a Portuguese, and was based on an old Welsh legend. It was the romances of this class that "Don Quixote" was intended to laugh out of Europe. Up to the Elizabethan period novels were all short stories told with amusing simplicity, and were innocent of any analysis of character or description of scenery. Travelling in Italy being the fashion at that time, Englishmen came home imbued with the spirit of the Italian "novella" and the desire to talk like Italian gentlemen, a fashion that was rebuked in Roger Ascham's "Schoolmaster." The Elizabethan novel, "Euphues," by Lilly, was a great favourite in that day, and gave rise to a considerable group of similar works. The "Arcadia" of Sir Philip Sidney was quoted as another illustration. The lecture was enlivened by the felicitous recital of some of the most naively entertaining stories of the old romances, and was received with much approbation by the assembly.

The second lecture, which was given on Thursday last, will probably be noticed in our next issue.

HEALTHY HOMES.

Dr. B. W. Richardson (who has projected, under the title of "Hygeia," a city which shall show the lowest mortality—a site on the Sussex coast having been secured for the said City of Health) gave, on Monday evening, the first of two addresses on Health Improvement in Great Cities. Having sketched in a lucid manner the progress of sanitary science since the treatise of the Rev. Stephen Hales, Rector of Teddington, appeared in 1733—from which time all our new knowledge of a sanitary kind might be dated—the lecturer summed up the matter in the following requirements:—Pure air, pure water, freedom from damp, sunlight, and equable temperature, which were the five fingers of the right hand of health.

He then described the arrangements with respect to sanitation of a middle-class house, which style of residence, though comparatively new, had in it all the errors of which he complained. He especially condemned the basement, the rooms being condensing-chambers for water, which, evaporating during the day, was carried, with sundry emanations, over the house. The basement was even used for sleeping, every dark nook and cupboard being sometimes the receptacle of a shut-up bed; and he had seen a house in which sixteen servants slept underground, where they could not see to dress themselves without artificial light. The staircase was the great source of draught, and it rendered equable temperature impossible. Dr. Richardson then drew a picture of the sort of house which he should like to see take the place of the one that he condemned. He would build a house on a basement of three arches, which should be thoroughly ventilated and applied to various purposes, but which should have no direct communication with the house. His staircase he would have in a separate shaft at the back, each floor communicating with it by a door, so that the floors would be what might be called flats, and each of them could be ventilated independently. A lift and the water-closets he would dispose in a similar manner. On the third floor he would place the kitchen at the front and the servants' dormitories at the back, and from a pipe in the kitchen hot water could be conveyed to every floor, which should have its separate sink and dust-shaft, so that there would be no going up and down stairs with pails and dust-boxes. At the top of the house he would have, on a firm, almost level, asphalted roof, a brick and glass-covered garden, equal in extent to the area of the house. Into this the staircase would finally enter, and any emanations from the lower part of the house would be eaten up wholesomely by the living vegetation. Heated readily from the kitchen, the garden might have at all times a summer temperature; the children could engage in luxurious and healthful play; the ladies would find occupation in the cultivation of flowers and evergreens, and in it the sterner sex might spend those hours which were now found so unacceptably dull, owing to the monotony of one or two rooms. In this garden, with the pleasant, the natural,

and the beautiful, Health would be trained, and Happiness, her dependent sister, nourished.

Professor Ella being compelled by ill health to abstain from lecturing this season, the vacancies thus created on the evenings of Jan. 18 and Feb. 15 will be filled by Mr. W. A. Barrett, Mus. Bac. Oxon, joint author of Stainer and Barrett's "Dictionary of Musical Terms." His first lecture will be on English Madrigal Composers, and will be illustrated by a choir of twenty voices, selected from the Chapel Royal, St. Paul's Cathedral, Westminster Abbey, Lincoln's-inn Chapel, &c., who will render eleven compositions by Edwards, Byrde, Wilbye, Dowland, Morley, Bennett, Bateson, Gibbons, Linley, De Pearsall, and Walmisley. The second lecture will be on English Glee Composers.

THE POWER AND DUTY OF WORKING MEN.

Mr. William Rathbone, M.P. for Liverpool, gave, last Tuesday, an address in the Concert-Hall, Liverpool, on the power, responsibility, and duty of the working men of this country; who must decide whether our national greatness and well-being are to decline or whether the country is to become more happy and prosperous. Our country was now having greater foreign competition than it ever had before; and he remarked that France, owing to the saving habits of her people, was in a fair way to take the place of England as the financial centre of the world. The working classes were now receiving a much larger proportion of the earnings and income of the country than had hitherto fallen to their share, and if they prudently saved a due proportion of their increased wages, then not only would those higher wages be a real and permanent benefit to themselves, but to the country at large. But if they went on spending unproductively so large a proportion of their earnings, the country would lose the command it had hitherto had of the trade and manufactures of the world. He believed that a considerable portion of the wages of the working classes of this country had during the last two years come out of capital and not out of income.

PARIS FASHIONS FOR THE NEW YEAR.

The mildness of the season has somewhat retarded the advent of veritable "toilettes d'hiver" in Paris. For "costumes de promenade" the time-honoured *rotonde* is this year altogether discarded, and is replaced by long mantles edged with fur and adjusted to the shape. Tight-fitting *paletots Russes* are also worn on the Boulevard and on the Bois; and long trains are more than ever in vogue for outdoor as well as indoor wear. The "robe princesse" still reigns supreme both for ordinary "toilettes d'intérieur" and for "toilettes de bal;" but it is now worn laced behind, and trimmed with galons of passementerie embroidered with flowers or arabesques in gay-coloured tints. The chapeaux, this winter, are almost exclusively trimmed with feathers, and feathers and awns-down are also largely employed for the adornment of "toilettes de bal." At recent gatherings of the grand monde a few *élégantes* appear to have inaugurated a new mode—that of trimming ball-dresses with fur; an innovation against which all the leading critics of fashion vehemently protest. Specimens of the various styles of feminine costume which have inaugurated the New Year will be found in the accompanying Engraving, to the annexed description of which we refer our fair readers for further information concerning the latest novelties of "La Mode Parisienne."

THE ILLUSTRATION.

Fig. 1. Toilette d'intérieur of dark blue faille and velvet. Over the velvet jupe à traine is worn a faille drapery, edged with a galon of brocaded velvet. The "corsage cuirasse" is of faille, with velvet collar and sleeves, the latter being trimmed with cuffs and bows of faille.

Fig. 2. Toilette de bal of rose-colour satin, the corsage princesses of which is laced behind with a cordon of white silk, and edged with lace and guipure, while a garland of tea-roses and leaves borders the upper jupe, which is caught up on either side. The under jupe, which is à traine, is trimmed with three superposed flounces of lace. A bouquet of tea-roses is worn on the crown of the head, with a sprig of the same flowers dropping behind.

Fig. 3. Costume de promenade, in maroon-colour fancy tissu, the "tunique princesse" of which is edged with a deep grelot fringe. A similar fringe ornaments the broad velvet sash and the bottom of the jupe, which is à demie-traine. The chapeau of black velvet is trimmed with bows and feathers of the same colour as the robe.

Fig. 4. Toilette de promenade, composed of a robe of black velvet, over which is worn a dark-green double-breasted *paletot* of fancy stuff, lined with wadding and edged with fur, and having side pockets of the prevailing pattern trimmed with large bows. The Chapeau Diavoli is of green faille with a large black ostrich-feather falling behind.

Fig. 5. Toilette d'intérieur for a little girl, in white cashmere, with epaulettes, cuffs, and sash of blue satin, and the skirt of which is plaited. The stockings are striped blue and white, and the boots are of white satin.

Fig. 6. Toilette de visite, composed of a robe of violet velvet with "corsage cuirasse" and "demie-traine" of grey brocaded silk, edged with a band of passementerie embroidered with roses and foliage. The velvet jupe is trimmed in front with flounces of brocaded silk, cut en biais, and edged with fringe. The chapeau, which is covered with velvet, is caught up on each side with silk bands, and trimmed with ostrich-feathers falling behind.

Fig. 7. Costume de promenade, composed of a *paletot Russe* in light brown tissu, cut to the shape and edged with black fur. The cuffs and side pockets are trimmed with fur and passementerie; while the upper jupe, also edged with fur, falls over a train of dark-brown silk. The chapeau has short strings, and is trimmed with ostrich-feathers.

Fig. 8. Toilette d'intérieur, in grey cachemire de l'Inde, with a tunique princesse, cut en biais in front, and edged with a *chicorée* of guipure.

Fig. 9. Costume de promenade, composed of a long mantle in black silk, cut to the shape, and edged and lined with fur. Chapeau rond, trimmed with cocks'-feathers.

Costume de promenade for a young girl, in grey plaid, composed of a tight-fitting double-breasted *paletot*, and upper and under jupe edged with pleated flounces. Chapeau Tyrolien, caught up at the left side, and trimmed with bows and coques of ribbon.

A year ago Mr. Robinson, editor and proprietor of the *Garden*, began the issue of coloured plates with every number of his journal. They are from original drawings, by the best flower and fruit painters, of the most valuable new or rare plants. Each plant chosen for illustration is usually a member of some important family, and the plate is accompanied by an article enumerating and describing all the kinds and embodying all that is known up to the present day concerning each great family of cultivated plants. These coloured plates greatly enhance the beauty and value of the periodical.

PARIS FASHIONS FOR THE NEW YEAR.

FLOODS ALONG THE THAMES.

MUSIC.

The earliest performance of the new year was that of "The Messiah," at the Royal Albert Hall, on Thursday week, under the direction of Mr. William Carter, whose large and efficient choir gave the choruses with excellent effect; the principal solo-singers having been Mesdames L. Sherrington and Patey, Mr. E. Lloyd and Signor Foli. Mr. T. Harper's trumpet obbligato was, as usual, an important incidental feature. Mr. E. Bending presided at the organ.

On the following evening, "Elijah" was performed by the Sacred Harmonic Society, at Exeter Hall; the choruses having been rendered with immense power by the large choir engaged here. The grand climax to the first part of the oratorio, "Thanks be to God," produced a special impression. The principal solo vocalists were Mesdames Sherrington and Patey, Mr. Wilford Morgan and Mr. G. Fox; Miss Jessie Jones having been the soprano in the duet (with Madame Patey) "Zion spreadeth her hands." In some of the concerted pieces, efficient aid was rendered by this lady, Miss Hancock, Mr. Carter, Mr. C. Henry, and Mr. De Lacy. Madame Patey was encored in the contralto air "O rest in the Lord," and the quartet "Cast thy burden upon the Lord," had also to be repeated. Sir Michael Costa conducted, and Mr. Willing presided at the organ, as usual. The next performance will take place on Jan. 26, when Handel's "Solomon" will be given.

On Saturday last the London Ballad Concerts, under the direction of Mr. John Boosey, opened their eleventh season at St. James's Hall, which was filled to overflowing. Mr. Sims Reeves fulfilled his engagement, and sang, in his usual admirable manner, Pinsuti's new song, "Smile, and bid me live," "The Pilgrim of Love," and (in reply to the encore of this) "Come into the garden, Maud." Other successful vocal performances were contributed by Mesdames Sherrington and Antoinette Sterling, Miss Anna Williams, Mr. E. Lloyd, Mr. A. Kenningham, and Mr. Wadmore, besides some capital part-singing by the gentlemen of the London Vocal Union. Madame Arabella Goddard played with brilliant execution, Thalberg's fantasia on the serenade from "Don Pasquale," and Jules Sivrai's "Balmoral Fantasia" on Scotch airs. The pianist was encored in each of her performances. Mr. Sidney Naylor accompanied the vocal music with care and skill. The second concert takes place next Wednesday evening.

This week the Monday Popular Concerts were resumed, after the usual brief Christmas recess. The performances began with Mozart's divertimento in B flat, for two violins, viola, violoncello, contrabass, and two horns—one of several such works by the same composer. It was given on this occasion for the fifth time, and received an admirable rendering from Herr Straus, MM. L. Ries, Zerbini, Piatti, and Reynolds at the stringed instruments, the horn parts having been worthily rendered by Mr. Wendtland and Mr. Standen. The closing piece of the concert was Haydn's string quartet in C (No. 2 of op. 50), which had not before been heard at these concerts. Its genial beauty will, doubtless, secure its early repetition. Mdlle. Marie Krebs played, with great effect, Beethoven's Sonata Appassionata for pianoforte solo, and was associated with Signor Piatti in a fine performance of the same composer's first duet-sonata for piano and violoncello, in F. Vocal pieces were rendered by Mdlle. Thekla Friedlander, with her usual success. Mr. Zerbini was an efficient accompanist. The first afternoon performance of the new year takes place to-day (Saturday).

The New-Year's Festival and Concert of the London Sunday-School Choir was held, at the Royal Albert Hall, on Monday evening, when a selection of pieces, sacred and secular, was effectively sung by about 1800 voices—selected from various Sunday schools attached to the association—conducted by Mr. Luther Hinton. The institution has been formed for the purpose of promoting and improving part-singing amongst Sunday-school teachers and scholars, and seeks to cultivate Christian unity amongst Sunday-school workers of all denominations. Classes, under the direction of seventy-four local conductors, meet for the practice of Sunday-school pieces. The full choir consists of 6958 members, from 119 schools.

THEATRES.

It will be recollected that last year a Parisian play, entitled "Les Danicheff," was acted at the St. James's by a French company, including Madame Fargueil, Mdlle. Hélène Petit, Mdlle. Antoinette, and M. Marais, and rose at once, on the score of its intrinsic merits, to popularity. It was reproduced on Saturday in an English version, with a thoroughly competent cast, including Mrs. John Wood, Miss Lydia Foote, Miss Fanny Addison, Mr. Hermann Vezin, Mr. John Clayton, and Mr. Charles Warner. There are several unimportant variations from the original, probably made to conciliate the supposed prejudices of an English audience, but which had better never been attempted. It is gratifying to be able to say with truth that the characters were one and all ably supported, Mr. Charles Warner especially shining in the rôle of Vladimir. Mr. Hermann Vezin was really great in De Taldi, and pronounced the satirical speeches with great elocutionary discrimination. Mr. Clayton, as Osip, gave a pathetic interpretation of the character. Mrs. Wood's Princess Lydia was perfect, and Miss Addison's Fargueil extremely good, if not brilliant. In Anna, Miss Lydia Foote proved singularly effective. The curtain fell to vehement applause.

Miss Annie Lafontaine had an opportunity on Saturday morning, at the Haymarket, of again challenging public opinion on her performance of Hester Grazebrook in Mr. Tom Taylor's remarkable comedy of "An Unequal Match," to which the finished acting of Miss Amy Sedgwick gave, for so long a time, such well-deserved celebrity. We can conceive nothing more difficult than a successful assumption of the character of the heroine after that of her original representative; but Miss Lafontaine justified the attempt, and, if not quite equal to her predecessor, at any rate comes off second best.

Mr. John S. Clarke commenced, on Saturday, a new engagement at the Strand. The characters assumed by him were the old ones of Toodles and Babington Jones, "Among the Breakers." He was well assisted by Miss Sally Turner as Mrs. Toodles. His reception was cordial; and he is likely to contribute to the hilarity of the audience for some weeks.

The Attorney-General, on Saturday last, attended a banquet to celebrate the laying of the foundation-stone of a new Conservative club at Preston.

A conference of municipal representatives was held at Birmingham yesterday week, presided over by the Mayor, at which a resolution was passed urging upon the Royal Commissioners for the Exhibition of 1851 the propriety of realising the property under their control, and of applying it in part to grants in aid of building local museums, and in making provision for the purchase of objects suitable for exhibition therein.

MUSICAL PUBLICATIONS.

Sterndale Bennett's pianoforte works: Lamborn Cock. We have here the first two volumes of a collection of the charming compositions of the deceased master who distinguished himself alike by his admirable pianoforte playing and his excellent productions for the instrument. The edition now referred to is in a handy large octavo form; the engraving and printing are distinguished by neatness and accuracy; and the price places the work within the reach of purchasers of the most moderate means. The office of editor has been carefully and conscientiously fulfilled by Mr. Arthur O'Leary, a pupil and friend of the composer, from whom he received various suggestions as to the order and arrangement of the pieces. The forthcoming volumes of this publication will complete what has long been a want in the pianist's library.

Mozart's concertos, vol. 1: Messrs. Augener and Co., Newgate-street and Regent-street. This is the commencement of an octavo edition of the numerous charming works composed by Mozart—mostly for his own public performance—with orchestral accompaniments. The volume now referred to is beautifully engraved and printed, and contains six concertos, for the price of as many shillings—edited by Mr. Pauer, who has supplied a second piano part (over the solo part), containing the chief features of the orchestral score. The concertos here given are those in E flat, D minor, B flat, and C major (composed in 1785); in G (1784), and in A major (1786). The continuation of the series will supply a want long felt by pianists of the classical school.

From Messrs. Ashdown and Parry we have some brilliant pianoforte pieces by Mr. Sydney Smith, well written for the display of executive power, while yet not making excessive demands on the performer. In fact, they are all showy and effective without presenting any very great obstacles to a player of moderate attainments. The titles of Mr. Smith's recent productions of this class are:—"Il Trovatore" (an operatic fantasia), "Le Bivouac" (a piece in the martial style), "Airs Ecossais" (variations on well-known national tunes), and "Mosé in Egitto" (founded on Rossini's biblical opera). "La Danse des Sauterelles, Fantasy for the Pianoforte," by Boyton Smith, has much pleasing character; and three pieces by Mr. L. Diehl—"La Maja" ("Mauresque"), "The Magic Harp" (morceau de salon), and "Coraline" (caprice)—may likewise be commended as agreeable and showy; similar praise applying to Mr. E. M. Lott's two fantasias, entitled respectively "Snowdon" and "In the Highlands," the first treating Welsh airs, the second Scottish tunes. All these are likewise published by Messrs. Ashdown and Parry.

"The Musical Directory Annual and Almanack" and "The Professional Pocket-Book" (both published by Messrs. Rudall, Carte, and Co.) are admirably adapted to their special and general purposes. The first-named publication contains a large amount of information specially referring to musical matters, including a record of last year's events of interest; besides which there are the business and official tables usually given in non-professional almanacks and directories. The Pocket-Book has also many of the features last specified, in addition to a daily and hourly calendar for the entry of engagements, and a specification of the principal forthcoming performances, so far as yet known. Both the works referred to will be highly valuable alike to the musical professor and the amateur.

ORDERS OF KNIGHTHOOD.

The new order of the Indian Empire will make the 146th order of knighthood in existence, and the seventh British order. The vast majority of orders, it should be observed, date from modern and even very recent times, few indeed being able to trace their origin to the days of chivalry. The oldest is the "Sovereign Order of St. John of Jerusalem," founded in the year 1048, which still boasts a Lieutenant of the Grandmastership and a Sacred College residing at Rome. The Spanish order of Calatrava dates from 1158 and the reign of Sancho III. of Castille. Of the better known orders, however, the Garter is first in point of antiquity (1338), and the Golden Fleece second (1429). The order of St. Andrew, which may be called the Russian Garter, dates only from 1698, when it was founded by Peter the Great. The order of the Black Eagle of Prussia was established by Frederic I. on Jan. 18, 1701, when the Prussian Monarchy was also proclaimed. The first non-Christian order of chivalry—a strange portent it would have seemed to Edward III. or Philip the Good—was created by the Shah of Persia, Feth Ali Khan, in 1808, and is known as the Order of the Lion and Sun. This Prince wished to decorate certain foreigners, and had instituted an order in honour of a French Envoy, which he subsequently offered to a subject of his Britannic Majesty; but he was informed that the dignity of England required that he should institute a new order by way of compliment to that country. Sir John Malcolm was one of the first knights. The French order seems to have died out. China now has its Order of the Dragon (1863), and Japan its Order of Civil and Military Merit. The Order of Kaméhaméha (1865) is an object of legitimate ambition to the natives of the Sandwich Islands. Among Republican orders may be cited those of San Marino (1859), founded by the "Grand Sovereign Council of the Republic" of St. John of Nicaragua, and of St. Rose of Honduras—all probably purchasable at reasonable rates.—*Pall Mall Gazette*.

NEW KNIGHTS OF THE STAR OF INDIA.

Mr. Arthur Hobhouse, Q.C., Second Ordinary Member of the Council of the Governor-General of India, is the youngest son of the late Right Hon. Henry Hobhouse, of Huddersfield House, Somersetshire, many years Under Secretary of State for the Home Department, by his marriage with Harriet, sixth daughter of the late Mr. John Turton, of Signal, Staffordshire. He was born in 1819, and was educated at Eton, and Balliol College, Oxford, where he obtained a first-class in classics in Michaelmas Term, 1840. He was called to the Bar at Lincoln's Inn in 1845, and obtained silk in 1862. He was appointed one of the Charity Commissioners in 1866, and a Commissioner under the Endowed Schools Act in 1869. He married, in 1848, Mary, daughter of the late Mr. Thomas Farrer.

Mr. James Fitzjames Stephen, Q.C., late member of the Governor-General's Council, is the eldest son of the late Right Hon. Sir James Stephen, K.C.B., Regius Professor of Modern History at Cambridge (who died in 1859), and grandson of Wilberforce's great friend, Mr. James Stephen, M.P., one of the Masters of the Court of Chancery. He was born about the year 1829, and was educated at Eton, and at Trinity College, Cambridge, where he took his Bachelor's degree in 1852. He was called to the Bar at the Inner Temple in Hilary Term, 1854, and joined the Midland Circuit. He was made a Q.C. in 1858, and was appointed Recorder of Newark in 1859.

Rear-Admiral Reginald John James George Macdonald, Commander-in-Chief of her Majesty's Naval Forces in the Indian seas, is the only son of the late Reginald George Macdonald, Chief of Clanronald (who died in 1873), by his marriage with Lady Caroline Anne Edgcumbe, younger daughter

of Richard, second Earl of Mount Edgcumbe. He was born about the year 1816, and entered the Royal Navy in 1833. Having served in the Mediterranean as mate of the Howe, he was promoted to the rank of Lieutenant in 1842; he afterwards served in the Albion, off Lisbon, and subsequently in the Collingwood, bearing the flag in the Pacific of Sir George F. Seymour, to whom he became Signal-Lieutenant in 1847. He became Captain in 1854, and obtained flag rank in 1870. He married, in 1855, the Hon. Adelaide Louisa Warren Vernon, second daughter of George John, fifth Lord Vernon.

Mr. Edward Clive Bayley, C.S.I., third ordinary member of the Council of the Governor-General, was born about the year 1823, and he entered the Indian Civil Service (Bengal Presidency) in 1841. He held for some time the post of Deputy Commissioner in the Punjab. He was afterwards joint magistrate and deputy collector at Azimghur, and was subsequently appointed Secretary to the Government of India in the Home Department.

Sir George Ebenezer Wilson Couper, C.B., of the Bengal Civil Service, is the eldest son of the late Colonel Sir George Couper (many years Equerry and Comptroller of the Household to her Royal Highness the Duchess of Kent), by his marriage with Elizabeth, second daughter of the late Sir John Wilson, of The Howe, Westmorland. He was born in the year 1824, and was educated at the Royal Military College, Sandhurst, and afterwards at Haileybury College. He entered the Bengal Civil Service in 1846, and in 1856 was appointed Secretary to the Chief Commissioner of Oude, Secretary to the Government of the North Western Provinces in 1858, and Judicial Commissioner in Oude in 1863. He was made a Companion of the Bath (Civil Division) in 1860, in recognition of his services during the Mutiny. Sir George Couper, who succeeded to his father's title in 1861, married, in 1853, Caroline, daughter of the late Mr. Henry Every, and sister of the present Sir Henry Every.—*Globe*.

THE OHIO RAILWAY DISASTER.

The *New York Herald* of Dec. 30 gives the following account of the terrible railway accident at Ashtabula, Ohio:—

"One of the most furious snowstorms ever known in this vicinity has been raging nearly all day, and deep drifts made every roadway impassable. So severe was the storm that very few of the business places in Ashtabula kept open doors after four or five in the evening, and the trains from all directions were several hours behind time. At about eight o'clock p.m. the whole village was aroused by the general fire alarm, and the word soon spread that passenger-train No. 5, from the east, had gone through the high bridge over Ashtabula with a large number of passengers, and that the whole train was on fire. A lurid glare in that vicinity confirmed the report, and in spite of the terrible night nearly the whole village and all of the fire-engines were soon en route to the dépôt, which is situated about one mile distant from the village. The train was due at Ashtabula at a quarter past five, and was nearly three hours late. It had eleven cars, including one drawing-room car, three sleepers, one smoking-car, two first-class coaches, and four baggage and express cars. It was drawn by two engines—the Socrates ahead, followed by the Columbia, No. 360. Daniel Maguire, engineer of the Socrates, relates that the train was running at a slow rate, and just as they had fairly crossed the high bridge, which is not more than forty rods distant from the dépôt, they felt a violent jar, and in an instant the coupling between the Socrates and the Columbia had broken, and the whole train was precipitated from the bridge into the river, some 65 ft. below. The bridge over Ashtabula river was an iron truss-bridge, and had been in use about eleven years. It is supposed that the heavy droughts must have thrown the cars from the track, causing the cold irons to snap. The horrible scene below beggars all description. The span is about 100 ft. wide, and through the space between flows the river, about 4 ft. or 5 ft. deep, at this time thickly covered with ice. Into this space were the eleven cars and one engine and tender precipitated. The fall of 60 ft. of course broke through the icy covering, and shivered the cars. The seven passenger coaches altogether contained about 165 adults, besides a number of children. Most of those in the forward car are saved, with injuries more or less severe. Within a very few moments after the crash the flames burst out simultaneously from nearly every car, and before help was at hand the flames were striving with the icy torrent as to which should devour the greater number of human lives. Mr. Frank Belknap, who was one of the earliest at the scene, says that the piteous cries for help from all the victims were enough to wring the stoutest heart. Here was a young and finely-dressed girl of about ten years of age struggling in vain to release her hip from the weight which was crushing her slender form; close behind her were the flames shooting out their forked tongues, which in another instant had enwrapped her in their furious embrace. Here was a fine gentleman of middle age sitting bolt upright in his seat and unable to extricate himself, calmly awaiting the flames, which soon claimed their victim; there were bodies floating out from the wreck, and others not yet suffocated by the icy flood were attempting to make their way to the shore. A crowd soon made their way to the burning debris, and, with the aid of axes and ropes, many were extricated, placed on stretchers, and taken to the top of the hill, where the best of assistance awaited them. The hotels at the dépôt were soon filled, and private houses were thrown open throughout the town. The surgeons of the town rendered all the assistance in their power; but many perished, notwithstanding the best of care, during the night. Others are now lying in a suffering condition in the hotels and private residences. It is estimated that fully one hundred persons have been killed."

The Railway Commissioners have, on the application of the Mayor of Rochester and a number of men of business in that district, ordered the London, Chatham, and Dover Railway Company and the South-Eastern to provide a train service connecting the railways at Strood, and a through traffic for both passengers and goods; and have directed that the companies shall pay in equal parts the costs of the application.

It is stated that the Palestine Exploration Committee, after a year of work on the laying down and preparation of that portion of the map already executed, have decided on sending out an expedition to complete the survey of Western Palestine. The command will be assumed by Lieutenant H. H. Kitchener, R.E., who was with Lieutenant Conder in 1874-5. He will have a staff of four non-commissioned officers, including Sergeant Armstrong, who has been with the survey from the beginning. He will survey the northern portion, including Galilee, and will then take up one or two unfinished portions of the south, and execute a general revision of the whole country. He proposes to clear out and restore Jacob's Well, for which purpose Miss Peache, of Wimbledon, has given £100, and Dr. Nathaniel Rogers, of Exeter, £50. Lieutenant Conder remains at home working at the reduction to shape of his voluminous notes and the memoirs which will accompany the sheets.

OBITUARY OF EMINENT PERSONS.

LORD BOSTON.

The Right Hon. Sir Florence George Henry Irby, Baron Boston, of Boston, in the county of Lincoln, and a Baronet, died at at Portlambert, his seat in Anglesey, on the 3rd inst. His Lordship was born March 9, 1837, the only son of George Ives, fourth Lord Boston, by his first wife, Fanny Elizabeth, eldest daughter of the late William R. Hopkins-Northey, Esq., of Oving House, Bucks, and succeeded his father as fifth Baron, Dec. 22, 1869. His Lordship was educated at Eton; he was J.P. for Bucks, J.P. and D.L. for Anglesey, and High Sheriff of the latter county in 1865. He married, Oct. 17, 1859, Augusta Caroline, second daughter of John St. Vincent, third Lord de Saumarez, and leaves three sons and two daughters. His eldest son and successor, George Florence, now sixth Lord Boston, was born Sept. 6, 1860.

SIR RICHARD JOHN FLETCHER, BART.

Sir Richard John Fletcher, second Baronet, of Carrow, in the county of Cork, formerly a Captain in the Army, died on Christmas Day, at Pitchcombe House, Stroud, in the seventy-second year of his age. He was elder son of Lieutenant-Colonel Sir Richard Fletcher, Chief Engineer during the Peninsular War, who was created a Baronet for his distinguished services in 1812, and who terminated his gallant career before San Sebastian in 1813. The Baronet whose death we record was never married. He was born on the 9th of February, 1805. Charles Orlando, his brother, born in 1806, succeeds him in the baronetcy.

SIR ROBERT WESLEY, K.C.B.

General Sir Robert Wesley, K.C.B., Knight of the Order of St. Ferdinand of Spain, First Class, died, on the 5th inst., at his residence, Richmond Lodge, Blackheath. He was eldest son of Robert Wesley, Esq., M.D., of Cove, in the county of Cork, for many years Staff Surgeon to the Naval Hospital at Haulbowline. He entered the Marine Artillery in 1809, became First Lieutenant in 1816, Captain in 1837, Lieutenant-Colonel in 1852, Colonel in 1855, Major-General in 1857, and Lieutenant-General in 1862. So far back as 1810 he served at the capture of Guadaloupe, and in 1811 and 1812 was employed in a force co-operating with the Peninsular Army on the north coast of Spain. From 1813 to 1815 we find Wesley engaged in the coast operations on the Canada frontier, and the brilliant defence of La Cote Mill. In 1835, when a British marine force was sent to Spain, under the command of Lord John Hay, to assist the army of Queen Isabella during the Carlist war, Captain Wesley acted as Adjutant, and was decorated with the order of St. Ferdinand. Finally, he filled for many years the office of Deputy Assistant General of the Marine Forces, and was rewarded for his services as head of the department, at the time of the Crimean War, with the insignia of K.C.B. He married, in 1834, his cousin Mary, daughter of the Rev. Robert Butt, Incumbent of Stranorlar, in the county of Donegal, and sister of Isaac Butt, Esq., M.P.

LIEUTENANT-GOVERNOR CARON.

René Edouard Caron, Lieutenant-Governor of the Province of Quebec, died on the 13th ult. Born at St. Anne, and educated at Quebec seminary and at the College of St. Pierre, he was called to the Bar in 1827, made Queen's Counsel in 1848, and raised to the Bench of the Superior Court in 1853. In 1855 he was transferred to the Queen's Bench, where he remained till he was transferred to the Governorship of his native Province. From 1834 to 1836, he represented the Upper Town of Quebec in the House of Assembly of Lower Canada, and from 1841 to 1857, was member of the Legislative Council of Canada, having been, for four years, Speaker of that Assembly.

PERSONAL STATISTICS.

The oldest member of her Majesty's Privy Council is Viscount Stratford de Redcliffe, G.C.B., aged eighty-nine; the youngest, H.R.H. Prince Leopold, aged twenty-four.

The oldest Duke is the Duke of Portland, aged seventy-seven; the youngest, the Duke of Montrose, aged twenty-five. The oldest Marquis is the Marquis of Donegal, aged eighty; the youngest, Marquis Camden, aged five. The oldest Earl in the House of Peers is Earl Bathurst, aged eighty-six; though the oldest bearer of that title is the Earl of Kilmorey, an Irish Peer, aged eighty-nine; the youngest is the Earl of Hopetoun, aged seventeen. The oldest Viscount is Lord Stratford de Redcliffe, aged eighty-nine; the youngest, Viscount Clifden, aged fourteen. The oldest Baron is Lord Chelmsford, aged eighty-three; the youngest, Lord Southampton, aged ten.

The oldest member of the House of Commons is the Right Hon. Joseph Warner Henley, M.P. for Oxfordshire, aged eighty-four; the youngest, the Hon. William O'Callaghan, M.P. for Tipperary, aged twenty-five.

The oldest Judge in England is the Right Hon. Sir Fitzroy Kelly, Lord Chief Baron of the Exchequer Division of the High Court of Justice, aged eighty-one; the youngest is Sir Nathaniel Lindley, Justice of the Common Pleas Division, aged forty-nine. The oldest Judge in Ireland is the Hon. James O'Brien, of the Court of Queen's Bench, aged seventy-one; the youngest, the Right Hon. Christopher Pales, LL.D., Chief Baron of the Court of Exchequer, aged forty-six. The oldest of the Scotch Lords of Session is Robert Macfarlane, Lord Ormidale, aged seventy-five; the youngest, Alexander Burns Shand, Lord Shand, aged forty-eight.

The oldest Prelate of the Church of England is the Right Rev. Alfred Ollivant, Bishop of Llandaff, aged seventy-nine; the youngest is the Right Rev. Edward Parry, Suffragan Bishop of Dover, aged forty-seven. The oldest Prelate of the Irish Episcopal Church is the Right Rev. John Gregg, Bishop of Cork, aged seventy-nine; the youngest is his son, the Right Rev. Robert Samuel Gregg, Bishop of Ossory and Ferns, aged forty-three. The oldest Prelate of the Scotch Episcopal Church is the Right Rev. Robert Eden, Bishop of Moray and Ross, aged seventy-three; the youngest, the Right Rev. George K. Mackarness, Bishop of Argyll and the Isles, aged fifty-four.

The oldest Baronets are Sir Richard John Griffith and Sir Moses Montefiore, each aged ninety-three; the youngest, Sir Henry Park Carew, aged seven.

The oldest Knight is Field Marshal Sir John Forster Fitzgerald, G.C.B., aged ninety-one; the youngest, Sir Ludlow Cotter, aged twenty-four.—*Who's Who* in 1877.

CHESS.

TO CORRESPONDENTS.

All communications relating to this department of the paper should be addressed to the Editor, and have the word "Chess" written on the envelope.

B HAVES.—If you will examine our issue of the 30th ult., you will find you have made a mistake. The solutions were regularly acknowledged.
E FARR (Lyons).—We have attended to your request.
H B (Brierly-hill) and J O S (Sheffield).—Copies of Wormald's "Chess Openings" can be procured from W. W. Morgan, 67, Barbican, London.
W L.—There seems to be a fatal flaw in both versions of the problem. When Black plays 1. K to Q 4th, White can then continue with either 1. to Q 3rd or Kt to Kt 6th. We shall be glad to hear from you on this point.
H K (Covent-garden).—A King cannot castle if an adverse piece or pawn attacks any square over which it is passed in the move. The pawn's privilege of capturing a Pawn en passant is of great antiquity. See Staunton's "Handbook," page 16.
J G F (Ramsgate).—Until we received your letter we had no problems of yours in hand. The two included shall have early attention, and if you will favour us with copies of those referred to, they shall be examined and reported on without delay.
W B C (The Hamlet).—We will endeavour to get you the information you require before our next issue.
W H R.—The solutions of Nos. 1711, 1712, 1713 were acknowledged to Drapers' College, Highfield (Southampton).—Wherein lies your difficulty? In the laws of chess there are several such anomalies, springing from a loose mode of expression on the part of the old writers, but tradition and custom furnish a safe guide to the intended meaning. A rule that the King cannot be moved to any square within the scope of action of an adverse piece, whether that piece is what is called "pinned" or not, has existed from time immemorial; and, although Philidor failed to set it forth clearly, he always observed the regulation in practice.
CORRECT SOLUTIONS OF PROBLEM No. 1712 received from Ansur and J G Finch.
CORRECT SOLUTIONS OF PROBLEM No. 1713 received from Sussex, E B, Deep Ho, W H Gibson, Ladbrough, and Highfield.
CORRECT SOLUTIONS OF PROBLEM No. 1714 received from T Guest, J G F, Tredunnock, E L G, Emile Frau, Knight Errant, Owllet, A Wood, Littlejohn, E Clarkson, Deep Ho, Drapers' College, Rotomago, P S Shenale, R H Brooks, H Roe, W Lesson, Carl Eggert, J S W, and Kichequer. All others are wrong.
CORRECT SOLUTIONS OF PROBLEM No. 1715 received from H B, Carl Eggert, X V I L, T Guest, H E Tudor, H Roe, C Akhurst, Woolwich Chess Club, Buck Knight, Z Ingold, Arty, Lily, B B, Drapers' College, J Balford, T E Webb, E L G, Emile Frau, Cant, W S B, J K, Little, W Lesson, W F Payne, J de Houtteyn, Knight Errant, Owllet, East Marden, E H V, H M S "Brasier," T W Slorpy, Horeward, A Wood, E Clarkson, B H Brooks, Rotomago, Jno C Skinner, W A Colard, G A Messenger, P S Shenale, Robin Roughhead, Grange, Sumpster, Light, and J Stephen. All others are wrong.
GAMES received from E T, S H, S S B, and G A M; and Problems received from I O H T, C Eggert, J A W, Hunter, J G Finch, and C W, of Sunbury, are acknowledged, with thanks.

SOLUTION OF PROBLEM No. 1715.
WHITE. 1. P to K 6th
BLACK. P to B 3rd (best)
WHITE. 3. Kt to B mates.
BLACK. K moves

PROBLEM No. 1717.

By CARL EGGERT.

BLACK.

WHITE.

White to play, and mate in three moves.

NORTHUMBERLAND AND DURHAM CHESS ASSOCIATION.
 A Game played at a meeting of the above Association, held at Newcastle-on-Tyne, on the 26th ult.—Messrs. ARCHDALL, PRATT, NEWTON, and NICHOLSON consulting on the one side; and Messrs. CHARLTON, GREEN, HOPKINSON, and WOODMAN on the other.—(Petroff's Defence.)

WHITE. (Mr. A. & Allies). 1. P to K 4th
BLACK. (Mr. C. & Allies). 1. P to K 4th
 2. Kt to K 3rd

 27. Q takes R R takes R
 28. K to R sq Q to Q 5th (ch)
 29. Q to Kt 3rd K to B 2nd
 30. Q to R 4th P to B 6th
 31. Q to K 7th Q to Q 2nd
 If he play Q to Q 6th, White moves his K to Kt sq; and, besides, the exchange of Queens would render Black's victory certain.
 32. Q to K 4th Q to Q 6th
 33. Q to K sq K to B 2nd
 The K can now be played out with impunity, as White's pieces are all cabined and confined at home.
 34. K to Kt sq Q to Q 6th (ch)
 35. K to R sq Q to Q 8th
 36. Q to B 2nd R to Q 7th
 37. Q to Kt sq R takes Q B P, and White resigned.

HERE ANSWERED.—The members of the Mid-German Chess Association of Leipzig have arranged to hold a festival in honour of the famous chess-player on the occasion of his birthday this year.

WILLS AND BEQUESTS.

The will, dated Sept. 9, 1873, of Sir Elkanah Armitage, late of Hope Hall, Lancashire, who died on Nov. 26 last, was proved on the 5th ult. at the Manchester District Registry, by Elkanah Armitage, Benjamin Armitage, Samuel Armitage, and Joseph John Armitage, sons of the deceased, the executors, the personal estate being sworn under £200,000. The testator bequeaths to his son Elijah, £28,000; to his son Vernon Kirke, £21,000; upon trust for the children of his deceased daughter Mrs. Rebecca Southam, £16,000, the interest whereof is to be paid to their father, Mr. George Southam, for their maintenance and education; upon trust for his daughters Mrs. Jane Ann Hewitt and Mrs. Mary Bowers Bennett, and their children, £16,000 each; all these legacies are free of duty. The residue of all his property he leaves to his said four sons, Elkanah, Benjamin, Samuel, and Joseph John.

The will and codicil, dated May 13, 1875, and Sept. 28, 1876, of Mr. James Kay, late of Turton Tower, Lancashire, who died on Nov. 4 last, were proved at the Manchester District Registry on the 4th ult. by James Kay and John Clark Kay, the sons, and the Rev. Philip Graham, the executors, the personal estate being sworn under £90,000. The testator gives to his wife, Mrs. Annie Kay, £100, the use of his trinkets and jewellery for life, and an annuity of £400; to his eldest son, James, all his real estate, household furniture, and effects, horses, and carriages; to his two sons, John Charles and Robert Arthur, £25,000 each; upon trust for his daughters, Mrs. Annie Hargreaves and Miss Emily Kay, £12,000 each; upon trust for his daughter, Mrs. Emily Osborne, £8,000, in addition to the £4,000 already settled upon her; one fourth of the rest of his personality to his said eldest son, and the remainder between his two other sons.

The will and codicil, dated March 14 and Aug. 25, 1875, of Mr. James Carey, late of Broadwater Down, Frant, Sussex, who died on Oct. 26 last, were proved on the 13th ult. by Christopher James Riethmüller and Edward Carey and Frederick Carey, the sons, the executors, the personal estate being sworn under £90,000. The testator leaves to Mr. Riethmüller £200; to his wife, Mrs. Rose Septima Carey, his household furniture and effects absolutely, and his real estate and the income of the residue of his personal estate for life; on her death he gives to his son Edward his house and premises near Shortlands, Kent; to his son Francis, £1450; and the remainder of his property to all his children in equal shares.

The will, with four codicils, of Colonel Thomson, late Mayor of Liverpool, was proved in London on the 6th inst. by Mrs. Francis Mary Thomson, the widow, the acting executrix. The will is dated Jan. 29, 1873, and the last codicil Nov. 17, 1875. The personality in England is sworn under £60,000, which, with his estates in England and Scotland, he leaves for the benefit of his widow and child, with liberty for his widow to reside at his mansion, Leyfield Priory, West Derby, and his residence in Scotland, and he declares that the provision thus made for his wife is in addition to the settlement made in her favour and the money invested for her, and he confirms such settlement and investment. He appoints two of his nephews, and Colonel Steble, of Sandfield Park, and John Pearson, Esq., of Golborne Park, conjointly with his widow, guardians of his child during her minority.

The will, dated July 28, 1860, of Sir Francis Shuckburgh, Bart., late of Upper Shuckburgh, Warwickshire, who died on Oct. 29 last, was proved on the 23rd ult. by Sir George Thomas Francis Shuckburgh, the son, the sole executor, the personal estate being sworn under £60,000. The testator leaves the whole of his property of every description to his said son, who succeeds him in the baronetcy.

The will, dated Dec. 29, 1874, of Mr. Henry Burdett Langham, late of Cottesbrooke, Northamptonshire, and of Montrose House, Hampstead, who died on Nov. 30 last, was proved on the 9th ult. by Herbert Hay Langham and Francis Nathaniel Langham, nephews of the deceased, the executors, the personal estate being sworn under £30,000. The testator, after giving a few legacies and annuities, gives one half of the residue of his estate to his sister, Mrs. Henrietta Otway, and the other half to the children of his late brother, Herbert Langham, except an eldest son.

The will, dated June 25, 1875, of Mr. Pearce William Rogers, C.B., formerly one of the Registrars of the High Court of Chancery, who died on Nov. 7 last, was proved on the 12th ult. by Mrs. Jane Rogers, the widow and sole executrix, the personal estate being sworn under £12,000. The testator gives legacies to his sisters, nephews, and nieces, and the residue to his wife.

The will of the Hon. Mrs. Percy Fitzgerald, of 37, St. George's-road, has been proved by her husband, the personality being sworn under £11,000. The deceased lady leaves £500 for masses for the repose of her soul; £500 to the poor of Collen, Ireland, in trust to the priest of the parish; and bequeaths the residue to her husband.

The late Sir Titus Salt has, by his will, intrusted to Lady Salt and Mr. Titus Salt the power to place in trust, for the future benefit of the public and the unfortunate in the locality, the public and benevolent institutions of Saltaire, including the almshouses, the dispensary, the club and institute, and the Sunday and day schools. The hon. Baronet has also provided a fund of £30,000, the income from which is to be appropriated for the benefit of the sick and the aged poor of Saltaire and the neighbourhood, thus providing an adequate endowment for the maintenance of the residents in the almshouses. We abstain from giving further particulars of the will until it is proved.

Referring to the notice of the will and codicils of the late Sir Henry de Hoghton, Bart., which appeared in the *Illustrated London News* of last week, we are requested to state that Sir Charles de Hoghton, who succeeded to the baronetcy on the death of his brother, is entitled under the will to an annuity of £3000 a year only for a term of twenty-one years, calculated from the death of the testator; and that, during such term of twenty-one years, the entire income of the testator's residuary real and personal estate, after paying his debts and legacies and the annuities given by his will and codicils, is directed to be accumulated. At the end of the twenty-one years the present Baronet, if then living, and if not the person then entitled under the limitations in the will, will succeed to the entire residuary real and personal estate and accumulations.

The turret-ship *Thunderer* completed her official trial, last Saturday, by a six-hours' run, with satisfactory results.

The annual ball given by the members of the Oxford Rifle Volunteer Corps took place in the Corn Exchange, on Thursday week, and passed off with great success.

Mr. William Abbott, of Tokenhouse-yard, has issued a submarine telegraphic map of the world, showing the existing cables and those projected, the land lines working in connection with the submarine ones being also shown. It is accompanied by a sheet of corresponding size, giving an analysis of the various submarine telegraphic companies, with their capital and dividends, and the names of the directors.

COUNTESS SPENCER. BY SIR JOSHUA REYNOLDS.
IN THE SPENCER LOAN COLLECTION, SOUTH KENSINGTON MUSEUM.

to snatch up the sword as an instrument for remedying disasters which may be otherwise ameliorated if not obliterated. There is only one thing certain in connection with a rash appeal to the arbitration of physical force—namely, that both those who offer and those who accept the appeal lay themselves open to grievous calamities. There is a broad truth underlying the maxim pronounced by Divine Authority that "They who take the sword shall perish by the sword." Russian modes of government and principles of policy are little to our taste—still less are those of the Ottoman Empire; but the chastisement of the latter by the former with a view to the improved government of her Christian population might turn out in the end to be a doubtful experiment, yielding no compensation equal to the wholesale misery it would inflict. It is not, therefore, to be assumed that the unanticipated change of attitude in Russia in regard to the present aspects of the Eastern Question is a matter to be deplored. Other and less ruinous means of accomplishing the designs of Europe may yet be discovered.

But should the members of the Conference (which is by no means unlikely) return to the countries they respectively represent, baffled by the deeper subtlety and the unabashed audacity of the Turk, the fact will not say much for the sagacity or the disinterestedness of the Christian Powers, considering the ostentation with which they entered upon their difficult undertaking. The zealous efforts with which they sought unity of counsel and of purpose, and the success with which they came to understand each others' minds, or to fancy they did, will cause the *dénouement*, whichever issue it involves, to be publicly regarded as little short of ridiculous. There needed not such grand machinery merely to give the Turks *carte blanche* for the government of the Ottoman Empire. There needed not that outburst of passionate sentiment on the part of the Slavonic population of the Russian Empire. There needed not all the preliminaries of war nor all the expenses which have hitherto been incurred in preparation for it. Lord Salisbury, we hope and believe, will justify the line which he has pursued throughout these negotiations. It has yet to be seen whether adequate support has been given to him by those from whom he accepted his appointment in carrying on his negotiations from day to day. This, however, is a matter for Parliament to see to, and Parliament will, no doubt, closely examine into the whole affair. How far England has made herself responsible by her representatives for the failure of the Conference at Constantinople will soon be seen, and a trustworthy judgment will probably be arrived at as to the extent to which the mistaken policy of July drew after it, as a necessary sequence, the disabilities which revealed themselves in December and January. The policy which has animated Russia may be less easy to unravel. Prince Gortschakoff seems to have outwitted himself. "Seems," we say, for we would not pronounce the word with confidence. He may have still another string to his bow, and one by the aid of which he will hit his mark. But for the present the world looks upon his diplomacy with no little surprise, and awaits with curiosity such an explanation of it as may be possible for him to give.

THE COURT.

The Queen received at dinner yesterday week, at Windsor Castle, the Earl and Countess of Derby, Lord John Manners, Lieutenant-General Sir T. M. and the Hon. Lady Biddulph, and Major-General H. Ponsonby. Major-General and the Hon. Mrs. Ponsonby also dined with her Majesty the previous day.

On Saturday last the Queen, accompanied by Princess Beatrice, went to London and visited the Duchess of Cambridge at St. James's Palace, where the Duchess of Teck met her Majesty. The Queen travelled by a special train on the Great Western Railway to and from Paddington, returning to Windsor at six o'clock.

Her Majesty and Princess Beatrice attended Divine service on Sunday in the private chapel of the castle. The Rev. Francis Pigou, Vicar of Halifax, officiated. The Dean of Windsor and the Hon. Mrs. Wellesley dined with the Queen.

Princess Christian lunched with her Majesty on Monday. Lady Bagot, the Very Rev. the Dean of Westminster, and Lieutenant-General Sir T. M. Biddulph were included in the Royal dinner party.

Princess Christian visited the Queen on Tuesday. Lady Bagot and the Dean of Westminster left the castle.

Her Majesty and Princess Beatrice have walked and driven out daily.

Lady Waterpark has succeeded Lady Abercromby as Lady in Waiting, and Viscount Hawarden and Colonel the Hon. C. H. Lindsay have succeeded Lord Bagot and Rear-Admiral Sir Edward Commerell as Lord and Groom in Waiting.

The Queen has forwarded a donation of £50 to the funds of the All Saints' Convalescent Hospital at Eastbourne.

THE PRINCE AND PRINCESS OF WALES.

The Prince and Princess of Wales, accompanied by the Duke of Connaught and Strathearn, drove to the meet of the West Norfolk Hounds, on Saturday last, at Gayton Hall, the seat of the Earl of Romney. The Princes joined in the hunt; there were numerous foxes, and an excellent day's sport was obtained.

On Sunday the Prince and Princess, with Princes Albert Victor and George and Princess Louise of Wales and the Duke of Connaught, attended Divine service at St. Mary Magdalene's Church, Sandringham Park. The Rev. W. Lake Oselow and the Rev. Canon C. F. Tarver officiated, the sermon being in aid of the Society for the Propagation of the Gospel in Foreign Parts.

On Monday the Prince and Princess left Sandringham, en route for Kimbolton Castle, on a visit to the Duke and Duchess of Manchester. Their Royal Highnesses travelled from Wolferton, accompanied by the Duke of Connaught, in a state saloon-carriage attached to the midday mail-train to Cambridge, where the Duke took leave of them; and the remainder

of the journey was made in a special train, via St. Ives, to Huntingdon, where they were received by the Duke of Manchester, the Earl of Sandwich, and others; the Mayors of Huntingdon and Godmanchester being presented to the Prince and Princess. The Duke of Manchester's Light Horse formed a guard of honour and an escort, and the Huntingdon and the Cambridge Volunteers were in attendance. Their Royal Highnesses drove from Huntingdon station (where were ranged all the school-children of Godmanchester) to Hinchbrook, where they were entertained, together with a distinguished party, at luncheon by the Earl and Countess of Sandwich, after which the Prince and Princess continued their drive to Kimbolton. Huntingdon was en fête upon the occasion; the town was gaily decorated, the Royal route being spanned by five triumphal arches, and the several bands playing national airs. On Tuesday the Prince and Princess, with their host and hostess and the numerous guests at the castle, drove to the "meet" of the foxhounds in the park; several runs were obtained, and one fox lost his brush. The hunting party returned to luncheon, after which the Prince inspected the Duke of Manchester's farm and his costly herd of shorthorns. On Wednesday his Royal Highness joined the meet of the Fitzwilliam hounds at Catsford Guide Point; foxes were plentiful, and good sport was gained. In the evening a ball was given at the castle by the Duke and Duchess of Manchester in honour of their Royal guests.

The Prince of Wales has sanctioned a donation of £50 from the Duchy of Cornwall, which owns a good deal of land in the neighbourhood of Bath, towards the expenses of the Centenary Exhibition of the Bath and West of England Society next June.

The Duke of Edinburgh was present, on the 4th inst., at a dance given by Rear-Admiral W. G. Luard, at the Admiralty House, Vittoriosa, Malta. The Duchess of Edinburgh had a reception at the Valetta Palace, on Thursday week, which was numerously attended by all classes of the community—English, Maltese, and foreigners. At the christening of the Duke and Duchess's daughter, at Malta, the sponsors were the Queen, the Grand Duchess, Cesarevna, Princess Louis of Hesse, Prince Leopold, and the Grand Duke Alexis of Russia. The Hon. Mrs. Monson represented the Queen, and the other sponsors were represented by the Duke and Duchess of Edinburgh. The robe worn by the infant Princess, Victoria Melita, was the same which was worn at their christenings by all her Majesty's children and grandchildren.

Prince and Princess Christian returned to Cumberland Lodge, on Saturday last, from visiting the Earl and Countess of Dudley at Witley Court.

The Duke of Connaught and Count and Countess Gleichen were present at Drury-lane Theatre on Monday.

The Duke of Cambridge left town, on Monday, on a visit to Colonel Tomline at Orwell Park.

Princess Charlotte and Prince Henry of Prussia, the eldest daughter and the second son of the German Crown Prince and grandchildren of Queen Victoria, will be confirmed at Berlin in Holy Week.

THE SPENCER LOAN COLLECTION, SOUTH KENSINGTON MUSEUM.

This collection of pictures, temporarily placed here for public inspection by the liberality of their owner, Earl Spencer, K.G., possesses a degree of interest not often found even in gatherings much greater in number. High in art merit and rich in historic association, this gallery has long held a conspicuous place among the private collections of this country, especially by its fine examples of portraiture in the long list of its family pictures, from that of the first Lord Spencer (which barony was created in 1602) and Margaret Willoughby, his wife, painted by Mark Gerards, downwards to recent times. It is, however, in that period of the family history, contemporary with Sir Joshua Reynolds, that the finest examples of that master here are found, as seen in the full-length of Lavinia, Countess Spencer, and Son, which work alone, by its charm of unaffected grace, beauty, and power of colour, places Sir Joshua in the first rank of portrait-painters. The Countess, seated with her boy before her, is seen in profile, wearing a "Gainsborough" hat as large as that in the stolen picture of the "Duchess." The playful action of the figure is happily caught, and the lustrous bloom of health rendered with singular brilliance. Also, by the same masterly hand, are two smaller canvases—the one radiant with the archly-beaming face of Ann Bingham, that of Lavinia Bingham fascinating by the charm of its gentle sweetness. Other portraits by Reynolds referring to this family will also justify their high repute, among which occur the full-length of Georgina, Duchess of Devonshire, placed as a *pendant* to Gainsborough's work of the same subject, and Frances, Marchioness of Camden. The Gainsboroughs, though fine in quality, do not equal the Sir Joshuas, the latter, under nearly all circumstances, possessing a degree of force and power to which the former but seldom approach.

The collection contains many other interesting examples of the English School in Hogarth's "View of the Green Park," heads by Dobson, Walker, Angelica Kauffman, and others.

Passing from works immediately interesting by their connection with the lineage of this noble house, are pictures appealing to us by a general interest. Among these are some canvases by Vandyke of inestimable value; and in saying the gallery exhibits the exquisite full-length of the youthful Elizabeth, daughter of Charles I., and the grand portrait-group of George Digby, second Earl of Bristol, and William Russell, Duke of Bedford, is briefly to say it possesses two of the most highly-esteemed works of this master. Most lovely is the fair young face and girlish figure of the unfortunate Princess, whose fate seems presaged in her lineaments, and whose look of sadness and unconscious beauty haunt us as in a dream. In contrast by its fulness of colour and force of effect, surpassing in such respects all else in the collection, is the group just named. Picturesquely attired in black and red heightened by the effects of light and shade, these scions of two noble houses in their highborn air and bearing must have afforded material to the painter after his own heart. He revelled in his subject, and has left in it a monument of his power. From life to death is but a step; and on the other side of the gallery is the ghastly head of George Villiers, Duke of Buckingham, as he lay dead in the "worst inn's worst room;" and this, too, by the pencil of Vandyke, whose facile hand has enriched the collection by several other works. Sir Godfrey Kneller has preserved to us the face and features of Sarah Duchess of Marlborough in the heyday of her power, as he also exhibits her as Sarah Jennings before her elevation to the halls of Blenheim. Valuable as illustrations of individual character are the heads of Montaigne by Lucas de Heere, and Anne of Cleves by Van Orley, the greenness of which latter face would fully justify the epithet applied to her by her Royal partner, the bluff King Hal.

Prominent in the Spencer Collection is the series of artists' portraits painted by themselves, and though only twenty-one in number, it is rarely so many similar works are found in one gallery. Like most men of decided power, their individuality

is strongly marked, and in such of those as Marill, Cyp, Verrio, Paris Bordone, Rembrandt, and Vandyke, we seem to read the characteristics of which biography has informed us. Reynolds, Wilson, Lely, and Antonio More, with others of less note, make up the company. Pictures by the Venetians are not wanting. The elder and younger Cornaro have been portrayed by Tintoretto and Titian respectively, and Paul Veronese is seen to fine effect in the composition of Mary Magdalen washing the Saviour's feet. Rembrandt's magic of light and dark is to be found in his work of the Circumcision, and his portrait of William III. when a boy attests to another phase of his versatility. Sebastian del Piombo's head of Cardinal Pole exhibits the deep tone of the Italian school; while, for the florid magnificence of illumined colour and impetuosity of execution, Rubens's grand sketch of a Jewish Sacrifice distances everything around it.

Our Illustration, selected from the Spencer Loan Collection, is the portrait of the second Countess Spencer, styled in the catalogue "Lavinia, Viscountess Althorp." This lady, a daughter of the first Earl of Lucan, was married, in 1781, to George John, then Viscount Althorp, who succeeded his father, two years later, as the second Earl Spencer. Countess Spencer lived to 1831. Her portrait, as seen in our Engraving, is one of those ancestral pictures by Sir Joshua Reynolds for which that painter has always been famous. In that look of life and being, by which the features seem to hold responsive communication with ourselves, this head is singularly distinguished, the rest of the work exhibiting a charm of colour and dexterity of execution in the treatment of its picturesque costume that has long since assigned it a high place among the works of Reynolds, wherein the subordination of all else to the features is the broad principle of style.

THE IMPERIAL DURBAR AT DELHI.

The Imperial Durbar, or Assembly of the native Princes and nobles of India, on New-Year's Day, for the proclamation of Queen Victoria as Empress of India, has been described in this Journal. It took place on the plain north of Delhi, three or four miles from the present inhabited city, and nearly on the spot where the Prince of Wales sojourned in the camp, a twelvemonth ago, to witness the grand review of the Indian army. This Imperial Durbar was certainly a more imposing assemblage of native magnates, and of the actual rulers of India, than even the Grand Chapter of the Star of India at Calcutta held on the preceding New-Year's Day. It was mentioned, in our former account of the proceedings, that Lord Lytton, the Viceroy of India, presented to each of the native Princes a commemorative medal—gold for greater Princes, silver for those of inferior rank. The medal is the work of Mr. George G. Adams, sculptor and medallist. The obverse gives a very faithful and pleasing portrait, in profile, of her Majesty; while the reverse bears simply the words "Empress of India" in three languages—Persian, English, and Hindee. We understand that Mr. Adams is executing the head of the Queen for the Arctic Expedition medal.

THE JUMNA MUSJID, DELHI.

Among the superb edifices of that Imperial city, where the Queen of Great Britain has recently been proclaimed Empress of India, is the chief mosque, built two centuries ago by the Mogul Emperor, Shah Jehan, to whose dominion her gracious Majesty has fully succeeded. The Jumna Musjid, as this grand building is usually called, stands on the bank of the river Jumna, occupying a platform 450 ft. square, which is paved with red stone, and is raised 30 ft. above the general level of the city. On three sides of this square, in the perfect state of the building, were continuous arcades, with a series of open octagonal pavilions, and with a lofty gateway on each side approached by steps. On the fourth side the mosque itself, presenting a beautiful front of white marble, but with a cornice inlaid with black marble. Its length is 260 ft. At each end rise three domes, of white marble ribbed with black, to the height of 150 ft. The summit commands a wide view of the city and adjacent plain, including the ground chosen for the Viceroy's encampment, and for the Imperial Durbar. In the distance is seen the famous Kootub Minar, a column 240 ft. high, with projecting galleries near the top, serving as a minaret in old times for the vociferous herald of the Moslem faith to cry aloud, "There is but one Allah, and Mohammed is the Prophet of Allah!"

THE LATE SIR TITUS SALT, BART.

The death of this eminent manufacturer and local benefactor of the West Riding has been noticed with appropriate testimonies of respect for his great works of public usefulness. It is a suitable opportunity for us to give an illustration of the monument which was erected in honour of him, two or three years ago, in the flourishing commercial town of Bradford. Mr. Adams-Aiton is the sculptor by whom the statue was designed and executed, and it is generally approved as a faithful and characteristic likeness of Sir Titus Salt. The architectural canopy or shrine was erected by Messrs. Lockwood and Mawson. Our readers are probably aware that the magnificent industrial colony of "Saltaire"—a complete model town for a large working-class population attached to the alpaca and worsted or mixed factory—is situated near Bradford, on the banks of the Aire. Here the liberal proprietor erected above 800 comfortable dwelling-houses, a Congregational and a Wesleyan church, several schools, lecture-halls, clubs and institutes, baths and washhouses, hospitals, infirmaries, and almshouses, and laid out a park for the recreation of his workpeople. Sir Titus Salt likewise conferred upon the town of Bradford, which he once represented in Parliament, some direct benefits of considerable amount, by his donations to the Fever Hospital, Peel Park, and other institutions, as well as by his personal services in the borough Corporation. Besides the open-air monument shown in our Illustration, there is a marble bust of Sir Titus Salt, upon a pillar and pedestal, in St. George's Hall at Bradford. It is the work of Mr. T. Milnes, and was presented to the town by the workpeople at Saltaire.

Mr. Joseph Whitwell Pease, M.P., on behalf of his partners, owners of the Middlesbrough estate, presented, on Monday, to the town the Middlesbrough High School—a building which, together with the land upon which it is erected, is equivalent to a total gift of £25,000. About six years ago, chiefly through the instrumentality of Mr. Thomas Hugh Bell, the High School was founded in a modest and unpretending way—a dwelling house having been converted into suitable premises for the purpose. An effort was made by different gentlemen to widen the operations of the High School. The ex-Mayor, Mr. John Dunning, brought the matter under the notice of Mr. Joseph Whitwell Pease, M.P., and that gentleman agreed not only to give a site, but to erect the main portion of the new building, which is situate at the top of the Albert-road, Middlesbrough. Mr. Pease communicated with Mr. Waterhouse, architect, London, and the work was quickly completed.

THE DELHI CLOCK TOWER.

The municipality of Delhi has, of late years, effected great improvements in that city, where Queen Victoria was proclaimed Empress of India on New-Year's Day. The streets and roads are now, perhaps, the cleanest and best drained and repaired of any native city in India. Handsome English lamps, with cast-iron posts, have lately been introduced in all the streets. A fine Townhall, with a ball-room, museum, library, and splendid durbar hall, measuring eighty feet in length by forty feet in width and height, has been erected, in a commanding site, between the Queen's-gardens and the Chandnee Chowk. Trees have been planted along the sides of the roads; large and handsome tanks have been built; and almost everything has been done that taste or intelligence could suggest for the proper conservancy of this fine old "City of the Great Moguls." A great improvement is the new clock tower, erected in the centre of the street called Chandnee

MONUMENT IN HONOUR OF THE LATE SIR TITUS SALT, AT BRADFORD.

MEDAL TO COMMEMORATE THE PROCLAMATION OF THE QUEEN AS EMPRESS OF INDIA.

Chowk, opposite the Townhall. This building stands 115 feet in height above the roadway, exclusive of the handsome gilt vane. Its materials are brick, red and yellow sandstone, and white marble. The stone dressings and carving are beautifully executed, from the designs and models of the architect. The capitals surmounting the main corner pillars measure four feet three inches wide and four feet six inches deep; they are carved out of solid blocks of white sandstone, and each cap weighs over two tons. The dials are sufficiently elevated to be distinctly visible from the stations of the East Indian and Punjab railways, and from other parts of the city. The building was completed in about eighteen months, at a cost, including clock and bells, of about 30,000 rupees (£3000), the whole of which sum was furnished by the Municipal Commissioners. The tower was designed and built under the superintendence of Mr. Edward Martin, Executive Engineer Rajpootana (State) Railway; the clock and bells were supplied by Mr. Benson, of Ludgate-hill, London.

THE FLOODS: ETON COLLEGE, FROM THE DATCHET ROAD.

THE CONFERENCE AT CONSTANTINOPLE.

Up to the time of preparing this number of our Journal the fate of the proposals unanimously agreed upon by the Great Powers of Europe, and formally submitted to the Turkish Government, was still uncertain. They were to be considered, on Thursday, by a Grand Council of the Empire, which Midhat Pasha had convened for this occasion. The Council was expected to number as many as 200 members, and it would include, besides all the principal State functionaries, the Greek and Armenian Patriarchs, and the heads of the Roman Catholic, Bulgarian, and Jewish religious communities. It was believed at Constantinople that the final proposals would be rejected, and in view of this the Plenipotentiaries and Ambassadors are making preparations for their departure. The Sultan has given an audience to the Persian Minister, and expressed his wish to cultivate the most friendly relations with Persia. The Turkish armaments continue on an extensive scale, and contracts have been concluded by the Minister of War with some Belgian firms for the supply of a large quantity of arms and ammunition. One of our Special Artist's Sketches is that showing the appearance, in the streets of Constantinople, of a number of recruits, just arrived by sea from Salonica, to be armed and drilled for military service. Another scene at Constantinople is the purchasing of sheep to be sacrificed at the Mohammedan religious festival of the Koorban Bairam, upon which occasion a great political demonstration was expected in support of the Turkish rule over the Christian populations. It is the custom of the richer class of Moslem, after slaughtering the sheep bought for this festival, to give the meat to the poor, as no order of priests in their religion claim it for themselves. The sittings of the Conference were expected to terminate on this present Saturday. They have been held, as we stated before, in the official mansion of the Turkish Minister of Marine, which we should call the Admiralty, adjoining the naval arsenal at Pera. We present a near view of that building, sketched by our own Artist from the old Turkish cemetery on the steep bank of the Golden Horn, below the residence of the British Embassy and the hotel occupied by Lord Salisbury, as described in a former notice. Stamboul, the Turkish city, is seen on the opposite bank of the Golden Horn. A singular incident of the past week is yet to be mentioned; this is the arrival of a deputation of Hungarian students from Pesth, at the instigation of General Klapka, and with the approval of Kossuth, to present a complimentary address and sword of honour to Abdul Kerim Pasha. He is the Turkish Commander-in-Chief in the war against Servia. Those in England who sympathised with Hungary in the conflict for her own liberties, a quarter of a century ago, may now feel disposed to ask whether the Magyars, after all, are deserving of their sympathy as friends of freedom.

FOREIGN AND COLONIAL NEWS.

FRANCE.

(From our Correspondent in Paris.)

Thursday, Jan. 18.

The week has been an uneventful one so far as the Versailles Legislature is concerned; but, in default of exciting Parliamentary incidents, the Parisians have been entertained with a grand *balmassé* at the Opéra, and a Bonapartist demonstration at the Church of St. Augustin. The ball given on Saturday night was a brilliant success, the famous waltzes of Johann Strauss, who conducted in person, being greatly applauded, spite of a foolish conspiracy (which the press has deservedly censured in severe language) to assert the superiority of French over German dance music. From a pecuniary point of view the fête yielded most satisfactory results, there being no fewer than 6000 entrées, and the receipts exceeding £3500.

It was on Monday morning that the Bonapartists made their customary annual demonstration at the Church of St. Augustin, where mass was said for the repose of the soul of the Emperor Napoleon III. The heroes of the manifestation were M. Paul de Cassagnac, whom the crowd familiarly greeted with shouts of "Vive M. Paul!"—a flower-girl, moreover, deliberately kissing him in a sudden outburst of enthusiasm—and a so-called delegate of the working-classes, who carried a gigantic crown of immortelles, bearing the inscription "To the memory of the Emperor, from the workmen of Paris." When the ceremony was over there were loud shouts of "Vive la France!" "Vive Cassagnac!" besides one or two isolated cries of "Down with the Republic!" Altogether, there were certainly not more than five or six hundred people present.

Besides this demonstration, which, spite of the pompous manner in which had been announced, proved a most insignificant affair, one has also to thank the Bonapartists for the only lively debate we have had in the Chamber this week. They thought proper the other afternoon to provoke the Minister of Justice apropos of the dismissal of the Advocate-General of the Appeal Court at Besançon—who was recently revoked of his functions by M. Martel for having publicly sung the praises of the notorious mixed commissions which succeeded Louis Napoleon's coup d'état and summarily dealt with the lives and liberties of some 40,000 citizens. M. Martel defended his line of conduct in a vigorous speech reflecting upon the mixed commissions as having been a disgrace to France, and the Chamber formally expressed its approval of the Ministerial utterances by voting a favourable order of the day by an overwhelming majority. M. Paul de Cassagnac intervened in the discussion on behalf of the Imperialists, when his language was so violent that he only narrowly escaped the formal censure of the House. M. Martel's speech naturally met with the warm approval of the Republican press, which had long been calling for some satisfaction of this kind; but the Minister now finds himself in a somewhat difficult situation, the matter in which the Advocate-General of Besançon was implicated having come before the Cour de Cassation, whose president, M. Devienne, happens to have been a member of these same mixed commissions.

Another literary celebrity has passed away this week in the person of M. Buloz, the founder and editor of the well-known *Revue des Deux Mondes*, to which during the last fifty years so many French writers of genius have contributed. M. Buloz, who was of obscure parentage, and began life as a boy in a printing-office, was only possessed of limited literary attainments, though he eventually arrogated to himself the editorial privilege of mutilating the "copy" of such writers as George Sand, Michelet, Guizot, Lamennais, and Henri Heine. His appearance and manners were far from prepossessing, and with his contributors he was almost invariably harsh and unpleasant. He had a certain fund of natural wit at command, and the papers abound in anecdotes respecting him. Although all his life a freethinker, he was buried on Monday with unusual pomp, according to the rites of the Roman Catholic Church, the ceremony being attended by a large number of literary celebrities.

The newspapers also announce the death of Madame Sarah Felix, the sister of the celebrated tragédienne Rachel, and herself at one time an actress of considerable ability.

ITALY.

In the Chamber of Deputies, on Wednesday, a bill was

introduced providing means for putting an end to abuses committed by the clergy in the exercise of their Ministry. Rear-Admiral di Saint Bon, Minister of Marine in the late Cabinet, has been returned to the Chamber of Deputies by the electoral colleges of Bozzolo and Castelfranco.

On Sunday the Pope received a deputation of ex-Pontifical functionaries, one of whom read an extremely violent address against the Italian Government. His Holiness, in reply, censured the measures contemplated by the Italian Cabinet with regard to the Church.

The Faculty of Law at Perugia has voted unanimously the abolition of capital punishment.

Two of the brigands who recently robbed the diligence between Palermo and Sciacca have been killed by the troops.

SPAIN.

At a Council of Ministers held, on Tuesday, under the presidency of the King, it was decided that the Ministry for Foreign Affairs should be intrusted to Señor Manuel Silveira, the Ministry of Justice to Señor Calderon Cofantes, and that of the Colonies to Señor Martin Herrera.

The Burmese Envoys have been received with much state by the King.

A children's hospital has been opened at Madrid. It is on the English model, and is the first established in Spain.

BELGIUM.

In Tuesday's sittings of the Chamber of Representatives, a bill was introduced and read by M. Malou, Minister of Finance, for preventing bribery and corruption in elections.

GERMANY.

The Emperor William has been created an honorary member of the Imperial Academy of Science of St. Petersburg, and has accepted the distinction.

Princess Charles of Prussia, sister of the Empress of Germany and mother of Prince Frederick Charles, died at Berlin on Thursday morning.

The Prussian Diet was opened, on the 12th inst., by the King in person. His Majesty, in the speech from the throne, said nothing whatever about European affairs. He expressed his hope that the endeavours of the Government to supply the wants of the country would meet with firm support in the Diet; and added that the public revenue for 1877, estimated on the whole to equal that of last year, offered the means of satisfying any new and permanent requirements of the State. The King then returned thanks for the proofs of affection and fidelity which he had received from his people on the celebration of his seventy years' military jubilee, and said that he regarded the sentiments then manifested towards him as a sure guarantee that Prussia would continue to fulfil her political mission in the German empire by faithfully carrying out truly monarchical and at the same time liberal institutions. On Monday the Lower House elected its presidents and constituted its bureau. Herr von Bennigsen was chosen President by 351 out of 367 valid votes recorded. Herr Klotz was elected first and Count Bethusy-Huc second Vice-President, the former by 211 out of 366, and the latter by 223 out of 307 votes. The Budget was presented to the Chamber, on Tuesday, by Herr Camphausen, the Minister of Finance. The Minister, in his speech, dwelt upon the difficult conditions of last year, and said that the fact of there being no deficit ought to be considered satisfactory. The receipts of the Treasury in 1876 showed a reduction of 3,000,000 marks; on the other hand, the administration of the forests showed a surplus of 3,000,000 marks over the estimates. The receipts from the direct taxes were in excess of, and those of the indirect taxes below, the estimates. The receipts for 1877-8 are estimated at 651,413,934 marks, being 15,466 marks less than last year. The ordinary expenditure is set down at 631,075,487 marks, being an increase of 11,915,369 upon last year. The extraordinary expenditure is estimated at 20,368,338, being 11,938,135 marks less than those for the preceding year.

The *North German Gazette* states that the German war-corvette Vineta has been ordered by telegraph to leave Yokohama and take up her station at Manila, in order to give the protection of the Imperial flag to the German commercial interests in those waters.

A despatch received by the African Society of Berlin announces that the African explorer, Dr. Pogge, who is on his way home, has succeeded in discovering the long-sought kingdom of Muata Yamvo, in Central Africa. Dr. Pogge is expected at Berlin very shortly.

RUSSIA.

The Emperor has written to the Commander-in-Chief and all those who have recently been engaged in the mobilisation and concentration of the Russian troops in Europe and the Caucasus thanking them for their successful exertions.

The Budget for 1877 shows the public revenue for the past year to have amounted to 570,778,000 roubles, and the expenditure to 568,770,000 roubles. In the estimates for the present year the revenue from the sugar duty is calculated to yield 1,000,000 roubles, and the revenue from the Post Office and telegraphs 2,000,000 roubles more than 1876. The Customs duties, however, are estimated to produce 3,000,000 roubles less than last year. The ordinary expenditure for 1877 shows an increase of 3,500,000 roubles.

DENMARK.

M. Brix, the Socialist leader, has been found guilty of political misdemeanour by the criminal court at Copenhagen and sentenced to four years' penal servitude.

SWEDEN AND NORWAY.

The Swedish Rigsdag was opened, on Wednesday, with a Speech from the Throne, in which it was announced that a bill will be introduced for the extension of military manœuvres, which is to form the basis of the intended new army organisation. Other bills are announced for reducing the land tax, for providing grants for the fleet, and for protecting literary copyright. The First Chamber has elected Count Hamilton president; the other members of the bureau have been re-elected. Mr. Crowe, the British Consul-General in Norway, died suddenly on the 10th inst.

Great damage was done, on Monday afternoon, by a fire which occurred at the principal theatre in Christiania. The larger portion of the building and a considerable quantity of theatrical property were destroyed.

AMERICA.

The Select Committee of the Senate and the House of Representatives, appointed to devise means for the proper count of the votes for President and Vice-President, has agreed to submit the question to the decision of a tribunal composed of members of the Supreme Court, the Senate, and the House of Representatives. Only two members dissent from this resolution. The Committee is very hopeful that the country will be satisfied with the result of its labours. A resolution has been passed by the House of Representatives declaring that all attempts to excite or prejudice public opinion on the subject of the Presidential election before the question has been constitutionally decided are unwise, unpatriotic, and dangerous. On Wednesday directions were given by the House of Representatives to its Serjeant-at-Arms to arrest the members of the Louisiana Returning Board and to

bring them to the bar of the House for refusing to produce certain papers before the Committee appointed by the House to investigate matters connected with the recent elections in the Southern States. The rival State Governments which have been organised at New Orleans carry on their domestic warfare with considerable method and patience. Mr. Nicholls, the Democratic Governor of Louisiana, having taken forcible possession of all the public buildings in New Orleans, the State House alone excepted, Mr. Packard, the rival Republican Governor, maintains himself in the State House. On the Republican side there are the negro militiamen; the white militia is, of course, Democratic. The metropolitan policemen, after giving ineffectual support to Mr. Packard, have thought it prudent to disappear from the streets of the city. The demonstrations which have taken place from the Republican to the Democratic Legislature seem to indicate in Louisiana, as they did in South Carolina, a feeling that the Democrats have really the popular voice on their side. In answer to Mr. Packard's demand for the assistance of the Federal troops in order to expel the Democrats from the Court House at New Orleans, President Grant has telegraphed to the Federal Commandant that the troops should only intervene to prevent a breach of the peace.

Mr. Ferry, the President of the Senate and Vice-President of the Republic, has been re-elected senator.

The engineers who have made a detailed examination of the mouth of the Mississippi officially report that the channel is twenty feet deep and two hundred feet wide throughout the South Pass.

The United States Consul in the Samoan Islands has arrived at San Francisco. He is commissioned, it is stated, by the native Government to make a treaty with the United States with a view to recognition of the Samoan Government by America and the cultivation of closer relations.

INDIA.

The Viceroy went from Delhi to Puttiala, where he installed the young Maharajah in the presence of the Rajahs of Jheend and Nabha and the Regency Council. From Puttiala Lord Lytton went to Allyghur, where he laid the foundation of an Anglo-Mohammedan college. After visiting Agra he arrived at Calcutta, accompanied by Lady Lytton and his family, on Saturday last.

The famine in the Madras and Bombay Presidencies is assuming a very serious aspect. The Government of India has forwarded a despatch to Lord Salisbury, in which the cost to the State on account of relief works and other measures for mitigating the effects of the famine is estimated at \$5,500,000.

Lord Carnarvon, acting in Lord Salisbury's absence as Secretary of State for India, has addressed a despatch to the Governor-General on the subject of the famine in Western and Southern India. Lord Carnarvon says he gathers from the information he has received that the famine will increase in intensity until the month of April, and from that date gradually diminish. It is estimated that the largest number of people to be provided for at one time in Bombay will be a million. In Madras, there are 134,000 persons employed on relief works; but the calculation of the number which will be reached in that Presidency in April has not yet arrived at the India Office. Referring to the relief operations, his Lordship says that the Governments of Bombay and Madras do not appear to entertain any apprehension of an inability to carry the necessary supplies to the affected localities, but he cannot regard without uneasiness the consequences of imperfect communications in districts which cover so wide an area, and some of which lie at so great a distance from the lines of railway. He desires to be furnished regularly, week by week, with a telegraphic summary of the leading facts as they arise in each Presidency, and with special narratives by mail of the progress of the famine, and of the proceedings of the two Governments under his Excellency's directions.

By public auction, on Monday, the Berne-Lucerne Railway was acquired by the canton of Berne for 8,475,000*l*.

Direct telegraphic communication from England to Portugal, Spain, Gibraltar, Madeira, and Brazil has been restored by the repair of the cable between Falmouth and Lisbon.

Intelligence from Matamoros says it is reported that the army of Iglesias was defeated on the 3rd inst., and has surrendered in Guanajuato to the forces under Porfirio Diaz. Iglesias asked permission to retire into private life.

Brazil, the Dutch and Spanish colonies, some British colonies, and Ceylon have joined the International Postal Union; and the Portuguese colonies, Hong-Kong, Japan, and the Argentine Republic have signified their wish to enter it.

From Carthage a confirmation has been received of the news that the Dutch Consul and other persons had been assassinated in the public streets. The perpetrators are not known, and the events are said to have no political significance.

Health on the Gold Coast, according to the latest intelligence, was good. The position of affairs remained unchanged at Whydah. Rumours, however, were current of the King having consented to pay the fine imposed by Commodore Hewett and reopen trade.

Consul Kirk has forwarded to Lord Derby a letter from the Sultan of Zanzibar expressing his desire to encourage and render every assistance to the movement recently set on foot by the Geographical Conference at Brussels for opening up the interior of Africa.

Messrs. W. H. Allen and Co. have now ready for publication a new Indian Army and Civil Service List, which embraces, in about 600 octavo pages, every department of the public service in India, including, of course, the British troops quartered in Indian stations.

The Chinese Ambassador to England, with his suite, landed on Tuesday at Gibraltar, and were received by Lord Napier of Magdala, the Governor and Commander-in-Chief. After the reception the Ambassador and the members of the Embassy drove round the rock and visited the galleries.

Owing to the appearance of cattle plague in animals exported from Hamburg, an Order in Council has been issued placing sheep and goats imported from Germany under the same restrictions as now apply to cattle. The effect of this order will be that all animals from Germany will be slaughtered at the place of landing.

The Cape Town *Standard and Mail* records a prompt rescue of a seaman from drowning. During the voyage of the Union Royal Mail Company's steam-ship Roman, on Nov. 15, a strong gale was blowing from the westward, with a heavy sea running, when one of the ordinary seamen fell overboard from the bridge, where he had been fastening the awning. Mr. Pybus, second officer, who was on the poop taking sights at the time, put down his sextant and threw a life-buoy within a few feet of the man, who got hold of it. A boat was lowered (by Clifford's patent lowering apparatus) and the man picked up and taken on board, and within fifteen minutes from the time of the accident the Roman was on her way again.

THE CHURCH.

The Rev. John Richardson Selwyn, M.A., a son of the Bishop of Lichfield, has been appointed Bishop of Melanesia, which comprises the islands of the South Pacific. Mr. Selwyn has been in charge of the mission since the murder of Bishop Patteson, in 1871; and it is understood that he would have received the appointment to the bishopric earlier but for his age, which is only thirty-two. It is expected that he will be consecrated in New Zealand.

The usual monthly meeting of the Incorporated Church Building Society was held on Monday, at the society's house, 7, Whitehall, S.W.—Archdeacon Harrison in the chair. Grants of money were made in aid of the following objects—viz., building new churches at Llwynypia, near Pontypridd, Glamorgan, and Solva, in the parish of Whitchurch, Pembroke; rebuilding the churches at Brighton, St. Mary, Sussex, and Littleton-on-Severn, near Bristol; enlarging or otherwise improving the accommodation in the churches at Combyne, near Lyme Regis, Devon, North Chapel, near Petworth, Sussex, and South Normanton, near Alfreton, Derby. Grants were also made from the Special School-Church and Mission-House Fund towards building school or mission churches at Gorsley, near Newent, Gloucester, and East Kirkby, near Mansfield, Notts. The Mission-Church Fund is again exhausted. Many outstanding applications remain; and it will depend entirely upon the offerings made by Church people whether these applications can be met or must be refused.

At the Arches Court, last Saturday, Dr. Stephens applied that the Rev. Arthur Tooth, Vicar of St. James's, Hatcham, should be pronounced guilty of contempt of Court for having, in disobedience to an inhibition of that Court, exercised the cure of souls in his church on Dec. 24 and 31, and also for having published in St. James's Church a libel upon the Court and its authority. Lord Penzance, the Dean, said he had no hesitation in applying the powers provided by the statute of the 53rd George III., cap. 127, and pronounce Mr. Tooth to be contumacious and in contempt. His Lordship directed that the same should be signified to the Queen in Chancery, with a view to his imprisonment, and Mr. Tooth was ordered to pay the costs. Notwithstanding the judgment of the Court of Arches, three services were held at St. James's, Hatcham, on Sunday. They took place early in the morning, before the Bishop's notice closing the church had been posted on the doors.—A correspondence is published in which the Bishop of Lincoln sets forth at length reasons why the decisions of the Court of Arches should be respected and obeyed.—A special general meeting of the members of the English Church Union was held at Freemasons' Hall, on Tuesday, to consider the questions in dispute with reference to St. James's Church, Hatcham. The discussion, however, took a general turn upon the relations of the Church to the State, and recent decisions of the Privy Council and Lord Penzance were warmly condemned. Resolutions were passed protesting against the encroachments of the State on the liberties of the Church.

THE UNIVERSITIES AND PUBLIC SCHOOLS.

OXFORD.

The opening of the new hall of Balliol College was celebrated, on Tuesday night, by a banquet, at which about 250 past and present senior members of the society were present. "Floreat domus de Balliolo" was responded to by the Master; "The Visitors," by the Bishop of London; "The Houses of Parliament," by Lord Cardwell and Mr. Cave; "The Clergy," by the Archbishop of Canterbury; "The University," by the Vice-Chancellor; "The Bar," by Mr. Osborne Morgan, M.P.; "The Civil Service," by Mr. R. W. Lingen, C.B.; and "Literature and Science," by Mr. Matthew Arnold.

CAMBRIDGE.

The undermentioned have been declared entitled to Mathematical honours; the list in order of merit will be published on the 26th inst.:

Arnold, Pembroke; Atkinson, Clare; Bagshaw, John's; Barry, Catharine's; Bassett, Trinity; Bayman, Trinity Hall; Bell, John's; Benwell, Trinity; Berkeley, King's; Blackburn, Trinity; Boissier, Queen's; Bothamley, Corpus; Bowyer, Queens'; F. L. Brereton, Corpus; Carr, Trinity; Catty, Christ's; Clark, Christ's; Clayton, Emmanuel; Coates, Trinity; Cobbold, Sidney; Colles, Emmanuel; Dauckwerts, Pembroke; Dixon, Christ's; Doherty, John's; Eustace, John's; Foa, Trinity Hall; Fuller, Emmanuel; Gibbons, Caius; Gilliland, Queens'; Grant, Christ's; Greaves, Christ's; Hadden, Trinity; Hancock, Queens'; Hatfield, John's; Hawthorne, King's; Heath, John's; Hicks, Trinity; Hickson, Trinity; Highmore, Corpus; Hinxman, Christ's; Hodson, Trinity Hall; Hogben, Catharine's; Hopkins, Trinity; Horton, Trinity Hall; Javrin, Clare; Jones, Jesus; Jones, John's; Kearney, Corpus; Kikuchi, John's; Knight, Trinity; Lawrence, Trinity; Lee, Pembroke; Lewis, Trinity; Lyon, Emmanuel; McAlister, John's; Macmichael, Trinity; Marwood, John's; B. A. Miller, Trinity; Mills, Clare; Milton, Caius; Monro, Queens'; Murtion, John's; Newbury, Peterhouse; Noakes, Christ's; Norman, Downing; Nodley, Sidney; Parsons, John's; Pendlebury, John's; Perceval, Corpus; Perry, Catharine's; Pryse, Trinity; Rentoul, Downing; Ridley, John's; Robinson, John's; Rose, Trinity; Rome, Trinity; Rowles, Catharine's; Salmon, Jesus; Sharratt, Emmanuel; Sharrock, Jesus; Sheriff, Emmanuel; A. P. Smith, Trinity; J. P. Smith, Trinity; Soe, Jesus; Stevens, Peter's; Swainson, Trinity; Tait, John's; Vinter, Sidney; Walters, Queens'; Williams, Pembroke; Wilson, John's; Wilson, Sidney; Woolley, Corpus; Wood, Christ's. Agrotat.—Ballfour, Trinity, allowed the ordinary degree; Chambers, Pembroke; Mason, Jesus; Miller, Pembroke; Ruck, Christ's; Vaughan, Peter's. Excused the general examination—Fenn, Trinity; Morris, Pembroke.

The examiners for the Law Tripos have issued the following class list:

Class I.—Bond, Trinity Hall; Mews, Trinity, and Thorneley, Trinity Hall, equal; Corbett, Trinity. Class II.—Thompson, Christ's; Keating, Trinity; Moon, Trinity; Heath, Trinity; De Stewart, John's; Atkinson, Caius; Frankau, Caius, and Turner, Trinity, equal; Hellmuth, Trinity, and De Marriott, Trinity, equal; Hanson, John's; Martin, Trinity Hall, and Morton, Trinity Hall, equal; Upward, John's; Langham, Trinity Hall; Phippen, Clare; Chamberlain, Emmanuel; Booth, Trinity; Tayleur, Trinity; Gurner, Jesus; Peabody, Trinity. Class III.—Brandon, Trinity Hall; Wise, Trinity; Holland, Trinity Hall; Adam, John's, and Howard, Trinity, equal; Gray, Trinity; Harrison, Trinity; Thomas, Trinity; Walker, Trinity; Beckingsale, Christ Church. The following candidates not deemed worthy of honours have been allowed an ordinary degree:—Curry, St. John's; Goodridge, St. John's; Macpherson, Trinity; and Solly, Trinity. Messrs. Faulkner, Trinity Hall; Noble, Trinity; and Travis, Emmanuel, have satisfied the examiners so as to be excused the general examination for the ordinary degree.

At a meeting of Convocation of the University of London, held on Tuesday evening, at the University building, Burlington-gardens, a resolution for the appointment of a special committee to consider what changes were desirable in the constitution of the University was defeated by fifty-seven to fifteen. A resolution requesting the annual committee to report upon the best means of carrying into effect the desire of Convocation that the degrees of the University should be open to women was carried, after a long discussion, by twenty-two to sixteen.

Lord Coleridge took the chair, on Wednesday evening, at the annual dinner of the evening department of King's College. In the course of his address, he called attention to the history of the institution, which he pronounced a success, and expressed an earnest hope and belief that this would continue. His Lordship heartily recognised and thoroughly admired the practical effects of such a system of education as that carried out in King's College.

The Charity Commissioners have recently issued a scheme for the administration of the Tonbridge Grammar School, which was established under the will of Sir Andrew Judd, made in 1558.

METROPOLITAN NEWS.

Dr. Herbert Watney has been elected assistant physician at St. George's Hospital.

A successful trial was made, on Tuesday, of the landing-stage, pentoon, and boats of the steam-ferry which is to cross the Thames between Wapping and Rotherhithe.

The discourse at the Royal Institution, next Friday evening, the 26th inst., will be given by Sir John Lubbock, Bart., M.P., F.R.S. (on Ants), instead of by Professor Huxley, as previously announced.

The annual benefit of Mr. Frederick Burgess, of the Moore and Burgess Minstrels, is announced for Tuesday next, at St. James's Great Hall. There will be performances in the afternoon and evening, and many artistes of note will appear.

At the weekly meeting of the London School Board the committee on incorrigible truants presented a report embodying a scheme for dealing with that class of children, and, after the discussion, it was resolved to send a letter to the Home Secretary in accordance with the committee's recommendation.

An exhibition and bazaar in aid of the Orphan Working School and the Alexandra Orphanage is announced to be held at the Crystal Palace next Monday, consisting of all kinds of fancy work, scrap albums, collections of wild flowers and seaweeds, made by children under the age of fifteen.

We learn from the *City Press* that the Cooks' Company have completed arrangements with the National Training-School of Cookery by which twelve girls of the City Ward Schools (from which a special class has been formed) will have an elementary education in simple cooking and general domestic economy.

The Victoria (Philosophical) Institute held a meeting on Monday evening—the Rev. R. Thornton, D.D., in the chair. Several new members were elected, and it was announced that 107 had joined during the past year. A paper on Christianity Considered as a Moral Power was read by Professor Lias, of St. David's College, Lampeter. A discussion ensued.

Handel's oratorio "Solomon" will be performed at Exeter Hall, next Friday, by the Sacred Harmonic Society, under the direction of Sir Michael Costa. This work—one of Handel's latest compositions—contains some of his finest airs and choruses. Madame Edith Wynne, Miss Julia Wigan, Madame Patey, Mr. H. Guy, and Mr. Maybrick are the principal vocalists.

Captain Shaw's annual report on metropolitan fires, which shows an increase of forty-two on the average of the last ten years, contains the names of firemen who are commended for special merit in saving life during the year. They are—William Dowell, eight lives; William Rhymes, six lives; Stephen Holden, three lives; William W. Dumdell, three lives; G. Blandford, two lives; and F. M'Nutt, one life.

The British and Foreign Sailors' Society has recently received the following contributions from corporations in the city of London:—The Fishmongers' Company, £52 10s.; the Drapers' Company, £21; the Clothworkers' Company (annual subscription), £10 10s.; the Skinners' Company, £10 10s.; the Trinity Board, £10 10s.; the London Dock Company, £10 10s.; the P. and O. Company, £10; and the London Assurance Corporation, £10.

The weekly return of metropolitan pauperism shows that the total number of paupers last week (the second of January) was 83,738, of whom 38,796 were in workhouses and 44,942 received outdoor relief. Compared with the corresponding weeks in the years 1876, 1875, and 1874, these figures show a decrease of 3675, 15,799, and 21,792 respectively. The number of vagrants relieved on the last day of the week was 681, of whom 489 were men, 158 women, and 34 children under sixteen.

Further discussion took place, on Wednesday, at a meeting of the St. George's guardians, respecting the high mortality amongst children in the Carlisle-place Convent. A resolution was passed expressing the deepest regret of the guardians at the large number of deaths, and censuring the managers for having continued to receive fresh inmates in the face of such mortality. A motion was also carried that, in the opinion of the board, all institutions which undertake the complete maintenance of infant children belonging to the poor should be placed under Government supervision.

Parliament-square, which has already furnished sites for the public monuments of Lords Derby and Palmerston, has recently received an addition in a bronzed statue of the late Sir Robert Peel. The figure of the great statesman is placed on a plain granite pedestal, and represents him as he was wont to appear in the House. The likeness is said to be excellent. It is stated that it is contemplated to erect other monuments of departed statesmen in Parliament-square. Those of Lords Derby and Palmerston face Palace-yard; the present addition is on the north side of the square.

The Postmaster-General has issued notice that, on and after Feb. 1 next, telegrams for banks, counting-houses, offices, and other places of business in the city of London which may arrive on Sundays, and after eight p.m. on week days, will not be delivered until the following morning, unless a request be made, in writing, by the addressers that such telegrams may be delivered immediately on their arrival. The department hopes by this means, without causing inconvenience to the public, to put a stop to the loss or delay of business telegrams which not unfrequently occurs through their being overlooked or mislaid after delivery at places of business which are closed.

The Council of the National Rifle Association have, in view of the next Wimbledon meeting, made some alterations in the targets and reductions in the sizes of the bull's-eyes. There will be rectangular instead of circular "outers." The many "highest possible scores" obtained at 200 yards during the past two years rendered it imperative to reduce the bull's-eye for that distance, while the few made at 500 and 600 has induced the council to adopt the Government "bull" for those distances. The term "centre" is to be dropped for Wimbledon, and the portions into which it is to be cut are to be called "inner" and "magpie" respectively.

The Mansion House Inundations' Relief Fund amounts to nearly £8000.—The Home Secretary received a deputation from the Commissioners of Sewers of the City, on Tuesday, who laid before that right hon. gentleman a scheme, under the Artisans and Labourers' Dwellings Act, embracing thickly-populated areas in the vicinity of Fetter-lane, St. Luke's, and what used to be known as Petticoat-lane, the total estimated cost of which was £284,000. Mr. Cross, in reply to the representations of the deputation, said he did not think there was a single corner in the schemes of the City or of the Metropolitan Board of Works that he had not visited, and he should immediately place the scheme now submitted to him in proper hands to be inquired into.

At the meeting of the Metropolitan Board of Works, yesterday week, a deputation from Fulham, consisting of owners of property and occupiers of premises, who had suffered severely from the effects of the recent floods, was introduced. They presented a memorial earnestly intreating the board to render

immediate aid, with a view to the effectual resisting of any further inundations on the occurrence of the high tides with which they were threatened by scientific authorities in the course of next week. The memorial was referred to the Works Committee. A similar course was adopted with regard to one from Limehouse.—A conference of local authorities representing the districts in the Thames valley that have suffered greatly during the late inundations was held at the City Terminus Hotel, on Wednesday. The meeting blamed the Thames Conservancy Board for want of proper management, objected to the constitution of that board, and formed an association to be called "The Thames Valley Floods Prevention Association."

A quarterly court of the Governors of the Seamen's Hospital (Dreadnought), Greenwich, was held yesterday week—Mr. Joseph Moore in the chair. It was reported that 501 seamen had been admitted as in-patients to the hospital during the past quarter from British and foreign ships, of which number 140 came from London, 36 from Liverpool, 28 from Glasgow, 14 from North and South Shields, 15 from Hull, and 268 from thirty-four other ports in Great Britain and Ireland. The secretary regretted to have to report that the balance-sheet for the year ending Dec. 31, 1876, showed a deficiency of £1539 6s., being upwards of £400 in excess of last year's deficiency. Not a single legacy of any importance had been left to this society since the Dreadnought was broken up and the hospital removed on shore. The average amount received every year in legacies before the society left the old ship was £2180, but during the last six years the average receipts from this source only reach £700 per annum. The Duke of Northumberland will preside at the annual meeting, on Feb. 7.

A WEEK'S BIRTHS AND DEATHS.

Last week 2516 births and 1358 deaths were registered in London. Allowing for increase of population, the births were 26, and the deaths 397, below the average numbers in the corresponding week of the last ten years. The deaths included 100 from smallpox, 24 from measles, 23 from scarlet fever, 4 from diphtheria, 25 from whooping-cough, 22 from different forms of fever, and 16 from diarrhoea; thus to the seven principal diseases of the zymotic class 214 deaths were referred, against 235 and 253 in the two preceding weeks. These deaths were 41 below the corrected average number for the same diseases in the corresponding week of the last ten years. The fatal cases of measles, scarlet fever, diphtheria, and whooping-cough were, in the aggregate, less than half the corrected average weekly number. The deaths referred to fever were 19 below the corrected average: 3 were certified as typhus, 17 as enteric or typhoid, and 2 as simple fever. The deaths from smallpox, which had been 97, 75, and 116 in the three preceding weeks, were 100 last week, of which 34 were certified as unvaccinated, 31 as vaccinated, and in the remaining 35 cases the medical certificates did not furnish any information as to vaccination. In 29 of the 52 fatal cases of smallpox occurring last week in private practice in London, no information as to vaccination was given in the medical certificates. Medical practitioners are requested to add this information in all their future certificates relating to smallpox deaths. In comparing, however, the numbers of deaths occurring among vaccinated and unvaccinated persons, it should be remembered that there are probably now in the London population fully nine times as many vaccinated as unvaccinated persons. The deaths from smallpox included 39 in the Metropolitan Asylum Hospitals at Homerton, Stockwell, and Hampstead, 5 in the Highgate Smallpox Hospital, 2 in the Kensington Workhouse, and two in the North-street Infirmary, Poplar; the remaining 52 occurred in private dwellings. The Metropolitan Asylum Hospitals, which have 900 beds available for smallpox, contained 873 patients on Saturday last, against numbers increasing steadily from 185 to 859 in the eleven preceding weeks. Many cases were necessarily refused admission during the week. During a period of nine weeks 3285 deaths were referred to diseases of the respiratory organs, a number which was 924, or 22 per cent below the average number in the corresponding week of the ten preceding years, corrected for increase of population. Different forms of violence caused 51 deaths; 45 were the result of negligence or accident, including 28 from fractures and contusions, 6 from burns and scalds, 3 from drowning, and 6 of infants under one year of age from suffocation. Thirteen deaths were caused by horses or vehicles in the streets.

ALTERATIONS IN THE NAMES OF STREETS.

The Metropolitan Board of Works has decided upon the following alterations in the names of streets within the limit of the metropolitan district:—Milton-place, Pierrepont-terrace, Cumberland row, and Camden-passage, Islington, will be incorporated under the name of Camden-passage, and the houses re-numbered. The name of Lare-street for a new street to lead out of Allen-street, Kensington, has been sanctioned, on the condition that no barriers be at any time erected or other obstructions caused to the free use by the public of the said street. Charlotte-row and Walbrook, City, will be incorporated under the latter name, and the house at present numbered 4, Charlotte-row, will be re-numbered 39, Walbrook. The name of Ralston-street has been approved for a new street on the Cadogan estate, Chelsea, on the condition that no barriers be at any time erected or other obstructions to the free use of the public of the said street. Old Paradise-row and Rosmond-buildings will be re-named Islington-green, and the houses re-numbered with consecutive numbers. Earl-street, Blackfriars, will be re-named Upper Thames-street, in continuation of the existing street of that name. The board has approved a plan on behalf of the Chartered Gas Light and Coke Company for the formation of a new road to connect Sand's End-lane and Imperial-road, Fulham, and of the name of Emden-road for the same, on the condition that no barrier be at any time erected or other obstruction caused to the free use of the public of the said streets; Grosvenor-place, Gloucester-road, and Alfred-street, Camberwell, will be incorporated under the name of Gloucester-road, and the houses re-numbered; Regent-street, Horseferry-road, Westminster, will be re-named Regency-street. The alteration of this name was strongly opposed by the Local Board of Works, but the Metropolitan Board decided, as there were three Regent-streets in the same postal district, it was expedient that the name of the least important one should be altered. The name of Summerfield-villas, Eversing-road, Stoke Newington, will not at present be abolished; Upper Cranfield-road, Deptford, will be incorporated under the latter name, the subsidiary names abolished, and the houses re-numbered; no changes will be made at present in the numbering of the houses in Campden-hill-road, Kensington; the name of Jesmond-street will be applied to a new street to lead out of East-street, Newington, on the condition that no barriers be at any time erected or other obstructions caused to the free use by the public of the said street.

It is the intention of the directors of the Dublin and Wicklow Railway, without further delay, to construct a second line of rails from Kingstown to Bray.

THE LATE STORMS: PASSING PROVISIONS THROUGH THE SURF TO THE BISHOP'S ROCK LIGHTHOUSE, SOILLY ISLES.

THE LATE STORMS: THE "LOSS-BOOK," A SKETCH AT LLOYD'S.

The Extra Supplement.

"THE ARMOURER'S DAUGHTER."

BY G. CATTERMOLLE.

The picturesque surroundings of feudal times possess an undying charm in themselves and their associations. The romance of chivalry still lives in these our more prosaic, but enlightened, days; and all that recalls, as in the picture before us, aught of the poetry and feeling of that period is sure of welcome. With the name of Cattermole is identified much of the pleasure modern art has opened up to us in this class of subject, and, in the picture here engraved, we have the suggestion of an incident for the realisation of which, to our mind's eye, but little imagination is demanded. The young Lord, tired of hawk and hound, has strolled from the castle to the armourer's room, where, with walls well hung about with sword and shield and bows, the old man, sitting amid a pile of dented helms and battered breastplates, dilates with accustomed garrulity on the mighty prowess of some former Lord, in which the blade he handles was the trusted weapon. But perchance the young man's thought is of the fair girl standing beside him—a form he has seen grow into maiden beauty as his boyish heart has warmed from companionship to love. With look askance, the sitting young eyes their trusting confidence, and reads a passage in their history they never have thought on. She plucks the petals from a rose—idly, 'tis true—dreaming, perhaps, of its foreboding voice. But cruel fate will shortly wake her from her gentle reverie. Love, like Death, ignores distinctions; but the armourer's daughter must not hope for the occupancy of the lady's bower in yon lordly pile.

The original water-colour drawing hangs in South Kensington Museum, and is an admirable example of the master at his best period, combining great power of composition and colour with the most dexterous felicity of touch.

MUSIC.

THE QUEEN'S THEATRE.

"Biorn," the new opera, produced on Wednesday evening, is the composition of Signor Lauro Rossi, director of the Royal College of Music at Naples, the book being the work of Mr. Frank Marshall. The leading incidents and the dramatic action are based on those of "Macbeth," but the scene is transferred to Norway, the names of the characters being necessarily changed. The haglike witches of the English tragedy are replaced by three fascinating Norni, or Fates; and an underplot is added, by which jealousy is added to the motives that impel the hero in his criminal career. These licences are great; but may, perhaps, find some excuse by the precedents of liberties previously taken by adapters of Shakespearean subjects for operatic composers—French, Italian, and German. In the construction of his book, Mr. Marshall has laid out some situations well calculated for dramatic and musical effect, which in the latter respect might have been turned to far better account than they have been by the composer of "Biorn," in the whole five acts of which it is scarcely possible to point to any manifestation of original musical thought or dramatic power. The prevalence of dance-rhythm gives a tone of frivolity that is in violent opposition to the serious nature of the subject; and this was conspicuously the case with the closing music of the opera, at the tragic catastrophe of the drama. The pieces that stood out most favourably in contrast with the other portions of the music were the trio for Biorn, Rollo, and Sigurd, near the end of the first act; Rollo's serenade, in the third act; and the chorus for the Queen's waiting-women, in the fourth act—the last being the best piece of vocal writing in the opera.

Some omissions were made in the performance, owing to the indisposition of Mrs. Fitzinman Marshall, for whom an apology was made before her first entry. This lady represented the character of Elfrida (Lady Macbeth); but, under the circumstances, it would be unfair to enter into criticism. Signor Mottino, as Biorn (Macbeth), displayed not only high merit as a vocalist, but also considerable power as an actor. Some of his music (poor and trifling as it generally is) was admirably declaimed, and in several of the principal dramatic situations this gentleman's acting was forcible and impressive without exaggeration. The part of Rollo (Banquo) also found an excellent representative in Miss Cora Stuart, who produced a very marked impression in several instances, particularly by her rendering of the serenade already specified, and her good declamation in the air, "Ambition," in the fourth act.

The remaining characters were generally well filled—the three Norni by Misses Riccobuono, Clare, and Warwick; Hela (Hecate), Mdlle. Christine Corandi; Sigurd (Duncan), by Mr. Dymott; Ulf, Huko, and Eric (Earls of Norway), by Messrs. G. Coventry, C. Howard, and D. Stone, &c.

"Biorn" has been well placed on the stage, with some excellent scenery by Messrs. Gordon and Harford, and brilliant costumes; and there is also some good ballet action. Signor Tito Mattei conducted the performance with care and energy.

The resumption of the Monday Popular Concerts last week has already been noticed. The Saturday afternoon performances in association therewith were also resumed in the same week. The programme in this instance, and at the second evening concert of the year, on Monday last, presented in each case much attraction and variety. On Saturday Schubert's otet, for string and wind instruments, was admirably rendered, the distribution having been as follows:—First and second violins, MM. H. Holmes and L. Ries; viola, Mr. Zerbini; violoncello, Signor Piatti; contrabass, Mr. Reynolds; clarinet, Mr. Lazarus; horn, Mr. Wendtland; and bassoon, Mr. Winterbottom. Mdlle. Marie Krebs gave an excellent rendering of Beethoven's "Sonate Pathétique" for piano solo, and was associated with MM. H. Holmes, Zerbini, and Piatti, in Mozart's pianoforte quartet in G minor. Mr. Sims Reeves was the vocalist, and sang Beethoven's "Adelaide" in his own incomparable style, having been encoined in Signor Piatti's serenade "Awake, awake" (which included the composer's fine playing of the violoncello obbligato). Monday evening's selection comprised Mendelssohn's first quartet (op. 12, in E flat); Beethoven's second pianoforte trio (in G), with Mdlle. Marie Krebs as pianist; Chopin's rondo for two pianofortes, in which the lady just named was associated with Miss Agnes Zimmermann; and Brahms's series of "Liebeslied Walzer"—the pianoforte duet accompaniment played by these ladies, and the vocal portions sustained by Mdlles. Sophie Löwe and Redeker and Messrs. Shakspeare and Pyatt; the same vocalists having given, with much effect, Schumann's quartets, "Es ist verrathen" and "Ich bin geliebt." The exquisite rondo of Chopin and the charming lieder of Brahms were given for the first time at these concerts, and pleased greatly. At each of the concerts referred to Mr. Holmes suddenly replaced Herr Straus as leading violinist, this gentleman having been called abroad in consequence of a severe domestic bereavement. Sir J. Benedict was the accompanist on Saturday, Mr. Zerbini having fulfilled the office on

Monday. Herr Straus is to reappear at the afternoon performance of to-day and at Monday's evening concert.

Herr Herman Franke has resumed his interesting chamber concerts—this season in the concert-room of the Royal Academy of Music—himself being the leading and solo violinist. The opening performance of the series took place on Tuesday evening.

The second of the new series of the London Ballad Concerts took place on Wednesday evening, when a varied selection of popular vocal music was rendered by several eminent vocalists, including Mr. Sims Reeves. Madame Arabella Goddard contributed some brilliant pianoforte playing.

Haydn's "Creation" was given by the Royal Albert Hall Choral Society on Thursday evening, under the direction of Mr. Barnby; the solo-singers announced having been Madame Lemmens-Sherrington, Miss José Sherrington, Mr. Vernon Rigby, and Signor Foli.

On Thursday next the anniversary of Robert Burns's birth-day will be musically celebrated at St. James's Hall by the performance of Scottish national songs, including the co-operation (as announced) of Madame Antoinette Sterling, Misses José Sherrington and Annie Sinclair, Mr. Sims Reeves, Mr. Pearson, Mr. Thurley Beale, and two vocalists of repute from Scotland.

Mr. Kuhe's Brighton Festival will take place, in the dome of the Royal Pavilion, on Feb. 13, 15, 16, 17, 19, 20, 21, and 22, under the direction of Mr. Kuhe, who, at some of the concerts, will be assisted by Mr. Arthur Sullivan. The orchestra will consist of about forty-eight of the best London instrumentalists, and the chorus will be that of the Brighton Harmonic Society, under the direction of Mr. R. Taylor; organist, Mr. Crapps. Among the works to be performed will be Handel's "Messiah," Haydn's "Creation," Verdi's "Requiem," Mr. J. F. Barnett's "Ancient Mariner," Madame Sainton-Dolby's "Legend of St. Dorothea," Mr. Arthur Sullivan's symphony in E, and Mr. Frederic Clay's new cantata, "Lalla Rookh," composed for the festival to a libretto written by Mr. G. A. Willis. Among the artists who will assist in the performance of the above-named works and at the miscellaneous concerts are Madames Sherrington, Patey, and Edith Wynne; M.M. Sims Reeves, Lloyd, Cummings, Campobello, Maybrick, and Foli; and Madame Arabella Goddard and Mr. Kuhe will be the solo pianists.

A correspondent, writing from Glasgow, says:—"For many years the irregularity of congregational singing has engaged my attention, and I have, at last, found a method for securing absolute precision. It is this: In front of a clock's pendulum place two panels attached below by a Y spring and sliding hoop, so that in common time the pendulum will be seen between them; and in triple time, when they are drawn together, a segment of the pendulum will be seen at the outer sides alternately."

NEW BOOKS.

An intimate acquaintance with the majority of the "ologies," and especially with palæontology, anthropology (including ethnology and craniology), glottology (including philology and entomology), geology, and mythology, is required for a proper understanding, let alone an adequate appreciation, of *Etruscan Bologna: A Study*, by Richard F. Burton (Smith, Elder, and Co.); and "caviare to the general" is an expression which but faintly describes the adaptability, or rather the inadaptability, of the volume for the tastes and comprehension of the ordinary reader. How universal is the gallant author's learning, how indomitable is his resolution, how vigorous is his execution, how persistent is his industry, everybody knows; and his researches in "the venerable ex-capital of Northern Etruria" show that, in all those respects, his old reputation has been well maintained. Very few, however, of his pages are within the range of any but the most erudite "ologists." That the results of his investigations were nevertheless intended for the mere tourist, as well as for others, is evident from his own language. He begins by promising never to borrow from the guide-books, and promising that the sooner they borrow from him the better for them. The book is divided into three "parts." The first part contains some remarks, breathing a spirit of personal enthusiasm, upon New Bologna, upon Old Bologna, and upon certain public and private collections of antiquities. In the second part we are invited to go and visit the very sites whence the collections were dug up; we are taken to the Certosa, to Casalechio, to Marzabotto, to Misanello, to Misano, and in each case we are treated to some learned observations and criticisms, the value of which can be properly appraised by none but a professed antiquary. In the third part we are summoned, having "seen the arts and industry, the temporary abodes and the eternal homes of the Circumpadan Etrurians," to bring our work of examination to a close and "interview what is left of the man himself." This is the part where it would be of the greatest advantage to be thoroughly versed in most of the "ologies." It is considered advisable to begin with a "geological sketch of early Italy," in all its phases, at various "epochs." After this the learned author is moved to "offer a few remarks," as long-winded preachers are wont to say, "concerning the successive immigrations into the Italian Peninsula, which finally brought the Etruscans." At this point a thorough master of anthropology, comprehending such branches of that science as craniology, glottology, and even anthropophagy, cannot fail to be deeply interested and to long for the wings of a dove that he might fly away and pay the recommended visit "to the learned anatomist and naturalist Prof. Commendatore Luigi Calori," who is affability itself towards anthropological inquirers, whose "study, behind the theatre where he lectures, contains nineteen old Etruscan skulls," and who "will at once point out their resemblance to the 'massive and grandiose Roman calvaria.'" In discoursing about the origin of the Etruscan language, the author takes occasion to make a fierce onslaught upon the Rev. Isaac Taylor's "Etruscan Researches," remarking, with facetious bitterness, that the "Family pen" was never employed to worse purpose. What especially rouses our author's ire is the assertion that "the ultimate and surest test of race is language"—an assertion which, together with others enough to make "the geographer and anthropologist stand aghast," is met by argument, by instance, and by the authority of Prof. Karl Vegt, Prince Louis Lucien Bonaparte, and other shining lights. The conclusions drawn by our author, as regards "the Etruscan tongue, are:—1. That it may possibly be proved 'Italiot'; 2. That its origin and its affiliation are at present mysterious as the Basque; 3. That, whereas almost all previous authorities had advocated some form of the great Indo-European speech, Mr. Taylor has made himself a remarkable 'Turanian' exception; and 4. That certain Finnish 'affinities' deserve scientific investigation." Some pages are devoted to the consideration, with specimens, of the very scanty "inscriptive literature of the Etruscans;" and the volume concludes, save for an appendix, with a short, but very interesting, essay upon the "modern Bolognese tongue." From the description given of the book, it will probably appear that the contents, though

some of them convey information intelligible and attractive to everybody, especially to travellers unaware of what has been brought to light by archaeological research in the neighbourhood of Bologna during the last few years, are, on the whole, more than a little "over the heads" of ordinary readers, and, valuable as they undoubtedly are, would find full and due appreciation among the members of some scientific society, and among such persons only.

A respectful horror is excited by merely imagining what a vast number of dry books a gentleman must, at any rate, have tried to read; and what a vast number of hard nuts he must, at any rate, have tried to crack, before he could accomplish the task which has led to the publication of the two portentous volumes—portentous as regards both size and subject—entitled *English Thought in the Eighteenth Century*, by Leslie Stephen (Smith, Elder, and Co.). One might readily believe that the author, having completed his work, was never seen to smile again, as the historians and the novel-writers have it; and that a similar smilelessness would be the fate of anybody who should attempt to read the two volumes through continuously, unless, indeed, as is most probable, a deep sleep should fall upon him and save him from himself. Taken piecemeal, or rather in regular consecutive doses of so many pages every so many hours, every other day, the volumes might be found to be a wholesome and not disagreeable mental aperient as well as sedative; particularly in the case of those persons who, for want of something better to do, are always pursuing "a number of ontological, theological, ethical, psychological, and logical inquiries." The best idea of the labour and industry which the author must have brought to bear upon his work will be gained from the following statement. His two volumes are divided into twelve chapters, and at the end of every, or nearly every, chapter he has given a list of the writers who have supplied him with material for his study and observations, and whose writings, be it remembered, from the nature of the case, must or should have been not merely consulted, as if for the sake of a fact or a date, but read, marked, learned, and digested. Well, the number of them is prodigious, and the surmised ponderosity of them is enough to appal the stoutest heart, and send a shudder all down the strongest back. At the end of the first chapter we find the names of eleven different writers; at the end of the second, none; at the end of the third, twenty-seven; at the end of the fourth, twenty-nine; at the end of the fifth, one; at the end of the sixth, one; at the end of the seventh, one; at the end of the eighth, thirty; at the end of the ninth, twenty-two; at the end of the tenth, twenty-three; at the end of the eleventh, eight; and at the end of the twelfth, forty-nine. It is true that, though the names are all different in each separate list containing several, yet the same name occurs in two or three or more lists, so that the sum total of the writers studied cannot be fairly calculated at a couple of hundred or more, as would otherwise be the case; but, on the other hand, the voluminousness of some few among the writers has to be taken into consideration. It may be safely concluded then, that, if Mr. Stephen was not called upon to make his own thoroughly master of whatever was written during their lives by two hundred different writers, he was, nevertheless, called upon to make himself thoroughly master of, perhaps, more than two hundred different writings. And the worst of it is that a reader who would thoroughly appreciate the value of what Mr. Stephen has accomplished in his two volumes ought, properly, to go through the same preparatory course as Mr. Stephen himself may be considered to have gone through; for the two volumes contain what is rather a collection of critical commentaries than anything else—a sort of work which, abundantly evident as the critical commentator's mastery of his subject and general acumen may be, can never be satisfactorily investigated by readers who have not at their fingers' ends the questions upon which the criticisms and the comments are made. Nor can it be said that Mr. Stephen conducts his readers, save to a very partial extent, into the more delightful and more profitable regions of thought. His bias is evidently metaphysical and theological; and his original scope appears to have been mainly the latter. Yet those two regions of thought are probably the most barren and profitless that any human being can survey. Mr. Stephen asks, as regards metaphysical questions, "Why are these studies, so apparently fruitless, so perennially fascinating?" One would be disposed to answer—to whom are they fascinating? Why, to the few, not to the many: to the few who are not as other men are; who rejoice in speaking a sort of language not understood of the people; who adopt a strange terminology; who are among thinkers what the Ritualists are among Churchmen; who delight in "knagging," like so many women, over a hair; who seem to be always attitudinising and hugging themselves in the consciousness of their own cleverness; who, having picked a hole in some system or creed, remind one of little Jack Horner, his Christmas pie, the plum he picked out, and his self-laudatory exclamation. It is a comfort to be told, on Mr. Stephen's own authority, that such robust thinkers as Burke and Dr. Johnson had no stomach, and had even a contempt, for what is generally known as metaphysics. And when we see on what shifting sands the metaphysicians build, one being continually toppled over by another, we cannot help wondering whether it is worth anybody's while to inquire what they thought or to what conclusion their thought led them. It was to perfect scepticism, as we know, that Hume was led; and yet we find the arch-sceptic confessing that his doubts vanished as soon as he left his study. When Mr. Stephen, in his second volume, deals with moral philosophy, political theories, political economy, and literary characteristics, then, indeed, he enters upon a field upon which most readers can, and will gladly, follow him, while they pick up many a hint that will enable them to see a great deal which had hitherto been invisible to them between the lines of the men who thought and wrote in the eighteenth century.

At the present crisis of the Turkish Empire, it need scarcely be observed, the publication of honest and impartial accounts of any lengthened residence in its disturbed European provinces is most opportune. The second edition of *A Residence in Bulgaria*, by Captain S. G. B. St. Clair and Mr. Charles Brophy, appears under a new title, as *Twelve Years' Study of the Eastern Question in Bulgaria* (Chapman and Hall). The book was originally written about ten years since, but Captain St. Clair has seen no cause to alter his opinions, which are vehemently hostile to the Christian subjects of Turkey. He bestows large praises on the Mussulman country population, at least of the Osmanli-Turkish race, within a certain distance of Constantinople or Adrianople. But he does not palliate the gross defects of the official administration, while he declines, on the other hand, to put faith in modern schemes of reform. His ideal seems to be a revival of the older, simpler, and less vexatious methods of Turkish rule, with the redress of fiscal and other special grievances, but sternly denying the claims of a different nationality, and the pretensions of the Greek Church. His detestation of Russian intrigues and interference is frequently expressed with considerable force. Another volume, by Mr. H. C. Barkley, C.E., is that bearing for title

Between the Danube and the Black Sea (Murray). The author is a civil engineer, who was employed between 1857 and 1870, with his two brothers, in constructing the Kustendje and the Varna and Rustchuk lines of railway. He writes in a much pleasanter spirit and style than Captain St. Clair or Mr. Brophy; and he is free from their bitter prejudices and animosity against the Rayahs, while he shows no dislike of the Turks as a people. His testimony is fairly borne to the existence of intolerable abuses in the provincial government, the practice of great iniquities, cruelties, and acts of extortion. The "zapitch," or armed rural policeman, seems to be the universal scourge of the provinces, while the venality and corruption of some officials, and the apathetic indolence of others, leave the natives a prey to all manner of local oppression, against which those of the Christian community have no defence. But the greater part of Mr. Barkley's interesting recollections deal with the lighter topics of personal adventure, anecdotes of travelling, sporting, and household life, of social conversation, business, and labour. It is but a limited part of Turkey, that corner of Bulgaria north of the maritime range of the Balkans to the Dobrukscha, with which we are here made acquainted; but it is not the least important, in view of a probable Russian invasion.

Two junior officers of H.M.S. Challenger, employed from the winter of 1872 to the midsummer of 1876 in a voyage of scientific discovery all round the globe, have produced acceptable books. These are the *Log Letters from the Challenger*, by Sub-Lieutenant Lord George Campbell (Macmillan); and the *Cruise of H.M.S. Challenger*, by Mr. W. J. Spry, assistant engineer (Sampson Low and Co.). Both narratives may be read with interest; but that of Lord George Campbell is really delightful, more especially in its descriptions of many remote islands in the Atlantic, the Southern Ocean, the Pacific, and the Malay Archipelago, with an inland Japanese trip from Yedo to the temples of Nikko. Lord George is an ornithologist, and devotes particular attention to the strange and beautiful varieties of the feathered race, the penguins of Tristan d'Acunha, the far-flying albatross and frigate-bird hundreds of miles from land, the splendid parakeets and lories of Fiji and the Moluccas, the bird of paradise, and other marvellous winged creatures. He has also a pleasant way of making us acquainted with the native people, wherever they are found at all amiable, giving a due preference and predominance to the more amiable sex. His book, which is written in a lively, unaffected, and agreeable style, seems to be made up of letters originally addressed to a lady friend at home. Mr. Spry's account of the cruise is not so well composed, in a literary point of view, and dwells rather too much upon the sojourn of the Challenger's party in Australia, at Hong-Kong, and in other places which are pretty well known; but the volume is furnished with some good engravings, as well as a chart of the entire voyage. It also gives minute details of the scientific apparatus and methods of operation used by Professor Wyville Thomson to explore the currents and bottom of the deep sea.

Facts About Sherry (Ward and Lock) is a shilling handbook as readable as the subject treated is palatable. Mr. Henry Vizetelly takes for his text the subjoined lines from Pasquill's *Palinodia* :—

And all drinks stand with cap in hand
In presence of Old Sherry;
Then let us drink old Sacke, old Sacke, boyes,
Which makes us blithe and merry.

And in order that he might speak with authority on this popular wine Mr. Vizetelly paid a visit in the autumn of 1875 to the districts of the south of Spain whence our supply of sherry is derived. There he had the good fortune to witness the vintage in several Jerez and San Lucar vineyards, to see the process of treading and pressing the grapes, and to become familiarised with all the mysteries of soleras, besides gathering a host of "Facts About Sherry" in the many bodegas he was privileged to enter. Mr. Vizetelly has embodied all this information in a profusely-illustrated brochure, which should be welcome for its store of valuable hints to everybody interested in wines. So ably, indeed, has our author accomplished the task he set himself that "Facts About Sherry" will, in all probability, restore sherry to that high place in public esteem from which adverse criticisms and other causes may have temporarily deposed it. Beginning with the grape harvest, and then proceeding to the method of pressing the juice from the fruit, to the fermentation, to the infusion of "no more than one or two per cent" of spirit, to the use of the young wine "to replenish the lowest scale of the solera," and to the difficult process of "blending," Mr. Vizetelly imparts what he has gleaned in a lucid, clear style, that greatly adds to the interest of the book. He is especially felicitous in disposing of the charges made against sherry that it is a "plastered" wine; and he proves by his "Facts About Sherry" that "unquestionably, when met with at its best, under conditions in which few people drink it in England, because they lack the courage and common sense to pay the due price for choice qualities, sherry has but few superiors among the white wines of the world." We may add that Mr. Vizetelly was wine juror for Great Britain at the Vienna Exhibition, and the author of "The Wines of the World Characterised and Classified," a worthy companion volume to "Facts About Sherry," respecting which we may say, in parting, as some connoisseur said of a choice wine, it leaves a farewell relish.

The Duke of Marlborough, Lord Lieutenant of Ireland, was on Saturday last presented with congratulatory addresses from the Corporation of Dublin, the University of Dublin, and the Royal College of Surgeons. In answer to the University address, his Grace said he deemed it a fortunate circumstance that it was his lot to fill the office of Lord Lieutenant at a time when increasing material prosperity was diffusing happiness around, and when education was spreading the healthy influence of moral culture over the people. His Excellency arrived at Killarney on Monday evening. He was presented with an address by a deputation of the Town Commissioners, to which his Grace replied, thanking the people for their kind reception. The Duke then proceeded to Muckross Abbey, the seat of his son-in-law, Sir Ivor Guest.

The annual meetings of both the Essex Agricultural Society and the Essex Chamber of Agriculture were held at Chelmsford yesterday week. Mr. James Round, M.P., presided at the former. Sir Charles Du Cane was elected president of the society for 1877, when the annual show is to be held at Chelmsford, the dates fixed being July 3 and 4. The prizes will amount to about £1500, and will include a new challenge cup, value 100 gs., presented by Mr. D. McIntosh, for the best short-horn in the yard, the last cup having been finally won by the Rev. R. B. Kennard. The last report stated that the last show was the most prosperous the society has ever held. The income for the year was £2726; there is a balance of £255 in hand, and the number of members is 940.—At the meeting of the Essex Chamber of Agriculture Lord Carlingford was unanimously elected president for the ensuing year, and Sir Charles Du Cane was elected vice-president.

LAW AND POLICE.

Formerly, when a barrister was elevated to the Common Law Bench and took the degree of the coil, he was rung out of his inn, and only reappeared as a visitor on grand days. Under the new system a Judge does not cease to be a member of his inn, and Mr. Justice Hawkins dined at the Middle Temple, yesterday week, in his character as bencher. As this was the first time he had appeared since his promotion, he was warmly greeted by the barristers and students as he passed down the hall. Mr. Justice Hawkins was entertained, on Tuesday evening, at the Albion Tavern, by the members of the South-Eastern Circuit, at a congratulatory banquet to celebrate his elevation to the Bench. Mr. Serjeant Ballantine presided, and a distinguished company from the Bench and Bar were present.—Mr. Justice Lopes will be entertained at dinner by the past and present members of the Western Circuit Bar Mess, on Saturday, Feb. 3, at the Albion, Aldersgate, in honour of his elevation to the Bench.

In the Exchequer Division of the High Court, on Saturday, the Lord Chief Baron expressed his great regret at the reduction by the Government in the number of Judges from eighteen to fifteen, in consequence of which, he said, very frequently indeed public justice could not be administered; and Mr. Justice Mellor, in the Queen's Bench, complained that, from want of accommodation, two Judges were compelled to sit together, when they might sit separately if sufficient courts were provided.

At a meeting, on Monday, of the Law Amendment Society, presided over by Mr. Hopwood, M.P., a paper was read by Mr. Serjeant Cox on the subject of Reform in the Procedure of Magistrates' Courts, in the course of which he adduced several special reasons why such procedure should be as simple and as intelligible as possible. The county courts had already done this, and had found no difficulty in the working of it. What should be done in the initial process was to assimilate the magistrates' court to the county court. After a discussion, the paper was referred to the repression of crime committee.

Mr. Forsyth, Q.C., M.P., will preside at the thirteenth annual meeting of the United Law Students' Society, to be held at Clement's Inn Hall, Strand, on Monday evening next.

Application was made, on Wednesday, before the Judicial Committee of the Privy Council for the prolongation of the patent granted for improvements in sewing-machines for boots and shoes. The invention had met with great obstruction from trades unions, and one of the proprietors had been stoned by a mob for introducing it. After a long investigation Sir Robert Collier gave judgment, describing the invention as meritorious, and stated that their Lordships would advise her Majesty to grant an extension for seven years.

The Court of Appeal has confirmed the decision of the Master of the Rolls restraining the Great Western and Midland Railway Companies from opening a portion of the Clifton Extension Railway, which had been reported upon unfavourably by Colonel Yolland.

A diver on the coast of Queensland was the means, last year, of recovering from a wreck, which was haunted by sharks attracted by the corpses, a box containing £9000. The Colonial Admiralty Court awarded him about £3000 as salvage, and the owners of the gold, appealed against the sum as excessive. The Judicial Committee dismissed the appeal.

A sporting man, named Higginson, who had given information to one Simpson about a horse, upon which Simpson won several bets in a Liverpool race, sued the latter in a local court and won £50 as the amount of a bet which he had instructed Simpson to make for him. The Judges in the Common Pleas Division have reversed that decision, on the ground that the transaction was void under the Games and Wagers Act.

A claim against Reuter's Telegraph Company for sending by mistake to a merchant at Valparaiso an order for barley, whereby the plaintiff lost considerably, has been decided by the Common Pleas Division in favour of the defendants, on the ground that the obligation of a telegraph company is to the sender of a message, and not to the receiver.

The Fulham District Board of Works have obtained an injunction in Chancery restraining the Metropolitan District Railway Company from raising their line at three points in the Fulham district where, it was said, a sewer was needed.

Vice-Chancellor Malins gave judgment, on Monday, in a suit instituted for the purpose of ascertaining what persons were entitled to £40,298 9s. 5d., paid by the Brazilian Government to Lord Dundonald, as the executor of the late Lord Dundonald, in respect of the services rendered by the Earl to that Government; and for the administration, so far as might be necessary, of the Earl's personal estate. The Vice-Chancellor ordered £10,668 18s. 10d. to be paid to Lord Dundonald, and, after providing for the claim of a Mr. Earp and the costs in the case, directed the residue to be divided into four parts and carried to the respective separate accounts of Lord Dundonald and his brothers, and their incumbancers.

The will case of the Earl of Longford against Wellington Purdon and others is again before the Court of Probate in Dublin, the amount involved being about £5000 a year. A previous verdict on an ejectment case, held in Mullingar, before Mr. Baron Dowse, against the testamentary capacity of Mr. Cooke, was set aside, and this is a new trial.

A dispute between Marquis Townshend and a married sister, Lady A. Sherson, came before the Master of the Rolls. The Marquis has paid sums of money due to his sister towards the reduction of her husband's debts, and until 1870 she had given receipts for the money so applied. She now sought to make her brother responsible to her for the money that had been paid on behalf of her husband. Ultimately a compromise was agreed on, the Marquis undertaking to pay Lady Sherson the income since 1870, when she ceased to give receipts.

Some time ago Mr. Christie, a clerk in the India Office, living at Kew, was convicted by the Richmond magistrates of an attempt to defraud the South-Western Railway Company. He appealed to the Quarter Sessions, and the conviction was quashed. Mr. Christie thereupon brought an action against the railway company for malicious prosecution, and the case came before Mr. Justice Field, with a special jury. The company expressed their regret for what had happened, stating that they could only act upon the reports of their servants, and consented to a verdict for 100 guineas.

A jury in the Common Pleas has awarded £100 to Mrs. Barnham, a cook and housekeeper, living at Reigate, as compensation for the loss of an eye in consequence of a fall over the raised coal-plate in the footpath in front of some houses in Bermondsey, of which the defendant was a trustee.

In the Exchequer Division, on Monday, a washerwoman, named Richardson, living at Battersea, obtained a verdict against the London and North-Western Railway Company for £150 damages for injuries sustained at Battersea station.

Two hundred and fifty pounds damages were, on Wednesday, given in the Exchequer Division for severe injuries sustained by Mr. Siemans, a dealer in jewellery, through being knocked down by a van of the Midland Railway Company while he was crossing the road in High-street, Aldgate.

The widow of a master tailor, named Womack, was awarded £3000 for his loss, in an accident on the Great Eastern Railway, by a jury at the Norwich Assizes. The company appealed, on the ground that the damages were excessive, and a new trial was ordered. It took place in London, and the jury gave her £4500. On Monday an application was made to the Chief Baron for a new trial, on the same ground as before, and the application was granted.

At the Central Criminal Court, last week, the Grenadier Guardsmen, M'Connon, who kicked a comrade to death in the guard-room at the Chelsea Barracks, on the night of Christmas Day, was sentenced to be hanged. Thomas William Christian, for attempting to poison Mrs. Bailey, at Charlton, was sentenced to eight years' penal servitude. Samuel Coates, who had been convicted of manslaughter, was sentenced to six months' imprisonment. Henry Appleby, who had been found guilty of offences under the Bankruptcy Act, was ordered to be imprisoned and kept to hard labour for nine months. On Saturday a licensed victualler, named William Wood, and George Bowyer, a barman, were found guilty of unlawfully conspiring together to induce licensed victuallers who required a barman to engage Bowyer through false representations. Wood was sent to prison for eighteen months and Bowyer for nine months, each with hard labour.

At the Middlesex Sessions, last week, John Williams, several times previously convicted, and Mary Ann Scott, were, for attempting to obtain money by false pretences, sentenced respectively to eighteen and six months' hard labour. A hawker, named Ann Mills, was sentenced to prison for eighteen months for stealing a child. The trial of William Lawrence, the spiritualist "medium," ended on Tuesday. The Assistant Judge, in summing up, said that the question the jury had to consider was not whether the prisoner made false pretences to supernatural power, but whether it was his intention to cheat and defraud by inspiring a belief in his possession of that power. The jury found a verdict of "Guilty." The Assistant Judge, in passing sentence, said it was clear that the prisoner had been getting money for some time past by impudent and ridiculous pretences, and sentenced him to be imprisoned as a second class misdemeanant for three months. The Court had no power to impose hard labour.

In the copyright case at Westminster County Court, wherein Mr. J. D. Besemere, a dramatic author, sued Mr. Henderson, lessee of the Criterion Theatre and proprietor of the Folly, to recover damages for an infringement of his copyright in a play called "Married Daughters and Young Husbands," which was produced at the Criterion as "Mother Carey's Chickens," his Honour has given judgment for the plaintiff for the amount claimed—viz., £50, reserving the question whether only one penalty should be awarded.

Frederick Treadaway was again brought up at Westminster on Monday, charged with the wilful murder of Mr. John Collins, at 99, Stanley-street, Pimlico; and also with attempting to murder Mrs. Collins. Since the last examination a bullet had been extracted from Mrs. Collins's neck, and a gunsmith stated that this bullet resembled the one produced by the doctor who made a post-mortem examination of Mr. Collins. The prisoner was committed for trial on both charges.

Robert Eddy, described as a servant, pleaded guilty, at Marlborough-street, on Monday, to the offence of obtaining a situation by means of a false character, and was fined £20, with the alternative of three months' imprisonment.

An old woman has been sent to prison for six weeks, by the magistrate at Clerkenwell Police Court, on a charge of pretending to tell fortunes, and receiving money for so doing.

Charles Graham, alias Charles Lever, aged twenty-one, who described himself as an actor and a theatrical agent, was charged, at Lambeth, on Tuesday, with stealing from Stephen Maskell £10 by means of a trick. The prisoner caused advertisements to be inserted in various newspapers, stating that a messenger of good character was required, who would have to deposit £10 cash as security. To this advertisement Maskell replied, and was engaged at a salary of £1 a week. For some days he was chiefly employed in taking advertisements to the newspapers offering salaried theatrical engagements to persons who were to deposit £10 each "as security." The prisoner paid him for three or four weeks, and then said he could pay him no more wages, as he was bankrupt. The £10 was not returned. Another man named Brown stated that he was similarly engaged by the prisoner, and deposited £5. Upwards of 1000 letters in answer to the prisoner's sham theatrical advertisements were found in his house when he was taken into custody. The magistrate was told that two young women were in attendance who had paid 5s. each to the defendant to give them lessons to play in the "Hunchback," and he told them they would be on the stage in a fortnight. They were to pay him £2, but they could give only 10s., and were to pay the remainder when they obtained engagements. Mr. Chance remanded the prisoner for a week, but agreed to take bail, two sureties in £40 each, with notice.

At Worship-street, on Wednesday, Frederick Charles William Jennings was charged on remand with stealing a watch and a purse with money from two young women with whom he had pretended to "keep company." In both instances he chose the moment of parting to commit the robberies. Another charge was gone into, and the prisoner was committed on the three charges.—At Salford, last week, Thomas Eastwood, alias Thomas Edward Butterworth, alias Smith, was found guilty of obtaining from Jane Hodge, of Withington, three boxes of wearing apparel, under the pretence that he was about to marry her. The Recorder described the prisoner as a "designing scoundrel," and committed him to gaol for fifteen months, with hard labour.

Alarming news from Zululand is telegraphed from Cape Town, via Madeira. Cettywayo, who was formerly favourable to the occupation of the disputed territory by British troops, now refuses to give his assent to that arrangement; and it is rumoured that he has not only returned unopened a letter sent to him by Sir Theophilus Shepstone, but has collected 8000 warriors in a large kraal on the disputed border.

The British Enterprise, 1620 tons, Captain John Greig, chartered by the Agent-General for South Australia, left Plymouth, on the 11th inst., for Port Adelaide, with 440 emigrants, among whom were seventy-five single domestic servants.—The Agent-General for Queensland has just received a telegram from that colony of the safe arrival of the Scottish Hero with emigrants, and that the whole of these have received ready employment, and that more are urgently required.

ST. MARY'S CATHEDRAL CHURCH, TRURO.

THE LATE R. T. LANDELLS.

The death of Mr. Robert Landells, in his forty-fifth year, was mentioned last week. It is sincerely regretted by all who had been associated with him at the office of this Journal and by a large number of personal friends. He belonged to a family which has been connected with the modern institution of the illustrated newspaper from its very beginning. His father, the late Ebenezer Landells, a native of Newcastle-on-Tyne, was a pupil of Thomas Bewick, and was one of the school of wood-engravers and designers or draughtsmen on wood founded by that eminently original master of the art. He came to London about 1839, and found employment in the illustrated periodical literature of that day. He was one of the enterprising men, skilled in their respective departments, who projected and started *Punch*, soon afterwards taken in hand by Messrs. Bradbury and Evans. In 1842 he became connected with the *Illustrated London News*, then in the first year of its existence. He was commissioned to attend upon the visit of the Queen and Prince Consort to Scotland, and to furnish the sketches and engravings for its illustration. Upon several occasions, both in this country and on the Continent, similar work was performed by Ebenezer Landells. His death, at the age of fifty-one, took place in the autumn of 1860. Mr. Robert Thomas Landells had before that time entered upon his career as a "Special Artist," not having attempted, like his father, the business of engraver. He was sent out by the *Illustrated London News*, in 1856, to the seat of war in the Crimea, and some of his sketches, though less prominent than those of Mr. J. A. Crowe, Mr. E. A. Goodall, and other Artists, appeared towards the end of that campaign. Shortly after the peace with Russia he went to Moscow for the coronation of the Emperor Alexander II., and supplied the illustrations of that grand ceremony. In the winter of 1863, and the following spring, the war between Germany and Denmark, in Schleswig-Holstein, gave occasion for Mr. R. T. Landells to exert his special talent in delineating various incidents of military life, and the figures and movements of soldiery. His subsequent opportunities for studying and practising that class of subjects were most extensive. He accompanied the first Prussian army corps, under the command of the Crown Prince of Prussia, in the war of 1866 against Austria, and the march towards Vienna. By special permission, Mr. Landells was attached to the staff of his Royal Highness, where his personal behaviour won him the lasting regard of some of the most distinguished Prussian officers. The advantage thus gained was still more valuable to him in 1870, during the war between France and Germany, when the high character and engaging manners of our Special Artist, already well known to the Crown Prince and his staff, secured him the instant admission to the same privileges, giving him the earliest and best chance of observing and sketching the operations

of that great war. He continued at the head-quarters of the Crown Prince at Versailles, where also was held the Court of the Emperor of Germany during the siege of Paris; while another of our Special Artists, Mr. Simpson, was present at the capture of Metz and Strasburg. Mr. Landells received from the Imperial Government of Germany, upon a special recommendation from the Crown Prince, the order of the Iron Cross, bestowed in recognition of his meritorious conduct and labours in that war, particularly remembering his exertions to aid in the relief of the sick and wounded soldiers in the winter campaign on the Loire. This ended his military experiences. He did not, of late years, undertake any important foreign mission; he chose rather to practise oil-

painting, or to make studies of quiet and homely scenes, bits of riverside building at Lambeth or Chelsea, seaside views on the Dutch coast, old houses, or boats and shipping. A small collection of his war sketches was lent to the Alexandra Palace for the Balaelava Festival in the October of the year before last; and one or two finished pictures by him, in oil colours, were in the International Exhibitions at South Kensington. He executed also many drawings in water colours, some for the Queen, by express command of her Majesty, as memorials of her state ceremonies, journeys, and visits to different places. In addition to the German war medal, he was honoured with decorations conferred by the King of Bavaria and the King of Denmark; and he was an acceptable person in society at home or abroad. He married a granddaughter of Liston, the comedian, a daughter of the late Mr. G. Herbert Rodwell, the musician and composer, but this lady died three or four years ago, leaving him with several children. His funeral, at Brompton Cemetery, on Saturday last, was attended by some of the gentlemen, artists, literary men, and others, who had been associated with him in active life.

The Portrait of Mr. Landells which we have engraved is from a photograph by Messrs. Fradelle and Marshall of Regent-street.

THE LATE R. T. LANDELLS.

THE POLYTECHNIC INSTITUTION.

"Hyldemoer, the Witch of the Elder-Tree," is a Danish Fairy Play, by Hans Christian Andersen, which has been translated by Mr. Edward Rose. This forms the dramatic portion of the Christmas entertainments at the Polytechnic. It is effectively recited by Mr. Seymour Smith, who varies the tone of his voice with almost a ventriloquist's power, while the actors on the stage suit the action to the words. The story is laid, above and below ground, in Denmark. It opens with a dissolving view, in which spirits are present to inform us of their lords' and masters' wish to marry. These potentates are the four Elements—namely, Earth (a Mole), Air (King of the Butterflies), Fire (Will-of-the-Wisp), and Water (a Mermaid and Maid), the latter a troublesome child, who continually "wants to go home." They discover that they are all in love with the same lady, the loveliest of her sex, who is a barber's daughter in Copenhagen. They agree to assume mortal form, each in the hope of making a favourable impression on her. The Mole, like all ugly people, is more particularly confident of his good looks. They depart; and their journey o'er land and sea is illustrated by an excellent panorama by Messrs. Leitch and Hill. Scene the second shows the exterior of the barber's house, with Peter, the apprentice, about to set out on his journey through the world. While bidding farewell to the shop, he is joined by Marie, the barber's lovely daughter, who condole with him, refers to the pleasant times they passed beneath the old elder-tree, presents him with a blossom, and sings a song in its

THROAT AFFECTIONS and
HOARSENESS.—All suffering from Irritation of the
Throat and Hoarseness will be agreeably surprised at the almost
immediate relief afforded by the use of BROWN'S BRONCHIAL
TROCHES. These famous Lozenges are now sold by most
respectable Chemists in this country at 1s. 1d. per box. People
troubled with a hacking Cough, a slight Cold, or Bronchial
Affections, cannot try them too soon, as similar troubles, if
allowed to progress, result in serious Pulmonary and Asthmatic
affections.—Depot, 483, Oxford-street, London.

DR. LELIEVRE'S ICELAND MOSS
POULTICE (Patented) is exempt from all the incon-
veniences inseparable from Poultices made with Linseed or
Bread. These spots the linen bedding, and on the edges
rapidly ferment, giving a most unpleasant odour; and no de-
pendence can be placed on the quality and freshness of the
linseed meal. This New Poultice is instantaneous, for it is ready
in a few seconds. Sold retail by all Chemists.
Wholesale, RIGGOLD and CO., 82, Southwark-street, London.

THE EASTERN QUESTION: RECRUITS FROM SALONICA ARRIVING IN CONSTANTINOPLE TO BE CLOTHED AND ARMED.

THE EASTERN QUESTION: BUYING SHEEP FOR THE KOORBAN BAIRAM CEREMONY AT STAMBOUL.

EXHIBITION OF WORKS OF OLD MASTERS AT BURLINGTON HOUSE.

We continue from last week our comments on this collection. The Spanish school is further represented by Murillo's six canvases, in one of which (270), "Landscape and Figures," we are introduced to a class of subject this painter rarely treated. This landscape will attract the attention of connoisseurs not only by its singularity of subject, but by the neutral tone in which it is wrought. Illustrative of the florid decoration of Paul Veronese are four allegorical subjects, placed in the corners of the large gallery (95), (103), (115), (126), exhibiting the largeness of his style in the treatment of similar works. In the two pictures of the famous master of the Venetian school, from the Royal collection, is that vivid perception of personality and glowing tone of colour that gives to Titian the high place he holds in the world's art. "Portraits of Titian and Andrea Franceschini" (107), introduce us to the painter and his friend, a Grand Chancellor of Venice, in whose thoughtful face is marked the impress of the responsibilities of office. The colour of this picture, unlike the majority of Titian's works, is less contrasted in chromatic arrangement than usual, though its sombre yet harmonious tone well accords with the dignity and sentiment of the heads. The second example (111) will also repay examination. To the single work of Philippe de Champagne, a "Portrait of Jean Pierre Camus, Bishop of Belley and Arras" (134), we refer as a fine example of a master not commonly known as a portraitist, but who has here left a striking instance of lifelike treatment in the head of a remarkable man. The characteristics of Paris Bordone's work are seen in 112 and 113, as "The Holy Family" (67), by Bonifazio, marks the manner of its author. In Sir Antonio More's fine "Portrait of Sir Thomas Gresham" (62) the founder of the Royal Exchange stands before us with an orange in his hand, which fruit he introduced into this country. Not only is this work one of historic interest, but of great beauty in point of art. Also, by the same pencil, is the small "Portrait of a Lady" (166), equally valuable as an example of that date. Belonging to the same period, and remarkable for elaboration of detail, is the "Portrait of Queen Mary" (171), painted by Lucas de Heere, and lent by the Society of Antiquaries. The four Holbeins will well repay examination. Between the earlier, conscientious, style of Frank Hals, as seen in the "Portrait of a Dutch Lady" (35), and the later, meretricious manner of that master, evinced in 29 and 38, is the difference separating thought from mechanism. The first-named work, by its careful rendering of individual character, modelling of surface, and thorough completeness, is one of the finest portraits in the collection, and places Hals in a far higher position than all the showy dexterities of his subsequent style.

Rembrandt, whose grand portrait of himself, in the first room (32), strikes like a note of challenge to the English masters hung about it in that apartment, in the originality of genius created a medium of his own imagination, through which he viewed all objects, tinging them as the mood or moment prompted. His light and shade, at once the most systematic and most powerful, was largely aided by his technical practice of carrying richness of colour into depths of shadow. His darks glow like gems in gloom, flashing into fire as the first rays of light impinge their recesses. For the climax of effect he levies all the resources of his palette, heaping up tint upon tint, until, with prismatic harmony, the chords of colour are focused into one burst of dazzling brilliance. This portrait of Rembrandt (32), lent by the Marquis of Lansdowne, is an extraordinary work, even for the master hand producing it. The painter, advanced in life, is standing with palette and brushes in hand, heavy in stature and grizzled in locks, but with a keenness of gaze and power of touch revealed in the work, making it one of the finest of the many pictures for which he was his own model. In (130) the subject is subordinated to a study of light and shade and colour, and is within that category of his works wherein the realities of form are sacrificed to an ideal tone of illumination.

If in the art of a nation is contained the reflection of its life and spirit, our interest in the pictures of the Low Countries must depend rather on their treatment than their subject, which, though homely and familiar—nay, oftentimes vulgar—become invested with a lasting interest and beauty under the magic of their pencil. When the fashion to collect Dutch works was rife in this country a large number of the highest value found their way here; and those who are familiar with the treasures of this school at Buckingham Palace will understand how, under the example of the formation of that collection by his Majesty George IV., the fashion for the acquisition of such works became general through the land. In the present gathering, every department of their more familiar walk of art is well represented, whether portrait, landscape, genre, or still-life; and this less by the number of examples than by the high quality of those exhibited, as seen in such a work as her Majesty's contribution of the younger Teniers's "Village Festival" (52), which for all the qualities peculiar to this master is unapproachable. Apart from other merits of this work, a group of figures towards the mid-distance, on the right, is "put in" with such a charm of touch and clearness as to render hopeless the chance of its ever being surpassed. Other fine examples occur in 58 and 85.

"The Listener" (71), by Maas, is known as one of his most celebrated works; and the four subjects by Ostade are in his happiest manner. Terburgh, Mabuse, and Jansen are similarly represented, whilst Ruysdael, Van der Velde, and Hobbema, the latter especially in his "Landscape" (139), are equally fine. Cuyp, whose river scenes and dewy meadows have long since made him a favourite in this country, has no fewer than six pictures, the largest being "The Negro Boy" (133), so named from a black servant holding a horse in the middle of the picture; but for the most distinguishing elements of this painter's excellencies, Mr. Robert's two small contributions (76 and 78) take place of the others. Of the Ruysdaels, the "Forest Scene" (199) is the most agreeable, being less heavy and cold than his other works, and exhibits the detail of foliage as thoroughly well understood. Berghem and Both, whose pleasant sunny pictures are eagerly sought out in all collections of Dutch landscapes, are here represented by a choice of works their warmest admirers will appreciate. By Everdingen, Wynants, Wouvermans, and Paul Potter, whose cabinet gem (73) is a most delicious example of landscape pencilling, striking illustrations are ranged through the rooms. Of Van der Heyden, Backhuysen, Jan Steen, Eglog Van der Neer, Polemberg, and Slingelandt, characteristic specimens have been obtained, which, by their number and genuineness, render this exhibition an unusually favourable opportunity for the study of masters whose productions are amongst the most covetable riches of art.

In Gallery No. 4 is contained a large collection of early Flemish and Italian art, from the time of Giotto downwards. These specimens, obtained from the treasures of many well-known collectors, comprise examples of great beauty and rarity. Want of space alone prevents our detailed notice of them. We would, however, especially call attention to Fra Angelico's "Death and Assumption of the Virgin" (154) and

"Virgin and Child" (155); but to no work in the room will there attach so much interest for the general public as an "Ecce Homo" (158), taken from the house of King Theodore of Abyssinia at Magdala on April 13, 1868.

Referring to later English art, Sir David Wilkie and James Ward, R.A., are but feebly represented. Of George Stubbs, A.R.A., who eighty years ago was painting such works as the two here exhibited (256, 265), little is now known beyond his book on the horse. Bonington reveals in his little gems (4 and 5) the influences of foreign study; seaside freshness sparkles in Collins' (26); Crome and Cotman, of Norwich, the former in a "Moonlight" (14) and the latter in a "River Scene" (278), take their places among the great ones of our school. Two interesting features of old London are happily preserved to us by the faithful pencil of Samuel Scott, in his representations of Westminster Bridge in 1747 (254) and London Bridge in 1757 (292). Copley's spirited sketch for the "Death of Chatham," in the National Gallery, testifies to the power of a name now rarely met with. By Hoppner, the once-powerful rival of Lawrence and Owen, are portraits of Lady Darnley (253) and Lady Cunliffe (266). Zoffany's clever theatrical reminiscences (267 and 273) point to a style of subject now rarely attempted. Nathaniel Dance, R.A., and Francis Wheatley, R.A., exhibit the style of their day, now nigh forgotten. In the single canvas of Hogarth (17) we see a most exceptional instance to his general manner, which versatility few would anticipate. Coming to nearer times are Northcote and Burgess, Nasmyth and Havell. Nearer still is Etty, in his "Pandora Crowned" (258), a work of eight or nine figures, begun and finished in six weeks, exhibited at Somerset House in 1824, and bought by the President, Sir Thomas Lawrence. A small example only (3) of his early manner places the name of Mulready in the catalogue: and with that of Sir George Harvey, P.R.S.A., one of the most recent of "deceased" masters, we close our notes.

Mr. H. Weekes, R.A., from protracted illness, has resigned the Professorship of Sculpture to the Royal Academy.

The list of candidates for the Associateship of the Royal Academy, from which three will be chosen at the election on the 24th inst., exceeds one hundred in number.

LECTURES AT THE LONDON INSTITUTION.

HISTORY OF THE ENGLISH NOVEL.

Professor Morley gave, on Thursday week, his second lecture on the History of the English Novel, to a crowded audience. An abstract of the first lecture was given in our last Number. Alluding to Defoe, he said that he was really the founder of the modern novel, and in his works they had the first complete departure from the heroic style of the French romances. Then followed Swift, in whose stories there was the taint of insanity, which tinged all his works. Samuel Richardson's works were professedly novels. By his "Pamela" he earned for himself the distinction of being the originator of the modern form of fiction. Afterwards came Henry Fielding, who was a born novelist, and the greatest that England had ever produced, even to this day. In all Fielding's novels there was not one coarse expression introduced for its own sake or for the sake of raising a mean laugh; he always treated evil as evil, and coarseness as coarseness. Richardson's greatest novel was "Clarissa Harlowe," and there was no other work in the English language that took such a large hold upon the human heart. Fielding's "Tom Jones" was his greatest novel; he took all life for his theme, with its evil as well as its good—a high, noble spirit pervading it throughout. At heart it was essentially moral and pure, and was thoroughly earnest, and could be read by honest men and women to their advantage. In Smollett there was a good deal of vivacity and real spirit of fun; and "The Vicar of Wakefield" of Goldsmith was written in a charming style, full of true poetry, the incidents coming home to the hearts of men. After the "sickly sentimental" school, there came up a cynical style of writing. There undoubtedly was cynicism in Thackeray's writings, but there was also a childlike spirit, intended to represent to us the true spirit of humanity. In Charles Dickens they had the same generosity of feeling, with more of the emotional enthusiasm, and with a power to move to laughter or to tears. This emotional element was very strong in Dickens, and, perhaps, of all novelists he had had the most command of our tears and laughter.

HEALTHY HOMES.

Our last Number contained a summary of the first lecture on "Health Improvements in Great Cities," given by Dr. Richardson, F.R.S. The second and concluding lecture was given on Monday last. Dr. Richardson began by referring to the public interest that had been aroused on the subject, expressing his utter inability, for want of time, to reply to the mass of correspondence he had received. Further treating of his proposed model house, he said that the common practice of covering the walls with paper was a bad process in many points of view. It was cheap, it was sometimes pretty, it was convenient, but it was not conducive to health, while the paper itself sometimes gave off deleterious particles, and the paste with which it was held to the walls underwent organic decompositions in presence of damp, most papers holding dust, organic and inorganic. What was now wanted was a fabric that could be put up like paper, and that could be washed at any time, and so completely purified. In some parts of the house ornamental tiles might be used with great advantage; in other rooms an impermeable cement could be employed, and in others thin galvanised iron, the latter of which would prove exceedingly useful and durable, besides being ornamental. All walls which were porous and absorbed vapour were dangerous; they kept up perpetual damp, and often, while doing so, gave evidence of the fact. With regard to the fitting of walls for health's sake, Dr. Richardson criticised the decorative patterns used for beauty's sake, in which the same object or subject was manifoldly repeated. Such patterns produced a bad effect on the sense of sight, and through that sense on the nervous system, sometimes leading to giddiness and disturbance of the circulation. Equally bad were patterns which presented different pictures at different distances, and especially so were those which presented pictures of a disagreeable or repulsive character. In respect to the colouring of the walls, blue, green, rose-pink, and grey were the best colours to be used. The standard temperature of a room should be 62° Fahr. Men and women engaged in sedentary pursuits should begin the work of the day in this degree of warmth, and the diffusion of warmth should be so perfect that at all parts of the room the thermometer should indicate the same degree. All warming and ventilating should be from one centre into the room. To introduce cold air by doors, windows, and chimneys, in order that it might become warm in a room by the heat radiating from an open fire-grate, was to expend that air uselessly, to ensure draughts, to prevent the possibility of equable temperature, and to destroy warming and ventilation at one and the same time. The evils arising from gas the lecturer traced mainly to the escape of carbonic

oxide. He deprecated the use of gas under all conditions where ventilation was not excellent, and specially objected to its use in bed-rooms. Some improvements might be made in candles, but the great desideratum was the practical introduction of the electric light into household service. Science had provided all the elements of success for this introduction, and enterprise and capital were now only required to give to the house light as pure as that of the sun itself. In houses where water was stored there ought to be two cisterns at the upper part, one for the closet service and the other for drinking and other domestic purposes. In every properly constructed house there should be a room for the accident of sickness, a room that need not be useless at any time, but which in sickness would give every requirement, and which would isolate the sick in cases of infection. In conclusion, he contended that it was quite possible to make great cities as healthy as country places by removing the artificial plans and customs which, springing out of the barbarities of past ages, run counter to the interests of life.

THE PASSES OF THE BALKAN.

Colonel Evelyn Wood, V.C., C.B., Assistant Quartermaster-General, gave, last week, a lecture at the Prince Consort's Library, Aldershot, on the Passes of the Balkan and the Passage of the Danube. The chair was occupied by Lieutenant-General Sir Thomas Steele, K.C.B., commanding the division. Colonel Wood commenced his lecture by alluding to the principalities of Wallachia and Moldavia, and the important part they occupied in the present aspect of affairs, and more particularly the position of Bucharest and Jassy, two cities of considerable importance in the present crisis. Speaking of the province of Roumania, he said, although it had only a population of 4,000,000, it could easily supply double that number with food if they did not export, and in that case a Russian army of 250,000 men would have no difficulty in finding subsistence in that province. As to the difficulties of a Russian invasion of Turkey, the river Danube was the principal obstacle. On the left, or Russian side, it was approachable only by a long, low coast of muddy and marshy land, while on the right or Turkish side there was a precipitous and steep bank, which continued for many miles. The width of the river through the Turkish territory, too, varied from 1400 to 2000 yards, the depth differing according to the season. Another great obstacle to Russian invasion was the range of Balkan mountains, the passes in many cases being little more than footpaths, and the roads through Bulgaria being few and bad. The soil, however, is rich, and produces abundant crops; the meat supply also would be plentiful, owing to the difficulty of exportation. Colonel Wood then pointed out the natural advantages of Widdin, Silistria, and Schumla as fortresses, and the importance of the railway from Varna to Rustchuk, and quoted the writings of the late Sir John Burgoyne as an authority on the defences of Constantinople and its approaches. Comparing the relative strength of the Russian and Turkish fleets and armies, he said that Russian advantages were more apparent than real, but that if they could cross the Danube and the Balkan mountains they might advance on to Adrianople, and from thence to Constantinople.

MR. GLADSTONE ON TURKEY.

Mr. Gladstone, on Tuesday, gave a reading in the boys' schoolroom at Hawarden, founded on a work published ten years ago by Miss Muir Mackenzie and Miss Irby, entitled "The Turks, the Greeks, and the Slaves; or, Travels in Turkey in Europe." The right hon. gentleman, in his introductory observations, said he had always held, and had ever contended in Parliament, that the English nation and the Government of England had been already over-weighted by the amount of their foreign responsibilities, undertaken from time to time; and that, consequently, he had always regretted any measures, from whatever quarter they emanated, which tended to increase them. That was no reason, however, why we should shrink from our duties; and that England had incurred responsibilities with respect to Turkey, he could not deny. He disclaimed all intention of meddling with the political part of the subject, limiting his purpose to an explanation of the internal government and state of Turkey and the condition of the Christian provinces, which are placed under a system of government that has no parallel in Europe. Twenty years ago, he said, England and France undertook the Crimean War with a view to secure better government for the Turkish provinces, and a solemn engagement was made by Turkey to cease her oppression and to emancipate the Christians; but, instead of this pledge having been redeemed, it was now, twenty years after that war, found that the condition of the Turkish provinces was worse than ever. God in his mercy grant that the wisdom, patience, and courage of Christendom might apply an effectual remedy to this state of things.

The Lord Chancellor, in opening new coffee-rooms for the working classes at Bournemouth, last Saturday evening, pointed out the impediment presented by intemperance to the moral and material improvement of the country, and looked upon such institutions as being calculated to remove many of the temptations by which working men are surrounded.

The Bishop of Winchester presided, yesterday week, at a large meeting, at the Townhall, Farnham, for the purpose of listening to an address by Mr. Buckmaster on the educational work of the Science and Art Department. The Bishop urged on all persons the study of art, which, he thought, had made considerable progress during the past thirty years. Mr. Buckmaster referred to the large increase of night classes for instruction in science and drawing as evidence of a gradually improving taste.

Mr. Arthur Arnold gave a lecture at Hull, on Tuesday evening, to the members of the Literary and Philosophical Institute upon "Eastern Life and Manners." He said it was an interesting coincidence that this was the first day of the Mohammedan year and of the Mohurrem. He trusted that the year 1255, according to the reckoning of Islam, would, in its course, bring improvement in the condition of the Mussulman as well as the Christian subjects of Turkey.

Mr. Phear (late Judge of the High Court of Judicature, Calcutta) read, in the theatre of the Society of Arts, on Tuesday evening, a paper upon "The Employment of Natives in the Civil Service of India." Sir George Campbell presided.

Mr. Nelson, at the meeting of the Statistical Society, on Tuesday, read a paper, which gave elaborate and valuable statistics of the affiliated orders of friendly societies, the Odd Fellows and Foresters.

The newly-completed winter garden at Bournemouth (of which we gave an Engraving in our Number for Dec. 9), was opened, on Tuesday, by Sir Henry Drumm and Wolf, M.P., who, in the course of a short address, referred to the necessity of such a building in Bournemouth, which would pass away the weary hours of those in quest of health. After the opening ceremony there was a concert by a London company.

THEATRES.

OLYMPIC.

The commencement of the really dramatic season may now with comparative safety be formally announced; and it has been inaugurated at the Wych-street theatre by the return of Miss Ada Cavendish to its boards, with a new play. The title of the drama is "The Queen of Connaught." It is divided into four acts, stated to be dramatised from "the popular novel of the same name." The names of the dramatists are not given, though we understand that Mr. Robert Buchanan is one. If so, the present drama is a marked improvement on his "Corinne," which had the misfortune of a collapse so lately at the Lyceum. The conduct of the action is, on the whole, satisfactory, and the several acts are worked up to a climax. The action itself is of a melodramatic kind, consisting of small incidents capable of being worked up into stage effects, and being produced as such with considerable power and skill. The characters are, on the whole, well and accurately drawn; but the dialogue might have been more carefully written. There is in it little of poetical sentiment, and its eloquence is of a very colloquial kind. The style is rhetorical rather than natural, with but few happy phrases and very little imagery. The interest is of the old-fashioned kind in Irish plays, in which the national character is exhibited as deficient in civilisation, rude in manners, and altogether wanting in morality and obedience to the law. The story might have been attributed to any period of the history of Ireland; but we are gravely told that it is of a contemporary kind, and that there are "parts of Connaught which are still under proclamation, and where a special 'permit' is required to carry arms." The authors confess, however, that "few cases of violence have occurred during the last two or three years." The subject of the present play is a case of violence, and the incidents are all cases of violence, differing in nothing from those which frequently occurred some half century ago. Do the authors mean to tell us that Connaught has failed to partake of the general improvement in other places? Perhaps. For what says the story? That an Englishman married an Irish lady of the O'Mara family, who, on the score of her ancestry, is entitled to the honour of being called "the Queen" of the locality. Her husband is a man of wealth, and anxious to dispose of it in the improvement of estates in the neighbourhood and the general condition of the people. But the vulgar still adhere to their own ways, and prefer a mud hut to a decent house, the native bog to a deal floor, a hole in the bottom of the mud to a regular grate for containing a fire, and another hole in the top of the ceiling for the smoke to escape by, to a regular chimney. Mr. John Darlington (for that is the name of the hero), is disgusted, and still more so with the rude measure of hospitality required by ancient custom, making his residence a sort of public tavern. All these things are native to Kathleen O'Mara, whom he has married, and the lady is as much disappointed almost as her tenantry at the coldness of his manner and the fastidiousness of his taste. She wonders, indeed, why he cannot leave things as they are, seeing that the people would be contented and happy with them, and resist all attempts at their improvement. Warnings of their dislikes are given in abundance, but Darlington bravely despises their threats and remonstrances. A former lover of "the Queen," Randal Dooneen, encourages rebellion against his authority, and even plans his assassination, hoping for an ultimate marriage with his "widdy." This fellow has already sought to drown a peasant-girl whom he had promised to wed; but she is saved by Darlington, and in the last act comes forward to denounce the villain and exculpate the husband, who is supposed to have given up a kinsman to the law, seeking refuge in the castle and charged with manslaughter. It is Randal who was guilty of the meanness, not Darlington; and thus, in the end, Kathleen is made to see that her husband is a superior kind of person—one entitled to her obedience as a wife, and likely to reform the people resident on his estates. This notion of utilising the stage, by teaching from it the notions of political economy and giving the Irish a lesson in domestic morals, peradventure, merits encouragement, and is likely to receive it from the hands of an Olympic audience. The piece has been well mounted, and is, probably, as well acted as it can be. Miss Ada Cavendish distinguished herself as a declaimer in many passages of Kathleen, and acted the rôle throughout with evident care and precision. Mr. Neville, as the English husband, was quiet and characteristic, and won on the sympathy of the house. The part of Randal Dooneen was supported by Mr. J. A. Arnold, an American actor, who made in it his first appearance in London. Mr. Flockton made a point with Anthony Dunby, the homicide who sought refuge from "the Queen;" and an Irish servant by Mr. W. J. Hill stood out as a speciality, cool and collected and ready for any atrocity. The drama was received with approbation, and, on the fall of the curtain, the principal performers were called forward and vehemently applauded.

ROYALTY.

A new play, slight in subject and structure, was produced on Saturday. It is entitled "Happy Hampstead," and gives opportunity for a picturesque view of the well-known heath. It is meant as "a musical pastoral," in one act; the words by Mr. Frank Desprez, and the music by Mr. Mark Lynne. The story is founded on an advertisement in the *Matrimonial News*, signed Amanda, proceeding from a young lady who desires to marry a nobleman. Of course, it is responded to by the Marquis of Kentish Town, and a meeting is arranged to take place at the heath on Whit Monday. The noble lover assumes the disguise of a costermonger, and the lady appears as a housemaid, who attracts the notice of a policeman, who has an assignation with a cook. Here are some cross purposes, which have to be reconciled. The policeman proves too vulgar for the Marquis, and the costermonger too sentimental for anybody else. Accordingly, he throws off his disguise and reveals himself as the correspondent of the *hymeneal journal*. There is some humour in all this. Mr. Walter Fisher was the nobleman, Mr. J. D. Stoye Amanda's father, Mr. Charles Kelleher the policeman, Miss Ella Collins the cook, and Miss Rose Cullen Amanda herself. The dialogue is of the opéra-bouffe type, interspersed with songs, and is amusing.

OPERA COMIQUE.

On Monday there was a change of performance at this theatre. Mr. Byron's "Prompter's Box" and his burlesque of "Little Don Caesar" constituted the entertainment, which was favourably received. The comedy has been a little altered, being now reduced to three acts. Mr. H. J. Byron, in the character of Fitzaltimont, retains his hold on the sympathies of his audience and secures the humour of the situation. The part of Frank Bristowe is effectively supported by Mr. J. Maclean. The performers were recalled on the fall of the curtain.

We are informed that two of the savages in the Covent-Garden pantomime, illustrated in our last issue, were represented by Messrs. Harry and Charles Raynor.

MUSICAL PUBLICATIONS.

"The Organ," a theoretical and practical treatise, by Frederic Archer. (Novello, Ewer, and Co.). This is a work of special value to students of the "King of Instruments," compiled by one who is eminent as a performer thereon. The volume—although moderate both in dimensions and price—is very comprehensive in its contents, which are divided into seventy sections, comprising descriptions of the construction and mechanism of the instrument, hints as to tuning, and the remedying of small accidental defects; a large collection of musical exercises and pieces, directions for accompanying the Church service, and many other important features.

Among recent publications by Mr. Czerny, of Oxford-street, are some brilliant and pleasing pianoforte pieces, calculated to interest students in various degrees of advancement. "Tarabouka, Danse Mauresque," by Robert Beringer, is a characteristic piece, of moderate difficulty. "Resignation, Andantino varié," by A. Ergmann, is a pleasing, melodious theme, ingeniously amplified. "Figaro, Scherzo," by Karl Liebhich, although brief and easy of execution, has much brightness of character. "Silver Snowflakes, morceau de salon," by Gennaro Bisaccia, is very animated in its dance-like rhythm. Two songs, also published by Mr. Czerny, deserve favourable mention. They are: "Those that we loved long ago," an expressive setting, by Berthold Tours, of some sentimental lines; and "In vain from clime to clime," by Joseph Romano, in which there is good scope for declamation, the general effect being much heightened by the addition of a violin (or violoncello) part—ad libitum—to the pianoforte accompaniment.

CONFERENCE OF SCHOOL TEACHERS.

A conference of teachers was held, yesterday week, at the Merchant Taylors' School, Charterhouse-square—Dr. Lyon Playfair, M.P., in the chair. Mr. Oscar Browning, M.A., explained the object of the gathering. It was called together under the auspices of the Teachers' Association, which was formed two years ago for the purpose of uniting all classes of teachers together for mutual objects. Very shortly after its formation it was thought that the best way of doing this was by holding a conference of teachers in London, and the first conference was held last year at King's College, and was very numerously attended. During the last year Dr. Lyon Playfair had kindly consented to be president of the association, and the Bishop of Exeter, Canon Farrar, Dr. Hodgson, and Professor Meiklejohn, were vice-presidents. The president then delivered his address. He said the main object of the association was to improve the education of the country by raising the qualification of teachers. He pointed out that until comparatively recent times teaching and medicine had been a common occupation, but that since they had become separated the medical men had organised themselves into a strong body, while the teaching body, which was much larger in number, had not obtained a recognition of their profession due to the importance of their art; and the fault was their own, and not that of the public. If a profession of teaching arose means must be taken to secure the methodical training of the teachers. Heaven-born teachers appeared at rare intervals, and training was as much required as in any other profession requiring knowledge and experience. The bill introduced by Mr. Forster in 1869, in reference to the supply of teachers for endowed schools, was well conceived; but it would not be wide enough for the present day, and if it were reintroduced it would be required for all classes of teachers. Dr. Playfair stated, further, that he objected to one examining body; and he thought that while the standard of qualification should be rigid, and should not be uniform, the teachers should endeavour to resuscitate Mr. Forster's bill. There was a great necessity for a Minister of Public Instruction, charged with bringing into harmonious co-operation our numerous educational agencies.

The conference was resumed last Saturday morning—Professor Meiklejohn presiding. The first paper was read by the Rev. A. Conder, of Bognor, on the desirability of obtaining a joint systematic periodical examination and inspection of schools. In the discussion that followed, several speakers insisted on the importance of having as examiners persons of experience in teaching, and it was observed that it was not sufficient to make a good examiner that he should have received a University education. Sir Charles Reed mentioned that in the School Board for the London teachers always took part in the examinations. The next paper was by the chairman, on the Life of Dr. Bell, the originator of the Madras system of education. It was a most able paper, though it had to be curtailed in parts from want of time. At the request of several in the audience, the chairman consented to the publication of his paper in the *Journal of Education*. The Rev. F. Davies read a paper on Gymnasia, in which he urged the importance of introducing gymnasia into schools as a means of exercising all the parts of the body. A really good set could be fixed in an ordinary class-room about 16 ft. high for £15, and could be easily cleared away, only a few hooks remaining. He earnestly commended the subject to their attention, believing that it would be a happy day for the boys and girls of England when a gymnasium was considered as necessary as boiled beef or the first Latin primer. Mr. Storr said he did not think gymnasia would take the place of games, and he doubted also whether all teachers would like to learn the practice in order themselves to instruct their boys. The Rev. A. J. D'Orsay urged that lessons should never continue longer than fifty or fifty-five minutes. Also that boys should not be sent out to play immediately after the chief meal of the day. A lady in the audience urged that ladies' schools should have gymnasia, and Dr. Langley, in reply, remarked that it was not at present the fashion for ladies to attend gymnasia, and they must get rid of that impression before girls' gymnasia would be established. Dr. Oppler said there were very successful ladies' classes in connection with the German Gymnasium at King's-cross. Mr. Colbeck, of Harrow, said if only the difficulty of dress could be got over there were three games very suitable for girls, which could be played anywhere—namely, lawn-tennis, squash-racquets, and fives. They supplied not only plenty of exercise, but the one thing without which no game could be considered perfect—fun.

The conference concluded with votes of thanks to the Merchant Taylors' Company for the use of the hall, and to the secretaries, Mr. Browning and Mr. Storr.

It is proposed that an annual festival, under the title of the National Olympian Festival, shall be instituted for the purpose of centralising the various associations having for their objects the encouragement of intellectual and of athletic contests, so that the intellectual and the physical contest may be brought into the same arena. This festival would be founded on the same principle and with the same objects as the Olympic games. Prizes would be offered for essays, poems, musical compositions, choral singing, &c.; and for success in the various kinds of athletic games. But the highest prize would be awarded to him who should exhibit the largest general power.

PEOPLE IN NOVELS.

If you will take a copy of Mr. Mudie's list of recent works of fiction, you will find that it contains the names of something like six hundred novels, most of them in three volumes. Though it is not probable that all of these made their first appearance during the last twelve months, yet, if you add to their number that of the stories published in the scores of weekly and monthly magazines that contrive somehow to exist, the grand total will reach quite five hundred in the year—a dreadful fact in itself, but not the one on which we wish now to dwell.

How many characters does an average novel contain? Dickens, in his principal books, had generally a little over fifty, I think; but there are probably many less in the ordinary three-volume emptiness. Say that twenty-five is about the usual number; this will give an annual increase of over twelve thousand to the fictitious population of Great Britain—a fact over which one really cannot pass in silence.

Now, all these people are intended to represent genuine human beings, and a great many of them (especially in first attempts, of which there must be a large proportion in our five hundred novels)—a great many, no doubt, are meant for portraits of living individuals. Of course, there is a good deal of copying—some of it unconscious, some probably intentional—from books instead of nature; it is easier, for example, to imitate Trollope's talk (simple and lifelike as it is) than to watch, and condense, and reproduce in an artistic form the conversations of our friends; but, allowing for all this, English literature produces in a year attempts to portray as many existing or possible men and women as would fill a small town.

And the question that naturally suggests itself is, what sort of portraits are they? Putting them to the most obvious test, how often do we meet and recognise their originals, or people whose characters are essentially the same as theirs, and prove them to be honest likenesses or true imaginations? Further, when we meet these originals, do we find what was attractive on paper as pleasant in real life, and, vice versa, what we detected at once in a novel as hypocritical villany, altogether so disgusting in a casual acquaintance?

To these questions different people would return very different answers. Some readers are constantly meeting in the flesh friends from the dreamland of Mudie—the outward appearance of such guardsmen as Miss Broughton's is sufficient assurance to them of identity of character, a chance phrase or an eccentric gait brings before them one of the oddities of Dickens. Others, less hasty, recognise specimens of more natural types chosen by Thackeray, Balzac, George Eliot; perhaps one may say that they apprehend too clearly the impossibility of the natures put together for their puppets by most writers to be readily taken in by a superficial likeness to a commonplace type. Others, again, those really "constant readers" who get through their three novels a week with untiring regularity, appear to live in a hazy atmosphere in which neither the people in their books nor those of the outer world stand forth with any clearness: stories go in at one ear and out at the other, and by Saturday the opium-eater of fiction could not tell you the ingredients of Monday's dose.

But, assuming that we belong to the wiser second class of readers, have we ever met half a dozen people who might, beyond question, have been the originals of portraits in the collection of, say, five or eight thousand fictitious personages, great and small, with whom in a lifetime we have become acquainted? There is a good young man in "Pendennis"—name at the present moment forgotten, but he calls on Laura with Wagg one day—whom we have certainly met; a girl in one of Black's novels whom we know quite well, though her portrait is drawn with a spite almost feminine; and a family in "Daniel Deronda" to whose gush we have often submitted—it was much more bearable unwritten. Colonel Newcome, with variations perhaps not really important, we have known; and surely one Klesmer, at the least. Finally, to complete our half dozen (counting the Meyrick girls as one) we have long and carefully examined a flesh and blood replica of the hero of perhaps the greatest novel by any living writer—Hansel, in Auerbach's "On the Heights."

Not that these are one tenth of the people who have proved to us the possibility of characters in novels by general likenesses which perhaps single points of contrast made only more striking, but that at present we can recall no others who might actually have sat for portraits in Scott or Trollope, Auerbach or Balzac. We have certainly seen the brother of Mr. Lillyvick, the cousin of the Laird of Dumbiedikes, close connections of more than one of Mr. Trollope's bagmen, and somebody very very like the immortal Foker; while, to take a higher range, everyone must have known people near akin to the Dorothea of "Middlemarch," to Beatrice Esmond and to William Dobbin—almost ideal though the one is in beauty, the other in nobility and truth.

Heroes and heroines of the ordinary type we must confess that we have seldom encountered; and, as they are the most monotonous of people, and apparently spend all their time in making love or in being made love to, it is well that they do not abound. Yet we must acknowledge an undying fear that one day we may meet our pet aversion—Little Dorrit; one maiden exactly like her in appearance we do know, but she is in character very much what that young person ought to have been, and unfortunately was not.

En revanche, we have met various people who posed as Little Dorrit, and were no doubt worse than the original; but this is a widely-spread sin, for which that great creature, the Commonplace Novelist, is answerable. (Not that Dickens himself was a commonplace novelist, though his heroes and heroines were types of nothingness.) The number of young men and women who consciously "set up to be" romantic people from Lytton, or "Guy Livingstone," or Miss Broughton, would not be believed in a census; a smattering of literary taste has grievous things in the way of affectation and gush to answer for—though it does sometimes give an ideal, somewhat higher than would otherwise have been placed before them, to impressionable, uncultivated natures.

The original people in novels would not be quite so dreadful to talk to as these their imitations; but, with of course some bright exceptions, they would be very bad. Conceit, gush, and prosiness would be their leading faults; and, though none of these are actionable, they are a good deal more unpleasant, in an ordinary way, than faults which are. Stupidity, on the other hand, is nearly always made too amusing to be really stupid in books—it would be great fun to meet most of the fools of fiction; perhaps the only exception being that wonderful specimen of genuine, possible, and yet artistic dullness, the stupid lodger in Balzac's "Père Goriot."

Fancy, finally, if you can, what it would be like to meet any of Ouida's characters in private life! The supposition is unthinkable—it is too wildly impossible. Would they not look entirely absurd beside ordinary chairs and tables, windows and doors—not to say men and women? How would they behave at dinner, or afternoon tea, or an evening party? We should never know—for immediately at their appearance we should leave the room.

THE EASTERN CRISIS: TURKISH TROOPS PASSING THROUGH STAMBOUL.
FROM A SKETCH BY OUR SPECIAL ARTIST

seen, the Diplomatic Assembly may be credited with having effected.

There is another desirable result for which we are indebted to the Conference at Constantinople. It has cleared up a good many International perplexities, and brushed aside not a few International prejudices. The Powers represented at the Porte by their Delegates and Ambassadors have come to ascertain by mutual converse, much more clearly than they could have done by Diplomatic correspondence, each other's policy in relation to the Eastern Question, as well as the foundation upon which it rests. Points of jealousy may possibly be retained between some of them; but, on the whole, the shroud of mystery in which the question has long been involved has been removed, and its real difficulties have been laid bare. This is of immense importance as it respects the future. No temper can be so dangerous to a nation as that of sleepless suspicion. The proceedings of the Conference have, at all events, thrown a flood of light upon the problems to be solved in the East of Europe. We have come to know better what Turkey is, and what are the likelihoods of her regeneration. We can better appreciate now the policy of Russia, and measure the means which she has at hand for its realisation. We have been let into the secret of Austrian uneasiness, and have got a glimpse of the views entertained on this subject by Germany. Our own position has been made clearer to us than ever it was before, and there is probably no State of Europe which cannot see more distinctly than it was wont to do the momentous issues involved in the maintenance of the independence and integrity of the Ottoman Empire.

The Conference, as it has cleared up our outlook, so it has brought into more prominent relief our national duties. There are probably few men in the kingdom who can now be deluded into the persuasion that, whether by traditional policy or by national interests, this country is bound to stand by the Turk. There is now no ground for fear that England will be found fighting in support of the unutterable misgovernment of the Osmanli race. So far, good. Negatively, the question with which we commenced these observations answers itself. We know not what we shall do, but we know pretty certainly what we shall not do. We cannot tell what, under coming circumstances, might be right; but we can tell what would be wrong. The Eastern Question is not so settled even for the Porte as it may seem to be. Should the European Powers abide in concert, resolved that they will accept nothing less than they have proposed through the Conference, Turkey will be unable to bear up under the tremendous pressure which she has imposed upon herself. Time, which most communities require in order to recover themselves from internal disorganisation and weakness, will prove to be Turkey's direst foe. Perhaps, no fate more desperate could overtake her than that of being let alone. We confess, therefore, we are not over-anxious about the proximate future—not over-anxious to see what is called "the failure" of the Conference redeemed. The laws which superintend the government of mankind will assuredly, in due time, vindicate themselves, and perhaps the permanent settlement of the Eastern Question will be more effectually promoted by the issue of recent abortive diplomatic efforts than would have been the case had united Europe succeeded in imposing its will upon Turkey.

THE COURT.

The Queen received Lady Elphinstone (on her marriage), yesterday week, at Windsor Castle, she being presented by Lady Waterpark. Lieutenant-Colonel Sir Howard Elphinstone, with his wife, dined with her Majesty; and the next day Prince and Princess Christian of Schleswig-Holstein, the Dean of Windsor and the Hon. Mrs. Wellesey, and the Rev. Dr. Farrar dined with the Queen.

On Sunday her Majesty and Princess Beatrice attended Divine service in the private chapel of the castle. The Rev. F. W. Farrar, D.D., F.R.S., Canon of Westminster, officiated. The Hon. Lady Biddulph dined with the Queen.

The Duke of Connaught and Strathearn visited her Majesty on Monday, and remained to luncheon. The Earl of Derby had an audience of the Queen. Princess Beatrice went to Cumberland Lodge, and was present at an entertainment given by Prince and Princess Christian in honour of Prince Christian's birthday. Prince and Princess Christian, the Duke of Connaught and Strathearn (who was staying at Cumberland Lodge), Lieutenant-General Sir T. M. Biddulph, and Lieutenant-Colonel and Mrs. G. Grant-Gordon dined with her Majesty. After dinner Miss Robertson and Miss F. Robertson sang before the Queen and the Royal family circle.

The Queen, accompanied by Princess Beatrice, left the castle on Tuesday for Osborne. Her Majesty travelled from Windsor by special train over the Great Western and South-Western Railways, via Basingstoke, to Gosport, and embarked thence in the Royal yacht *Alberta*, commanded by Commander Fullerton, in the absence, from illness, of Captain Campbell, and crossed to Osborne, arriving there at a quarter before two p.m. The *Hector* is stationed off Osborne as guard-ship during the residence of the Court in the Isle of Wight.

The Duke and Duchess of Teck, with two of their children, Princess Victoria Mary and Prince Francis of Teck, paid a two-days' visit to the Queen at Windsor Castle, last week, and upon the occasion Prince and Princess Christian, the Earl of Carnarvon, and Major-General H. Ponsonby were included in her Majesty's dinner party.

The Queen has sent gifts of pheasants and other game to University College, St. Bartholomew's, and other hospitals, for the patients.

The following were the orders for the Court's going into mourning, on Sunday last, for the late Princess Charles of Prussia, sister to the Empress of Germany and second cousin to the Queen, viz.:—The ladies to wear black dresses, white gloves, black or white shoes, feathers, and fans, pearls, diamonds, or plain gold or silver ornaments. The gentlemen

to wear black Court dress, with black swords and buckles. The Court to change mourning on Wednesday last, and to go out of mourning to-morrow (Sunday). The Queen was represented at the funeral of her Royal Highness by the Earl of Dunmore.

Her Majesty will open the Session of Parliament in person on Thursday, Feb. 8.

THE PRINCE AND PRINCESS OF WALES.

The Prince of Wales, with his host, the Duke of Manchester, and a distinguished party, joined the hunt with the Cambridgeshire hounds yesterday week. The Princess of Wales, with the Duchess of Manchester, was present at the "meet," which was at Gaynes Hall. Excellent sport was obtained. On Saturday last the Prince hunted with the Pytchley hounds, the meet being at Oxendon. On Monday the Royal visit at Kimbolton Castle terminated. The Prince and Princess travelled by special train to St. Ives, where the state saloon was attached to an ordinary train. Their Royal Highnesses arrived at Wolferton at half-past six p.m., and drove to Sandringham. On Wednesday the Prince, accompanied by Lord Alfred Paget and other gentlemen, went to Eastwell Park, Kent.

The Duke and Duchess of Edinburgh were present, on the 12th inst., at a ball given by the officers of the 42nd Highlanders at Malta. The Duke and Duchess embarked on board H.M.S. *Helicon*, on Wednesday, for the Piræus, on a visit to the Court of Greece. The Royal children remain at Malta under the charge of the Hon. Mrs. Monson during their parents' absence. The Duchess has appointed William S. Playfair, Esq., M.D., to be one of the physicians-accoucheurs to her Royal and Imperial Highness.

The Duke of Connaught and Strathearn has during the week visited the Court and the Opéra Comique Theatres.

Invitations for Parliamentary dinners, on the 7th proximo, have been issued by the Premier, Earl Granville, and the Chancellor of the Exchequer.

FASHIONABLE MARRIAGES.

The marriage of Captain Henry E. Stirling Home Drummond-Moray (Scots Fusilier Guards), younger, of Blair Drummond and Ardoch, son of Mr. Charles and Lady Anne Home Drummond-Moray, with Lady Georgina Emily Lucy Seymour, third daughter of the Marquis and Marchioness of Hertford, was celebrated, on Tuesday, at St. Peter's Church, Eaton-square. A number of the non-commissioned officers and privates of the Scots Fusilier Guards belonging to Captain Drummond-Moray's company were present, each man wearing a bunch of violets in his button-hole. The bridesmaids were Miss S. H. Drummond-Moray, Lady Margaret Seymour, the Hon. Emily Ormsby Gore, Countess Feodore Gleichen, Miss Alexandra Seymour, Miss Lucy Hope, Miss Van de Weyer, and Miss C. Douglass. Mr. William Home Drummond-Moray, brother of the bridegroom, was best man. The bride, who was given away by her father, wore a dress of white satin, trimmed with Brussels lace, and a veil of the same lace over a wreath of orange-blossoms. Her jewels were pearls and diamonds. The bridesmaids were dressed in cream-coloured cashmere, embroidered in holly and juniper; badges of the Drummond and Moray clans, which were worked by Mrs. Elliott and pupils of the Ladies' Work Dépôt in Wigmore-street; cream felt hats, with the same badges in front, and cream feathers. Each wore a gold locket (given by the bridegroom), with the initials "H. M. G." in turquoises and pearls. The religious ceremony was performed by the Hon. and Very Rev. the Dean of York and the Rev. James St. John Blunt, M.A., brother-in-law of the bride. After the breakfast, at Hertford House, Connaught-place, where the Marquis and Marchioness of Hertford entertained about 150 guests, the bride and bridegroom left for Tetworth, Lady Harlech's residence at Ascot. Lady Georgina's travelling-dress was of grey serge, trimmed with chinohilla, and bonnet to correspond. The wedding presents were very numerous, including from the Queen an Indian shawl, from Princess Christian an antique silver box, and from Princess Louise of Lorne an antique silver tea-caddy.

The marriage of Lady Gwendolen Talbot, second daughter of the Earl of Shrewsbury, and Colonel Chaplin, M.P., took place, on Thursday week, at Ingestre church. The Bishop of Lichfield officiated, assisted by the Hon. and Rev. A. C. Talbot and the Hon. and Rev. W. Talbot, great uncles of the bride. The bridesmaids were Miss F. Ochetwynd, Miss North, and the Hon. Marion Thellusson, and the Hon. Evelyn Boscawen was best man. After the wedding breakfast at Ingestre Hall, the bride and bridegroom left for Alton Towers.

The marriage between Lady Theodora Grosvenor and Mr. Merthyr Guest is fixed to take place on Thursday, March 8, at Motcombe; and the marriage of Mr. Thomas Egerton Tatton to Miss Essex Cholmondeley is fixed to take place on Feb. 6.

A marriage is arranged to take place between Mr. Francis Gordon, youngest son of the late Lord Francis Gordon, and Miss H. Reid, second daughter of the late Mr. Rawson Reid.

THE CHINESE EMBASSY.

The Chinese Embassy, under their Excellencies the Minister Kwoh-Sung-Tao and the Assistant-Minister Lin-Si-Hung, with seven secretaries, attachés, interpreters, and twenty-two attendants, arrived at Southampton, on Sunday afternoon, by the Peninsular and Oriental steamer *Peshawur*, and proceeded to London by special train. The Embassy was accompanied by Dr. Macartney, of the Nanking Arsenal, who acts as English Secretary. Mr. Hillier, of her Majesty's Consular Service in China, who accompanied the Embassy as far as Alexandria, and then preceded their Excellencies overland, was delegated by the Foreign Office to meet them at Southampton and escort them to London. Their Excellencies were also met at Southampton by Mr. Campbell, Commissioner of Chinese Imperial Maritime Customs, and agent of the Chinese Government, by whom the necessary arrangements were made for their reception and residence in London. Their Excellencies reside for the present at 45, Portland-place. The wife of the Minister Kwoh, attended by three female servants, accompanied him to England.

At a general assembly of the Royal Academy of Arts, Burlington House, on Wednesday evening, Mr. Walter W. Oulless, Mr. Peter Graham, and Mr. Marcus Stone were elected Associates.

Pictures for the forthcoming season of the Crystal Palace Picture Gallery will be received at St. George's Hall, Langham-place, Regent-street (entrance in Mortimer-street), on Monday and Tuesday, Feb. 19 and 20, between ten and five.

Mr. Cross, the Home Secretary, on Wednesday, opened a new infirmary at Warrington, which has been erected at a cost of £8000, and endowed by Mr. Hatton with the sum of £10,000. The right hon. gentleman, who formerly resided at Warrington very warmly received. In a brief address, he pointed out that whatever differences of opinion might exist in this country on politics and religion, there were none upon the one great Christian principle of healing the sick.

THE CONFERENCE AT CONSTANTINOPLE.

As was fully expected last week, in consequence of the resolutions unanimously taken by the Grand Council of the Turkish Empire assembled on the Thursday, the Sultan's Government has refused to consent to the proposals of the Foreign Powers. So the diplomatic Conference is broken up, followed by the departure from Constantinople of all the Foreign Ambassadors, as well as the Special Envoys or Plenipotentiaries of their respective Governments. The Grand Council of the Porte was composed of 240 members, of whom fifty-four were Christians. Among the members present were the Armenian and Roman Catholic Patriarchs and the Great Rabbi. In the course of his speech Midhat Pasha, the Grand Vizier, referred to the threatened departure of the Ambassadors. Those of France and England, he said, had declared that their Governments would neither make war upon Turkey nor lend her any assistance. Austria was neutral, but it was to be feared that she would not be able to resist the demands of her Slavonic subjects. Only one dissentient voice, that of the delegate of the Armenian Protestants, was raised, it seems, when the Council passed the resolution rejecting the proposals of the Powers. At the close of the proceedings a vote of confidence was passed in the Government, and it was authorised to continue the negotiations, if necessary, on the basis of such proposals as were not in conflict with the Constitution.

The final meeting of the Conference took place on Saturday. On the assembling of the Plenipotentiaries Safvet Pasha read a note based on the decisions of the meeting of the Grand Council on the previous Thursday. In this document no notice was taken about the appointment of provincial governors, while with respect to the International Commission the note proposed to substitute an elective commission, to be presided over by an Ottoman functionary. All the questions relating to Serbia and Montenegro were reserved for ulterior decision. Lord Salisbury thereupon declared that the Conference must be considered at an end, the Porte having refused the two guarantees which were demanded of it. General Ignatieff spoke to the same effect, and expressed a hope that the Porte would not enter upon further hostilities against Serbia and Montenegro, but would cause the position of its Christian subjects to be respected. The Russian Ambassador further remarked that the members of the Conference had received petitions from the Christians of Macedonia, Thessaly, Epirus, and Crete requesting the Conference to occupy itself with improving their condition. It had not been possible to take these petitions into consideration, as the task assigned to the Conference was limited in its scope; but his Excellency was anxious to state the fact at the closing sitting of the European Plenipotentiaries.

All the Ambassadors requested audiences of the Sultan to take leave, but they were not received by his Majesty before their departure from Constantinople. The Sultan is said to have excused himself because he had the toothache.

The Marquis of Salisbury went on board the Austrian Lloyd's steamer *Ceres*, engaged for his departure, on Monday afternoon, but that vessel was prevented by the bad weather from leaving till next morning. Sir Henry Elliot left Constantinople on Thursday, having first received a farewell address, signed by a large number of the English and other foreigners resident there, and by many Turks. General Ignatieff's departure has been delayed by the illness of one of his children.

It is stated from Constantinople that the Porte proposes to carry out of its own accord all the reforms demanded by the Conference, and has sent to Paris for gendarmes in order to establish a sufficient gendarmerie, and to England for officials to institute reforms in the administration.

A Vienna correspondent says that Austria declines the request of the Porte to mediate between Turkey and Serbia and Montenegro, with a view to the conclusion of peace, and has recommended the Porte to treat directly with the Principality.

Our Special Artist at Constantinople sends two or three illustrations; one of them representing the Grand Vizier on his way from a sitting of the Conference. A portrait of Sultan Abdul Hamid II., in military uniform, mounted on a favourite charger, is engraved for our Extra Supplement. The illustration on our front page is a street scene in Stamboul, with the passing of a detachment of troops.

INTERIOR OF A DUTCH HOUSE.

This agreeable scene of domestic life is copied from one of the Dutch pictures, formerly belonging to the collection of Sir Robert Peel, in the National Gallery. Peter de Hoo, the artist, who lived in the latter part of the seventeenth century, is one of the most cheerful, pleasant, and natural painters. He delights in subjects which are homely, but not mean or vulgar; in well-furnished parlours and well-kept gardens, with comfortable, well-dressed persons; an orderly family, man, woman, and child, of the upper middle class, with a neat and contented maid-servant, perhaps lighting the fire, or bringing in something to eat or drink. He has a happy trick, also, of throwing in a gleam of sunshine through an open door or window, playing on the rich colours of a carpet or tiled floor, a velvet robe or coat, or the warm complexion of a healthy, animated face. Out of doors, in like manner, he knows how to light up a brick wall, and make its bright red hue, such a hue as the brickwork of that age commonly showed, set off the green vine-leaves, and other foliage of trailed plants, with very charming effect. In this simple view of a household interior and its occupants there is nothing to demand explanation. We should rather fancy the gentleman to be a visitor, receiving from the family, in the way of ordinary courtesy, a glass of wine and a pipe of tobacco, when he sits down for an hour of friendly talk.

A number of trade unionists met some of the junior clergy of London on Tuesday evening, when the principles of trades unionism were advocated, and their results from members' points of view were set forth.

With reference to some remarks of the peculiar rock scenery of the Yosemite Valley, in California, with the views of it lately published in our Journal, a correspondent wishes to invite comparisons on behalf of the mountain scenery of Bavelle, in Corsica, which can be reached within three days from London, by way of Marseilles. Mr. Edward Lear, the artist, has borne testimony to the majestic character of this Corsican scenery, "the tremendous mystery of its cloud-piercing towers and pillars of granite, with their sides riven and wrinkled into a thousand chaams, with pine growing in all their crevices and on all their ledges and pinnacles." They form a continuous chain, with lofty pinnacles or needles, rising sometimes to the height of 9000 ft. out of the surrounding dense masses of the Pinciaricchio forest, and exhibit the most brilliant varieties of colouring, from the effects of the atmosphere. A collection of water-colour drawings, by another artist, Mr. Van de Velde, of Holland, representing some of these sublime and beautiful views in Corsica, was lately to be seen in London.

"INTERIOR OF A DUTCH HOUSE." BY P. DE HOOGE.
IN THE NATIONAL GALLERY.

THE DARDANELLES AND BOSPHORUS.

The great political importance which is attached to the possession of Constantinople arises from its position commanding the passage between the Mediterranean and the Black Sea, through the straits dividing Europe from Asia. These straits are the Bosphorus, upon which Constantinople stands, and the Dardanelles, at the other end of the small inland Sea of Marmora, a hundred and thirty miles south-west of Constantinople. The Dardanelles, anciently named the Hellespont, have a length of nearly forty miles, from their western entrance in the Ægean Sea, near Tenedos, and the supposed site of Troy, to the small town of Gallipoli, where the Sea of Marmora is entered, and which was occupied by the British army at the outset of the war with Russia in 1854. Besika Bay, where our fleet has been lying at anchor several months during the late agitations and negotiations upon the Eastern Question, is on the coast of Asia Minor, not far from the outer entrance to the Dardanelles. One of our Engravings presents a general view of that entrance; it is accompanied by the two views respectively of the Castle of Europe and the Castle of Asia, old fortifications built on the opposite shores of the strait. Here the width of the strait is 4000 yards, and the extreme depth of the channel is fifty fathoms. It is considered that three points exist in the channel leading from the Sea of Marmora to the Mediterranean, the passage of either of which by a fleet without permission from the master of the shore

would be a matter of the greatest danger. The vessel navigating the Sea of Marmora arrives at the first constriction of Gallipoli Strait, opposite Tchardak. The width from Europe to Asia at this point is 3800 yards. The greatest depth of the channel, about the middle, is forty-six fathoms. About 51.3rd miles south-west of Tchardak we arrive at a point called the Narrows, between Killia Bahr on the European and Chanak Kaleh on the Asiatic coast. The extreme width at this point is 1460 yards. The bottom of the Channel declines, at first rapidly, and then more gradually, on each side, till it reaches a depth of fifty-three fathoms. This place is the key of the Mediterranean, as far as navigation to or from the Black Sea is concerned. The great constriction of the passage is the more serious (as far as any attempt to force it is concerned) from the plan of the channel, the axis of which in this locality, for about a mile and a half, lies directly north and south, thus exposing any vessel to both a sweeping and a concentrated fire from properly-arranged batteries. This central strait, that of the Narrows, is one that might be rendered absolutely impassable. While the master of Constantinople can bar egress from the Danubian Provinces as well as from the Black Sea, the master of the Narrows can bar not only these lines of maritime communication, but that of Constantinople also.

At the south entrance of the Bosphorus the total width is 1800 yards. From Seraglio Point to Leander's Tower it is only 1620 yards. For the greatest part of this width the depth does not exceed twenty fathoms; but a depth of thirty-four

fathoms is found to run through at about 400 yards east of Seraglio Point. It is evident, therefore, that the southern entrance of the Bosphorus can be readily defended by torpedoes, and the northern entrance by artillery, by any Power commanding the shore.

The superiority of the Turkish fleet and the works of defence erected in the Bosphorus and Dardanelles have prevented the possibility of a Muscovite capture of Constantinople by a sea attack. It therefore only becomes necessary so to strengthen the land approaches as to make Constantinople practically impregnable. And this could easily be accomplished. The Bosphorus can only be approached from the north by a narrow strip of land, in some places only twenty-three miles wide. If a line of works were erected across this strip, with its right resting on the Black Sea and its left on the Sea of Marmora, Constantinople would be secure. An admirable position exists, which is so aided by natural obstacles as to reduce the front to be defended to between seventeen and eighteen miles. This line extends from Lake Derkos on the right to the backwater of Buyuk Chekmege on the left. At Buyuk Chekmege there is a harbour, and the backwater—a mile and a quarter wide—guards for five miles the left of the position. The position then follows a range of hills commanding a broad and open valley, and offering every military advantage for purposes of defence, and eventually rests on Lake Derkos. Between Lake Derkos and the Black Sea the only approach lies by a narrow sandbank easily

THE BREAK UP OF THE CONFERENCE: THE GRAND VIZIER RETURNING FROM THE CONFERENCE.
FROM A SKETCH BY OUR SPECIAL ARTIST.

commanded by a single work near the village of Derkos. The railway from Constantinople runs through the left centre of the position, and there is sea communication on both flanks. There is abundant supply of water everywhere, and the country is peculiarly adapted for the encampment of troops. The proposed line of defence could easily be constructed by encamping troops along the position who would throw up the necessary works. Since the introduction of breech-loading arms, it has been proved that a front attack upon a strong line of well-defended works is practically impossible. In the proposed line both flanks would be secure, and communications would be open, and with an unlimited facility of supply. Thus a hostile approach to the Bosphorus from the north by land would be rendered impossible. It is evident that the narrow neck of land which connects the Chersonese with Roumelia, and which is only between three and four miles in width, and with anchorage close inshore for ships of war on both flanks, offers such facilities for the defence of the approaches to the Dardanelles from the north that this position may be considered as unassailable.

FOREIGN AND COLONIAL NEWS.

FRANCE.

(From our Correspondent in Paris.)

Thursday, Jan. 25.

The grand ball given by Marshal MacMahon at the Elysée Palace, on Tuesday night, and the production of Victorien Sardou's new comedy, "Dora," at the Théâtre du Vaudeville, have been the leading events of the week here; for the debates of the Versailles Legislature have scarcely presented a single important or lively feature. The failure of the Conference at Constantinople does not appear to have particularly alarmed Parisian speculators, for during the last few days the *rente*—both three and five per cent.—has been quoted at higher prices than it has ever previously attained, while the newspapers almost unanimously express confidence in the maintenance of peace. General Tcherniaeff, who arrived in Paris some days ago, has, of course, been interviewed alike by French, English, and American journalists; but his formal declarations to the effect that Russia will commence hostilities at the close of the coming month do not appear to have produced much impression over here, and the attention of the Parisians has easily been diverted from these Eastern complications to the ball at the Elysée and Sardou's new piece.

The grand fête given on Tuesday night by the President of the Republic proved a complete success. The Viscount d'Harcourt, *secrétaire de la Présidence*, had received no fewer than 23,000 applications for tickets, to the great majority of which it was of course impossible to respond favourably to, the number of invitees having been restricted to 5000. As it was, the salons of the Elysée were thronged with guests, and there was but little room available for dancing. The Marshal spent the greater part of the evening conversing with Prince Orloff and the Duc d'Aumale, while the Duchesse de Magenta, in a robe of white faille trimmed with garlands of flowers, held her court in the sumptuous *salon d'argent*, surrounded by the Princesses of Orleans and a bevy of Faubourg St. Germain belles. The orchestra, which was conducted by Johann Strauss, played a warmly applauded selection of the Viennese maestro's most celebrated waltzes and quadrilles.

M. Sardou's new comedy "Dora" was enthusiastically received by the public at its first performance on Monday, although it is vastly inferior to many of his previous productions. The plot is somewhat pretentious and complicated, but the leading incidents may be summarised as follows:—Dora and her mother, the ruined Marquesa de Rio-Zarès, are located in an hotel at Nice, where they find themselves unable to discharge their bill. A certain Van der Kraft, a political spy, offers them his services on condition that Dora shall become one of his employees and procure for him certain important information. Dora indignantly rejects the proposition, and she and her mother are eventually saved from their embarrassment by a young Frenchman, André de Maurillac, who offers Dora his heart and fortune. The two are married, and everything seems to presage a happy existence, when a certain Countess, of equivocal reputation, in the employment of Van der Kraft and in love with André, resolves to ruin Dora in her husband's estimation by abstracting from the latter's cabinet some important diplomatic papers, which she incloses in a letter Dora has had occasion to write to Van der Kraft. The letter is, of course, intercepted and opened by her husband, who discovers that it contains the missing papers. A dramatic scene ensues between André and Dora, the latter protesting that she is innocent in spite of the overwhelming circumstantial evidence. But the papers smell of musk, a perfume which Dora abominates, and to which the Countess is particularly partial. This circumstance attracts the attention of one of André's friends, who, after a series of clever stratagems, eventually unmasks and confounds Dora's jealous rival. There are a host of minor characters and incidents—some passably amusing; and the piece is capably put upon the stage—M. Berton, Diéudonné, and Parade playing the leading masculine parts; while the chief feminine rôles are admirably interpreted by Mesdames Pierson, Bartel, and Celine Montaland.

Following the example of the British Parliament, the Versailles Chamber of Deputies has decided in principle that a special committee shall be appointed to inquire into the numerous foreign loans contracted in France. This measure is principally directed against the Eastern States and the numerous South American Republics, whose creditors have been for so many years defrauded of their just claims.

Mr. P. Cunliffe Owen, the director of the South Kensington Museum and secretary to the British Commission for the Paris Exhibition of 1878, was formally received yesterday by the French Commissioners. Mr. Owen stated that the Prince of Wales would assume the supreme direction of affairs, hoping thereby to ensure an effective representation of the productions of the United Kingdom. In reply, the French Commissioner-General said that the acceptance of the post of president by the eldest son of the Queen, with the choice of so many eminent personages as members of the commission, would be regarded by the French as a solemn token of sympathy tending to strengthen the bonds of friendship uniting the two countries.

A Madame de Belcastel, wife of a nephew of the well-known Legitimist Senator, has been sentenced this week to a year's imprisonment for swindling. The husband, who after squandering his fortune appears to have abandoned his wife, is to-day a choriste at the Opera. Madame de Belcastel, having obtained employment from a leading Parisian *modiste* and *lingère*, has been disposing of goods entrusted to her at about half their cost price and pocketing the proceeds. Most of her *clientes* belonged to the theatrical world, and several leading actresses appeared to give evidence against her.

SPAIN.

Tuesday being the King's fête day, there was a review of the troops and the garrison at Madrid. At night there were illuminations and a ball at the palace.

General Moriones embarked at Barcelona, on Saturday, for the East, to assume the governorship of the Philippine Islands. The revenue for the last half year of 1876 shows an excess of two millions sterling over that of 1875.

ITALY.

In Wednesday's sitting of the Chamber of Deputies the bill for preventing abuses on the part of the clergy in the exercise of their ministry was adopted by 150 votes against 100. A grant for defraying the expenses of Italy's participation in the Paris Exhibition to be held in 1878 was also voted.

The Pope is reported to have had a fainting fit on Sunday, and did not leave his private apartment on Monday. On Tuesday morning, however, he gave an audience, the fatigue of which brought on a renewed attack of fainting. Subsequently some other persons were received.

Mr. Edward Freeman, Professor Max Müller, and Sir Henry Sumner Maine have been elected corresponding members of the Academia Reale dei Lincei in the respective departments of history, philology, and political science.

The Italian Geographical Society has decided to present its gold medal to Captain Nares.

GERMANY.

The German Emperor has assigned 4,430,000 marks from the part of the French war indemnity pertaining to Prussia for the transformation of the arsenal at Berlin into a hall containing a collection of objects "representing the glorious history of the Prussian army, and consequently of the whole Prussian people."

The Prussian Budget passed its first reading in the Lower House of the Diet yesterday week. In the course of the discussion Herr Camphausen, Minister of Finance, observed that he did not regard the future of the industry of the country as being more unfavourable than last year. The low rate of discount prevailing at the principal banks of Europe showed that there was unemployed capital everywhere. The enterprise which was repressed by the apprehension caused by the Eastern Question would return when that apprehension was removed, but he hoped that it would not again lead to swindling, but to a development of sound industry.

A reported outbreak of cattle plague in Germany is officially confirmed at Berlin, and the necessary measures for preventing its spread have been ordered by the sanitary authorities.

AUSTRO-HUNGARY.

We learn from Pesth that the Austrian and Hungarian Ministers had a conference, on Wednesday, of five hours' duration, at which the Bank question was the subject of discussion. Both sides manifested an earnest desire to come to an understanding. Another conference was to be held, on Thursday, at the residence of M. Tisza, which would probably be followed by a Crown Council, under the Emperor.

RUSSIA.

The Budget for 1877, as published by the *Official Gazette*, estimates the revenue at 570,777,802 silver roubles, and the expenditure at 570,769,280 silver roubles.

AMERICA.

In a Message which President Grant has sent to the House of Representatives, he defends the employment of troops in the South to preserve peace and protect voters.

The two Houses of Congress began, last Saturday, the debate on the bill of the Joint Committee for counting the Presidential votes. According to the Philadelphia correspondent of the *Times*, it was mainly through President Grant's efforts that the Committee reported the plan with such unanimity, and the President will use all the Administrative influence to secure the passing of the bill. On Thursday the Senate passed it by 47 votes to 17, and it seems pretty certain that the bill will be passed in the House of Representatives.

Proceedings have been begun by the Government against Mr. Tilden to recover alleged deficiencies in his payments of income tax.

It has been decided by the Western Union Telegraph Company to obey the summons, with which it had at first refused to comply, to produce the political despatches referring to the Presidential election before the Congressional Investigation Committee.

Mr. George F. Hoar has been elected United States senator for Massachusetts.

The will of the late Commodore Vanderbilt is published in the New York papers. There are bequests to the amount of about £3,000,000, but none for charitable or public purposes. The bulk of his fortune is left to his son, Mr. W. H. Vanderbilt. The total amount of property dealt with in the will is not stated, but the *New York Herald* says that it is estimated at between £16,000,000 and £20,000,000.

The Sioux Indians recently at war with the United States have passed over into Canada.

THE CAPE OF GOOD HOPE.

A telegram from Madeira, in anticipation of the incoming Cape mail, brings news from Cape Town to the 2nd inst. News had been received from the Transvaal that Secoceni was desirous of peace, and that Mr. Marensky, one of the missionaries, had been requested to negotiate with him. Sir Theophilus Shepstone had been detained on his journey, owing to an outbreak of disease among the waggon-oxen of his train. There was no further news respecting the movements of the Zulu King Cetewayo, who, according to a previous account, had been threatening to overrun the Transvaal with a host of armed Zulus.

INDIA.

From an official statement respecting the distress in Madras and Bombay which is sent to us by the India Office, it appears that in the former district there has been a small decrease in the numbers on the relief works and a slight rainfall, and that in the latter the situation remains unchanged. It is estimated that the number of persons to be relieved in Bombay in May will be 870,000.

A Calcutta telegram says there is no truth in the fresh rumours that it is intended to send an expedition to the Peshawur frontier. The military movements which may have given rise to these rumours are merely intended, it is said, to place the Government in readiness to act should circumstances render it necessary.

CHINA.

A telegram from Hong-Kong says that the German Minister in Peking is mediating between Spain and China with regard to the difficulties which have arisen in the matter of unsettled claims. The Spanish Minister has in the meantime returned to Peking.

It is announced that the Chinese Government has officially notified to the French Government that it will take part in the Paris Exhibition of 1878.

By a Royal decree published at the Hague, the importation and transport of foreign cattle, sheep, and goats in the Netherlands are prohibited.

Lord Derby has received a memorial, numerous signed by British subjects, complaining of the existence of brigandage in Sicily, and asking the Foreign Secretary to press this matter upon the attention of the Italian Government.

The Town Council of Stockholm has decided to create a new port for the town, with the necessary dépôts for storing bonded goods. A railway will unite the port with the town. The expense is calculated at about £120,000.

A gold medal, in commemoration of the great services which General Renard rendered to the Exposition d'Hygiène et de Sauvetage, at Brussels, has been presented to the General by a deputation of the subscribers at the communal school-house of Schaerbeek, a suburb of Brussels.

Intelligence from Mexico to the 16th inst. states that the whole of the Republic, with the exception of the State of Tinaloa and Chihuahua, was held by Porfirio Diaz. It is said that Iglesias has fled to Mazatlan, and that Lerdo de Tejada has sailed for San Francisco.

The French Army List for 1877 states that there at present 4 Field Marshals, 16 Generals of Division maintained on active service as having commanded in chief before the enemy, 96 other Generals of Division, 198 Generals of Brigade, 403 Colonels, and 20,120 officers of inferior grades.

According to *L'Union Médicale*, Professor Hendreich states that where the refuse was removed from the mines of Laurium the seeds of a glaucium, or poppy, had sprung up and flowered. The plant, which is described by Pliny and Dioscorides, had disappeared for fifteen or twenty centuries, and its reappearance at this interval is a fact parallel to the fertility of the famous "mummy wheat."

The sixteenth annual prize-meeting of the New South Wales Rifle Association took place near Sydney in November last. Nearly the whole of the competitions were with the Martini-Henry rifle, with which the Australian volunteers are armed. The targets, scoring, and conditions were Wimbledon, 1873. The silver medal of the National Rifle Association, entitling the winner to shoot for the Prince of Wales's Prize at the first Wimbledon meeting he can attend, was secured by Corporal Quantock, South Sydney, with the good score of 36 points out of a possible 40, in five shots at 500 and 600 yards. In the annual international match between teams of five bona-fide volunteers representing England, Ireland, Scotland, and Australia, the latter were the victors with 289 points, the others being in the following order:—English, 278; Irish, 276; and Scotch, 259 points. The conditions of the match were ten shots each at 500 and 600 yards.

POLITICAL ITEMS.

THE MEETING OF PARLIAMENT.

The following letter has been forwarded to supporters of the Government in the House of Commons:—"Dear Sir,—The meeting of Parliament has been fixed for Thursday, Feb. 8. Interesting debates may be expected, and I therefore take the liberty of requesting your attendance.—I have the honour to be, your faithful servant, STAFFORD H. NORTHCOTE."

Earl Granville and Lord Hartington have issued circulars to the members of the Opposition in the two Houses of Parliament, expressing a hope that they will find it convenient to be in their places at the opening of the Session.

The *Whitehall Review* publishes the arrangements for the opening of Parliament. The Queen will leave Buckingham Palace shortly after one o'clock in the Royal State carriage, drawn by eight cream-coloured horses which are used only for these occasions. With the exception of one carriage (that one immediately preceding the Royal equipage), which will be drawn by six black horses, all the other carriages will be drawn by the bays. The Sovereign will be accompanied by Princess Beatrice. Her Majesty, who, until the death of the Prince Consort, used to pass through the grand entrance of the House of Lords, will alight from the State carriage at the Peers' entrance, where the Queen will be received by the Deputy Lord Great Chamberlain (Lord Aveland) and the great officers of State.

Mr. Delahanty, the Home-Rule candidate for the county of Waterford, has been returned, having polled 1799 votes; Mr. Lehmann, the Liberal candidate, polling 534.

Mr. Gladstone, replying to an address from the Frome Liberal Association on Monday, spoke mainly upon the Eastern Question. Referring to the Conference at Constantinople, which, he feared, must be regarded as having failed, he expressed his firm belief that Lord Salisbury had done his best. As to any further proposals which might come from the Porte, nothing that Turkey could now present would be worth the attention of the other Powers, as she had rejected their recommendations. It was quite plain that Europe ought not to have made recommendations to Turkey unless the Powers were prepared to abide by them. The important question had now arisen—whether, when the Turkish Government had failed to redeem their promises towards their Christian subjects, they should continue to enjoy all the advantages of the Treaty of 1856, and hold us bound, by our blood and treasure, if necessary, to maintain their independence, when they had failed to render their equivalent in return. This country was under deep responsibility, and they should look to her Majesty's Government to tell them what would follow from the woful failure of the Conference. With respect to the wish conveyed in the address that he would resume the Liberal leadership, Mr. Gladstone said he hoped to be permitted to serve in the rank and file of the party under leaders who would do honour to it and to themselves.

Mr. Samuelson, M.P. for Frome, was entertained at dinner by the Frome Liberal Association on the same day. Mr. Le Gros, president of the association, occupied the chair. Mr. Samuelson, in returning thanks for the toast of his health, said he would have to assume the harness he had laid aside for the past three years. He thought the Liberal party had gained much since it had passed over to the Opposition benches. Adversity had welded it more closely together. They had had a great treat that day in hearing the greatest of living statesmen, and it was very kind of Mr. Gladstone to afford them that interview. He looked forward to the coming Session with much interest, because he hoped to ascertain whether the divergence between Lord Beaconsfield and Lord Salisbury on the Eastern Question was as real as it was apparent.

Mr. Briggs, on Monday, addressed his constituents at Blackburn, in the Exchange, which was densely crowded. In the course of his address, he denounced the fiscal, home and foreign policy of the Government, and said he was asked on an average once a day, "Do you believe that disestablishment is coming on?" He said from the signs which they had in any quantity around them, it was impossible to think otherwise.

Mr. Lowther, Under Secretary for the Colonies, speaking at the Sheriffs' banquet at York, on Tuesday, referred to the Eastern Question. The object of the country had been, he considered, the maintenance of British interests and the preservation of peace. It would be premature to assert that these ends had been attained. He denied, however, that the Conference had been a failure, inasmuch as it had been the means of clearing up many misconceptions and removing many illusions.

Speaking at a meeting held in Leeds, on Tuesday night, in advocacy of the United Kingdom Alliance, Mr. Barran, M.P., denounced the evils arising from the drink traffic, which he pointed out acted prejudicially to the trade of the country, which could not possibly prosper so long as so many millions annually were spent in intoxicating liquors. The meeting passed resolutions thanking Sir Wilfrid Lawson for his exertions in the cause of temperance and in favour of the Permissive Bill.

Mr. Colman addressed his constituents at Norwich. He said when Parliament met the Legislature and the country would want to know whether the unanimity of the Cabinet of which he had heard so much was with Lord Beaconsfield's Guildhall speech or with Lord Carnarvon's sympathetic utterances. It was certain that the country had resolved not to fight for Turkey. No more solemn issue than that about to come before Parliament had ever engaged its attention, and if England had to take further steps it would not be in an unrighteous war.

There were several meetings on Wednesday, the following being the principal ones:—

Three members of the Government—the Chancellor of the Exchequer, the Home Secretary, and the Vice-President of the Council—were present at a Conservative demonstration in Liverpool, and were heartily received by an immense audience. Letters of apology were read from Lord Beaconsfield and the Earl of Derby, who were unable to leave London in the present state of affairs. The principal speech of the evening was made by Sir Stafford Northcote, who, after defending the Government from the charge of having "frittered away" five millions of a Liberal surplus, proceeded to deal with the Eastern Question, remarking that it was essential for the interests of England that peace should reign, not because we were unprepared for war, but because our interests lay in the pursuance of a peaceful policy. The Government sympathised deeply with oppression wherever it existed, but there were limits within which they could not act with any hope of doing good. They had striven to ascertain their obligations and to act up to them. They had no unworthy jealousy of Russia, but had exercised their own judgment, and never had any intention to go to war on behalf of Turkey. The Turks, he added, had been ill advised to reject the propositions of the Conference.

Mr. C. S. Read addressed his constituents at Harleston. Referring to the Eastern Question and to the change in the policy of the Ministry at the dictates of public opinion, he contended that public opinion and the Ministry had changed because there had been a great change in the circumstances.

A new Liberal Association for the West of Scotland was formed in Glasgow. The meeting was thoroughly harmonious. The Liberals of the East of Scotland will follow this example.

At the annual meeting of the Bermondsey Conservative Association, speeches were made by Colonel Beresford, M.P., Mr. D. Straight, and other gentlemen upon the attempts made by Mr. Gladstone and his friends during the recess to thwart the foreign policy of the Government.

Mr. Wykeham Martin and Mr. Julian Goldsmid, the members for Rochester, addressed their constituents. The former, referring to the Eastern Question, spoke in qualified approval of the course taken by Government. Mr. Goldsmid, alluding to the proposal to separate Church and State, spoke in favour of disestablishment, but would not pledge himself to vote for it.

Mr. John Kynaston Cross, the Liberal member for Bolton, addressed his constituents. He said his great objection to Lord Sandon's new Act was the principle of indirect compulsion, a principle which he held to be false in theory and pernicious in practice. Alluding to the Permissive Bill, he observed that further restrictive measures would but increase the monopolists' advantage, and neither the public nor the publican would gain. The result of the Conference was a humiliating lesson for us. The end of Turkish rule in Europe might be some years distant, but it appeared inevitable, and happy would it be for Europe if it came quickly.

On Thursday week the Ipswich Reform Club was successfully opened by a soirée. Speeches were delivered by the Liberal candidates for the borough, Mr. H. Wyndham West, Q.C., and Mr. Edward Grimwade, and by other gentlemen.

At the Penistone Agricultural Society's dinner, yesterday week, Mr. Stanhope, M.P., referred to the large number of recruits who had joined the Army within the past few weeks. He thought it satisfactory that the Army had not been raised by conscription. The laws of this country, so far as its local forces were concerned, permitted of the ballot, but he saw no necessity for that in the future. Mr. Stanhope spoke hopefully of the Eastern Question.

UNVEILING THE BURNS STATUE.

The statue of Burns, in Glasgow, was unveiled on Thursday afternoon. A procession, estimated to number 25,000 strong, started from the green at noon. It was three miles long. Bands played, banners were waved, and the city bells rang. The procession marched through Irongate, Argyle, and Sauchiehall streets to George-square, where Lord Houghton unveiled the statue. The weather was splendid, and the day was observed as a general holiday. The spectators were estimated at 100,000.

In performing the ceremony, Lord Houghton said:—"To you the figure I am about to reveal will be nothing new or strange. It will be the recognition of a friend of your childhood, the greeting of one of whom the memory is ever fresh, and with whom your associations are ever dear. This, your friend and poet, will look with kindly and grateful eyes for generations to come on the faces of men who will traverse the busy streets of this multitudinous city. From him they will learn a lesson, hardly taught by the images of the leaders of armies or rulers of nations, yet one of which Scotland may well be proud. For, through his difficult, and, may be, faulty life, he never lost the manly endurance, the simplicity of manners, the spirit of fraternity he ever teaches to her sons, and which has enabled them to go forth conquering, and still to conquer, in the battle of material life, in the conflicts of intelligence and skill, and to spread to the farthest confines of our earth the name and fame of Robert Burns."

The Lord Provost, on behalf of the Corporation of Glasgow, accepted the statue.

At the meeting of the Royal Geographical Society, on Monday night, Sir Mordaunt Wells again introduced the subject of the arrangements at the "Arctic Expedition meeting" at St. James's Hall, at which the Prince of Wales was present, and gave notice of his intention to move on a future occasion that a committee of six Fellows, of not less than ten years' standing, should be appointed to investigate the entire subject of the exercise of patronage in the distribution of tickets for the meeting. Sir Rutherford Alcock said that the Council would make arrangements for the discussion of the motion either at the next meeting or at the anniversary meeting. The Rev. Dr. Muir then read a paper on Later Explorations in the Interior of Madagascar, giving an account of five journeys over entirely new ground by English missionaries in Madagascar during the last two years.

METROPOLITAN NEWS.

The London Athletic Club gave its second annual ball, at Willis's Rooms, on Thursday night.

The bill for constructing the new Tower bridge passed the standing order before Mr. Frere, the examiner, on Monday.

The annual ball in aid of the London Coffee and Eating House Keepers' Benevolent Association will take place, at the City Terminus Hotel, Cannon-street, on Wednesday, Feb. 7.

The poll in Aldersgate Ward for the election of a common-councilman in the room of Mr. John Staples, who has been elevated to the Aldermanic Bench, was closed on Wednesday, the numbers being—for Mr. Goodinge, 237; for Mr. Ellis, 141.

As a result of the recent inquiry respecting the Carlisle-place Orphanage the guardians of St. George's, Hanover-square, have passed a resolution entreating the Home Secretary to cause a return to be made of the rate of mortality in all institutions in London which receive infants.

The executive committee of the Mansion House Inundations Relief Fund, on Monday, decided that, as the money in hand (£8200) was sufficient to meet the claims upon them, they should cease to advertise for donations, although they would for the present accept any sums which the public might send.

At a meeting of the council of the Charity Organisation Society, held on Monday, the report of a committee of that body on the maintenance and instruction of idiots was considered; and a deputation was appointed to wait on the president of the Local Government Board on the subject.

Lovers of dancing will observe with satisfaction that the popular ball in aid of the funds of the Licensed Victuallers' School, in Kennington-lane, will take place at St. James's Hall, on Thursday next, Feb. 1. Adams's quadrille band of fifty instrumentalists has again been engaged, and in other respects the entertainment will be on the same liberal scale as in former years.

At the meeting of the Metropolitan Board of Works, yesterday week, it was ordered that General Sir J. E. Alexander should be informed, in answer to a letter from him, that the Board would place "Cleopatra's Needle" on the Embankment if the obelisk were brought to England. A new scheme of fire brigade superannuation was submitted, and, with some modifications, agreed to.

The opening meeting of the Society of Telegraphic Engineers for the current year took place, on Wednesday evening, at the Institute of Civil Engineers, Great George-street, Westminster, when the new president, Professor Abel, F.R.S., gave his opening address. It was mainly devoted to the bearing of chemical science upon the operations of telegraph engineering.

A report was presented at a meeting of the City Commissioners of Sewers stating that, during the past week, over 18 cwt. of meat, including ten sheep, five calves, twenty-six pigs, six quarters of beef, and twelve joints, had been seized at the markets and slaughter-houses, and destroyed as unfit for human food. Especial attention was drawn to the seizure of two consignments of bad meat from Russia.

In a recent lecture at the Society of Arts, Mr. G. C. Barsley urged the utilisation of railway cuttings and embankments as orchards. At present we are importers of fruit to the extent of six millions a year, and most of the two hundred square miles of railway slope would be found admirably suited for the purpose suggested.—At last Wednesday's meeting, held under the presidency of Sir Antonio Brady, a paper on Silk-worm Grain was read by Mr. B. Francis Cobb.

The weekly return of metropolitan pauperism shows that the total number of paupers last week (the third week of January) was 84,858, of whom 39,026 were in workhouses and 45,832 received outdoor relief. Compared with the corresponding period in the years 1876, 1875, and 1874, these figures show a decrease of 4129, 15,058, and 22,050 respectively. The number of vagrants relieved on the last day of the week was 728, of whom 556 were men, 148 women, and 24 children under sixteen.

A deputation from the Aborigines' Protection Society waited upon Sir Bartle Frere at the India Office, on Tuesday, and presented him with an address on his appointment as Governor of the Cape Colony. In reply Sir Bartle said that he should be exceedingly glad if he was allowed, during what remained to him of official life, to carry into effect the principle of entire justice to every class, race, creed, and colour. He trusted he should find it an easy task at the Cape to assist statesmen on the spot who had studied the question.

A banquet to Miss Helen Taylor, to celebrate her return to the London School Board for the division of Southwark took place, last Saturday evening, at the Bridge House Hotel—Sir George Campbell, M.P., in the chair. In reply to the toast of her health, which was proposed by Mr. Roebuck, M.P., Miss Taylor said she regarded the result of the election as showing the determination of the people of the metropolis that both boys and girls should receive a thorough and a liberal education. She pointed out the importance of allowing the intellect of girls in our schools to receive a fair share of development, for it was to the mental progress of the mothers that she looked as the most potent influence on human greatness. Among the other speakers were Mr. Stansfeld, Mr. E. J. Reed, Mr. James Heywood, the Rev. John Rodgers, and Mr. Sergeant Simon.

The winners of the prizes competed for by the 19th Middlesex Rifles during the past year received their rewards in Westminster Hall, yesterday week, from the hands of Colonel Lord Abinger, the commanding officer of the Scots Fusilier Guards, to which regiment they are attached. A new feature was introduced into the proceedings, the battalion parading to the strength of 429 of all ranks, in marching order, and being formed in eight companies for inspection by his Lordship. Lieutenant-Colonel Oxley was in command, and escorted Lord Abinger in his tour of examination, and on returning to the top of the hall, where the prizes were displayed in the usual manner, he gave a statement of the strength of the regiment, from which it appeared that the efficient at the close of the year were 747, out of an enrolled strength of 800. Since the end of October sixty-four new members had joined the corps, and they were altogether in a most satisfactory condition. Sergeant Lloyd received Lieutenant-Colonel Oxley's challenge cup, the regimental challenge cup, badge, and £10, and other prizes; Private Thomas secured Mrs. Holland's challenge cup and the club challenge cup; Captain Coish won the "Three Star" badge, and Private Ivory carried off the champion badge.

Under the auspices of Baroness Burdett-Coutts, the Duke of Norfolk, and some of the authorities of St. Pancras, the disused burial-grounds of Old St. Pancras and St. Giles's-in-the-Fields were, on Wednesday, dedicated to the use and recreation of the public for ever. In the afternoon a procession was formed at the Vestry-Hall in the former parish and went to the entrance gates of Old St. Pancras church, where they were met by the Rev. W. R. Arrowsmith, Vicar; Mr. P. H. Holland,

Government Inspector under the Burials Acts, &c. The company entered the church, where the Vicar offered up a prayer for the success of the undertaking in which they were engaged. The company then adjourned to the inclosure, where a plane-tree was planted by Mr. Churchwarden Watkins, who, in the midst of the roots, placed a bottle containing the Act of Parliament under which the ground was to be appropriated. Mr. Churchwarden Thornton planted a second tree at the extreme northern end of the inclosure, and others were placed in various parts. After the ceremony the company, to the number of nearly one hundred, adjourned to the Vestry-Hall, where an entertainment took place.—The vestry of St. George's-in-the-East, in reply to a memorial adopted at a public meeting, held about a year since under the presidency of the Rev. Harry Jones, the Rector of the parish, have converted a part of the parish churchyard and a disused burial-ground adjoining it into a public garden and recreation-ground.

Dr. J. Lawrence Hamilton, writing to the *Times*, from 31, Gloucester-terrace, Hyde Park, urges the following plea on behalf of our hospital inmates:—"Save for a sea of dreary whitewash, dull distemper, or cheerless paint, most of our hospital walls are completely bare and destitute of ornament. If a few philanthropists would each send a spare scrap of art now and again, something would be done to lighten the gloom of the sick ward. A hint in your columns ought to be sufficient to stimulate the munificence of many an art-collector, as also the liberality of painters in such a direction."—Mr. W. Collingwood Smith, who has already shown practically his sympathy with this suggestion, writes from Wyndham Lodge, Brixton-hill:—"To cheer the weary inmates of our hospitals by contributions of sketches, drawings, pictures, or prints, which many amateurs might give and artists could, out of their abundance, very well spare, is surely a duty which those who are blessed with health should render to their poorer and afflicted brethren. The suggestion of Mr. Lawrence Hamilton is an excellent one, and will doubtless be acted upon; and it would really aid, by its mental influence on the patients, those efforts which medical science already applies in the many noble institutions of our country. As an artist who has already given some thirty-five large, although rough, water-colour drawings to various well-known hospitals, I venture to suggest to my colleagues similar donations, which, although the merest clearings of the studio, and probably unvendable, may still be well adapted to the object in view."

A WEEK'S BIRTHS AND DEATHS.

There was a further decrease last week in the number of deaths from smallpox. In the two preceding weeks the deaths from this disease were 116 and 100 respectively; last week they declined to 79, of which 32 cases were certified as unvaccinated, 18 as vaccinated, and in the remaining 29 cases the medical certificates did not furnish any information as to vaccination. Distributing the 29 not stated cases in the proportion shown in the 50 cases stated as to vaccination, and assuming that 90 per cent of the London population have been vaccinated, it may be estimated (the Registrar-General says) that but one death from smallpox was registered last week among every 114,000 vaccinated persons, whereas the proportion among the unvaccinated was one death in every 7000 persons. Smallpox was therefore more than sixteen times as fatal among unvaccinated as among vaccinated persons. Of the 900 beds available for smallpox patients in the Metropolitan Asylum Hospitals 846 were occupied on Saturday last, against numbers increasing from 185 to 873 during the twelve preceding weeks.

There were 2747 births and 1491 deaths registered in London last week. Allowing for increase of population, the births exceeded by 205, whereas the deaths were 221 below the average numbers in the corresponding week of the last ten years. The annual death-rate from all causes, which in the three previous weeks had been equal to 22'6, 22'3, and 20'1 per 1000, was last week 22'0. The deaths included, besides the 79 from smallpox, 17 from measles, 42 from scarlet fever, 5 from diphtheria, 31 from whooping-cough, 18 from different forms of fever, and 18 from diarrhoea; thus to the seven principal diseases of the zymotic class 210 deaths were referred, against 253 and 214 in the two preceding weeks. These 210 deaths were 56 below the corrected average number from the same diseases in the corresponding week of the last ten years, and were equal to an annual rate of 3'1 per 1000. The fatal cases of measles, whooping-cough, and fever were less than half the corrected average weekly numbers. The 42 deaths from scarlet fever showed a marked increase upon those returned in recent weeks, although they were 16 below the corrected average. The 18 deaths referred to fever were 20 below the corrected average; 5 were certified as typhus, 10 as enteric or typhoid, and 3 as simple fever. Five deaths were caused by horses or vehicles in the streets.

The mean temperature was 45'5 deg., which was 8'7 deg. above the average.

REWARDS FOR SAVING LIFE.

At a meeting of the Royal Humane Society, held at the offices, Trafalgar-square, last week, several cases of saving life were investigated by the committee, which conferred the usual rewards. The bronze medallion was unanimously voted, with a suitable testimonial, to a little boy, twelve years of age, named Willie Francis, of Windsor, Nova Scotia, for saving the life of Stanley Beanson, who was in imminent danger of drowning in the river Avon, at Windsor, Nova Scotia, on Oct. 24 last. On the recommendation of the Lords of the Admiralty, the bronze medallion was also granted to John Payne, chief officer of coastguard, for swimming off with a line through the heavy surf to the rescue of Joseph Shield, who was in danger of drowning in a heavy sea near the Skerries coastguard station, Dublin, on the 2nd ult. The bronze medallion was also voted to Patrick Murray, a farm labourer, of Drumsberry, in the county of Cavan, for saving Patrick Owens and his sister, Mary Owens, from drowning in the river Drumsberry, much swollen by heavy rains. Testimonials inscribed on vellum and on parchment, recording the services rendered and the thanks of the society were also presented to Patrick Caulfield, for saving Mary Brown, who attempted suicide in the river Thames at Temple Stairs on Oct. 11; to Andrew Kavanagh, for saving Andrew Graham, who fell into the Grand Canal at Dublin on Nov. 20; to George Barker, for saving Emma Kiddle, a little girl, who fell down a well, at Sibley, Leicestershire, on Nov. 2; to Lieutenant J. W. Osborne, of her Majesty's ship *Narcissus*, for saving Marshal Mannard, of the same ship, who fell overboard at Woosung, Shanghai, on Oct. 18; to John Ellis, ordinary seaman of her Majesty's ship *Hercules*, for saving H. R. Saunders, who fell overboard off the port of Salsica, Turkey, on Nov. 20; to Edward Fulgar, also of her Majesty's ship *Hercules*, for saving James Miller, who fell overboard in Besika Bay on the 19th ult.; to Francis Kelly, of her Majesty's ship *Minotaur*, for trying to save Robert H. West, who fell overboard into the Tagus and was drowned on the 17th ult.; and to Isaac Evans, for saving Elizabeth Lloyd, who fell into the canal at Westpool on the 23rd ult. A pecuniary reward was also voted to Joseph Reynolds for saving A. H. D. Hare, who fell into the river Thames and was in danger of drowning at Hammersmith on Nov. 17.

THE CASTLE OF ASIA, DARDANELLES.]

THE CHURCH.

PREFEMENTS AND APPOINTMENTS.

Addison, Berkeley; to be Honorary Canon in Durham Cathedral.
 Bailey, James; Perpetual Curate of Abram, Lancaster.
 Balfour, W.; Vicar of Minsterworth.
 Barrett, G. W.; Precentor of Norwich Cathedral.
 Blencowe, C. E.; Vicar of Marston St. Lawrence-cum-Warkworth.
 Bliss, John Worthington; Rector of Ham.
 Booker, Arthur Wellington; Vicar of Sproston-cum-Saltby.
 Boyd, Charles; Rector of Princes Risborough, Bucks.
 Bromby, H. B.; Dean of Holart Town.
 Bruce, Lloyd Stewart; Coadjutor Rural Dean of Retford Deanery (No. 3).
 Burder, Frederick Gouldsmith; Perpetual Curate of Rowton.
 Coldridge, Samuel Fowning; Vicar of Ide.
 Cole-Webb, Charles Henry; Perpetual Curate of Ponsnett.
 Fernie, J.; Vicar of Wellington, Gwent.
 Fraser, Canon; Vicar of South Weald, near Brentwood.
 Freeman, E. P. W.; Rector of Clapton, Northamptonshire.
 Gray, B. H.; Rector of Wolsingham, Durham.
 Greene, Edward; Curate of St. Peter's, Bedford.
 Harrison, Francis Lupton; Vicar of Pannal.
 Henderson, H. E.; Vicar of Alwinton with Holystone.
 Holden, John Shuttleworth; Rector of Lackford.
 Hornbrook, S.; Curate of Thurham, Kent.
 Jeckell, Joseph John; Rector of Bilton-with-Conistone.
 Johnson, Edmund; Vicar of Wapley.
 Jones, Morgan; Rural Dean of Arnsley.
 Jones, W. W.; Vicar of Aberdare.
 Kerr, Saint George; Vicar of Stancliffe.
 Knipe, Thomas Venham; Perpetual Curate of Christ Church, Clevedon.
 Leeke, Edward Tucker; Canon and Chancellor of Lincoln Cathedral.
 Lewis, Evan; Canon of Bangor Cathedral.
 Lloyd, Joseph; Perpetual Curate of Llanpumpaint, Carmarthenshire.
 Lloyd, William V.; Chaplain in Ordinary to the Duke of Edinburgh.
 Lockwood, John; Perpetual Curate of Halton, Cheshire.
 Lumley, W. F.; Chaplain to Essex County Gaol, Springfield, Chelmsford.
 Lyttel, Edward Zechariah; Vicar of Woodville.
 Marriott, S. J.; Minister of Christ Church, Dudley.
 Mason, J. M.; Honorary Canon in Durham Cathedral.
 Matthews, John Ebsworth; Perpetual Curate of Swanwick.
 Meredith, John Blunt; Vicar of Kinnerley.
 Monk, Joseph; Vicar of Wollaston-cum-Irchester.
 Morgan, David; Rector of Gwytherin.
 Nixon, H. E.; Sole Charge of Binsted, Hants.
 Osborne, William Alexander; Rector of Dodington.
 Parker, Charles; Perpetual Curate of Botton Strange.
 Proctor, Aislabie, Vicar of Alwinton; Vicar of Dodington.
 Richards, David; Curate of Cardigan, Cardiganshire.
 Shalard, George Edward; Vicar of Easton-cum-Stow Longa, Hunts.
 Sharp, Henry Isaac; Twentieth Honorary Canon in Ely Cathedral.
 Treacher, J. S.; Vicar of Sandford-on-Thames, near Oxford.
 Whitby, T.; Vicar of St. Simon, Leeds; Vicar of Christ Church, Plymouth.
 Whitmore, Henry; Rector of Seabergam, Cumberland.
 Williams, William; Vicar of Llanuwchlly.
 Wilson, Robert Spedding; Rector of Stokely, Brune.
 Wood, John; Minister of St. Matthew's, High Town, Luton.
 Wyde, John; Vicar of St. Saviour's, Leeds.
 Yonge, J. E.; Rector of Hempstead with Lessingham.—*Guardian*.

It was announced at the annual meeting of the Leeds Church Extension Society, held on Wednesday, that nearly £57,000 had been promised towards the proposed fund of £100,000 for building churches in the borough.

Dr. Vaughan will resume his public readings in the Greek Testament on Tuesday, the 30th inst., and continue them for a fortnight, on Tuesdays, Wednesdays, Thursdays, and Fridays, at eight o'clock a.m., in the Middle Temple lecture-room.

The Revisers of the Authorised Version of the New Testament met, on Tuesday, in the College Hall, Westminster. Fifteen members were present, the Bishop of Gloucester and Bristol in the chair. The company carried their work nearly to the end of the tenth chapter of the Epistle to the Hebrews.

On Saturday morning the Bishop of London consecrated the new Church of St. Agnes, Kennington Park, which is capable of seating 1200 persons, and with the vicarage and schools, has been erected at a cost of £16,000. Mr. G. Gilbert Scott was the architect. The ceremony was followed by a luncheon, at which the Bishop presided.

Lord Cairns presided, on Monday, at the anniversary meeting of the Bournemouth branch of the Church Missionary Society, which had, he said, been instrumental during the greater part of the present century in bringing converts to the Church. He spoke at some length upon the responsibility of Christians aiding in the conversion of infidels.

The Bishop of Gloucester has issued his annual letter on diocesan progress. Referring to general Church matters, he says the attitude of the counter-Reformation movement now is deliberate opposition to the Royal supremacy.—The annual meeting of the Gloucester and Bristol Diocesan Association was held at Cirencester yesterday week. The Bishop presided, and, in expressing his approval of the proposal for the division of the diocese, said that, though enlarged powers and influence for good might follow an increase of the episcopate, that increase must be wise and sober, and proceed on the old lines.

The Bishop of Chester consecrated, last week, at the village of Moulton, midway between Northwich and Middlewich, a new church, which has been erected at the expense of the rector of Davenham, the Rev. T. France Hayhurst, and which, with the parsonage house, has cost about £5000. The land was given by Mr. Robert Verdin, of the Newbridge Saltworks, who has been erecting a large number of houses in the district. The church is built in the ancient English style, with open roof of red pine, and seats of stained wood varnished. There is sitting accommodation for about 300 adults and fifty children. The Rev. W. R. Hopkins has been appointed the incumbent. All the sittings are free.

The Rev. Arthur Tooth has declined to surrender the keys of St. James's Church, Hatcham, to the Rev. Mr. Chambers, the Curate recently licensed by the Bishop. The church consequently remained closed on Sunday. Mr. Tooth has been arrested for contempt of the Court of Arches, under the writ issued to the Sheriff of Surrey, and is now in the debtors' side of Horsefonger-lane Gaol.—A large meeting was held at Bristol, on Tuesday night, to hear an address from Earl Nelson on the Church of Our Fathers—a Call to Unity. His Lordship, speaking of the Tooth case, said he thought the position was not so dark as some believed, and he asked his hearers to pause before they gave up the Church as an establishment. Several speakers, however, followed, who thought if such persecution as that of Mr. Tooth was sanctioned by law the sooner the Church was disestablished the better. Enthusiastic cheers were given for "the Martyr Tooth."

The officers of the Coldstream Guards have caused a handsome window to be erected in Holy Trinity Church, Windsor, to the memory of the late Lieutenant-Colonel Harvey Tower, Surgeon-Major Wyatt, C.B., and the Hon. Alfred Charteris. The work has been executed by Messrs. Clayton and Bell.—A stained-glass memorial window has been erected in the east end of the chancel of Rushock church, Worcestershire, in memory of the late Rev. John Piercy, LL.B., many years Rector of the parish. The subjects are Christ with his Parents leaving the Temple and St. John taking the Virgin home after the Crucifixion. The window was executed by Mr. Baguley, of Newcastle-on-Tyne.—The east window of the new parish church of St. Mary, Newington, has been filled with stained glass, the lower portions of the five lancets representing incidents connected with our Lord's Passion, and the upper scenes associated with His glory. The artist is Mr. Bell, and the cost (about £700) has been borne by Mr. Arthur B. Bryer, of Kennington-park-road, who was born in the parish,

and has never resided beyond its limits. He has given the window as a thank-offering. Mr. Bell has also supplied glass for two memorial windows in the south aisle of the nave, which represent our Lord's triumph over death in the raising of the daughter of Jairus, and of Lazarus. Orders have been given to the same artist for four more windows in the same aisle.

THE UNIVERSITIES AND PUBLIC SCHOOLS.

OXFORD.

At New College, Mr. Alfred Minler, Scholar of Balliol, has been elected to an open fellowship, and Mr. John Baron Moyle, B.A., late Scholar of New College, to a Winchester fellowship.

At Corpus, Messrs. Cannan and Knight, from Clifton College; Lowry, from Eton; and Wallas, from Shrewsbury, have been elected to classical scholarships; and Mr. Watkin, from Manchester Grammar School, to a mathematical scholarship. Proxime accesserunt—Carden, Magdalen College School; Lott, Exhibitioner of Corpus; Olivier, from Tonbridge School.

Mr. Alfred John Parkman Shepherd, B.A., Tutor of Queen's, has been elected to a fellowship in his college.

Mr. John Quine, of King William's College, Isle of Man, has been elected to the vacant Mathematical Postmastership at Merton College.

Mr. Samuel Fry Bee has been recommended by the examiners for election to the vacant Dyke Scholarship in St. Mary Hall.

CAMBRIDGE.

Messrs. G. W. Hooker and T. R. Jones have been elected joint holders of an exhibition of £50 a year for three years, offered by the Worshipful Company of Clothworkers to non-collegiate students for proficiency in physical science.

LONDON.

The following are lists of the candidates who have passed the recent LL.B. examinations:—

First LL.B. Examination.—Pass List.—First Division: Andrew Giles private study; William Frederick Hamilton, private study; Arthur Oldham Jennings, private study; Frederick Charles Kolbe, B.A., University College; John William Percy, private study; Archibald Arthur Frankard, B.A., Worcester College, Oxford; Charles Alfred Russell, B.A., Gray's Inn and University College; Henry Arthur Smith, M.A., private study; William John Sparrow, B.A., private study; Francis William Steere, private study; Philip Fulliot Scott Stokes, B.A., private study; Stephen Horton Williamson, private study; John Kyme Wright, University College and private study; Howard Young, private study. Second Division: John Holden Clarke, Owens College; Eustace Conway, private study; Charles Johnston Edwards, private study; Hugh William Elcum, University College and private study; John William Evans, University College; Percy Ralph Evans, private study; Charles Henry Ernest Fletcher, private study; Frederick Joseph Mogg Gould, private study; Frederick Kilvington, private study; Walter Mills, Dursley Grammar School; John Ernest Moore, private study; Francis Robert Morrison, private study; William Percy Pain, private study; Dudley Stewart Smith, private study; William Henry Taylor, private study.

Second LL.B. Examination.—Pass List.—First Division: Clement Muecher Bailhache, private study; Robert Frederick Norton, B.A., private study. Second Division: Herbert Bentwich, University College; Henry Alleyne Bevel, University College; Fielding Clarke, private study; Robert Henry Cooper, private study; George Sydney Davies, private study; Angus George Milward McIntyre, private study; John Frank Rowe, private study; James Walmsley, University College and private study.

DURHAM.

The examiners for the first year in arts have issued the following lists:—

CLASS LIST.—In Mathematics and Physical Science.—Class I.: J. Morris, Hatf. Hall; F. W. Sanderson, Hatf. Hall. Class III.: R. F. Edwards, Univ. Coll. Pass List: E. Jesse, Univ. Coll.; A. L. Silvester, Univ. Coll.; —Snapp, Hatf. Hall. Recommended for second-year scholarship: J. W. Sanderson. Recommended for scholarships at admission: £70, J. B. Brown; £50, C. E. Baldwin, F. Pickup, equal. Recommended for exhibition at admission: £20, J. C. Evans.

The examiners for the first year and admission in theology have issued the following lists:—

First year: Bell, Hatf. Hall; Dent, Univ. Coll.; Horrocks, Univ. Coll.; Robinson, Univ. Coll.; Treviskis, unattached. Admission: Fisher, Harrison, Lawson, Neale, Pickles, Thwaites. Recommended for exhibition: £30, Pickles.

ROYAL MILITARY COLLEGE.

The following, in the order of merit, are declared by the Civil Service Commissioners to be the successful candidates at the Open Competition, held in December, 1876, for cadetships at the Royal Military College. Candidates marked thus (*) are eligible for commissions in the West India regiments only:—

Piper, John Crompton	Martin, E. H. de J. G. B.	Purdon, David Wm.
Raid, Herbert A. S.	Hunter, Charles R.	Ward, Arthur Henry K.
Mills, Edward William	Everard, A. A. N.	Ward, Charles
Henderson, Geo. F. B.	Owen, Henry Mostyn	Yelverton, Hon. B. N.
Gompertz, Alfred C. M.	Grosvenor, Saumarez F.	Widdows, James
Cambridge, Geo. T. P.	Luscelles, William J.	Robinson, Ralph S. P.
Cromie, Charles Francis	Baldane, E. H. V.	Lewis, B. G.
Strong, Sydney Philip	Rodwell, Ernest H.	Carnegy, Philip M.
Angelo, Frederick W. P.	Mayne, Clyde F.	Gordon, Arthur Neil
Young, Julian Henry	Hudson, A. T. P.	Griffith, Edward Hugh
Coxin, Herbert W.	Judge, Charles Bellew	Shipley, Mordaunt Lea
Burne, Robert Henry	Bayly, James	Caunter, James Eales
Boswell, William Leigh	Taylor, Henry R. M.	Thouiller, L. W. de M.
Ayle, Walter	Payne, Alexander V.	Humphrey, Stanley
Wilson, Henry F. M.	O'Donnell, Manns Lewis	Bruce, L. C. Knight
Hall, Henry Thomas	Tindal, A. Henry U.	Wood, Fred. Philip F.
Wrightman, Herbert V.	Doyle, Arthur H. J.	Evans, Horatio James
Priestley, F. J. B.	Burnett, James G. L.	Carr, Arthur Nisbet
Norton, Archibald	Thompson, Peter R. E.	Sim, Alexander D.
Garrett, John Raymond	Douglas, Cameron C.	Macleod, Alex. W. D.
Scotton, H.	Williamson, Edward A.	Williamson, Hugh E.
Rimington, F. W.	Gastrell, Everard T.	Newland, Edmund W.
Charley, J. F. W.	Cole, Robert Arthur	Harvey, William Lueg
Hodgson, G. B.	White (Hon.), H. F.	Morris, Henry Gage
Bright, Arthur T.	Martin, Herbert	Gould-Adams, H. J.
Gould-Adams, W. R.	Douglas, William	Sturges, William Eden
Astley, Bertram F.	Proby, G. N. A.	Young, Henry M'Leod
Gardner, Charles A.	Whistler, Albert E.	Sumner, Charles M.
Beecher, Andrew C.	Scott Moncrieff, W.	Allen, Walter Harding
Porter, George Adrian	Carden, Alfred	Vines, Charles James
Crawley, George E.	Hunt, Phineas W.	Warrander, John
Dundas, Lawrence C.	Govan, James Lorne	Churchward, P. R. S.
Des Vaux, Frederick H.	Cahusac, William F.	Wilkinson, Montagu G.
Bunbury, William E.	Percy William Francis	Warden, E. J. P.
Williams, Arthur L.	Shubrick, Henry T.	Middleton, William C.

The following, in the order of merit, are the names of the University candidates successful at the same examination:—

Campbell, Arthur C.	Hotham, Henry E.	Fort, Richard
Wolfe, Richard	Brine, Arthur	Coke, Hon. Wenman
Lee, Henry Cunliffe L.	Leigh, Henry Gerard	Maunsell, John D.
Colborne, Hon. F. L. L.	Jones, Walter Gerald	King, Richard Newton

The following Queen's cadets have passed a qualifying examination for cadetships:—

Davies, Wilbraham T.	Nicol, James C. W. D.	Tuite, Mark Antony
Hamilton, John F. C.	Spoor, Herbert H. S.	

The following Indian cadets have passed a qualifying examination for cadetships:—

Carruthers, George A.	Hunter, John Gunning	Rattray, Rullion Hare
Cockburn, Francis P.	O'Donnell, Hugh	Robertson, George H.
Cox, C. H.	Orman, Charles Edward	Silver, George
Forster, Henry James		

The following Lieutenants of Militia have passed a qualifying examination for commissions in the Army:—

Coke, Charles Henry	Scott, James Selby E.	Way, Claude Greville
Goddard, E. H.	Smully, Frederick P.	

The choir-house, in which the twenty choristers of Westminster Abbey will in future be lodged, was opened for their reception, on Monday afternoon, with an entertainment in celebration of the event, which was attended by the Dean, the Sub-Dean (Lord John Thynne), Archdeacon Jennings, Canons Duckworth and Farrar, the Precentor (the Rev. S. Flood Jones), the Rev. J. Troutbeck, the Rev. W. Harrison, the Chapter Clerk, and others. The proceedings commenced with an

address by the Dean, who, after stating the objects with which the Chapter had made this new provision for the choristers, gave them some kindly words of welcome and advice. The boys then admirably performed, under the direction of Dr. Bridge, a cantata, by Carl Reinecke, entitled "Little Snow-drop," the accompanying text, translated from the German by the Rev. J. Troutbeck, being read by him between the vocal numbers. Mr. W. Shell, who has for six years been the schoolmaster of the choristers, has been appointed, in addition, master of the choir-house. The Rev. J. Troutbeck, Minor Canon of the Abbey, will hold the office of Controller, which involves a general supervision of the education and management of the choristers.

NEW BOOKS.

COMMANDER CAMERON'S "ACROSS AFRICA."

The full and complete narrative, by Commander Verney I. Cameron, R.N., C.B., of his great achievement in African travel, has now been published by Dalby, Isbister, and Co. It occupies two volumes, with special map and numerous wood-engravings, some thirty of which are of the size of the page, and more than a hundred set in the text. The work is dedicated to her Majesty, by permission, and will be acceptable to a large number of her subjects, who feel rather proud of this remarkable overland performance of a British naval officer. We have already, at the time when Lieutenant Cameron came home, found much to say of his personal merits, his courage and fortitude, his perseverance, and the address with which he managed to make his way through strange or hostile barbarians, from the eastern to the western seacoast of Africa, in parts before unknown. The geographical importance of his discoveries, if not their political and possible commercial importance, has been appreciated by general opinion. It remains only to accompany his route, as described in these volumes, with a more exact attention to circumstances, and to details of time and place, for the better comprehension of his actual journey. The curious physical features of that vast country, and the habits of its different nations, whether savage or half-civilised, should also be noted by readers of his book.

Our readers will probably recollect that Lieutenant Cameron went out from England, towards the end of 1872, in search of Dr. Livingstone, whose fate or position was the subject of painful anxiety here. The preceding expedition of Lieutenants Llewellyn Dawson and Henn, with which also the Rev. C. New and Mr. Oswald Livingstone were associated, had given up the attempt, and it was not then expected that Mr. H. M. Stanley, the special reporter of the *New York Herald*, would be able to accomplish it. Lieutenant Cameron's party from Zanzibar, at the beginning of 1873, comprised three other gentlemen, two of whom, Dr. Dinton and Mr. R. Moffat, a nephew of Livingstone's, shortly afterwards died; the third, Lieutenant Cecil Murphy, turned back when the death of Livingstone was known. Cameron then resolved to go forward alone, or with his native followers only, and to explore the continent west of those newly-discovered lakes and rivers which were described by Livingstone.

This was at the beginning of 1874, when Cameron was at Unyamwe, 450 miles from the east coast, opposite the island and port of Zanzibar. From Unyamwe to Ujiji, on the shore of Lake Tanganyika, is 180 miles, tolerably familiar to Arab traders, and latterly traversed by several Europeans—Captains Burton and Speke, Livingstone and Stanley—but sometimes beset with impediments from the conduct of the native chiefs and the Arabs, jealous of other foreign visitors. The really new and important part of Cameron's enterprise began in March, 1874, with a boating cruise, and a minute survey of the shores, on both sides, along the southern portion of Lake Tanganyika. This occupied him to the end of May, and we hope that it will soon lead to good practical results in the navigation of that fine inland sea. It might easily be connected by tolerable roads, if not by a light railway, as Cameron suggests, with Mombasa or some other part of the seacoast. We are glad to see this week, from an official correspondence between Dr. Kirk and the Sultan of Zanzibar, that a road to Ujiji is now in contemplation. Lake Victoria Nyanza, and Lake Nyassa, should in like manner be placed in communication with the sea. The existing trade, conducted by Arab caravans from the coast to Tanganyika, is not inconsiderable in amount; though much of it, dealing in kidnapped slaves under the pretext of seeking ivory, must be sternly put down. There can be no doubt that it would pay well to open an honest and regular commercial intercourse with the ports of Lake Tanganyika. Cameron has done good service by correctly examining and describing its shores, which was the first part of his task. Tanganyika is 500 or 600 miles long, about 30 miles wide, and above 2000 feet deep.

The principal subject, however, of this interesting narrative, in a geographical point of view, is the exploration of Central Africa to the west of that interior chain of lakes and maze of winding rivers which Dr. Livingstone made known to us in his latest journeys. We gave some account of these, with a map designed from Livingstone's and Stanley's information, so long since as August, 1872. Livingstone's last journals have been published and commented upon, and he was proved to have been entirely mistaken in his notion that those lakes and rivers, Lakes Bangweolo, Moero, and Ulenge or Kamboi, with their main river bearing the names successively of Luapala, Lualaba, and Luvwa, were a source of the Nile. It had already been proved by Livingstone himself, in company with Stanley, when they went round the north end of Lake Tanganyika, that the Nile did not, through Lake Albert Nyanza, draw off any of the Tanganyika waters. The questions then remained, first, whether Tanganyika had an outlet, on its western side, into the lakes and rivers of the Lualaba system? and, secondly, whether all these waters, the drainage of the whole middle part of the continent, might not flow into the Congo, or some other large river of the Atlantic side? It is probably not too much to say that Commander Cameron has solved this twofold problem, by his successful journey "across Africa," from the western shores of Lake Tanganyika, to the Portuguese settlement of Benguela, on the coast of the Atlantic Ocean.

He did not think it needful again to go over the ground explored by Livingstone, the lakes of the Upper Lualaba and its tributaries. He travelled through the Ugubha and Manyema country to the north-west of his starting-point on Tanganyika, and reached, at the beginning of August, 1874, the Arab settlement of Nyangwe, north of Lake Kamirondo. This place may be regarded as the actual commencement of what is perfectly new to European travellers in the main achievement of Commander Cameron. His observations, however, of the different nations, those of Uvinza, Urundi, Kawendi, and Ufipa, on the eastern shore, those of Ugubha and Manyema to the west, around Lake Tanganyika, will be found curious and entertaining. They agree, in respect to the last-named people, with the descriptions given by Dr. Livingstone. We are the more impressed with a feeling of the enormous wrong and mischief done to these native African races by the Mohammedan slave-traders, who continually

instigate the chiefs of different tribes to cruel wars and depredations for the booty they make of defenceless women and children, after a merciless slaughter of the men. The desolating effects of this horrible system are felt nearly a thousand miles inland, as well as on the banks of the White Nile.

At Nyangwe, which is an important commercial mart for the Zanzibar traders, Cameron found a good friend in Hamed ibn Salim, who was often called "Tanganyika," from his acquaintance with that lake. This well-disposed Arab merchant lent him all the assistance in his power to continue his journey westward. He wished, of course, to follow the great river Lualaba, which is a mile wide at Nyangwe, taking the direction almost due west to an unexplored Lake Sankorra. But this he was forbidden to do, and was not allowed to buy canoes. He was obliged to go southward, into the Urua country, which is ruled by a native King, named Kasongo. The second volume gives an account of tedious negotiations with Kasongo, and of the intrigues of several persons about the Court of that Monarch, who greatly hindered Cameron's progress. One of these was a Portuguese half-breed, José Antonio Alvez, from Angola; another was his agent, Coimbra, of the same class, who was even a greater rogue than his master. On the other hand, Cameron again fortunately met a good fellow of an Arab, Jumah Merikani, who did him most valuable service. His enforced sojourn at Kilemba, the capital of Kasongo's country, till June, 1875, is related in several chapters. It gives a thorough insight into the corruptions of native government and manners, and the oppression of the poor people, caused by sordid and unscrupulous foreign visitors. Cameron was nevertheless compelled to endure the society of these dishonest rascals, Alvez and Coimbra, and to keep on civil terms with them, during the greater part of his journey to the west coast. Their party and his, with other people, formed a joint caravan, including a large gang of freshly-captured slaves, fifty women and girls tied together, some pregnant, or with babes in arms, often cruelly flogged. It must have been hard for our countryman to suppress his anger, and to refrain from an open quarrel with the ruffians into whose company he had fallen; but his only chance of getting on was by the opportunity their caravan afforded him. The reader will observe that both Alvez and Coimbra are frequently spoken of by the names which they bore among the natives, the former as "Kendelé" and the latter as "Kwarumba." They professed to be Portuguese Christians, but were in most respects worse heathens than any black men of Urua, and they made the chief, Kasongo, almost as bad as themselves.

The route pursued by this caravan from Urua, turning gradually from southward to westward, led the traveller through the Ussambi, the Ulunda, Lovale, and Kibokwe districts. He passed thus along the west side of the central mountain ranges, about the 12th degree of south latitude, and saw the head waters of the Liampye and other rivers flowing into the Zambesi. This region had never before, to our knowledge, been visited by an Englishman, or by anyone who could write a description of it. We must refer to Cameron's book for topographical details, and for the relation of his adventures and experiences, which must have been a severe ordeal to go through. He suffered greatly from repeated attacks of fever, accompanied with delirium, and leaving him, each time, in a more debilitated condition. When at length he arrived at Benguela, in November, 1875, after tramping five months continuously from the capital of Urua, his strength was all but exhausted. He was, indeed, very ill for many days, but got relief in time to save him. Having gone on by steamer to Loanda, where he was hospitably welcomed by Mr. Hopkins, the English Consul, he soon obtained conveyance to the Cape, and thence home to England. In April last, as our readers will remember, his return to this country was hailed with many popular expressions of regard, and with the praises he had fairly earned. A most creditable personal exploit has been followed by the production of a modest and truthful narrative, which we have perused with much satisfaction.

Exhilarating as it is to read so many, cheery, warmhearted a narrative as that contained in the pages of *The Two Americas*, by Major Sir Rose Lambert Price, Bart., F.R.G.S. (Sampson Low and Co.), something more than mere exhilaration is to be derived from the work. There is a great deal that will be new, interesting, and instructive to many persons; and the "notes on men and manners in North and South America," being those of a shrewd observer and a man of the world, who has seen men and cities and has served his country in many parts of the world, may exercise a salutary influence upon ordinary readers, although they may make but little impression upon the profoundly speculative moral philosopher. In the main, however, the book is "an account of sport and travel," and, from that point of view, it can hardly fail to meet with proper appreciation. It is illustrated, not profusely but sufficiently; and of the illustrations, as works of art, it may be truly said that they are forcible if not admirable, while, regarded as auxiliaries of the text, they are placed at so great a distance from the pages to which they refer that the arrangement, though open to a charge of eccentricity, occasions a not altogether unpleasant flutter of hopeful anticipation. There is little to make a reader do anything but yawn until the second chapter has been reached, and the author and his shipmates have "anchored in the harbour of Rio de Janeiro, the capital of Brazil;" but then, indeed, there is scarcely a page, commencing with the description of that magnificent harbour and ending with the story, in the last appendix, of General Custer's "disastrous expedition against the Sioux Indians," which is not well calculated to put a temporary stop to the laziest reader's habit of yawning. From Rio we are taken to Montevideo, and thence to Patagonia and Terra del Fuego, where much sport is encountered and shot, including a skunk, which, having been retrieved by our author's dog, and very unwisely taken on board the ship, causes dog, and vessel, and crew, and everybody, in spite of disinfectants, to be disagreeably odorous for days and even for weeks. It appears that the "Fuegians are mostly cannibals," and, to use the author's curious expression, look "upon Europeans not only in the light of enemies, but also as game," so that a highly-civilised English Baronet, having fallen amongst them, may experience the singular sensation of knowing that he is regarded by them as he would himself regard some wild animal that gives good but dangerous sport, and is much to be desired as a toothsome dish. It is melancholy to relate that, successful as our author was with his gun in those regions, especially in having a full hour's very fair sport afforded to both himself and a friend by a single streamer-goose which refused to say die, "the angler has no place for his calling in the lovely but deceitful waters of Patagonia." At Valparaiso the traveller is struck with the cleanliness of the streets; and at a railway station between Valparaiso and Santiago he fell in with what he had hitherto believed to be undiscoverable upon the face of the earth—a refreshment-room absolutely worse than any of ours, whether at Mugby Junction or elsewhere. In course of time we are taken to Lima, and there we become witnesses—though, fortunately, not eye-

witnesses—of a bull-fight, which, as it differs, partly for the better and partly for the worse, from its Spanish prototype, and has not been so often described, it was quite worth while to notice. The chief points of difference appear to be that, in the Peruvian edition of the brutal pastime, the horses are very good, instead of very bad, and are seldom or never killed by the bull, and that, when the bull has gone through the expected amount of torture, a dozen bulldogs are let loose upon the poor, paralysed beast to fasten upon him, tear him down to the ground, and literally eat him alive, "amid the frantic plaudits of the crowd," until he is at last "pithed" and "put out of his misery." The author is "happy to say that no ladies were present, and but a small sprinkling of women belonging to the lower classes." It is pleasant to turn away from this sort of so-called sport, make for Payta, cross the line, and watch our author as he takes a swim in his own hemisphere and accomplishes the feat of "turning a turtle." Soon we find ourselves at anchor "in the much-abused harbour of Acapulco, in Mexico;" and not many pages have to be travelled over before we reach San Francisco, in California. Meanwhile, we have, of course, seen a great deal of magnificent duck-shooting, observed the effect of tickling an alligator with small shot, gone on "a wild-geese chase," and had a "disagreeable encounter," besides paying attention to the author while he relieves his feelings "by abusing universal suffrage and priest-craft in South America and Mexico." Among the incidental remarks he makes is one which, coming from so experienced an authority, cannot but cause deep concern to smokers; for, speaking of the "cigar as sold by most of the tobaccoists and at half the clubs in London," he asserts his belief that not "one man in twenty in England has ever had a genuine Cabanna or Partegas even in his mouth." The Four-in-Hand Club and the Coaching Club have most to do with his declaration that the Californian drivers are the best "whips" in the world, and that "it is worth while coming all the way to California if only to learn what coaching really is." Messrs. Frank Buckland, Francis Francis, and the rest, are the proper persons to argue with him about the "Dolly Varden" trout. All Englishmen will rejoice, and probably all who are competent to express an opinion will not assent, at his cordial outburst of good feeling towards the officers of the United States army and towards that gallant American Commodore who, at the disastrous affair of the Peiho, found that "blood is thicker than water." Our military authorities should give heed to what he has written about the American "trowel-bayonet," both in his text and in his appendix; and most people will regret with him that the injunction of "De mortuis nil nisi bonum" should have been so grotesquely parodied, with their usual grim humour, by our Transatlantic cousins, into "No Injun is a good Injun until he is a dead Injun." As for his political opinions, it is sufficient to say that he is quite entitled, in a free country, to hold them; that they will commend themselves to those who agree with him; and that they are not likely to cause a revolution of sentiment among those who differ from him.

The importance of comparative mythology and of comparative philology is sometimes set too high, especially by persons who are inclined to put implicit faith in mythological and philological resemblance as a proof of ethnological affinity; but that there is considerable value in such publications as *Basque Legends*, collected, chiefly in the Labourd, by the Rev. Wentworth Webster, M.A. Oxon., together with an "Essay on the Basque Language," by M. Julien Vinson, of the "Revue de Linguistique, Paris" (Griffith and Farquar), nobody would dream of denying. It is a question, however, whether the value is commensurate with the extraordinary expenditure of time and trouble. But that is the affair of the laborious and industrious persons who undertake the collections. These "Basque Legends," then, are divided into seven different sorts. First of all, we have legends of the Tartaro, a one-eyed monster, resembling, so far as his singleness of eye and the insertion into it of a red-hot instrument are concerned, the classical Cyclops, but, as regards the possession of wits, a somewhat greater imbecile. Secondly, there are stories touching the Heren-Suge, or seven-headed serpent, wherein it is possible to discover something similar to our myth of St. George and the Dragon. There are two tales showing how the fox and the ass, respectively, outwitted the wolf and another animal called a man. Then come some stories about two nondescript creatures and about our old friends the fairies. A few poor legends of witchcraft and sorcery follow; and are succeeded by a great number of "contes de fées," for be it known that "fée and fairy are not synonymous." This class occupies no fewer than 115 pages out of the whole 233; and the legends are divided into two kinds, "those which have a greater or less similarity to Celtic legends, as recorded in Campbell's Tales of the West Highlands and elsewhere," and "those which we believe to be derived directly from the French." A group of "religious tales" is added, given "simply as specimens of a literature which in mediæval times rivalled in popularity and interest all other kinds of literature put together." And the volume is brought to a close with a learned dissertation on the Basque language, which, on the celebrated "Mesopotamian" principle, it may be a satisfaction to the general public to know, "is an agglutinate and incorporating language, with some tendency to polysynthetism." It does not appear, however, that anybody can tell us, either in short words or long, what is the real origin of the Basque tongue. To recur to the legends, it seems impossible to imagine that any human being can take any interest in them save for the sake of science or curiosity; and it is, therefore, sincerely to be hoped that the author's "fear" lest "scientific men" should be "disappointed in this collection" will turn out to be groundless. Certainly the pains taken to make a valuable book will have deserved a better fate.

In the third series of *Cameos from English History*: by the author of "The Heir of Redclyffe" (Macmillan and Co.), the period of time embraced extends from 1423 to 1523; and it has seemed good, so prolific were those years in events abroad, which were not only interesting in themselves but had a great influence upon England, "to cut Cameos from many a shell besides those provided from our native shores." While then, so far as English history is concerned, attention is occupied chiefly "with the wars of York and Lancaster, and the settlement of England after them," there is a great deal to be learned also about Alexander VI. and Savonarola, about the partition of Naples between France and Spain, about chivalry in Italy, with which may be connected the old story of Bayard and the lady and her two daughters, about Martin Luther and Wittenberg and Worms, about Leo X. and the Concordat of Bologna. In telling the tale of Lorenzo de' Medici's death, the author gives only the account which represents that Savonarola refused absolution to the dying man, because the latter refused, on his part, to make a certain promise which he could not possibly have performed. It might have been mentioned that there is another version, Poliziano's, of the scene at Lorenzo's death-bed, though which of the two is correct has never been clearly established. Whether it is advisable to take your history piecemeal, in disjointed fragments, with prominence

given first to one country and then to another, may be an open question; but, if it is, it can probably be taken in no more salutary, accurate, and pleasant form than in that of these "Cameos."

THE MEMDOUHIYE, TURKISH WAR-SHIP.

The new ironclad frigate *Memdouhiye*, which made her trial-trip, on Thursday week, over the measured mile at the Maplin Sands, has been built for the Sultan of Turkey, at Blackwall, by the Thames Ironworks and Shipbuilding Company. She is a sister ship to the *Mesoudiyé*, which was built at the same establishment in 1875. Her dimensions are—Length between perpendiculars, 333 ft.; extreme breadth, 59 ft.; depth, 40 ft. 8 in.; tonnage, British measurement, 5349 24-94; tonnage displacement, 9000 tons. The draught is 20 ft. forward and 24 ft. aft. The *Memdouhiye* is one of the central box-battery ships, built on the usual cellular system, and divided into eighty-two water-tight compartments. She carries on her sides armour-plating 12 in. thick, backed by East India teak of the same thickness, on an inner skin of an inch and a half; so that the total thickness of metal to be penetrated is 13½ in. The central battery, 153 ft. in length, is fitted with all the modern improvements for working twelve of Sir William Armstrong and Company's 18-ton wrought-iron guns. There are recessed ports, for getting nearly a direct fore and aft fire. The battery on the upper deck contains three 6½-ton chase guns, two at the bow, firing right forward, and one pivoted, so as to work either of two ports aft, one on each side the rudder. The armour-deck before and abaft the battery is covered with teak 4 in. thick, and all the openings in this deck are made watertight by means of sliding shutters. The *Memdouhiye* has a powerful ram-bow, the solid forging of which weighs twenty tons, and is backed by wrought-iron breast-hooks and framing, so as to make the ship herself a huge projectile. The chief difference between this ship and the *Alexandra*, now fitting out at Chatham, is in the disposition of the guns. Those in the *Alexandra* are placed in two batteries—namely, eight 18-ton guns in the main-deck battery and four guns in the upper-deck battery, two of these being 25-ton guns. In other respects, such as thickness of armour, teak-backing, and general construction, the ships to all appearance are exactly alike. The *Memdouhiye* is barque-rigged, and has two funnels. Her engines are by Messrs. Maudslays, Sons, and Field, and are of the ordinary description, with horizontal double piston-rod, working to 30 lb. pressure. The nominal horse power is 1200, and the actual capacity of working is said to be 7200-horse power. The two cylinders are each 116 in. in diameter, with 4-ft. stroke. The surface condensers, giving a surface of 16,500 square feet, are fitted with 8800 brass tubes, 8 ft. 6 in. long, having an internal diameter of three quarters of an inch. The aggregate length of tubing is about fourteen miles. The screw, which is four-bladed and otherwise of ordinary form, is fitted with the means of adjusting the pitch from 19 ft. 6 in. to 24 ft. 6 in. There are seven large and two small boilers fitted in the wings of the ship, with watertight bulkheads between them; and the forty furnaces, all placed amidships, are each 7 ft. 6 in. long and 3 ft. 6 in. wide, giving a fire-grate area of 960 square feet. In the boilers are 3600 brass tubes, 6 ft. 8 in. long and 3 in. diameter outside, the total heating surface being 22,500 square feet. Each of the two funnels has, in the uptake, superheating apparatus.

Amongst those present at the trial, last week, were Mr. Paul Gadban, the Turkish Consul-General in London; Mr. Peter Rolt, the chairman, Mr. Hayward, the manager, and Mr. Macrow, the naval architect of the Thames Ship-Building Company; Mr. Walter Maudslay and Mr. Joshua Field, of the firm of Maudslays, Son, and Field; Mr. George Duncan, Mr. Warrenner, and Mr. Sells, of the same firm; Mr. Dodd and Mr. Oliver, for the Admiralty; Mr. Hounsom, of the Chief Constructor's Department, who has inspected the building of the ship; and Captain Comyns, who is to take her out to Constantinople. The performance of the engines and of the ship was satisfactory; the mean speed attained was 13 7/8 knots, and the ship turned a circle of 400 yards in 4 min. 37 sec.

We find the following statement as to the present strength of the Turkish navy:—The ironclad fleet consists of fifteen vessels ready to take the sea, two of which are almost completed and two in course of construction. There are also fourteen monitors on the Danube and Lake Scutari. The fifteen ironclads comprise seven frigates and eight corvettes, all armed with Armstrong guns. Each frigate has a nominal strength of 640 men, but the actual strength of the crews is not more than 250 or 300. The nominal strength of the crew in each corvette is 219 men, but the actual effective averages from 120 to 160 only. In addition to this ironclad fleet of 130 guns and 33,618 horse power, there are the following screw-steamers:—Three vessels of the line for transport service, with 254 guns; five frigates, in good condition, with an armament of 208 guns; seven corvettes, fit for active service, with 100 guns; four schooners, with 16 guns, adapted for harbour service; and six yachts and eleven avisos (63 guns), which might be employed as cruisers. There are also four paddle-wheel corvettes, with 16 guns; three large cruisers, with 8 guns; three small yachts, useful as despatch-boats, unarmed; and twenty-two avisos, some of them very old, with a total of 64 guns. Turkey possesses five transports, with two and three guns each, and has at command twenty-nine vessels belonging to various navigation companies, some of them very powerful ships. The crews, and especially the officers, of the navy are very far from perfection.

Caradog, leader of the Welsh choir which three years ago won the £1000 prize at the Crystal Palace, has been presented with £310 at a dinner held at the Black Lion Hotel, Aberdare.

Mr. Shaw Lefevre writes to the *Times* that the number of persons who have money in the Funds is diminishing, those entitled to dividend having been for 1872, 237,616; in 1873, 233,749; and in 1874, 228,696. On the other hand, the holders of the French Rentes, which in 1871 were 1,269,739, had in 1875 risen to 4,380,933.

The Sketches of Prague, which appeared in our Journal three weeks ago, have given occasion to a letter addressed to us by Dr. J. Maly, an officer of the Prague municipality, chief clerk to the Poor Law Board in that city. He suggests that St. George's Church, an old building of Roman architecture, standing in front of St. Vitus's Cathedral, should have been included among the objects shown in our Illustrations. Some errors of detail are also pointed out by him in the description of Prague to which we referred, in a popular handbook of European travel. It should be observed that both the Old Town and the New Town, with the poor Jewish quarter, are situated on the right bank of the Moldau, or of the Vltava, as that river is called by the Czech native people of Bohemia; while the Hradschin, or precinct of the ancient Royal Castle, stands on the hill northward, above the "Little Town," on the left bank of the river. The military barracks are in the Old Town, occupying what was formerly the residence of King Vladislav, and there are no Royal Palaces in a state of actual ruin.

THE NEW TURKISH WAR-SHIP MEMDOUHIYE.

INDIAN SKETCHES: THE MODERN JUGGERNAUTH.

THE LATE MR. ALFRED SMEE, F.R.S.

We lately noticed the death of this gentleman, which took place, on the 11th inst., at his residence in Finsbury-circus. He belonged to a family long well known in the City of London, his father having for many years held the office of chief accountant to the Bank of England. He was born in the year 1818, and was admitted a member of the College of Surgeons in 1840. At the very early age of twenty-three he was elected a Fellow of the Royal Society on account of his researches in science, and more particularly in the department of electricity, which he had made from youth a special study. He held for many years the appointment of consulting surgeon to the Bank of England; and (it is said in "Men of the Time") that he was the deviser of the present system of printing the Bank of England notes. He was also extensively connected with the Gresham, the Accident Insurance, and other public companies. He stood one or two contested elections, in the Conservative interest, for Rochester, but without success. Mr. Smee was the author of several important works on "Electro-Biology," "Electro-Metallurgy," "The Principles of the Human Mind," "The Potato Plant, Its Uses and Properties," and of a large illustrated quarto volume, entitled "My Garden," in which he described the geology, topography, and leading features of the neighbourhood of Carshalton and Biddington, in Surrey.

The portrait is from a photograph by Grillet, of Naples.

A NEW JUGGERNAUTH.

It is very striking to see many of our Western inventions now in working order in India. The railway, the telegraph, and the steam-boat are all doing duty there; but there is something strange in their appearance amongst a primitive Asiatic people. When the India of this day is contrasted with what it was only a quarter of a century ago, it is as if a new generation of gods had come into

THE LATE MR. ALFRED SMEE, F.R.S.

the land. These great wonder-working powers of science and mechanism might, according to Hindoo ideas, be easily converted into deities. The idea of renewed avatars is a great principle of the Buddhist and Brahminical religions. The old gods have seen their day—they are used up, and must give place to another birth; and here is the new race of powers, beginning their rule, one may truly say, with an iron hand. Amongst these iron divinities which have so lately appeared is a very large one, lately to be seen at Bombay. It is furnished with heavy wheels, to crush whatever comes under it. This is its peculiar character in outward aspect, so that Juggernaut naturally comes to mind. The locomotive may be regarded as a new road-roller incarnation of that deity; but in this new birth of the god the crushing power, instead of taking the lives of fanatics, is devoted to a useful purpose. The Chinese have a proverb that "The smoother of a road is a benefactor of men." That beneficent operation is the attribute of this new Juggernaut. When he was first set at work, in November, 1875, smoothing the way for the entrance of the Prince of Wales, a crowd of Brahmans, Mohammedans, Parsees, and all the wide variety of creeds to be found in Bombay, would look on at the huge monster with curious wonder. There is an expression about these natives, of something like astonishment and fear, which is very closely allied to superstition; and it would not be a very difficult matter to get them to do "poofah" to such an object as this steam-roller. The old Juggernaut is not quite responsible for all the follies committed by his votaries, and it might be the same with this one. Only make the one false step and commence a foolish worship, and with such a susceptible race, so given to worship a visible object, the new Juggernaut might soon have to answer for wholesale self-immolation. The principle of "renewed incarnations" would again be vindicated. In our Artist's sketch of the scene at Bombay, one of the arches made for the Prince of Wales's visit is seen on the right hand.

LAW AND POLICE.

The Hon. Mr. Justice Manisty was entertained at dinner, at the Albion Tavern, Aldersgate-street, last Saturday evening, by the members of the Northern and North-Eastern Circuits, to celebrate his elevation to the Bench. A large number of the members of both circuits assembled.

The Court for the Consideration of Crown Cases Reserved has quashed the conviction by the Worthing Quarter Sessions of a publican who refused to supply with whisky a gentleman calling at refreshment-rooms with a St. Bernard dog which had the reputation of being savage.

The Court of Chancery has ordered the trustees to make good the amount received upon the insurance policy on the life of a Mr. Kingston which they had received in trust and subsequently permitted Kingston to hold, and he sold it.

In the Queen's Bench Division, on Monday, upon the application of Captain Parry, the chief constable of Derbyshire, a rule nisi was granted for a criminal information against the proprietor of a weekly newspaper for libel.

The Judges in the Exchequer Division have decided in favour of the Crown upon the question of the liability of the estate of Madame Gasquet to pay legacy duty. She was a native of France, but had resided in London for nearly forty years, with only one short break in 1853, when she visited her native country. Her estate was worth £8000. The Judges decided that the testatrix was domiciled in England, and that legacy duty must be paid.

Mr. Baron Pollock, with a special jury, yesterday week, tried an action brought to recover a sum of £296, the value of jewellery and other articles which had been lost at the Golden Cross Hotel, Charing-cross. The proprietor of the hotel denied any negligence, and contended that his liability would at all events, by Act of Parliament, be confined to £30. The property lost was contained in a dressing-case, placed with other luggage in the inner hall of the hotel, in front of the bar window. The jury found for the defendant, on the ground that he and his servants had shown no negligence, and that the plaintiff had contributed to his own loss by a want of reasonable care.

An action was tried by Mr. Justice Lopes, in the Common Pleas Division, last week, in which Mrs. Sterling sued Mr. Edmund Donaldson to recover a sum of £50. Both the plaintiff and the defendant were abroad, in 1870, in the exercise of the theatrical profession, and the former now claimed the amount mentioned as a loan advanced at that time. The defendant set up a counter-claim under an agreement for some performances at San Francisco, which, he contended, had not been carried out. The jury returned a verdict for the defendant.

The question whether the cutting of cocks' combs is an operation which should render the perpetrator liable to be prosecuted for cruelty was, yesterday week, argued before the Exchequer Division. Proceedings were originally taken before the magistrates at Sittingbourne, where the defence was that had the combs of the birds not been cut they would have won no prizes at a local exhibition. The magistrates dismissed the case, but the Judges of the Exchequer have decided that a conviction ought to have been recorded, as the act complained of was to enable the birds to be used for cock-fighting, which is illegal.

An action by the Rev. W. Clark, Head Master of the Derby Grammar School, against General Davison, for the cost of his son's schooling, resulted in a verdict for plaintiff, the jury expressing the opinion that every care was given by Mr. Clark to the morals and general conduct of the boys.

In the bankruptcy of Sir Capel Fitzgerald, Bart., it was stated that the Irish estates are expected to realise £30,000; and, as the bankrupt's debts are under £28,000, he passed without opposition.

The bankruptcy of Viscount Maidstone came before the Court last Saturday. The debts amount to about £24,000, one third of which is unsecured. The proceedings were adjourned for the accounts to be examined.

Mr. Edward Thomas Delafeld, who, some years ago, was connected with the management of the Royal Opera, Covent-garden, appeared on Tuesday in the Court of Bankruptcy, his liabilities, principally in respect of bills, amounting to about £3000. There were no assets available for creditors.

Sir E. A. Cunynghame, who was lately committed for trial for the Bow-street Police Court on a charge of conspiracy, died on Wednesday afternoon at an hotel in Covent-garden.

A young man named Blundell, who was lately an inmate of the Smallpox Hospital at Stockwell, was, yesterday week, fined £5 and 29s. costs, by the magistrate at Lambeth, for going from his home to the hospital by railway and by cab, without taking proper precautions.

That which is known as the "confidence trick" was again exposed at the Middlesex Sessions, on Tuesday, when sentences of eighteen months and six months' hard labour respectively were passed upon two men, who had been convicted of having practised it. Frederick Jennings, a mean scoundrel, whose practice it was to make the acquaintance of young women, to pretend admiration for them, and then to steal their watches and money, was convicted, on Wednesday, and sentenced to ten months' hard labour.—Monday next has been fixed for the hearing of the Slade appeal case.

NEW BOOKS AND PUBLICATIONS.

NEW and POPULAR NOVELS.
Now ready, at all the Libraries.
TWO LILIES. By JULIA KAVANAGH. Author of "Nathalie," &c. 3 vols.
DIANA, LADY LYLE. By W. HEPPWORTH DIXON. 3 vols.
HER PLIGHTED TROTH. By Mrs. ALEXANDER FRASER. Author of "Guardian and Lover." 3 vols.
GLENCRAIG. By IZA DUFFUS HARDY.
ONE GOLDEN SUMMER. By Mrs. MACKENZIE DANIEL.
HURST and BLACKETT, Publishers, 13, Great Marlborough-street.

LADY'S PEERAGE AND BARONETAGE
for 1877, under the special Patronage of her Majesty. Corrected by the Nobility, and containing all the New Creations. 4th Edition. 1 vol., with the Arms beautifully engraved. 31s. 6d., bound, gilt edges. Now ready.
HURST and BLACKETT, Publishers, 13, Great Marlborough-street.

THE ARGOSY for JANUARY now ready, containing the opening chapters of GABRIEL'S APPOINTMENT.

THE ARGOSY for FEBRUARY,
ready on Monday next, containing
GABRIEL'S APPOINTMENT.
Chap. 4, 5, 6. Illustrated by M. Ellen Edwards.
"Owen the Milkman." By Johnny Ludlow.
"Through Holland." By Charles W. Wood. With six illustrations.
And many other Contributions.

"The Argosy" is the best and cheapest of our magazines. "The Argosy" is one of the most delightful of the month. "The Argosy" is one of the most perfect of its kind. "Johnny Ludlow's" stories are almost perfect of their kind. **Third Edition of THE ARGOSY for JANUARY,** now ready, containing Contributions from Mrs. Henry Wood, Johnny Ludlow, &c.
THE ARGOSY for FEBRUARY also ready.
RICHARD BENTLEY and SON, 8, New Burlington-street, W.

MYRA'S JOURNAL OF DRESS AND FASHION. The cheapest and best Ladies' Journal in the World.
MYRA'S JOURNAL for FEBRUARY, including MYRA'S PARIS PATTERNS and MODELS, price 6d., 10 pages 2d., complete.
A superbly Coloured Fashion Plate of the Newest Toilets for Ladies and Children.
A full-sized Paper Pattern of a Double-breasted Paletot for a Little Girl.

EVERYONE WHO HAS A GARDEN SHOULD READ
SUTTON'S AMATEUR'S GUIDE IN HORTICULTURE.—This popular Guide to the Kitchen and Flower Garden now appears in a new form, and is devoted entirely to Gardening matters. The Seed List forming a separate book. It has been considerably enlarged, and is published in a convenient form for keeping as a book of reference. The articles on cultivation are invaluable. It is beautifully illustrated with coloured and other Engravings, and is the most complete and practical work yet published. The "Farmer" of Dec. 20, says:—"It would be difficult to find any work on Gardening more essential to Amateur Gardeners in fact, it may be described as a plain and easy guide to all who want to know. The instructions are at once clear, sound and complete. The 'Chrono-Lithograph' literally glows with beauty, and is a perfect work of high art."

SUTTON'S AMATEUR'S GUIDE IN HORTICULTURE may be had, post-free, for 14 stamps; and
SUTTON'S DESCRIPTIVE SPRING CATALOGUE AND PRICE CURRENT OF SEEDS, gratis and post-free.
Apply to SUTTON and SONS, The Queen's Seedsmen, Reading, Berks.

VALUABLE DISCOVERY FOR THE HAIR.

If your hair is turning grey, or white, or falling off, use "The Mexican Hair Renewer." For it will positively restore in every case Grey or White Hair to its original colour, without leaving the disagreeable smell of most "Restorers." It makes the hair charmingly beautiful, as well as promoting the growth of the hair on bald spots, where the glands are not decayed. Ask any Chemist for "Mexican Hair Renewer," price 2s. 6d. Prepared by HENRY C. GALLUP, 49, Oxford-street, London.

FLORILINE.—For the Teeth and Breath.
Is the best Liquid Dentifrice in the world; it thoroughly cleanses partially-decayed teeth from all parasites or living "animalcules," leaving them pearly white, imparting a delightful fragrance to the breath. Price 2s. 6d. per Bottle. The Fragrant Floriline removes instantly all odours arising from a foul stomach or tobacco smoke, being partly composed of honey, soda, and extracts of sweet herbs and plants. It is perfectly harmless and delicious as sherry. Prepared by HENRY C. GALLUP, 49, Oxford-street, London. Retailers everywhere.

GOLDEN HAIR.—ROBARE'S.
AUREOLINE produces the beautiful Golden Colour so much admired. Warranted not to injure the hair. Price 3s. 6d., 10s. 6d., or 15s. 6d., per Bottle. Wholesale, Messrs. HUXFORD and SONS, 5, Great Marlborough-street, W.; and Strand 35, City-road, E.C. London: Piraud and Meyer, 87, Boulevard de Strasbourg, Paris; 81, Graben, Vienna; 44, Rue des Bonnes Chartres, Brussels.

DOES YOUR HAIR TURN GREY?
Then use HERRING'S PATENT MAGNETIC BRUSHES and COMBS. Brushes, 10s. and 15s. each. Combs, 2s. 6d., 5s. 6d., 10s. 6d., and 20s. each. Pamphlets upon application.—6, Great Marlborough-street, W.; 38 and 40, City-road; and of all Perfumers.

NUDA VERITAS.—GREY HAIR.
restored by this valuable specific to its original shade, after which it grows the natural colour, not grey. Used as a dressing, it causes growth and arrests falling. The most harmless and effectual restorer extant. One trial will convince it has no equal. Price 10s. 6d., of all Chemists and Hairdressers. Testimonials post-free.—R. HOVENBACH and SONS, London.

BREIDENBACH'S WOOD VIOLET PERFUME, fresh as morning-gathered flowers, 5s. 6d., 10s. 6d., or 15s. 6d., per Bottle. Wholesale, Messrs. HUXFORD and SONS, 5, Great Marlborough-street, W.; and Strand 35, City-road, E.C. London: Piraud and Meyer, 87, Boulevard de Strasbourg, Paris; 81, Graben, Vienna; 44, Rue des Bonnes Chartres, Brussels.

JOHN GOSNELL and CO.'S CHERRY TOOTH PASTE gives a beautiful Set of Teeth, makes the Teeth of pearly-like whiteness, and protects the enamel from decay.—Of all Chemists and Perfumers, at 1s. 6d. per pot.

"FOR THE BLOOD IS THE LIFE."

CLARKE'S WORLD-FAMED BLOOD-MIXTURE is warranted to cleanse the Blood from all impurities, from whatever cause arising. For Scrofula, Scurvy, Skin and Blood Diseases, its effects are marvellous. In Bottle, 2s. 6d. each, and in Cases containing six times the quantity, 11s. each, of all Chemists. Sent to any address for 30 or 132 stamps, by the Proprietor, F. J. CLARKE, Chemist, Lincoln.

THROAT AFFECTIONS and HOARSENESS.—All suffering from Irritation of the Throat and Hoarseness will be greatly relieved by the use of BROWN'S BRONCHIAL TROCHES. These famous Lozenges are now sold by most respectable Chemists in this country at 1s. 1d. per Box. People troubled with a hacking Cough, a slight Cold, or Bronchial Affections, cannot try them too often, for they are so similar to lozenges, if allowed to progress, result in serious Pulmonary and Asthmatic affections.—Depot, 48, Oxford-street, London.

NEW MUSIC.

M. R. WILLIAM ABBOTT,

SWORN BROKER,

No. 10, TOKENHOUSE-YARD,

LONDON, E.C.

is able to give special advice as to the position and prospects of the following securities:—

SUBMARINE TELEGRAPHS.

TELEGRAPH CONSTRUCTION COMPANIES.

TRAMWAYS and LONDON GENERAL OMNIBUS.

RAILWAYS:—GREAT EASTERN; CHATHAM AND DOVER; and METROPOLITAN DISTRICT.

JOINT-STOCK BANKS and FOREIGN STOCKS.

Mr. Abbott invites correspondence from holders or intending investors in the above.

SUBMARINE TELEGRAPHS.

"We have received a 'Submarine Telegraph Map of the World,' accompanied by an 'Analysis of the Submarine Telegraph Companies of the World, December, 1876,' both by Mr. William Abbott, of Tokenhouse-yard. These appear likely to be of use to the general public, whether as employers of cable communications or as investors, and may also supply material for the statistician. The map is practically a new edition of a similar work published by Mr. Abbott some years ago, and its vastly-increased number of lines show at a glance the great development of electric communication. It shows both existing and projected cables by land and sea, its most conspicuous features being, of the accomplished lines, the plexus of nerves between Ireland and Newfoundland, and of those remaining to be laid down, the projected communication between Juan de Fuca Station, on the Pacific Coast (at the junction of the British and United States territories, North America, and Vladivostok, East Siberia, via the Aleutian Isles and North Japan. The land line already existing from Nicholas, on the East Siberian Coast, to St. Petersburg, attracts the eye almost as much as this gigantic undertaking, stretching as it does across the icy wilds of Northern Asia for some 110 degrees—a distance sufficiently formidable, without receiving a fictitious increase from the projection of the map (Mercator's). The other projected lines (all submarine, according to the map) are between Vladivostok and Yokohama; Hong-Kong and Manila; Singapore and Norkanton, North Australia; Brisbane and the Fiji Isles, via New Caledonia; Aden to Natal, with branches to Zanzibar, Mauritius, and Bourbon; the Cape de Verde Isles and Bathurst, Senegambia; and from Venice, down the Adriatic, to Durazzo, on the Albanian coast, opposite Brindisi."—The Field.

"This is a useful map for those who wish to keep before them a view of the world's telegraphic communications, and must have cost considerable labour to compile. It is accompanied by a tabular statement of each Telegraph Company, and will probably help to furnish all counting-houses."—Vanity Fair.

JOINT-STOCK BANKS.

"Following the valuable and carefully compiled tables, published half-yearly by Mr. William Abbott, we find that on balance the ten banks which may be considered specially London institutions, and whose accounts are made up to the end of June, have an increase on their deposit and current account balances amounting to £1,320,000. There is so far, therefore, no sign that the country has been suffering to the extent people say. It should not be forgotten, however, that this increase is capable of another reading. It may mean, and to some degree does mean, that the customers of banks have not the same use for their resources which they had six months ago, and are therefore driven to let their balances run up at their bankers, because they do not know where to employ the money. But if this were so to a large extent we should at once find an indication of it in the increased balance of idle cash which the banks must show, for, if customers cannot employ money profitably, neither can the banks themselves. . . . A small trader, for instance, cannot expect to get his bills discounted for much less than 5 per cent, whatever the 'Bank rate' may be. Banks also, when money is cheap, try, as we see, to keep less loose cash, and buy more interest-bearing securities; so that, putting all things together, their profits do not vary so much in times of depression and low rates as people would at first sight suppose. We must remember, too, that they earn on a very large amount of capital and pay on a small, as is very clearly illustrated in the tables of Mr. Abbott, to which we have already referred."—The Times.

FOREIGN STOCKS.

"Under the title of 'A Short Retrospect of the Foreign Stock Market from 1871 to 1876,' Mr. William Abbott has brought out a pamphlet which is none the less suggestive of reflection to investors because its pages are few in number, and because it is composed exclusively of extracts from the monthly Circulars issued by him during that period. Mr. Abbott's tone has been, it is only fair to state, consistently and energetically opposed to Foreign Loans and in favour of Home Investments, and he has omitted no opportunity of animadverting upon the absurdity and impolicy of a state of things under which, while 'shaky' Foreign Governments have been enabled to bridge over their ever-recurring deficits by chronic applications to our market, Public Works at Home—such, for example, as the Great Eastern and other Railways—have had much difficulty in obtaining the funds needed for their profitable development. In these views Mr. Abbott has, beyond question, hit a palpable blot."—Money Market Review.

ENGLISH RAILWAYS.

"Mr. Abbott not only dissects the concern, but takes each feature of it in detail, examines it with the most painstaking minuteness, and combines the result of his investigations in a synopsis which is at once luminous and convincing. His skill in work of this kind is universally admitted. He has long exercised it in demonstration of the value of submarine telegraphs, and his recent analysis of the condition of joint-stock banking in this country is regarded as the work of a gentleman thoroughly conversant, not only with the theory, but also with the facts of finance, being, as it is, at once scientific and practical."—Railway News.

"How a railway, the hopelessness of whose financial position at and for some time after the disastrous commercial crisis of 1866 acquired for it the cautionary title of 'The Lost Capital and Debenture Ruined Company,' may, in a comparatively short period, satisfy the greater portion of its Parliamentary obligations and give promise of a remunerative future to its ordinary shareholders, is familiarly explained in a brochure recently published by Mr. William Abbott."—Illustrated London News.

Just published, post-free, 1s. 6d.

SYDNEY SMITH'S PIANOFORTE</

THE IMPERIAL ASSEMBLY OF INDIA AT DELHI.

LORD LYTTON, VICEROY OF INDIA, PASSING THE FLAGSTAFF TOWER.

THE IMPERIAL DURBAR AT DELHI.

We have received from a Special Artist in India a series of illustrations, which we now begin to publish, of the grand ceremonies and festivities at Delhi, on and about New-Year's Day, for the proclamation of her Majesty as Empress of India. The Viceroy or Governor-General of India, Lord Lytton, arrived at Delhi a week before. The scenes of public interest connected with the Durbar, or Imperial Assembly, began, on Dec. 23, with the state entry of the Viceroy. Two o'clock was the time fixed for his arrival that day, but from early morning the roads were crowded with troops. The native chiefs and their followings were hastening to take up the positions allotted to them along the line of procession, and the spectators were trying to reach some point which gave a good view of the line of march. The route for the procession was from the railway station along the Queen's-road, the Lothern-road, the road from the Jumna Masjid, through Duriba and Chandnee Chowk-street, then leaving the city to proceed by the Grand Trunk-road to the Ridge, and along the Ridge to the Flagstaff Tower, thence to the Camp. The greater chiefs, with their retinues and elephants, lined the Ridge-road. The Princes of Rajpootana were drawn up near the railway station.

The view from the terraced roof of the Jumna Masjid for an hour before the procession passed was most striking. The space in front of the old fort of Selimghur, between the fort and the Masjid, was crowded with spectators. The Masjid steps were closely packed with natives, whose variously-coloured turbans and dresses gave the appearance of a gigantic bouquet of flowers. The road across the plain was lined on one side with artillery, and on the other with native cavalry. Barely discernible in the distance, the gorgeously-caparisoned elephants and quaintly-dressed troopers of the Rajpoot chiefs were grouped around the entrance of the station behind the narrow and crowded streets of the native city.

At two o'clock precisely a Royal salute from the fort announced the Viceroy's arrival. In half an hour later another salute told that the procession was beginning to move. A little longer, and the head of a column came in sight, advancing up the road towards the Masjid. First came the Deputy-Assistant Quartermaster-General, next the 11th Hussars, the A battery of Horse Artillery, and a regiment of Bombay Cavalry, gay in blue and silver. Some staff officers followed, and then appeared a personage anxiously looked for by all—Major Barnes, the Chief Herald. He had been selected for that important post—so, at least, the Indian papers say—by reason of his being the biggest officer in the Army. Sitting on horseback he did not seem greatly to surpass the ordinary stature, but if there be any deficiency in his inches his gorgeous dress made ample amends. In attendance on Major Barnes were his twelve trumpeters, six Europeans and six natives, mounted on fine grey horses, and riding by threes, the Europeans and natives alternately, like squares in a chessboard. Their dresses were on the same model as that of the Chief Herald, but of course far inferior in point of splendour, and the little peaked jockey caps which the Europeans wore must have made them supremely uncomfortable in the full blaze of an Indian sun.

Following the Chief Herald and trumpeters came a detachment of that splendid body of men, the Body-Guard, the flower of the native cavalry, and immediately behind, seated in a glittering howdah on the back of a magnificent tusker elephant, appeared the Viceroy and Lady Lytton. A gilt umbrella was held over their heads, and an attendant seated behind waved off imaginary flies with a brush made of a yak-tail. This seems to be a necessary adjunct to all Oriental pomp; and, though it may look well, it was hardly necessary. The Viceroy elephant was a magnificent tusker, and he appeared to have a fair idea of his own importance. Instead of walking on quietly and steadily, as a well-conducted elephant should, he would insist upon stopping every now and then and taking a look round. Nor could anything persuade him to move until he had satisfied his curiosity. The result was that every few minutes the "halt" had to be sounded, so as to preserve the line of procession unbroken. As the Viceroy passed the Masjid he was received well but quietly by the natives. All seemed excited, but there was no cheering. This, however, is not to be wondered at. The natives are not given to express their feelings in our manner, and the silence of the crowd is not in itself any mark of disloyalty.

The next elephant carried two little girls, daughters of the Viceroy, who seemed to enjoy the affair greatly, though they must have been very tired before the end of the three hours' ride. Behind them came the remainder of the Body-Guard and a squadron of the 10th Hussars; then the three Lieutenant-Governors, each on an elephant, and each attended by his staff; next, the members of the Council, the secretaries to the Government, and the Chief Justices of Bengal and the North-Western Provinces; then solah topees, looking singularly out of place in their judicial robes. Lastly, there came a number of native chiefs, their elephants painted with all the colours of the rainbow and glittering with gold and silver trappings. Their attendants, arrayed in fantastic dresses, formed a confused but picturesque group. The procession wound slowly through the tortuous streets of the native town, and, converging from the city, reached the Ridge and turned towards the north, passing along a road lined by the elephants and retainers of the great chiefs, Scindia, Holkar, the Guicowar, the Nizam of Mysore, and others. When it arrived at the flagstaff at the tower it turned sharply off to the left, and, descending from the Ridge, advanced up the main street of the Viceroy's camp about five o'clock. A few minutes before sunset a Royal salute, the third fired during the day, marked the arrival of the Viceroy's cortege at the end of its journey.

We shall give more illustrations next week.

The chief prize given at the Edinburgh Photographic Exhibition—a gold medal—for the picture which possesses the highest degree of merit, irrespective of size, has been carried off by a Russian—A. Karelina, Nizny, Novgorod.

The exhibition of the Royal Birmingham Society of Artists closed on the 13th inst., after a very successful season. The total number of visitors was 45,054. The amount of sales was £4976, and a total of 226 pictures were disposed of.

Yesterday week the new municipal buildings erected at Kidderminster, at a total cost of £25,000, were opened by Mr. Radford, the Mayor, by whom 400 persons were invited to a banquet at the music-hall.

The show of the Dorset County Poultry and Pigeon Society was recently held. There were over 1200 entries, and the different classes were well represented. The society offered this year £250 in prizes, including thirty-four pieces of plate and silver cups.

A letter from Baroness Burdett-Coutts is published, in which her Ladyship again calls public attention to the threatened extermination of many classes of small birds in consequence of the misuse of them for purposes of ornamentation. If ribbons were substituted for feather decorations, not only would this evil be averted, but, in the present stagnant condition of ribbon manufacture, fashion would aid the industrious and enable them to live in comfort.

MUSIC.

Herr Straus's absence from two of the Popular Concerts, in consequence of a severe domestic loss, has already been spoken of by us. This excellent leading violinist reappeared at the afternoon performance of Saturday last, and again at the evening concert of the following Monday. Saturday's selection included Mendelssohn's fine string quintet in B flat, (a posthumous work), which was admirably given by Herr Straus, and MM. L. Ries, Zerbini, Burnett, and Piatti. Mdle. Marie Krebs played Beethoven's sonata in E flat entitled "Les Adieux, l'Absence, et le Retour," with great success, and was associated with Herr Straus and Signor Piatti in an excellent rendering of Beethoven's pianoforte trio in D major. A quaint violoncello sonata by Antonioti (an Italian composer of the last century) served to display the fine tone and style of Signor Piatti. Mdle. Redeker sang, with much expression, some German lieder by Schubert and Lassen, and was encored in the last. Sir J. Benedict accompanied.

Last Monday's Popular Concert included fine performances of the first of Beethoven's Rasoumowsky quartets (in F); the same composer's thirty-two variations on an original theme in C minor, for piano solo; his first sonata for piano and violin, in D major; and Mendelssohn's theme and variations for piano and violoncello, in the same key. With Herr Straus as leading violinist, Mdle. Krebs as pianist, and Signor Piatti as violoncellist, the results could not have failed to be satisfactory. Mdles. Thekla Friedlander and Redeker sang three duets by Schumann and two by Rubinstein, one of the latter ("Wanderer's Nachtlied") having been encored. Sir J. Benedict was the accompanist.

The programme of the concert given on Thursday evening, at St. James's Hall, in celebration of the anniversary of Robert Burns's birthday, consisted of a varied selection of Scottish vocal music, the singers announced having been Madame Antoinette Sterling, Misses Annie Sinclair, Eileen Richardson, José Sherrington, and Hunter; Mr. Sims Reeves, Mr. Pearson, Mr. Walker, and Mr. Thurley Beale. The band of the Scots Fusilier Guards, conducted by Mr. J. P. Clarke, contributed to the programme.

Handel's "Solomon" was given, yesterday (Friday) evening, by the Sacred Harmonic Society, at Exeter Hall, the solo singers announced having been Madame Edith Wynne, Miss Julia Wigan, Madame Patey, Mr. H. Guy, and Mr. Maybrick.

Mr. R. Blagrove began, on Thursday evening, a new series of ten concertina performances. They are given in the concert-room of the Royal Academy of Music. Mrs. Weldon and Miss Alice Fairman were the vocalists on Thursday last.

During a pause in the performance of "The Creation," at the Royal Albert Hall, on Thursday week, the acoustic properties of the hall were tested with a very successful result. It was thought that, by the aid of a mechanical contrivance, it might be possible for a speaker to make himself heard in the remotest corner of the building; and with this view the council determined to try the experiment before a large audience. Arrangements were accordingly made with Mr. Penrose, the architect to the Dean and Chapter of St. Paul's Cathedral, for the construction of a sounding-board like that which surmounts the pulpit under the great dome. Some doubts were entertained as to the result of the experiment; because, although a successful trial had been previously made whilst the hall was empty, it was felt that a difficulty might arise from the fact of the sound having to reach the ears of a large and widely-dispersed audience. The new sounding-board was raised a few feet above the conductor's chair, and, during the interval in the performance, Mr. G. Godwin, F.R.S., addressed the audience. He explained that the promoters of the Albert Hall designed that structure with the object that it should be applied to purposes other than those of a musical character, and that it had occurred to a member of the council that, with the aid of a specially constructed sounding-board, the hall might be used for lectures and other similar entertainments. The question, he added, to be solved that night was whether or not the words he had uttered had been fairly heard throughout the building. There was an immediate response from all parts of the hall of "Yes, yes!" followed by considerable applause. The experiment may therefore be said to have been quite successful, and the Albert Hall may yet fulfil a mission of public usefulness. The new sounding-board is constructed on a principle which is known as the inverted paraboloid.

THEATRES.

Managers have this week fallen back on old pieces, and thus renewed many pleasant recollections for their audiences.

The Haymarket has taken the lead in this movement, and last Saturday presented two revivals. The performance began with Mr. C. M. Rae's petite comedy entitled "Follow the Leader." It is an adaptation of a French farce called "Les Brebis de Panurge," made, about four years ago, for Mrs. Stirling, who then appeared in it at the Charing-cross Theatre. The part of Mrs. Neville is now admirably played by Miss Annie Lafontaine; and the lover, Henry Wilson, is acted with spirit by Mr. W. Herbert, a débutant. Amelia Barrington—the fastidious young lady, who is swayed by the leading of her friend into the acceptance of the youth whom she had first of all rejected—found an excellent representative in Miss Kathleen Irwin. This pleasant little piece is followed by Mr. W. S. Gilbert's "Pygmalion and Galatea." Our readers are too well acquainted with the merits of this drama to need any instruction from us on the subject. The present cast and acting of it are satisfactory. Messrs. Buckstone and Howe and Mrs. Chippendale still sustain their original characters, Chryso, Leucippe, and Daphne, the shrewish wife of the ignorant art-patron. Miss Marion Terry sustains the important rôle of Galatea, and is received by the audience with very great applause. Nor is Miss Henrietta Hodson as Cynisca to be overlooked in the general appreciation; her conception of the character is true, and her execution exceptionally splendid. The acting of Mr. Charles Harcourt in Pygmalion was masterly. The reception of the piece was enthusiastic, and promises for it a renewed run.

We were much pleased with a morning performance at the Lyceum, last Saturday, of Dean Milman's tragedy of "Fazio." It has been reduced to four acts, and on that account was played closer than usual. Miss Bateman appeared as Bianca, the jealous wife, thoroughly embodying the poet's idea of the character, and fully expressing the poetic spirit of the dialogue. This is a task of no little difficulty; for the author's style is rhetorically verbose, and frequently he gives three lines for what might have been more forcibly expressed in one. Miss Bateman's delineation of the character was an artistic whole, and she preserved its unity throughout. In the first act she well indicated the elements of which it was composed. In the second, the fatal passion destined to destroy her husband and herself, kindled by his conduct and infuriated by his self-conviction, was interpreted with singular skill and unquestionable power. The scene before the Duke, where she

first denounces Fazio, and then repents of her precipitation, was replete with beauties of conception and execution. In the final scene she rose to the sublime, and withered the proud, guilty woman, Aldabella, with her scorn, while her own great heart broke with the heavy burden of its affliction. She was energetically supported by Mr. E. H. Brooke in Fazio, who rendered the blank verse with a sense of its somewhat too elaborate music, and by Miss Pauncefort in the part of the guilty Marquessa, who performed with dignity and great discrimination. The tragedy has since been represented nightly, in consequence of its indisputable success.

A complimentary benefit is to be given to Mr. Parry, on the 7th of next month, at the Gaiety, under the patronage of the Prince and Princess of Wales, when Sheridan's "Critic" will be performed. Mr. Parry's career has been so distinguished as a musical and dramatic artist that we shall be glad to witness an earnest public response to the appeal of his numerous and noble friends.

MUSICAL PUBLICATIONS.

"I'll Crown thee Queen" and "Haul in the Bowline," songs composed, respectively, by Berthold Tours and Odoardo Barri, and both published by Messrs. J. B. Cramer and Co., are effective pieces, the latter being in the robust, declamatory style suitable to the nautical tone of the words.

Three characteristic dance pieces for the pianoforte, by Hamilton Clarke (also published by Messrs. Cramer and Co.), are bright and melodious in style, the forms used being those of the mazurka, the polka, and the polonaise.

The *Organist's Quarterly Journal* (Novello, Ewer, and Co.) begins its fifth volume with the new year, the current number being the thirty-third issue. It opens with a spirited march, in C minor, by Mr. G. B. Allen, which is followed by an expressive "Elegy" in E minor by Mr. C. Goodban; after which comes a graceful and characteristic minuetto in G minor (with trio in G major) by Mr. Berthold Tours. The next piece is a rather elaborate fugue (with introduction) in G major, by Signor Auguste Moricani, organist at the Vatican, at Rome. The subject is wrought with much skill, among other ingenious features being an effective inversion of the theme. An animated "Concluding Voluntary," in F, by Mr. Arthur Johnson, and an "Easy Voluntary," in G, by Dr. Spark (editor of the work), complete the contents.

ASTRONOMICAL OCCURRENCES IN FEBRUARY.

(From the "Illustrated London Almanack.")

The Moon is near Mars on the mornings of the 7th and 8th, being west of the planet on the former and east of him on the latter day. She is near Jupiter on the mornings of the 8th and 9th, being to the right and left of the planet respectively; near Mercury and Venus on the morning of the 11th, and near Saturn on the evening of the 14th. Her phases or times of change are:—

Last Quarter	on the 5th	at 6 minutes after 5h	in the morning.
New Moon	" 18th	" 59 "	" 8h "
First Quarter	" 21st	" 15 "	" 4h "
Full Moon	" 27th	" 14 "	" 7h "

She is nearest the Earth on the afternoon of the 26th, and furthest from it on the morning of the 11th.

There is a Total Eclipse of the Moon, on Feb. 27, partly visible from England. The eclipse begins at 5h. 30m. p.m., about 1m. after the Moon has risen; the beginning of the total eclipse will be at 6h. 27m.; the middle of the eclipse will be at 7h. 15m.; the end of the total eclipse will be at 8h. 3m.; and the eclipse will end at 9h. 1m. p.m. At the time of the middle of the eclipse, 7h. 15m., the Moon will be in the zenith of a place whose longitude east of Greenwich is 74 deg. 26 min., and whose north latitude is 8 deg. 15 min.

Mercury is a morning star, and rises on the 5th at 6h. 26m. a.m., or 1h. 8m. before sunrise; on the 10th at 6h. 13m. a.m., or 1h. 13m. before sunrise; on the 15th at 6h. 8m. a.m., or 1h. 8m. before sunrise; on the 20th at 6h. 6m. a.m., or 1h. 1m. before sunrise; on the 25th at 6h. 5m. a.m., or 51m. before sunrise. He is stationary among the stars on the 7th, near Venus on the 8th, near the Moon on the 11th, at his greatest western elongation (26 deg. 41 min.) on the 20th, and in his descending node on the 21st.

Venus is a morning star, and rises on the 1st at 6h. 35m. a.m., or 1h. 6m. before sunrise; this interval gradually gets smaller and smaller each successive morning until the 10th, when it is 50m.; on the 20th it has decreased to 37m.; and by the last day to 27m., the planet rising on this day at 6h. 23m. a.m. She is near the Moon on the 11th. She is due south on the 1st at 10h. 36m. a.m., and on the last day at 11h. 9m. a.m.

Mars is a morning star, rising on the 1st at 3h. 50m. a.m., on the 10th at 3h. 45m. a.m., on the 20th at 3h. 38m. a.m., or 3h. 29m. before sunrise; and on the last day at 3h. 30m. a.m. He is near the Moon on the 7th, and in his descending node on the 22nd. He is due south on the 1st at 7h. 54m. a.m., on the 14th at 7h. 39m. a.m., and on the last day at 7h. 23m. a.m.

Jupiter is a morning star, and rises on the 1st at 4h. 58m. a.m., on the 10th at 4h. 29m. a.m., on the 20th at 3h. 57m. a.m., and on the last day at 3h. 34m. a.m. He is near the Moon on the 8th and 9th. He is due south on the 1st at 8h. 53m. a.m., on the 15th at 8h. 9m. a.m., and on the last day at 7h. 26m. a.m.

Saturn is an evening star till the end of the month, setting on the 1st at 7h. 2m. p.m., or 2h. 15m. after sunset; this interval rapidly decreases to 1h. 30m. by the 10th, and to 39m. by the 20th, the planet setting at 6h. 0m. p.m.; on the last day of the month he sets at nearly the time of sunset; and from March 1 to Sept. 9 he sets in daylight. He is near the Moon on the 14th. He is due south on the 1st at 1h. 51m. p.m., on the 14th at 1h. 6m. p.m., and on the last day at 0h. 17m. p.m.

Lord Hampton was, on Saturday last, elected president of the Worcestershire Agricultural Society for the present year. Kidderminster was chosen as the place for the annual show.

The Prince of Wales has honoured Mr. W. E. Atkins, of Southsea, by purchasing a painting of H.M.S. Serapis entering Portsmouth harbour on her return from India. This is a companion to one painted by the same artist, and purchased by his Royal Highness last autumn.

The mystery which for six years had surrounded the name of the donor of £3000 in aid of an art-gallery for Birmingham was disclosed, last week, at a meeting of the trustees of the gallery fund. The late Mr. Clarkson Oler was the donor, and the sole depository of the secret was Mr. Arthur Ryland.

The Irish Rifle Association met at Dublin, on Monday, and resolved to invite another team from the New York Amateur Rifle Association to compete in Ireland on the same conditions as the matches were shot off in 1875 and 1876. It was also resolved to ask the Duke of Marlborough to use his influence to obtain for the Irish Association the privilege to compete for the Queen's Prize at Wimbledon.

ROYAL INSTITUTION LECTURES.

THE HUMAN FORM.

Mr. Alfred H. Garrod, M.A., F.R.S., the Fullerian Professor of Physiology, on Tuesday week, gave the first of a course of ten lectures on the Human Form: its Structure in Relation to its Contour. After referring to the professional instruction in anatomy given at the medical schools and the Royal Academy, he stated that he would aim at rendering the subject interesting to a general audience, and thereby lead to a better appreciation of works of art and a higher standard of criticism. To do this, he proposed to consider the principles of the construction of the human frame, so far as they bear upon the external conformation of the body, together with the most marked effects of the changes from repose to action, and from action to repose. After some remarks on the general principles of art, and especially on the beauty arising out of the law of the composition of lines, he observed that more examples of this are to be found in man than in any other animal, which he demonstrated by referring to a fine, large, bold outline drawing of two figures shaking hands. He then began the subject of his course by exhibiting a skeleton, which he described as consisting of bones, characterised as light, strong, and elastic, some hollow and others solid, according to their office. These, with their muscles, and the interior organs, termed viscera, form a perfectly compact machine, worked in a most economical manner. Explanations were next given of the structure and office of the constituent parts of the spine, including the cervical, dorsal, lumbar, sacral, and caudal vertebrae, fully illustrated by models, specimens, and diagrams.

THE VERTEBRAL COLUMN AND THE SKULL.

Professor Garrod in his second lecture, given on Tuesday last, resumed his comments on the vertebral column or spine, by noticing its flexible character, together with the admirable arrangements for supporting and moving the head, and protecting the spinal cord, and also the passages through which the nerves proceed to convey sensations and regulate all the movements of the body. The dorsal vertebrae, which support the ribs constituting the chest, which protects the lungs and heart, were next described, their nature and office being illustrated by models; after which the lumbar vertebrae were noticed, followed by the sacrum, composed of five distinct vertebrae in children, but joined closely together in adults. The caudal vertebrae, with a very rudimentary tail, terminates the series termed the vertebral column. Proceeding to the skull, of which fine specimens were exhibited, the Professor alluded to what is termed the vertebral theory, said to have been originally proposed, but not made known, by Goethe in 1787, but really discovered by Oken in 1806, and published in 1807. This ingenious hypothesis supposes the skull to be composed of a number of vertebrae, continuing the spinal column, modified to form a case for the brain and aid its conjunction with the spinal cord. Having then explained the skull to be really made up of a number of small bones, interlocked in a very remarkable manner, the Professor began to build up, bone by bone, a very large model of the skull, commenting, as he proceeded, on the nature and office of each part, till the structure was complete; at the same time he pointed out how the shape of the nose and other features of the human countenance might vary with the modifications of the bones with which they are connected.

CHEMISTRY OF THE METALS.

Dr. C. R. Alder Wright, F.C.S., gave the first of a course of four lectures on the Metals and their chief Industrial Uses on Thursday week. He began with a series of experiments demonstrating the elementary character of the metals as distinguished from their compounds; showing, for instance, with the bicarbonate of sodium and the oxide of silver, how the metals may be obtained by expelling the gases by chemical means. Of sixty-six elements fifty-two are metals, of which about twenty-four only are technically employed—aluminium, copper, gold, iron, lead, mercury, platinum, silver, tin, and zinc being the chief. Some of the others, such as arsenic, antimony, and bismuth, are used for alloys; while the rarer metals are employed for special purposes. Dr. Wright then illustrated an important distinction between metals and non-metals. Two metals combine, without much heat, and the resulting alloy has metallic characteristics; but when a metal unites with a non-metal the evolution of heat is often very great, and the product, with few exceptions, has no metallic properties. Thus, a brilliant effect ensued on bringing together oxygen and heated zinc, sulphur and hot copper shavings, and powdered antimony in chlorine gas. Steel, Bessemer metal, and phospho-bronze were referred to as compounds with non-metals still retaining their metallic character. Having referred to "native metals," or those found in the free state, Dr. Wright explained and illustrated some of the various ways in which other metals may be extracted from their ores—1, by volatilisation, when the metal, such as zinc and mercury, can be converted into vapour and recondensed at easily obtained temperatures; 2, by amalgamation, in which the ore is chemically dissolved, and then brought into contact with mercury, which is separated from the resulting amalgam by distillation; 3, by smelting: when the metal is fusible at a moderate or high temperature it may be extracted from the ore by chemical agents, which will, at a certain temperature, act on the metallic compound, and set the metal free in the liquid state; 4, in the "wet processes" the metal is extracted by the application of chemical reagents to an aqueous solution of a compound of the metal. In the latter part of the lecture Dr. Wright referred to tables and specimens, illustrating the chief processes employed to isolate the ordinary metals from their sources, such as the washing, crushing, and stamping gold quartz, ironstone, tinstone, and other ores; elucidating his remarks by numerous experiments, and referring to diagrams showing the various chemical reactions.

A COMBAT WITH AN INFECTIVE ATMOSPHERE.

Professor Tyndall, in the first Friday evening discourse of the season, on Friday, the 19th inst., gave an account of his recent experiments on the power of the atmosphere in developing life in animal and vegetable infusions, in continuation of those made in 1875 and 1876, described in his discourse on Jan. 21 last year, and reported in our Number for Jan. 29 following, page 107. After causing a beam of electric light to be projected across the lecture-theatre, the track being revealed by the brilliant reflections from the floating motes, he reminded his audience that, when the air is quite still, the dust falls and the light disappears; and that when this dust falls into organic infusions, the very minute organisms termed bacteria are produced with putrefaction and turbidity; but that these infusions become perfectly sterile when boiled in an oil-bath for five minutes and placed in small chambers rendered impervious to dust-laden air. He said that above fifty infusions of various kinds had been tried with complete success—every germ was destroyed. When the Professor resumed his arduous researches, in September last, beginning with infusions of fungi, the results differed; and turbidity and putrefaction occasionally ensued, without any apparent adequate cause. His precautions were redoubled, without effect; some of his infusions of cucumber, beetroot, and

paranep, after boiling swarmed with bacterial life. Suspecting that he was working in an infective atmosphere, he transferred his experiments from the laboratory to the upper rooms of the institution, constructed new apparatus, and adopted new methods for excluding contaminated air, without complete success. So minute are these germs, that they were not removed from some infusions passed through 300 filtering papers, and even the intense heat of the voltaic current used to calcine the air failed to destroy their life. Unable, however, in any way to admit the doctrine of spontaneous generation, the Professor still persevered in the conflict; inventing more and more stringent measures to exclude his enemy; preferring to distrust his work, rather than the evidence derived from his previous researches. Having been led to examine the ingenious methods devised by Dr. Roberts, of Manchester, and Professor Kohn, of Breslau, he pointed out the causes of their inefficiency, and then proceeded to explain the new apparatus which he had recently employed at the new laboratory at Kew, whither he had removed his researches, in order to obtain an atmosphere more free from germs than that of the Royal Institution, and his new mode of closing his chambers to the entrance of air charged with dust. By these means he vanquished his enemy, and refuted all the evidence in favour of spontaneous generation derivable from his previous failures. In one tube, where putrescence ensued, the cause was traced to a minute pin-hole in the side of the chamber in which the tube was placed.

THE NATURE OF MUSIC.

Mr. Ernst Pauer gave the first of two lectures on the Nature of Music, as exemplified in the Italian, French, and German schools, on Saturday last. In his introductory remarks he observed how impossible it is to translate the musical language of feeling into words according to rules, since different persons are very differently affected by the same piece of music. The world of music is the world of feeling; or, as Calderon expresses it, "Music resounds from the depth of our heart; it enhances the cheerfulness of the cheerful and the sadness of the sad." It affords a fitting expression for all our emotions, and all their gradations, and its sounds are the overflowing of our innermost feelings. The mathematical and harmonious rules which manifest themselves in music, when produced in an outward form, are founded on the composer's individual feeling. The Pythagoreans asserted that the human soul, like the entire world, corresponds with harmonious numbers; and Dr. Hauptmann says that our soul sympathises only with that which is musically correct, and only those works which are founded on and in obedience to the universally accepted laws of nature are intelligible to all. In music (as in nature) contrast is indispensably necessary, its essential object being to express, not the abstract ideas of our intellect, but the harmoniously-ordered substantial feelings of the heart. The two chief forms of music are vocal and instrumental: in the former the art appears as a companion of the language of speech and the sister of poetry; in the latter as the exponent of the soul's emotions in unfettered many-sided independence. Thus, more than any of the other arts, music has aided the progress of civilisation. After having referred to the remarkable analogies of music with painting and architecture, respecting which Hegel says, that music is "architecture translated or transposed from space into time," Mr. Pauer commented upon the great respect in which music was held by the ancients, and its effects in various forms, quoting Homer, Quintilian, Tacitus, St. Augustine, and others; and giving examples of its influence upon Eric III. of Denmark, Frederick II. of Prussia, and other eminent persons. Goethe remarked that "a great work of art remains like the work of nature, unintelligible to our reasoning faculties. We contemplate it, we feel it, we experience its effect; but, after all, we do not understand it thoroughly, and we cannot account for it in words." "Yet," said Mr. Pauer, "we know its materials and accessories, and we appreciate all the laws of beauty, and the nature of harmony, rhythm, and beauty, which form the life and soul of the musical art."—The musical illustrations were an aria and gavotte by J. Sebastian Bach, a fantasia in D minor by W. A. Mozart, and Beethoven's sonata (op. 53) in C major.

Mr. Pauer's lecture, this day, will be illustrated by specimens of the Italian, French, and German schools.

On Friday next Professor Osborne Reynolds, of Owens College, Manchester, will give a discourse on Vortex Motion. On Saturday next Mr. J. A. Symonds will begin a course of three lectures on Florence and the Medici.

The following lectures have also recently been given:—

At the London Institution, on Thursday week, Mr. A. C. Barret lectured on the Origin, Rise, and Progress of the English Madrigal, including some observations as to the causes which had led to the decline of the style. The lecture was vocally illustrated by members of the various London choirs, who sang a selection of English madrigals, including specimens of the compositions of Fellows (1523), down to those of Walmisley (1811). Having distinguished between the poetical and the musical madrigal, the latter being the older, Mr. Barret defined the musical madrigal to be a popular means of wedding words of wisdom to merry music. A strictly scientific and technical description of the madrigal followed. With these observations he introduced the choir, who sang very pleasingly Edwardes's (1523) "When going to my lonely bed." Specimens of Byrde (1546), Wilbye (1560), Dowland (1562), Morley (1563), Bennett (1565), Bateson (1580), Gibbons (1583), Linky (1586), De Pearsall (1735), and Walmisley (1811) followed, each case being preceded by a brief biographical sketch of the composer and a critical analysis of his style of composition. — Mr. E. B. Tylor, LL.D., F.R.S., whose works on Primitive Culture are so widely known, gave the first of two lectures on the Philosophy of Language last Monday. Repeated plaudits bore witness to his marked success in popularising this subject.

Lecturing at the Royal United Service Institution, yesterday week, on the Military Geography of European Turkey, Lieutenant-Colonel C. E. Howard Vincent pointed out that the Turks had failed to turn to good account the topographical advantages which they enjoyed, and expressed his conviction that the idea which many persons entertained as to the ability of the Turks easily to drive the Russians back when war was entered upon was incorrect in itself and pernicious in its tendency. With regard to the defence of Constantinople, the lecturer pointed out that the twenty-one ironclads of Hobart Pasha were in first-rate condition, but by taking from them what would be required for the Bosphorus and the Dardanelles there would not be more than ten left for naval operations against the three or four circular ironclads and the fleet of the Russian gun-boats.

The Rev. Canon Farrar, D.D., at Liverpool, yesterday week, awarded the scholarships and prizes granted by the Liverpool Council of Education to the pupils of the elementary schools in Liverpool. He warmly eulogised the council for erecting a solid bridge between the elementary and public schools of the town, and of opening up a "career to talent" for boys who

otherwise might not have the chance to rise. He strongly urged the national value and importance of encouraging scientific study. Alluding to the religious difficulty, he said habit was, to a considerable extent, a great religious sham; and, in the face of sincerity and an earnest and absorbing desire to do good, it had a great tendency to vanish of itself. He thought it was a fatal mistake on the part of the Church of England clergy so stiffly to refuse the simple and fair expedient of a conscience clause, and that mistake had brought its own retribution. But the jealousy of opposition to voluntary schools by Dissenters was no less to be deprecated. In this matter of education every man ought to act as a citizen and a Christian; and only in the second instance, so far as it might be done without hindering a great national benefit. As the member of a particular religious body he altogether scouted the notion that the educational energy of the Church of England was simply a "subterranean" desire to proselytise, and was stimulated only by the selfishness of an ecclesiastical community. He condemned the view taken alone by Birmingham of making school boards solely and purely secular, and forbidding them to have anything to do with religious teachings. The educational system was sometimes objected to as costly; but a criminal child, it must be remembered, cost the country a hundredfold more than did the rescue of fifty innocent and not criminal children from the streets.

Professor Leone Levi began a course of lectures, last Saturday afternoon, in the large theatre of King's College, to members of working men's clubs and institutes, on subjects connected with work and wages. The first lecture was on the Use of Capital in Industry. Mr. S. Morley, M.P., presided. After the lecture, an hour was given for criticism and questions, to which Professor Levi replied.

Mr. Huggins, F.R.S., made an important communication to the Physical Society at its meeting last Saturday. For a long time he has been engaged with attempts to photograph the spectra of stars, and has obtained several partial successes. The chief difficulty to be overcome has been to follow the motion of the star with the telescope with sufficient accuracy, as a long exposure is requisite. This has been done, and there was shown on Saturday a clear photograph of the star α Lyrae.

The Hon. William Forster, of Australia, read a paper on the Fallacies of Federation before the members of the Royal Colonial Institute on Tuesday. The chair was taken by Sir Charles Nicholson, Bart. Mr. Forster contended that the true remedy for the disasters of the Boers in South Africa would be British connection, and not colonial federation. He insisted that there was abundant evidence to create a doubt whether the desire or approval of a federal system had yet taken sufficient hold of the public mind in most British colonies to justify the Government in prematurely forcing such a system upon any British colony. In Barbadoes the question had evoked a sort of tropic hurricane, and in New Zealand a similar lesson had been taught of the futility of Federal theories, enforced or imposed by Imperial legislation. Colonial federation would not confer upon the colonies any additional power or voice in Imperial affairs; federation could give them nothing which was not attainable in their present condition, so long as they remained a portion of the British Empire. He concluded by insisting on the expediency of leaving the question to be settled by the colonies themselves, and by deprecating the interference of the Imperial Government in what he conceived to be, not an Imperial, but, in every sense of the word, a colonial or local question. A discussion followed.

The Rev. Dr. Benson, Bishop-Designate of Truro, distributed the prizes, on Monday, to the students of the Lincoln School of Art, in connection with the Science and Art Department. The school now ranks the second in the kingdom, being beaten only by Lambeth; while of the 205 prizes granted to the 160 competing schools in the United Kingdom, Lincoln has taken twelve, including two gold medals, two silver medals, and four bronze medals. The students sent up 2630 works to South Kensington, of which a considerable number were exhibited, the adjudicators expressing their surprise at the amount and general excellence of the work done. The Dean of Lincoln, Dr. Benson, and other gentlemen addressed the meeting. The prizes had been won by all classes, from the daughters of the Bishop of Nottingham to the workmen in the foundries.

An Art Loan Exhibition was opened at King's Lynn, on Monday, by the Mayor, Mr. J. D. Thew, and Lord C. J. Hamilton, M.P. The exhibition is for the purpose of raising funds towards liquidating a debt still remaining for the restoration of the ancient church of St. Margaret in the town, which was restored a few years since as a thank-offering for the restoration to health of the Prince of Wales after his severe indisposition at Sandringham.

Cocoa-rooms were opened last week in Hanover-street, opposite the Sailors' Home, Liverpool. It was stated that eighteen branch establishments are now in existence, and that during the previous week £596 had been received for 9393 gallons of cocoa, tea, and coffee, and 47,238 pieces of bread stuffs. The Bishop of Chester expressed his sympathy with the undertaking, as did also the Bishop of Manchester, who said he believed drunkenness was decreasing.

Mr. Samuel Morley, M.P., presided, on Thursday week, at the annual meeting of the Nottingham Congregational Institute, of which he has just become president. In the course of his remarks, the hon. gentleman said he believed it would be found that a much larger number of people in this country, which we were accustomed to boast of as a highly Christian land, were living in systematic neglect of the obligations, or he would rather say the privileges, of religion than the number of those who came under its influences. And one of the greatest difficulties of the day was to decide how these people were to be reached. He was not at all disposed to undervalue a learned ministry, but he would remind the students that what was wanted amongst Christian ministers was not intellectual gladiatorialship, but deep and earnest sympathy. The people should be approached by those who had the genuine feelings of neighbours to them. The great conflict of the day was between appeals to the eye and appeals to the conscience. The Ritualistic party in the Church of England was now occupying a great deal of public attention, and he believed they were helping the Nonconformists to solve deeply interesting questions. There was now going on, near London, a contest in which he believed the law ought to be obeyed. At all events, when the law interfered with the conscience of any man, he must set himself right before the law; and when a man connected with the Established Church, which was based upon law, chose to set the law at defiance, his only honest course was to leave the Establishment. He (Mr. Morley) believed that the question of a State Establishment was rapidly reaching a solution, because there was a large and increasing number of men within the Church who were seeking to work out a theory utterly inconsistent with the idea of an Establishment; and he advised the Nonconformists to leave the Churchmen to fight out the question amongst themselves.

THE IMPERIAL ASSEMBLY OF INDIA AT DELHI: THE VICE-REGAL PROCESSION PASSING THE CLOCK-TOWER AND DELHI INSTITUTE, IN THE CHANDNEE CHOWK.

THE PANDORA ARCTIC EXPEDITION: WALRUS-SHOOTING.

WALRUS-SHOOTING.

Our Illustration of this peculiar sport in the Arctic regions is from a sketch furnished by Captain Allen Young, owner and commander of the steam-yacht Pandora, which followed the Alert and Discovery, in their North Polar Expedition, some distance up Smith Sound, and which also, in a previous voyage, passed through Lancaster Sound and Peel Sound towards the place where Sir John Franklin was lost, in the westerly channels of the Arctic archipelago. The chase of the walrus, indeed, is commonly pursued in other seas within the Arctic Circle. It is a customary practice with Norwegian and Russian hunters in the neighbourhood of Spitzbergen and Novaya Zemlya, as described by Lieutenant Julius Payer, of the Austrian "Tegetthoff" expedition. This widely-extended genus of marine mammal belongs to the seal family, and is an amphibious quadruped, but with legs too short for walking, so that it can only shuffle along upon land, while its webbed feet are most useful for swimming. It grows to the size of 10 ft. or 15 ft. in length, and 10 ft. in girth, or even larger; its colour when young is black, turning brown or pale with age; it is called the walrus, the morse, or the sea-horse, and sea-cow. Its tusks, about 20 in. long, weigh 5 lbs. to 10 lb., and fetch a high price, for which it is hunted and killed, this ivory being preferred for artificial teeth. The oil and hide are likewise valuable, and the flesh is not bad food. This animal is gregarious; scores or hundreds are seen in a herd lying on the ice, and they make a great noise, all roaring or braying together in the night. They have been known to attack a boat when fired at, and to break the oars or wrest them out of the men's hands, and even to tear the planks of the boat. The female walrus shows great courage in fighting to save her cubs, which she will carry off under her fins, and take refuge at the bottom of the sea.

ILLUSTRATED NEW BOOKS.

We have briefly noticed, with other publications adorned by the arts of the photographer, the designer, and the engraver, a very handsome volume of Egyptian travel, to which some further attention is yet due. It is *A Thousand Miles Up the Nile*, by Miss Amelia Edwards (Longman, Green, and Co.). The engravings on wood, from her own water-colour drawings, have been executed by, or under the direction of, Mr. G. Pearson, but were drawn on the wood by Mr. Percival Skelton and others. They are equal to some of the finest recent work in that department. There are more than seventy, besides a small one from the curious symbolical picture, by Mr. Elihu Vedder, an American artist, called "The Secret of the Sphinx." It represents a naked Fellah, or Egyptian peasant labourer, kneeling before the mighty face of the huge antique statue, which sits almost buried in the desert sands; he is listening for a word of revelation to issue from her closed lips. This is supposed to typify the awful curiosity which mankind ought to feel concerning "the whole uninterpreted and undiscovered past of Egypt." There is ample scope, no doubt, for the sentiment of romantic wonder in that region of pre-historic study. Miss Edwards is a skilful literary mistress of imaginative thought, as well as of graphic and vivid description, with power to arouse this kind of feeling upon sufficient occasion. Her book will at least bear comparison with that of Miss Martineau thirty years ago, "Eastern Life, Present and Past," a new edition of which has lately appeared. It is not so heavily charged with bits of moral and theological discussion calculated to provoke dissent. Nor is it at all overlaid with passages of mere rhetoric and effusive aspiration, which used to be more in fashion among Eastern tourists in their writings upon the subject. Miss Edwards rather manages to produce a sustained impression by setting forth with brevity and simplicity the actual features of each scene, and stating precisely what she found there. She was accompanied by another lady, who is mentioned as "L," and who also made sketches. They spent the winter months of 1873 and the following year in this leisurely river voyage from Cairo up to the Second Cataract, above the famous temple of Abou Simbel, and down to Cairo again. Their vessel was a comfortable "dahabeeyah," named the Philæ in honour of that celebrated islet and its remote shrine of ancient mystic worship. With a crew of fifteen Mohammedans, and with three fellow-passengers, sometimes pleasantly designated "the Idle Man" and the "Happy Couple," there was no intolerable air of solitude in their life in that floating temporary household. At several places, too, where they stopped for exploring and sketching, they met with English and other European travelling parties, of whose doings and sayings we are discreetly told. One dahabeeyah carried a party of ladies exclusively; another was occupied by gentlemen only; so they were naturally led to be sociable when they lay moored together alongshore. It was practicable also now and then to exchange hospitalities and friendly signs, if not much talk, with the Arab or Nubian Sheykhs, the official Beys, a Coptic Bishop, and other persons of local respectability on the banks of the Nile. In the harems of the Viceroy, at Cairo, of the wealthy Ratab Aga, at Ayserat, and of an Arab gentleman at Luxor, Miss Edwards and her companion made acquaintance with the shut-up life of Eastern ladies. They concluded that the wives of the poor hard-worked Fellahs were the happiest women in Egypt. "They have, at least, the free use of their limbs, and they know the fresh air, the sunshine, and the open fields." We cannot attempt in this short notice even to mention with any particularity the notable places and objects of historical or philosophical interest to be seen on the Nile. But Miss Edwards has diligently studied to explain as well as to describe them. Memphis, with its remains of ancient royalty; Thebes, Luxor, and Karnak, with their vast ruins of fallen magnificence; the First Cataract and Philæ; and the upper course of the river to Abou Simbel, where fresh antiquarian discoveries were made at the time, in turn engage her attention. The book has not been hastily or carelessly written, having occupied her two years since the visit to Egypt. It is sumptuously got up as regards the quality of its paper, printing, and binding, which make it a tasteful volume of price.

Twenty-one steel-plate engravings, by skilful hands, of landscape pictures by J. M. W. Turner, Pyne, Stanfield, Linnell, David Cox, and other good painters, with descriptive pages written by the Rev. J. G. Wood, are contained in a drawing-room-table book of *English Scenery* (published by Virtue and Co.). The views here presented are Windsor Castle and Forest, Eton College, Hampton Court, Petworth, a bit of old Hyde Park, a lake in Cumberland, Borrowdale, Heathfield, in the uplands between Kent and Sussex, Tintern Abbey, Dover, Battle Abbey, "Norham's Castled Keep" on the Tweed, Portsmouth Harbour, and a few other places less familiar to common recollection. One view, indeed, is that of the smoky chimneys, town churches, and factory buildings of Manchester, from Kersal-moor, by W. Wyld. This is sufficiently real and modern; but the old Hyde Park view, by Nasmyth, taken sixty or seventy years ago, with a pretty rustic cottage in the midst of it, can scarcely be recognised in the Hyde Park of our day. Mr. Wood's commentary on these subjects is slight and feeble.

The first volume of *Picturesque Europe* (Cassell, Petter, and Galpin) is devoted to *The British Isles*. It contains thirteen principal steel engravings, from pictures by Birket Foster, Wimperis, S. Read, P. Skelton, J. Mogford, Harry Fenn, and J. Chase. There are, besides, a large number of engravings on wood, drawn by Wimperis, Fenn, Skelton, W. Boot, C. Staniland, T. L. Rowbotham, and others. The aim of the editor has been to select characteristic examples of the scenes in this United Kingdom which combine natural beauty or grandeur, or home-like sweetness of aspect, with cherished associations of our national history, or with some peculiarity of situation, as marked features of the insular geography. Windsor and Eton occupy the first two chapters, with the first two steel engravings, each accompanied by a score of minor illustrations printed amidst the descriptive text. This is written, in the case of Windsor, by the Rev. T. G. Bonney, and by Mr. Oscar Browning for Eton, lightly but impressively touching up the salient features of each subject; the Royal Palace, and the College of youthful masculine education for the English nobility and gentry. Warwick and Stratford-on-Avon are next treated, and these are well chosen, as standard examples of English provincial scenery, with historic dignity to enhance its peculiar interest. We should have thought that Oxford, York, and Winchester might also have been included; but perhaps their sites are not so picturesque, and it is the landscape, not the architectural beauties, to which a preference has been given. One chapter is nominally devoted to "the South Coast, from Margate to Portsmouth," its principal view being that of Dover Castle; while another professes to be a continuation of the south coast to the Lizard Point. But these titles hold out a promise far more extensive than the amount of illustration and description is found to justify; only the Cornish coast scenery is sufficiently treated, and nothing is shown of South Devon. The Land's End has an illustrated chapter to itself. The banks of the Thames, the Dales of Derbyshire, the Forest Scenery of Great Britain, and some of the old English Abbeys and Churches, are presented to our loving admiration, two of these papers being written by Mr. W. Senior. There is but a single chapter, with its one superior and sundry minor illustrations, devoted to Scotland, and this is confined to Edinburgh and "the South Lowlands," which latter term means only Melrose and Abbotsford. Ireland is not better provided for with a few views of Killarney and Wicklow; North Wales is represented by Conway and Snowdon. The contents of this volume, in short, though very good in their way, so far as they go, must not be supposed to form anything like a complete or adequate presentment of the picturesque features of the British Isles.

The yearly volume of *The Portfolio* (Seeley, Jackson, and Halliday) contains many fine etchings, besides numerous wood engravings. The former class of illustrations render the magazine quite unique among periodicals of the day. Mr. P. G. Hamerton, the editor, is equally accomplished as a graceful and thoughtful writer, a skilful artist, and a learned critic of the fine arts. His literary assistants in the last twelve-month were Mr. Wornum, with notes on the old masters in the National Gallery; Mr. Bevington Atkinson and Professor Sidney Colvin; with Mr. Comyns Carr, who contributes a series of papers on the Abbey Church of St. Alban. That interesting monument of ecclesiastical antiquity, which will henceforth be St. Alban's Cathedral and an episcopal seat of the highest order in the Church of England, is well deserving of study. Mr. Comyns Carr gives a very good account of its conventual history, architectural construction, and decoration, which he shows to have fairly exemplified, in every age, the dominant movements both of religious and of secular public life. This subject is also effectively illustrated by the etchings of Mr. Ernest George and engraved sketches by Mr. Kent Thomas. Next perhaps in importance among the continued articles in this volume are those of Mr. Hamerton on the life, genius, and works of J. M. W. Turner. His kindly explanation of Turner's life is, of course, rather apologetic; but he shows a true sympathetic appreciation of the great landscape painter's genius, and of the circumstances and influences by which it was trained to original discoveries of nature and noble productions of art. Several French etchings from drawings or sketches by Turner accompany these biographical and critical essays upon him. The other contents of the volume have considerable interest for all who love pictures and painters with intelligent discrimination.

The first portion of a splendid French work on Venice, its history, architecture, fine arts, commerce, and social life, in successive ages, has been published by M. Rothschild, Rue des Saints Pères, Paris. The author, M. Charles Yriarte, claims our particular regard and that of our readers, since we have been much indebted to him, during the past eighteen months, for his sketches of the Dalmatian coast, Herzegovina, Bosnia, and Servia, which he was one of the first to visit upon the occasion of the late insurrections and wars. We had already perused, with great interest and satisfaction, his accurate and scholarly study of the old Venetian Republic, its political constitution and administration, in *La Vie d'un Patricien de Venise*, published about three years ago. No living writer, French, German, or even Italian, is so competent for this special task of describing, in a comprehensive but exact and lively manner, the marvellous Queen of the Adriatic; with her merchant nobles, her citizen princes, heroes of trade, of statesmanship, and of naval warfare; with her grave and gorgeous magnificence in edifices, costumes, fashions, and art; with her wealth of glowing pictures and costly marbles, and her variety of ingenious manufactures. These subjects are to be thoroughly illustrated by means of 400 fine engravings. A sufficient number of specimens have been put before us to warrant our entire approval of the work; but its publication, by weekly and monthly issues, will occupy two years and a half. The paper and printing are of superlative quality, for which the price seems to us rather moderate, being one franc for a weekly part.

A fire broke out in the Crompton Spinning Company's Mill, near Oldham, on Monday, which destroyed the building. The damage is estimated at £40,000, and about 500 hands are thrown out of employment.

The East Suffolk Chamber of Agriculture preceded their annual meeting with a market tea at Ipswich on Tuesday evening. Lord Rendlesham, M.P., presided, and Colonel Barne, the other member for the division, was present. Both hon. gentlemen spoke on agricultural topics, more particularly on the heavy burdens arising from local taxation. Colonel Barne, M.P., was elected president for the ensuing year.

Several colliery disasters occurred on Tuesday. At a pit near Bolton, Lancashire, a wall of cannon coal was set on fire, presumably by the carelessness of a boy. Several of the miners dashed through the fire and escaped, but fifteen men and boys lost their lives. A pit near Hamilton was flooded, and four men were drowned. In South Wales the winder of the ascending bucket at a mine in Glamorganshire failed to stop the machine at the proper time as two gentlemen were coming up: one died on the spot, while the life of the other is despaired of.

OBITUARY OF EMINENT PERSONS.

VISCOUNT GAGE.

The Right Hon. Henry Hall Gage, fourth Viscount Gage, of Castle Island, in the Peerage of Ireland, and third Baron Gage, of High Meadow, in the Peerage of Great Britain, a Baronet of England, died at his seat, Firle Place, near Lewes, on the 20th inst. His Lordship was born Dec. 14, 1791, the elder son of Henry, third Viscount Gage, by Susannah Maria, his wife, only daughter and heiress of Lieutenant-General William Skinner. He was educated at Westminster, and at Trinity College, Cambridge, and was author of several mathematical papers read before the Royal Institution and other societies. At the period of his decease Lord Gage, though younger than the Lords Kilmorey and Stratford de Redcliffe, was the father of the House of Lords, having sat in that assembly for sixty-nine years—a longer period than has any other peer. His Lordship married, March 18, 1813, Elizabeth Maria, eldest daughter of the late Hon. Edward Foley, and by her (who died June 13, 1857) had three sons and four daughters. The eldest of the former, Lieutenant-Colonel the Hon. Henry Edward Hall Gage, married, Aug. 31, 1840, Sophia Selina, daughter of Sir Charles Knightley, Bart., and died, Sept. 8, 1875, leaving a daughter, Mrs. Cavendish, of Chyknell, and an only son, Henry Charles, now fifth Viscount Gage, born April 2, 1854. Of the late Lord Gage's daughters the second died unmarried, the third, Caroline Harriet, is wife of Standish, present Viscount Gort, and the youngest, Fanny Charlotte, of W. Tomline, Esq. The family of Gage, one of the most eminent in England, has its name on the roll of Battle Abbey, and, before it took up its abode at Firle, was seated at Burstowe, in Surrey, and at Penshurst, afterwards so celebrated as the home of the Sidneys. The Lords Gage derived their immediate descent from the famous soldier and statesman of the time of Henry VIII., Sir John Gage, K.G.

LORD ONGLEY.

The death of Lord Ongley took place on Sunday last, at his residence, Bushey Lodge, Teddington, where he had long resided in retirement, at the age of seventy-three. Robert Henley Ongley, eldest and last surviving son of Robert, the second Lord Ongley, in the Peerage of Ireland, by his marriage with Frances, only daughter of Sir John Burgoyne, of Sutton Park, Bedfordshire, was born at his father's residence, Old Warden, near Biggleswade, in that county, in May, 1803. He succeeded to the title and representation of the family, while still a boy, in 1814. He was a deputy lieutenant for Bedfordshire.

LORD MILTON.

William, Viscount Milton, who died on the 17th inst. in France, was the eldest son of William Thomas Spencer, present Earl Fitzwilliam, K.G., by Lady Frances Douglas, his wife, eldest daughter of Sholto, Earl of Morton, and was born July 27, 1839. He received his education at Eton, and at Trinity College, Cambridge. From July, 1865, to June, 1872, he sat in the House of Commons in the Liberal interest for the southern division of the West Riding of Yorkshire, of which Riding he was a magistrate. Lord Milton was for several years an officer in the West York Yeomanry Cavalry. He married, Aug. 10, 1867, Laura Maria Theresa, second daughter of the late Lord Charles Beauleck, and granddaughter of William, eighth Duke of St. Albans, and leaves two sons and two daughters. It may be mentioned here that Lady Milton's father perished in a noble attempt to save the lives of others. The circumstances of this terrible disaster were as follow:—On Nov. 2, 1862, the schooner Coupland, of Shields, was wrecked, during a hurricane, near the pier at Scarborough. The National Life-Boat Institution's boat stationed there was manned and launched, and proceeded in the direction of the vessel. The sea broke upon the sea-wall of the Spa with violence, and the rebound of the waves caused such a sea as no small craft but the life-boat could have borne. Just then all control over the boat was lost, her coxswain having been thrown out of her by a lurch of the boat, and several persons, amongst whom Lord Charles Beauleck stood foremost, rushed to the rescue of their fellow-men who were in such imminent peril. At that moment a huge wave lifted the life-boat with fearful force against the sea-wall, and on her release it was found that Lord Charles Beauleck, Mr. William Tindall, banker, and Mr. J. Iles had been killed by the collision. The National Life-Boat Institution presented to the families of Lord Charles Beauleck and the other two gentlemen its silver medal, as a permanent memorial of its sympathy for them and its admiration of the conduct of the deceased.

SIR J. R. CROWE.

Sir John Rice Crowe, Knt., C.B., late H.B.M. Consul-General for Norway, died at Christiana, on the 10th inst., aged eighty-two. Early in life he served in the Russian marine, under his uncle, Admiral Crowe, and took part in the engagements off the island of Lemnos and was at the capture of the island of Tenedos. Subsequently he was for two years attached to the Russian Embassy in London; in 1824 became Vice-Consul at Hammerfest, in Norway; Consul there in 1837, and Consul-General at Christiana, 1843. For his long public services he was made C.B. in 1859, and knighted in 1874.

The deaths are also announced of—

Admiral Sir Fairfax Moresby, on Sunday night, at his residence at Exmouth, aged ninety-one.

Mr. John Adams, consulting surgeon to the London Hospital, aged seventy-two.

Thomas Hayter Longden, Esq., J.P. and D.L., on the 15th inst., at his residence, Ennismore Gardens, aged eighty-eight.

Thomas Page, Esq., the eminent engineer, on the 11th inst., aged seventy-three.

The Hon. Louisa Catherine Borrowes, wife of Major Robert Higginson Borrowes, of Giltown, in the county of Kildare, J.P. and D.L., High Sheriff in 1853, and third daughter of the third Lord Kilmaine, on the 14th inst., aged forty-five.

Diana, wife of Sir Thomas Chambers, Q.C., M.P., on the 14th inst., aged forty-seven.

Emma Lady Green, wife of Lieutenant-General Sir Edward Green, K.C.B., and daughter of the late T. Eaton, Esq., R.N., on the 10th inst.

Thomas Lewin, Esq., barrister-at-law, one of the six conveying counsel of the Court of Chancery, author of "Treatise on Trusts," and "Life and Travels of St. Paul."

Charles Haywood, Esq., Lord of the Manor of Kemsey, formerly Captain 1st Stafford Militia, changed his name from Eaton to that of Haywood on succeeding to that property, on the 7th inst., at The Lea, near Newport, Salop, aged fifty-six.

The Hon. Grace Charlotte, Lady Menzies, of Menzies, widow of the late Sir Niel Menzies, sixth Baronet of that ilk, and eldest daughter of the Hon. Fletcher Norton, and sister of the late Lord Grantley, on the 3rd inst., aged eighty-three.

Samuel Arthur Reynell, Esq., of Archerstown, in the county of Westmeath, J.P., formerly Master of the Hounds, younger brother of Richard Winter Reynell, Esq., of Killynion, High Sheriff of Westmeath in 1839, on the 11th, aged sixty-two.

Captain Francis Henry Woodgate, Bengal Staff Corps. He was distinguished throughout the Indian Mutiny, served with Havelock's force on its first taking the field, and was at the final assault and capture of Lucknow. In 1860 he served in China, and at the occupation of Peking.

Lord George William Loftus, second son of John, second Marquis of Ely, and uncle and heir presumptive of the present peer, of apoplexy, at Nice, on the 19th inst. He was born May 11, 1815, and married, June 21, 1846, Martha, eldest daughter of the late Mr. J. Fuller, who died in April, 1858.

Viscount de Stern, at his residence at Queen's Gate, on the 19th inst. He was created a Viscount by the King of Portugal in 1869, and he was also in the commission of the lieutenantancy of the city of London. He is succeeded in the title by his eldest son, Mr. Sydney de Stern.

Francis Lyon Barrington, Esq., of Hetton Hall, in the county of Durham, J.P. and D.L., only son of the Hon. Russell Barrington (fifth son of George, fifth Viscount Barrington, by Marion, his wife, daughter of John Lyon, Esq., of Hetton Hall), on the 15th inst., aged forty-two.

Henry Fletcher Campbell, Esq., of Boquhan, J.P. and D.L., on the 12th inst., aged seventy-six. He was second son of the late General John Fletcher Campbell, of Salton, and grandson of Andrew Fletcher, of Salton, Lord Justice Clerk of Scotland, who was nephew of the famous Andrew Fletcher, of Salton.

Edward Sincove Drew, of The Grange, Honiton, Devon, J.P. and D.L., High Sheriff in 1845, on the 15th inst., aged seventy. He was the lineal descendant of Sir Thomas Drew, of The Grange, knighted at the coronation of Charles I., who was representative of the eminent family of Drew, of Killerton.

The Hon. Mrs. Ashley Eden (Eva Maria), daughter of Admiral Rowland Money, C.B., younger brother of Sir James Kyrle Money, Bart. She married, first, in 1843, H. E. M. Palmer, Esq., of the Indian Army; secondly, in 1847, the Rev. John C. M. Bellew; and, thirdly, the Hon. Ashley Eden, third son of Robert John, third Lord Auckland, Bishop of Bath and Wells.

BRITISH COMMISSIONERS FOR THE PARIS EXHIBITION.

Her Majesty, in pursuance of an invitation received from the French Government, has appointed the following Royal Commission to represent British and Colonial exhibitors at a Universal Exhibition to be held in Paris in the year 1878:—The president will be the Prince of Wales; the other Commissioners being Lord Lyons, the Duke of Richmond, the Dukes of Manchester, Sutherland, and Westminster, Earl Spencer, Earl Cadogan, Earl Granville, Lord Northbrook, Lord Tenterden, Lord Dudley, the Hon. E. Stanhope, the Hon. R. H. Meade, Sir Alexander Cockburn, Sir Stafford Northcote, Dr. Lyon Playfair, the Lord Mayor of London, the Lord Provost of Edinburgh, and the Lord Mayor of Dublin for the time being; Sir William Stirling Maxwell, Sir Coutts Lindsay, Sir Nathaniel Meyer de Rothschild, Sir R. Wallace, Sir John Rose, Sir A. Milne, Sir A. H. Horsford, Sir H. Rawlinson, Sir R. Alcock, and the President of the Royal Geographical Society for the time being; Sir H. Thring, Sir Francis Grant, Sir Louis Mallet, Sir John Gilbert, Dr. Hooker, Dr. J. R. Bennett, Dr. P. G. Hewett, Lord Skelmersdale, the President of the Institution of Civil Engineers, the President of the Association of the Chambers of Commerce, the President of the Agricultural Engineers' Association, and Messrs. Charles Rivers Wilson, A. E. Ellis, R. J. Loyd-Lindsay, E. Ashworth, Isaac L. Bell, Hugh Birley, Joseph Chamberlain, W. Holms, F. Leighton, Samuel Morley, John Mulholland, A. J. Mundella, W. Rathbone, and H. W. Ripley. Mr. P. Cunliffe Owen is the secretary.

The "leader of society," whose portrait was published with last week's *Whitehall Review*, is the Duchess of Marlborough, wife of the Lord Lieutenant of Ireland.

From April 1, 1876, to the 20th inst., the Exchequer receipts amounted to £58,468,669, as compared with £58,091,841 in the corresponding period of last year. The expenditure was £63,541,563.

Her Majesty has given her commands that a miniature facsimile of the medal given to the Indian Princes at Delhi at the late Imperial assemblage shall be executed by Mr. G. G. Adams, who designed and struck the original.

A company has been formed in Switzerland for unearthing the village of Plurs, in Graubunden, which was overwhelmed by a fall of rock in 1618, nearly 1000 persons perishing. A rich booty is hoped for from the shops, factories, and churches.

Drs. H. Crookshank, S. J. Gordon, Charles Monks, and J. Williams, have received from the Turkish Government the military war medal, in recognition of their services during the Turco-Servian campaign.

Mr. Alderman A. B. Walker, the Mayor of Liverpool, gave, on Monday, the first of two dinners to the aged and deserving poor of the town. It was held in St. George's Hall, where a similar entertainment was held when Mr. Walker occupied the office of Mayor, two years ago.

At Sunderland, on Tuesday, Mr. W. S. Allen, M.P. for Newcastle-under-Lyme, laid the foundation-stone of the new place of worship for an ancient Baptist church, with which his father-in-law, the late Mr. John Candlish, formerly M.P. for the borough, was associated.

The Civil Service life-boat of the National Institution on the Wexford station has been the means of saving a shipwrecked crew from an inevitable death. On Monday night the smack Mountain Hare drove on the north end of the Dogger Bank at the entrance to the harbour, in a strong wind from the S.S.W. and a very heavy sea. The life-boat promptly proceeded to the help of the crew, and found the vessel on her beam-ends and full of water, with the sailors clinging to the rigging, from which perilous position they were rescued and taken safely on shore.

CHESS.

TO CORRESPONDENTS.

A LITTLE BOY (Doughty-street).—How can any doubt exist as to the Pawn's first move of two squares covering the check in the position you describe? When the move is completed it is for Black to determine whether or not he will capture the Pawn en passant. He is not, as you appear to think, obliged to do so.

I O H T (Norwich).—Your analysis proves satisfactorily that in the game between Delta and an Amateur the former could have sacrificed his Queen on the thirteenth move, and brought about a very fine termination.

CAISSA.—Philidor never attempted to perform impossibilities, nor did he ask his readers to do so. There is a true solution to the problem given below.

INQUIRY.—In an adjourned game neither player should examine the position until the play is resumed. The usual course in important games is to record, in a sealed envelope, the move of the player whose turn it is to move at the time of the adjournment.

A P P (Lancaster-gate).—We have no problems of yours in hand. Please forward duplicates, and they shall have our best attention.

DOLLY (Liverpool).—You shall have the author's answer to your analysis next week.

J S L (Bury St. Edmunds).—The position given by Pontani, wherein White wins with King and Pawn against King and five Pawns, is familiar to students. The famous Hungarian player, Sen, proved conclusively that Black can at least draw the game.

J S W (Aberdeen).—You can obtain the *Huddersfield College Magazine* on application to Mr. Watkinson, Fairfield, Huddersfield.

W L.—The amended problem shall have our best attention.

W C (Cheltenham).—Is there any defence to E to K 2nd, B to B 5th (ch), and R Q 8th?

CORRECT SOLUTIONS OF PROBLEM No. 1716 received from T D Taylor, Société Littéraire Belgique, R H Bate, E L G, M B A, Rotomago, F Myers, Highfield, P Billing, P S Shenale, H C R, E H V, G H V, T Guest, Eglesdene, E Clarkson, Tredannoch, Deep He, C Ahurst, Letta, G Finch, J H Skelton, F O Egger, W A Collier, B Lewy, H M S "Bruiser," Newarth, W E Champion, A Boyles, Drapers' College, Only Jones, T L Radwaner, S B S, Emily, B Rooks, B, and D H Harrison. All others are wrong.

CORRECT SOLUTIONS OF PROBLEM No. 1717 received from W Leeson, H B Woolwich Chess Club, W Brown, J Lonsdale, P S Shenale, B Rooks, B Hedges, Cant, T Guest, H Johnson, E H V, Uns, Triton, Only Jones, E S N, G Neumann, Vig E Frau, L Johnson, E Clarkson, Robin Roughed, Simples, H C R, S B S, Olive Crook, Hereward, W G V D, Letta, E Lord, J G Finch, E J Hayes, F O Egger, J K W F Payne, Owlet, T Smith, H M S "Bruiser," A Wood, A W Holmes, J de Huysteyn, R H Brooks, W S B, Z Ingold, Lily, Edipus, Jane N, E L G, Tredannoch, Newarth, Drapers' College, G P Crane, E H, and F Myers. Note.—This problem cannot be solved by Kt to Q 4th. Black's defence is Q to R 8th (ch), and when White interposes R, Black takes it with K, following the attack.

PROBLEMS received from W Grimshaw, J Neumann, J Statham, W T P, J G Finch, and S W C.

SOLUTION OF PROBLEM No. 1717.

WHITE. BLACK. WHITE. BLACK.
1. Kt to Q 8th Q to R 5th (ch) 3. Kt to B 7th. Mate. BLACK.
2. R to Kt 5th (ch) K takes R The variations are obvious.

PROBLEM No. 1719.

By I. O. HOWARD TAYLOR.

BLACK.

WHITE.

White to play, and mate in two moves.

CHESS IN LONDON.

An amusing little Partie played recently between Messrs. MACDONWELL and MUNDELL.—(Danish Gambit.)

WHITE (Mr. M'D.) BLACK (Mr. M.)
1. P to K 4th P to K 4th
2. P to Q 4th P takes P
3. P to Q B 3rd Kt to K B 3rd
Black may also play P takes P or P to Q 4th with a safe defence, and either is better than the move in the text.
4. P to K 5th Kt to K 5th
5. P takes P P to Q 4th
6. B to Q 3rd P to K B 4th
We should have preferred B to Kt 5th (ch), &c.
7. Kt to K B 3rd P to Q B 4th
8. Castles Kt to K B 3rd
9. B to K 3rd P takes P
10. Kt takes P Kt takes Kt
11. B takes Kt B to K 3rd
12. B to Kt 5th (ch) K to B 2nd
Doubtless his best move. If he had interposed the B, White could have con-
tinued with B takes B (ch), P to K 5th, and P to K B 3rd, &c.
13. P to K B 3rd Kt to Q B 4th
14. P to K B 4th P to Q R 3rd
15. B to K 2nd Kt to K 5th
16. Kt to Q B 3rd Kt takes Kt
17. P takes Kt R to Q B sq
18. K to R sq R to K Kt sq
19. P to K Kt 4th P to K Kt 3rd
20. P takes P P takes P
21. B to R 5th (ch) K to Kt 2nd
22. R to Kt sq (ch) K to R sq
23. R takes B K takes R
24. Q to Kt sq (ch) K to R sq
A fatal blunder. R to Kt 2nd was his only move.
25. B to K B 7th
A very fine coup, that leaves Black destitute of resource.

CHESS IN POLAND.

The following Game was played at Warsaw, in September last, between Messrs. S. HAMEL and D. WINAWER.—(Fianchetto di Donna.)

WHITE (Mr. W.) BLACK (Mr. H.)
1. P to K 4th P to Q Kt 3rd
The Fianchetto, although an exceedingly tame, is a perfectly safe defence. It seems, however, to abandon all hope of victory at the outset, and therefore has never found favour with the best players.
2. P to K B 4th P to K 3rd
3. Kt to K B 3rd B to Kt 2nd
4. Kt to Q B 3rd B to Kt 5th
5. Q to K 2nd Kt to K B 3rd
6. P to Q 3rd Kt to Q 4th
7. P takes P Kt takes P
8. B to Q 2nd Kt takes Kt
9. P takes Kt B to R 4th
The B would be better posted at Q 3rd.
10. P to K B 5th Castles
11. P takes P R to K sq
12. P takes P (ch) K takes P
13. Kt to K 5th (ch) K to Kt sq
14. P to Q 4th B to K 5th (ch)
15. K to Q sq B to Q 4th
To prevent 16. Q to B 4th (ch) and the smothered mate that would have followed.
16. P to K Kt 3rd Q to K B 3rd
17. B to Kt 2nd P to Q B 3rd
18. R to K B sq Q to K 3rd
19. B to K B 3rd B takes B
20. Q takes B Kt to Q 2nd
21. Kt takes P
If—
Q takes P Kt takes Kt
Q takes P (ch) K takes Q
P takes Kt B takes P
and Black has recovered the Pawn.
22. B to K B 4th R to K B sq
Better than P to Kt 4th, to which White has a good reply in R to K sq.
23. Q takes B Q R to B sq
24. Q to Kt 3rd R takes Kt
25. K to Q 2nd
White appears to gain no advantage from 25. P to Q 3th, inasmuch as Black can check with Q at Kt 5th, and then remove his R to at least a place of safety.
26. Q takes Q Kt to K B 3rd
27. P to Q B 4th R takes Q
28. K to Q 3rd R to K 7th
29. B to K 5th R takes P
30. B takes Kt P takes B
31. R takes P K R to K 7th
32. P to R 4th R to Q 7th (ch)
33. K to K 4th Q R to K 7th (ch)
34. K to Q 5th R to K sq
35. R to Q 6th
The end game is highly interesting, and will well repay examination.
36. P to R 5th R to K 6th
37. P takes P R takes P

CHESS INTELLIGENCE.

The Newcastle-on-Tyne Handicap Tourney, begun at the meeting held on Dec. 26 last, was only brought to a conclusion this week. The first prize, value £5, was won by Mr. Peart, of Gateshead, who received the odds of Pawn and move from the winners of the second and third prizes. These fell to Messrs. Charleton and Archdall, in the order named. The report of the meeting, for which we are indebted to Mr. F. Woodmass, of Newcastle, states that, despite adverse weather and the counter-attractions incident to the season of the year, the meeting was a decided success.

A return match between the Athenæum and Eclectic Chess Clubs was played, on the 9th inst., at the rooms of the former, in Camden-road. Eighteen players, nine on each side, took part in the mêlée; and it resulted in a victory for the Athenæum Club, whose representatives scored eight games to their opponents' five.

WILLS AND BEQUESTS.

The Scotch Confirmation granted by the Commissariat of Haddington, on the 15th ult., of the will, with six codicils, dated respectively April 9, June 10, and Nov. 11, 1870, Feb. 24 and April 28, 1871, and July 21 and Oct. 5, 1876, of the Most Hon. George, eighth Marquis of Tweeddale, who died at Yester House, Haddington, on Oct. 10 last, to Major-General Richard Taylor, C.B., John Clerk Brodie, James George Baird Hay, and John Dalziel, the executors, was sealed at the principal registry, London, on the 4th inst., the personal effects in Scotland and England amounting to nearly £210,000.

The will and three codicils, dated Feb. 9 and July 7, 1876, of Mr. Thomas Clarkson Osler, late of Edgbaston, Birmingham, who died on Nov. 5 last at Brighton, were proved on the 8th inst. by George Spencer Mathews, Howard Samuel Smith, Thomas Martineau, and Alfred Clarkson Osler, the son of the deceased, the executors, the personal estate being sworn under £140,000. The testator bequeaths £200 each to the General Hospital, the Queen's Hospital, the Sanatorium at Blackwell, and the Protestant Dissenting Charity School, Graham-street; and £100 each to the Hospital for Sick Children and the Protestant Dissenting Ministers' Benevolent Fund Association in connection with Unitarian Churches. All these charities are situated at Birmingham, and the legacies to them are given free of duty. To his wife, Mrs. Caroline Osler, he gives all his household furniture, plate, pictures, and effects, pecuniary legacies, amounting together to £5350, an annuity of £1000 for life, to be reduced in the event of her marrying again, and his residence, Thornfield House, during widowhood. There are some other legacies; and the residue he leaves to his children.

The will and two codicils, dated Oct. 28, 1857, July 31, 1860, and July 10, 1865, of Mrs. Elizabeth Butler, late of No. 10, Canonbury-lane, Islington, who died on Nov. 23 last, were proved on the 22nd ult. by James Butler, William Worsfold, and Jonathan Scollick, the executors, the personal estate being sworn under £80,000. After giving a few legacies, the testatrix directs the residue of her property to be divided between the children of her sister Ann Butler, certain of the children of her sister Emma Daniels, and her nephew, Thomas Ensor Cato, per capita and not per stirpes, share and share alike.

The will and two codicils, dated Dec. 15, 1871, Dec. 11, 1873, and May 19, 1875, of Sir Charles Robert Turner, formerly one of the Masters of the Court of Queen's Bench, late of No. 17, Chester-terrace, Regent's Park, who died on the 13th ult., were proved on the 10th inst. by Montague Turner, the great nephew, and Samuel Harvey Twining, the acting executors, the personal estate being sworn under £50,000. The testator bequeaths to the Middlesex Hospital, King's College Hospital, the Marylebone Hospital, the Cancer Hospital, Brompton, and the Adult Orphan Asylum, Regent's Park, £50 each; but these legacies appear not to be payable until the death of the widow; to his wife, Dame Judith Turner, his furniture, plate, and household goods, £1000, and his shares in the Grand Junction Canal Company; and there are a few other present legacies. The residue is left to his wife for life, and on her death a considerable number of other legacies are to be paid, and the ultimate residue testator leaves to certain of his nieces.

The will, with one codicil, dated April 29, 1872, and Aug. 27, 1875, of Mr. Henry Hopley White, Q.C., one of the Benchers of the Middle Temple, late of Lincoln's Inn, and of The First Rectory-grove, Clapham, who died on the 10th ult., was proved on the 8th inst. by Mrs. Julia Vincent, the niece, George Thomas Woodroffe, and the Rev. Dacre Craven, the executors, the personal estate being sworn under £25,000. The testator bequeaths to the British and Foreign Bible Society and the Established Church Missionary Society, Salisbury-square, £250 each; to the London Female Bible and Domestic Mission, £200; upon trust for William Anscher Chauncey, £5000; to Elizabeth Todd, formerly laundress at his chambers, £100; to Mrs. Vincent, his residence, with the furniture, plate, and effects, and £200; to his executors, £50 each; to his cousin Eliza Ann Horner, £2000; to his cousin Charles Arthur William Chauncey, £1000; and the residue between his said last-named cousin and his said niece, Mrs. Vincent.

The will, dated July 18, 1868, of Mr. Gerrard Heverden Andrews, late of Biggleswade, Beds, who died on Nov. 26 last, was proved on the 16th inst. by the Rev. William Gerrard Andrews and the Rev. Charles Gerrard Andrews, the brothers of the deceased, the executors, the personal estate being sworn under £25,000.

The will, with three codicils, dated July 27, 1867, and Oct. 26 and 28, 1876, of Mr. Henry Charles Barlow, M.D., late of No. 11, Churchyard-row, Newington, who died, on Nov. 8 last, at Salzburg, Austria, was proved on the 11th inst. by Thomas Clark and Frederic Norgate, the executors, the personal estate being sworn under £8000. The testator bequeaths all his Dante books and manuscripts, and £1000 Consols, to the London University College, the income of the money to be applied in the delivery of twelve annual public lectures on the "Divina Commedia;" to the Geological Society, £500 Consols, the income to be applied for the advancement of geological science; £100 each to the Royal Infirmary, Edinburgh, the London City Missionary Society, and the United Parochial Society and Sunday Schools of St. Mary, Newington; £50 each to the British and Foreign Bible Society, the London Orphanage Asylum, the Stockwell Orphanage, the Asylum for Female Orphans, Beddington, the Magdalen Hospital, at the date of his will, in Blackfriars-road, the Invalid Asylum, Stoke Newington, the Society for the Propagation of the Gospel in Foreign Parts, and the Church Missionary Society; £25 each to the Surrey Dispensary, the National Sunday League, and the Sunday Evenings Society for the People; there are various other legacies, including the gift of some books to the University at Athens. As to the residue of his property, he leaves one sixth to the poor of the parish of St. Mary, Newington, and one sixth each to the poor of the cities of Paris, Prague, Venice, Florence, and Rome, to be paid to the municipal authorities through the British Consuls.

Mr. T. M. Southwell, carpet manufacturer, of Bridgnorth, has issued a circular to former creditors of the firm of which he is the surviving partner, stating his intention to pay up in full the creditors who accepted a composition of seven shillings in the pound in 1858. The sum required for this purpose is little less than £10,000, and cheques in discharge of the balance accompany the circular.

A lengthened discussion took place, on Thursday week, at the meeting of the new School Board for Birmingham on the subject of religious education. A resolution recognising the importance of religious instruction being given in board schools was proposed by Mr. Greening, and it was shown that the attempt to impart religious teaching in the schools by means of voluntary teachers had been a complete failure, that plan having been able to touch only six schools accommodating 5600 scholars, out of a total of twenty, accommodating 17,253, the number of scholars, moreover, being rapidly increasing. Mr. J. S. Wright, Mr. R. W. Dale, and the other Radical members strongly opposed the resolution, which was rejected by nine to five.

FLORIAN PASCAL'S AIR DE BALLET.
Mouvement de Danse. Performed nightly with immense success at the Promenade Concerts, Covent-garden. "Exceedingly graceful, and admirably contrived to afford ample scope for the display of taste in execution without being difficult."—Review. Piano Solo, 18 stamps; string Band Parts, 1s. net.
J. WILLIAMS, 24, Berners-street, W.; and 123, Cheapside, E.C.

FLORIAN PASCAL'S BRIC-A-BRAC
(requise), performed with great success at Alexandra Palace and the Promenade Concerts, Covent-garden. Piano Solo, 18 stamps; string Band Parts, 1s. net. Lists of his compositions gratis and post-free.

FLORIAN PASCAL'S GAVOTTE
FAVORITE LOUIS XIV. for Piano, 3s.
A remarkably good and interesting piece, taking old melody, and a piece of music which will do honour to any drawing-room. Exquisitely quaint and captivating.

FLORIAN PASCAL'S AUTREFOIS
(Souvenir de Marguerite de Valois). Price 3s.
Admirable morceau for the Piano, both highly characteristic and pleasing. Written in a most quaint and pleasing manner.

SHALL I WEAR A WHITE ROSE? New Song. By EMILY FARMER. Poetry by Saville Clarke. This charming song is now being sung by Madame Trebelli at her provincial concerts with perfect success. Published in E flat and G flat, for Soprano or Contralto. Post-free, 2d stamps.

ALMA WALTZES. By H. WEIST HILL.
Just issued. These charming Waltzes are now performed with the greatest success daily at the Alexandra Palace Concerts. Piano Solo, post-free, 2d stamps, of JOSEPH WILLIAMS, 24, Berners-street, W.

ARDITT'S LATEST COMPOSITION.
L'INGENUE. Morceau à la Gavotte. Just issued. Performed nightly, with immense success, at the Promenade Concerts. Piano Solo, post-free, 18 stamps.
JOSEPH WILLIAMS, 24, Berners-street, W.

THE CURFEW BELL (L'HEURE DU COUVER-FEU). By E. NOLLET. Will speedily find favour with all piano players. The short introduction effectively represents the tolling of a bell, and the march itself is quaint and pleasing in style. Creates quite a sensation when performed at the Promenade Concerts. Piano Solo, post-free, 18 stamps.
JOSEPH WILLIAMS, 24, Berners-street, W.

LES BERGERS WATTEAU. Mouvement de Danse, style Louis XV. By LOUIS GRECH. Performed at the Promenade Concerts, and encored nightly. Piano Solo, post-free, 18 stamps.
JOSEPH WILLIAMS, 24, Berners-street, W.; and 123, Cheapside, E.C.

THE RAFT. Words by O. Rowe; Music by C. PINBUTI. Net 2s. In keys of E and G. The great Descriptive Song of "The Raft" is now so well known from the fine singing of it by Signor Foll. The music is very dramatic, and written in a very masterly style.
JOSEPH WILLIAMS, Berners-street and Cheapside.

I LOVE MY LOVE. Words by Mackay; Music by C. PINBUTI. Price 2s. net. In A flat and B flat. The harmony and general structure of this ballad are really charming.—JOSEPH WILLIAMS, Berners-street and Cheapside.

LOVED AND LOST (Geliebt und Verloren). Walts by MULLER. Post-free, 2s. "The most enchanting and fascinating waltz that has been published for many years."—(See the "Little Blue Bell" in the Christmas Number of the "Illustrated London News" for 1876). DUFF and STEWART, 147, Oxford-street; and of all Musicians in town and country.

A MAIDEN SAT ALONE ONE DAY.
New Song. By HENRY SMART. "This song is so simple and needs so small a compass that it should become a great popularity."—Queen. "Will be asked for again and again."—Graphic. Sent for 2d.—DUFF and STEWART, 147, Oxford-street.

ANGELS ARE WATCHING. By FRANZ ABT. "The delicacy and tenderness of this charming berceuse are above praise."—Queen. "The melody is really charming."—JOSEPH WILLIAMS, Berners-street and Cheapside.

A BIRD SANG IN A HAWTHORN-TREE. J. L. HATTON'S most successful new Song, for soprano. "Exceedingly original, quaint, and truly charming; a song that will add to the composer's fame."—Queen. Sent for 2d.—DUFF and STEWART, No. 147, Oxford-street.

HIGHLAND WHISKY. "THE PERFECTION OF WHISKY."

UNRIVALLED FOR "TODDY."

Wholesale of the Sole Proprietors: GREENLEES BROTHERS, 1, Gresham-buildings, E.C. Distilleries, Argyleshire.

KINAHAN'S LL WHISKY.

KINAHAN and CO., London, finding that, through the recommendation of the Medical Profession, the demand for their OLD LL WHISKY for purely medicinal purposes is very great,

submit with pleasure the following analysis by Dr. Hassall:—

"I have very carefully and fully analysed samples of this well-known and popular Whisky. The samples were soft and mellow to the taste, aromatic and ethereal to the smell. The Whisky must be pronounced to be pure, well-matured, and of very excellent quality. The medical profession may feel full confidence in the purity and quality of this Whisky."

LIEBIG COMPANY'S EXTRACT OF MEAT.

Finest Meat-flavouring Stock for Soups, Made Dishes, and Sauces. Contains Genuine ONLY with Facsimile of Baron Liebig's Signature across Label.

H. SCHWEITZER and CO., 10, Adam-street, London, W.O.

C A C A O I N E

(COCOA-NIB POWDER).

A predominance of favour over what is found in other preparations of Cocoa or Chocolate, by reason of the development of the essential principle, theobromine, obtained by removing and so unclogging it of those substantial matters with which cocoa-nibs in their natural state are so many times overweighed.

Unsweetened, and cannot spoil in any climate.

To be had only in packets, 2d. and 1s., labelled JAMES EPPS and CO., HOMOGENEOUS CHEMISTS, 45, Threadneedle-street; and 170, Piccadilly.

BORWICK'S BAKING POWDER has

been AWARDED THREE GOLD MEDALS for its superiority over all others. Makes bread, Norfolk dumplings, pastry, puddings, &c., light and wholesome. Sold in 1d. and 2d. Packets, and 6d., 1s., 2s., 3s., 4s., and 5s. Patent Boxes.

DIGESTIVE LOZENGES

or VICHY.

Manufactured from the Salts extracted from the Mineral Waters.

The Vichy Lozenges should be taken by those persons whose digestion is difficult, painful, or laborious.

In cases of slow or difficult digestion, a few of the Lozenges should be taken before each repast.

The Lozenges are flavoured with peppermint, lemon, vanilla, rose, orange-flowers, or aniseeds.

In Boxes, at 1s. and 2s. each.

VICHY SALTS FOR BATHS.

In Packets, for One Bath, 1s. 6d. each.

VICHY HARLEY-SUGAR.

An excellent Digestive Biscuit.

In Boxes, 1s. 6d., 2s. 6d., and 3s. 6d.

All these preparations are guaranteed by the French Government.

Sold by all respectable Chemists.

TAYLOR'S WHITE FULLER'S-EARTH

is the only reliable and thoroughly harmless Skin Powder.

Recommended by the most eminent dermatologists, and prepared by an experienced Chemist. It is the best dusting powder for infants.

Used in the Nurseries of the Princess of Wales, the Duchess of Edinburgh, the Duchess of Teck, and most of the aristocracy. Recommended by the Faculty. Post-free, send 1s. or 2s. stamps. Prepared only by JOHN TAYLOR, Chemist, 13, Baker-street, London, W. For winter use simply invaluable, and far superior to Glycerine or any greasy compound.

HOLLOWAY'S PILLS and OINTMENT.

The Pills purify the blood, correct all disorders of the liver, stomach, kidneys, and bowels. The Ointment is unrivalled in the cure of bad legs, old wounds, gout, and rheumatism.

LAMPLOUGH'S PYRETIC SALINE.

Have it in your houses and use no other. This saline is the true Antidote in Fevers, Eruptive Affections, Sea or Bilious Sickness, having peculiar and excellent merits. For the prevention of the public against fraudulent imitations I have applied for and again obtained a perpetual injunction, with costs, against the defendant. Observe the genuine has my Name and Trade Mark on a Buff-Coloured Wrapper.—113, Holborn-hill, London.

THE MEDICAL PROFESSION throughout

the world have given their unqualified approval of the wonderful and beneficial effects of

"ALLOCOCK'S POROUS PLASTERS"

in BRONCHITIS, SCIATICA, LUMBAGO, RHEUMATISM, and severe coughs, and in all local pains and affections; but beware of the imitations. See the stamp of every plaster has "Thos. Allocock and Co. Porous Plaster" thereon, and do not buy any without it. Sold by all Patent Medicine Vendors.

HEALTH, TONE, AND VIGOUR.

THE LATE SIR ASTLEY COOPER'S

VITAL RESTORATIVE, for Strengthening the Nerves and Purifying the Blood, highly recommended for the loss of Nerves and Physical Force, pleasant to the taste, perfectly harmless, possessing highly reanimating properties. It removes pimples, blotches, purifies the blood, gives sound and refreshing sleep, and restores the constitution to health and vigour in a short time. Sold by most Chemists at 2s. 6d., 3s. 6d., 4s., and 5s. per Bottle; sent carriage paid, on receipt of price, by HILTON and CO., 9, Lower Belgrave-street, London. Particulars free.

TOOTH-ACHE.

INSTANT CURE.

BUNTER'S NERVINE.

J. Housell, Esq., Surgeon, Bridport, writes:—"I consider Bunter's Nervine a specific for Toothache. Very severe cases under my care have found instantaneous and permanent relief. ANTIQUARIAN DISCOVERIES IN GREECE: OUR ARTIST SKETCHING THE ENTRANCE GATE OF THE ACROPOLIS AT MYCENÆ.

permanent, at least, in its sources, can be counted upon by the Chancellor of the Exchequer. The Budget, if it do not entail upon the country additional taxation, may be regarded with considerable favour. For the present, however, we have observed no signs of a watchful economy in the national outlay. No rumours of intended retrenchment have cast their shadows before. No large readjustment of the public burdens looms in the proximate future. We have a cautious and competent Chancellor of the Exchequer, but we cannot but bear in mind that it is his to find the means, not to determine the amount of money to be spent. The people's outlook in this direction cannot be described as exhilarating.

THE COURT.

The Queen and Princess Beatrice, with Prince Leopold (who arrived last week from Boyton Manor), continue at Osborne House. Her Majesty conferred the Star of India on Prince Leopold, on Thursday week, his Royal Highness not having been able to receive it on New-Year's Day.

The Queen's eldest grandchild, Prince William of Prussia, completed his eighteenth year on Saturday last. Her Majesty conferred on him the Order of the Garter. The Duke of Connaught and Strathearn arrived at Osborne. The Judge Advocate-General had an audience of the Queen. The Duke of Richmond and Gordon dined with her Majesty.

The Queen, Princess Beatrice, the Duke of Connaught, and Prince Leopold attended Divine service on Sunday, performed at Osborne by the Rev. George Prothero.

Her Majesty, accompanied by the members of the Royal family, has taken her usual daily walks and drives.

The Queen has sent presents of pheasants for the patients of St. George's, Charing-cross, the Great Ormond-street Children's, and other hospitals of the metropolis.

Lady Churchill has succeeded Lady Waterpark as Lady in Waiting to her Majesty. The appointment of Augustus Savile Lumley, Esq., to be her Majesty's Marshal of the Ceremonies, in the room of the Hon. Spencer Lyttelton, resigned, is gazetted.

The Duke of Connaught left Osborne, on Tuesday, for London. The Earl of Dunmore had an audience of her Majesty on his return from Berlin, where he attended the funeral of Princess Charles of Prussia on the part of the Queen.

COURT ARRANGEMENTS.

The Queen purposes holding a Council on Wednesday next at Buckingham Palace.

Her Majesty will open Parliament in person on Thursday next.

We are authorised to state that the Queen will not this season hold an "Official Court."

Her Majesty will hold a Drawingroom at Buckingham Palace on Friday, March 2, on which occasion the Corps Diplomatique will also be received under the usual regulations of the Diplomatic Court. The Queen will hold a second Drawingroom on Wednesday, March 14, and two more Drawingrooms after Easter, of which due notice will be given. The Prince of Wales will hold Levées on her Majesty's behalf on Thursday, the 15th, and on Monday, the 26th, inst., at St. James's Palace.

THE PRINCE AND PRINCESS OF WALES.

The Prince of Wales's shooting party at Eastwell Park, the residence of the Duke of Edinburgh, in Kent, broke up on Saturday last. The Prince, accompanied by Prince Edward of Saxe-Weimar, Earl Sydney, Lord Alfred Paget, and other gentlemen, drove to Ashford station, where he was received by the Right Hon. E. H. Knatchbull-Hugessen, M.P., a director of the South-Eastern Railway Company. His Royal Highness travelled to Charing-cross, the train arrangements being under the personal supervision of Mr. Shaw, the manager. The Prince arrived at Marlborough House shortly before seven p.m., and afterwards went to the Folly Theatre. His Royal Highness returned to Sandringham on Monday.

The Princess of Wales, who, with her family, remained at Sandringham during the Prince's absence, attended Divine service on Sunday at St. Mary Magdalene's Church, Sandringham Park, accompanied by Princes Albert Victor and George and Princess Louise of Wales.

The Prince and Princess of Wales have signified their intention to honour with their presence the performance to be given at the Gaiety Theatre on Wednesday next for the benefit of Mr. John Parry.

The Duke and Duchess of Edinburgh arrived at the Piræus yesterday week, where they were received by the King and Queen. The Royal party then proceeded to Athens. The palace was illuminated in honour of the illustrious guests. A dinner was given at the palace on Sunday in honour of the Duke and Duchess. The members of the British Legation, Admirals Drummond and Rice, the members of the Russian Legation, and the wife of the Russian Admiral, Madame Boutskoff, were invited.

The Duke of Connaught and Strathearn, Lieutenant-Colonel commanding 1st battalion Rifle Brigade, paid a visit to Lieutenant-Colonel Sir Edward Elphinstone, Royal Engineers, at the Aldershot camp yesterday week. His Royal Highness has during the week visited the Prince of Wales's, the Criterion, and the Folly Theatres.

The Duke of Cambridge entertained a party of noblemen and gentlemen at dinner, on Monday, at Gloucester House.

His Excellency the Lord Lieutenant of Ireland and the Duchess of Marlborough, with Lord Randolph and Lady Rosalind Churchill, arrived at Dublin, on Saturday last, from Moor Park, the seat of the Marquis of Drogheda. His Excellency conferred the honour of knighthood on Alderman Boag, of Belfast, on Tuesday, and also held his first Levée at Dublin Castle, which was numerously attended. The Lord Lieutenant and the Duchess gave a dinner party. On Wednesday the Duke received a deputation at the castle, consisting of the principal and head members of the Belfast Corporation, the Down University, the General Assembly of the Presbyterian Church, the King and Queen's College of Physicians, the Royal Hibernian Academy, and the Royal Horticultural Society, who presented addresses of congratulation upon his appointment to the office of Lord Lieutenant. The Duchess of Marlborough held her first Drawingroom in the evening, which was largely attended.

The Maharajah Dhuleep Singh has arrived in town from Elvedon Hall, Thetford.

The Duke and Duchess of Manchester have arrived at their residence in Great Stanhope-street from Kimbolton Castle.

The polo and hunt fancy-dress ball for the western and midland counties took place, on Wednesday, at Cheltenham, under the auspices of the International Gun and Polo Club, of several masters of hounds, and of the leading county families. The annual ball in connection with the Bicester Hunt took place, on Tuesday, and was attended by greater numbers than on any previous occasion.

The Extra Supplement.

GRINDING A SKATE IN FRIEZLAND.

This picture, by a German artist, Mr. C. Bischoff, was to be seen in last year's Exhibition of the Royal Academy. Its subject is an ordinary incident, as we suppose, of the winter season in that part of the Continent which, though very near our island shores, experiences a much longer and steadier continuance of hard frost than we are accustomed to feel. In Holland and the adjoining province of Friesland skating is not a fearful joy to be snatched for one or two days, rarely during an entire week, amidst harassing doubts and anxieties lest there should be a change in the weather, a softening or breaking up of the ice, so that ponds and rivers, which presented but yesterday a firm and glassy surface to the gliding foot, become mere traps of dangerous deception, liable to crack and split and open their rotten crust, letting the unwary or foolhardy skaters fall into the chill waters, too often deep enough for drowning as well as ducking. Long excursions may be undertaken along the canals or rivers, and across the broad lakes or meres, in some countries of Northern Europe; and journeys of business, or to visit friends and kinsfolk at Christmas holiday time are often performed in this expeditious, cheap, and enjoyable manner. The scene to which we are admitted in this picture is not difficult to understand; it might belong to a Friesland idyll of rustic life. Here is a maiden, quaintly attired in the dress of a superior class of the peasantry, with the square cap, the embroidered sleeves, the frock and bodice, and the broad-hemmed petticoat, sitting beside a grinder's bench, waiting for the skate which she has taken off to be ground. The young man and woman to whom the house belongs, and whose matrimonial relation to each other is perhaps suggested by the cradle, are busily employed in doing the job she has ordered, with grindstone and file. Another customer, the brisk young fellow outside the door, has stuck one of his skates upon the end of an alpenstock, which is thrust in at the window. He will, of course, want to be next served, and has only his pipe to console him at present; but we suppose, when the girl is free to come out and join him, the delay will not seem quite so tedious as it may be felt just now.

POLITICAL ITEMS.

A banquet, at which the Chancellor of the Exchequer, Mr. Crose, and Lord Sandon, M.P., were present, was given by the Mayor of Liverpool on Thursday week.

Sir G. Campbell addressed a crowded meeting of his constituents at Kirkcaldy, on the Eastern Question, yesterday week. He expressed a belief that the Government did well in sending Lord Salisbury to Constantinople and in withdrawing Sir H. Elliot. He said long ago that the Turks would yield to force only, and that it was now clear and decided that there should be the joint execution of the plan settled by Europe. England, with a strong and ready fleet, should press joint action on the other Powers; and by doing so she would assuredly take a magnificent position, settling the Eastern Question for generations, and saving outraged humanity.—Sir G. Campbell addressed his constituents at Dysart, last Saturday, and gave a general support to Mr. Gladstone.

Sir James Fergusson, addressing the Glasgow Conservative Association, yesterday week, said there existed in Scotland great prejudice against the Conservative party, hardly a Scotch burgh constituency returning a Conservative, and only one third of the Scotch members were Conservatives. An hereditary prejudice had to be overcome; for Conservatism, rightly considered, was the happiness of the greatest number. The Conservative policy kept faith with Christian and Turk alike. It favoured peace, but spared no cost to maintain the strongest Navy in Europe. What the Conservatives wanted was confidence in themselves and organisation. The Government would, he said, meet Parliament without fear.

Sir J. D. Hay, M.P., lectured at Stamford, in the evening, upon what he saw and heard during a recent visit to the Danube and Constantinople.

Mr. Gladstone was presented with an address by the Liberal Association of Taunton, last Saturday, in which he was welcomed as the statesman to whom the nation looks in the present crisis for guidance and advice. In reply, the right hon. gentleman, referring to the Eastern Question, cautioned the public to be on their guard, as great efforts would be made to induce them to relax their vigilance and to accept the half-hearted conclusion that the question is for the present at an end. He pointed out that there was not in the whole history of Turkey a sign that the people had learned the first elements of peaceful civilisation, showed that there had been no exaggeration in the accounts of the atrocities in Bulgaria, reminded the people of England that their resources and their action had placed Turkey in the position of power which she had so abominably misused, contended that Turkey had broken the treaty of 1856 and trampled it under foot, and denied that it was any longer in force as between Turkey and ourselves. Mr. Gladstone afterwards went on to Glastonbury, where he expressed his hearty thanks for the cordial reception with which he was greeted.—In declining an invitation to visit Bath, Mr. Gladstone explains that he is now engaged in some visits of a purely private and personal nature, at the same time pointing out that, if he were to make visits to great communities at so peculiar a crisis for the purpose of a political exposition, he would seem to assume a character which does not belong to his position.

At a meeting of Old St. Martin's Club, to present a testimonial to the representative of the parish in the Metropolitan Board of Works, Mr. W. H. Smith, M.P., made some remarks upon the value of local self-government.

Mr. Gordon, the Conservative member for Chelsea, addressed a meeting of his constituents on Monday evening. A vote of confidence in the hon. member was carried.

At Newcastle-under-Lyme, a meeting of the members of the Liberal Association was held, on Monday, to select a candidate to represent the Liberal party at the borough election, should one be rendered necessary through Sir E. Buckley's retirement. It was decided to bring forward Mr. J. S. Wright, chairman of the Birmingham Liberal Association.

The opening of the Manchester Junior Conservative Club was celebrated, on Monday night, by a dinner in the club premises, at which about 120 members were present. Mr. J. W. Maclure presided.

Mr. Brogden, M.P. for Wednesbury, addressing a meeting of his constituents, at Darlaston, on Monday night, said that, while not wishing to throw discredit upon the present Government, it was clear that in the early stages of the Eastern Question the Administration were not in accord with popular sentiment; and by the course then pursued the Cabinet had encouraged the Turk in the adoption of measures which resulted in the massacre of so many thousands of helpless men, women,

and children. Mr. Brogden believed that a great change had recently taken place in the constituencies, and that a poll of the country at this time would give the Liberals a majority.

The annual dinner of the Dublin Constitutional Club took place, on Monday night, at the Exhibition Palace—Colonel Taylor, M.P., occupying the chair. Representatives of various associations in the country attended.

A crowded meeting was held in Edinburgh, on Monday evening, in support of the Permissive Bill. Sir Wilfrid Lawson, M.P., moved one of the resolutions, and, remarking that the liquor traffic was the greatest obstacle to good government, described his bill and called for support towards having it made law.

At a Liberal soirée held at Stroud, on Tuesday night, Mr. Edward A. Freeman was the principal speaker, and devoted his remarks to the Eastern Question. He said he scarcely regretted the failure of the Conference, for so many concessions had been made to the Turks that what remained would have been useless. He acknowledged the indebtedness of the nation to Lord Salisbury.

The annual meeting of the Liberal Association was held, on Tuesday night, at the Albert Hall, Sheffield, which was crowded to excess. Mr. Leader presided, and Mr. Morley, M.P., Mr. Samuelson, M.P., Mr. Mundella, M.P., and Mr. Leatham, the recent candidate in the Liberal interest for the South-West Riding, were the principal speakers. The proceedings were characterised by the utmost enthusiasm, and the speakers united in the belief that the prospects of the Liberal party were good, and that only unity and forbearance were required for success.

Major-General Shute, M.P., speaking at Brighton, on Tuesday night, at a banquet of the local Conservative Association, said in reference to the Army and Navy that there were no departments which owed more to Conservatism. Mr. Ashbury, M.P., and Mr. M. D. Scott, M.P., expressed their strong approval of the foreign policy of the Government.

Mr. John Kynaston Cross, the Liberal member for Bolton, presided, on Tuesday night, over a numerously-attended meeting, convened by the Liberation Society. Mr. R. W. Dale and Mr. J. G. Rogers were the principal speakers.

The Cambridge Reform Club held a banquet at the Cambridge Townhall, on Tuesday night, under the presidency of Mr. J. W. Cooper. Messrs. Fowler and Shield, the Liberal candidates for the representation of the borough, spoke on the Eastern Question, and objected to the policy of the Government, which history would condemn. Mr. Herschell, M.P. for Durham, denied that the policy of the Government on the Eastern Question had been consistent.

Mr. Childers spoke at the inauguration of a Liberal club at Goole, on Tuesday, and in the course of his address reviewed the Liberal reform measures of the past fifty years.

Mr. Joseph Cowen addressed his constituents at Newcastle-on-Tyne, last Tuesday night, on foreign politics. He condemned the speeches of Lord Beaconsfield in the first few months of the agitation against Turkey, but commended the action taken by Lord Derby after the first account of the atrocities had been confirmed. He had faith in Midhat Pasha, and although the new Constitution of Turkey would probably be a failure, it should be tried. A vote of confidence in Mr. Cowen was unanimously passed.

The annual meeting of the Leeds Educational Council, which was originated at the suggestion of the Right Hon. W. E. Forster, M.P., and of which he is president, was held on Wednesday afternoon. Mr. Forster said it would be a mistake to induce every clever boy in an elementary school to strive to get an exhibition. Boys who received exhibitions should show signs of having a particular faculty for the life either of a scholar or a teacher.

Mr. Mundella, M.P., was present, on Wednesday, at the annual meeting of the Sheffield Chamber of Commerce. He said trade was worse in Germany and Belgium than in England, and that workmen in America were in a worse position than those at home. The hon. member mentioned that large quantities of corn grown in the plains of Cawnpore were now being consumed in England; and as regarded American meat, he said he was informed by a gentleman interested in the trade that the whole of England would be supplied, and that the meat could be brought in summer as well as in winter.

At the annual soirée of the Bath Young Men's Liberal Association, on Wednesday night, a vote of confidence in Colonel Hayter, M.P., was passed. A resolution was also adopted that the conduct of the Government on the Eastern Question had been unsatisfactory and disastrous. Colonel Hayter thought it was a dangerous policy to add greatly to the Episcopalate, and in reference to the Eastern Question advocated the unity of England, Russia, and Austria to force on Turkey concessions to its Christian subjects.

Mr. Arthur Cohen, Q.C., who contested the borough of Lewes in the Liberal interest at the general election, addressed a Working Men's Association on Wednesday night. He condemned the vacillating policy of the Government in regard to the Eastern Question, and expressed a conviction that ere long the Ministry would have to give place to the exponents of a more liberal policy.

A Liberal gathering took place in the Cambridge Theatre, on Wednesday night, at which Mr. W. Fowler and Mr. Shield, the Liberal candidates, addressed a large number of the electors. Mr. Fowler spoke on the Eastern Question and on the financial policy of the Government. Taxes had, he said, been remitted out of their predecessors' surplus, and the expenditure had been generally increased. Mr. Shield treated the Eastern Question as the great historical problem of European politics.

Mr. T. Earp and Mr. Bristowe addressed their constituents, on Wednesday night, at Newark, and received a vote of confidence. Both spoke strongly against the Turks.

In a small part of this week's issue wrong Arms were placed to an Obituary notice of Sir Hardman Earle, Bart. The Memoir, with the proper Arms, will appear in our next Number.

The Earl of Wharncliffe was, on Wednesday night, chosen president of an institution about to be formed in Sheffield, to be called the South Yorkshire Association for Promoting Adult Education.

The first block of the new buildings for King Henry VIII's Cathedral Grammar School at Chester was formally opened, on Wednesday, by a gathering of the friends of the school, over which the Duke of Westminster presided. The new buildings have cost about £14,000, and to complete the whole will cost another £10,000, of which sum about £5000 is in hand, raised by subscription. The Duke eulogised the efforts of Dr. Howson, Dean of Chester, who was absent through illness, in getting the cathedral restored and the new schools built and so nearly completed.

SKETCHES AT THE IMPERIAL DURBAR, DELHI.

THE IMPERIAL DURBAR AT DELHI: THE NEPAULESE DEPUTATION.

THE IMPERIAL DURBAR AT DELHI.

We continue our series of Sketches of the Grand Durbar or Court of the Viceroy of India, with the Assembly of Princes and Rajahs, held by Lord Lytton at Delhi, on New-Year's Day, for the solemn proclamation of her Majesty's new title as Empress of India. The arrival of the Viceroy at Delhi, some days before, with his entry in a procession of elephants, has been the subject of an illustration in our Journal. He took up his abode, with the members of his family and personal and official suite, and with a party of guests, besides the members of the Supreme Council of India, in the viceregal camp, near the site of the old military cantonments on the plain north of the city of Delhi, and where the British Army lay during the siege of 1857. The Commander-in-Chief of the Indian Army, and the Commander-in-Chief of the Bombay Army, were encamped close to the Viceroy. The camp of the Governor of Madras (the Duke of Buckingham) was situated on the right hand of Lord Lytton's camp, and that of the Governor of Bombay on the left; beyond this were the camps of the Lieutenant-Governors of Bengal and the North-West Provinces, and the Punjab. Around these official camps extended far and wide those of the native Princes; the Nizam of Hyderabad, the Maharajah of Mysore, the Guicowar of Baroda, and the Maharajah of Cashmere, being placed each by itself; while the camps of the other Rajahs and Ruling Chiefs were arranged in different regional groups—those of Madras, Bombay, the North-West Provinces, Oude, the Punjab, Rajpootana, and Central India. The whole formed a vast town of canvas tents, covering seven or eight miles, and decorated with a variety of splendid banners. The famous "Ridge," behind the Viceroy's tent, was surmounted by a flagstaff displaying the Imperial standard.

The ceremony of New-Year's Day, at the Imperial Durbar, took place on the Daheerpore plain, three miles from the Viceroy's camp. The Viceroy had been occupied several days in receiving and returning the state visits of the native Indian potentates or dignitaries; and there was a deputation of Ambassadors from the Maharajah of Nepal, as well as from the Nizam of Hyderabad—both of whom are independent Sovereigns, to present the "nuzzur," or complimentary gift, to the representative of the British Empress of India. The scene at this important ceremony, which was on Dec. 26, is shown in our page Engraving, from a Sketch by our Correspondent, Lieutenant C. Pulley, of the 3rd Ghoorhase, who has also contributed some other sketches. The smaller Engravings on the opposite page represent, in a rather humorous style, a few minor incidents and figures attending this extraordinary assemblage of so many different nations, tribes, and classes from all parts of India. The final proceedings on the day of the Imperial Durbar, which was a pageant of gorgeous magnificence, were brief and simple, as we have described them. The Imperial Proclamation was read by Major Barnes, the Chief Herald. The Imperial standard was hoisted with an artillery salute of a hundred and one guns. The National Anthem was played by all the military bands. Lord Lytton then read an address, explaining the rights and reasons of her Majesty's new title, and announcing the creation of a new order of knighthood, that of the "Indian Empire." He also read a telegraphic message from her Majesty, and so closed the Durbar. It was altogether a very grand affair; sixty-three of the native ruling chiefs were present, with splendid retinues, and 15,000 troops were arrayed on the field.

We shall give some more Illustrations next week, including the principal acts of the Durbar.

FOREIGN AND COLONIAL NEWS.

FRANCE.

(From our Correspondent in Paris.)

Thursday, Feb. 1.

The chief event of the week has been the re-election of M. Gambetta to the presidency of the Budget Committee—a result mainly due to the co-operation of the Bonapartist fraction, which, possessing a casting vote in several of the bureaux of the Chamber, might easily have transformed the ex-Dictator's triumph into a defeat had it chosen to do so. On the contrary, however, the Imperialists facilitated M. Gambetta's election by all the means in their power, their object being to place him in opposition to M. Jules Simon, so as to bring out the latent antagonism between the two—an antagonism which, it is said, nothing has dispelled or softened down since the time when the present Premier arrived at Bordeaux, on behalf of the Government of National Defence, to put a sudden end to M. Gambetta's dictatorship. It remains to be seen whether the provisions of the Bonapartists will be realised; at all events, M. Gambetta pronounced a most conciliatory speech on assuming the presidency of the Committee, declaring that, far from being hostile to the Government, he was anxious to assist it in its task, and to hasten the examination of the Estimates.

M. Robert Mitchell, a young and hot-headed Bonapartist deputy, provoked an animated debate in the Chamber, a few afternoons ago, by interpellating the Government concerning the sous-préfet of La Réole, whom he accused of having furnished an ante-dated shooting license to a Republican electoral agent, with the view of screening him from a charge of poaching. M. Jules Simon replied in an energetic speech, maintaining that the question was a puerile one; and that his subordinate, if guilty of an error, had, at all events, acted in perfect good faith. M. Mitchell thought fit to rejoin, and a lively altercation ensued between him and M. Jules Ferry, whose interruptions, he said, were impertinent. This observation provoked the intervention of President Grévy, and the debate eventually terminated by M. Mitchell being formally called to order.

Commander Cameron, the well-known African traveller, who has been recently stopping in Paris, read an account of his explorations in Central Africa before a crowded audience in the great hall of the Sorbonne on Friday night. He addressed the company in French, which he speaks with considerable fluency, and his dramatic narration frequently elicited loud applause. On Saturday, the French Geographical Society gave a grand banquet in his honour.

The *Liberté*, which some months ago passed into the hands of M. Isaac Pereire, the well-known financier, has been indulging of late in a series of vehement attacks on the Crédit Foncier, which, at all events, enjoys far greater prosperity than M. Pereire's famous venture, the ill-fated Crédit Mobilier. These attacks provoked a great sensation on the Bourse, and Baron de Soubeyran, the chief administrator of the Crédit Foncier, thought fit to send a challenge to M. Pereire. At first the latter's son assumed the responsibility of the articles, and announced his intention of fighting in his father's place. To-day, however, M. Isaac Pereire opposes the substitution, and declines to reply to M. de Soubeyran otherwise than before a court of law.

The theatrical events of the week have been, first, the inauguration of Auber's monument at Père Lachaise—a ceremony accompanied with great éclat—on Monday afternoon. The band of the Republican Guard played the "Pie Jesu;"

the bust, executed by the sculptor Perraud, recently deceased, was uncovered, after which two Conservatoire pupils advanced and laid on the tomb an immense crown of immortelles, a yard in diameter. Speeches were then made by the Marquis de Chennevières, as director of fine arts; Baron Taylor, M. Ambroise Thomas, M. Halanzier, the manager of the Opera; M. Carvalho, of the Opéra Comique; and the Mayor of Caen, representing Auber's native town.

Another incident of interest in the theatrical world has been the production at the Variétés of the new opéra-bouffe, by Offenbach, entitled "Docteur Ox," the libretto being derived from M. Jules Verne's well-known novel of the same name. The scene is laid in a Dutch town, thrown into a state of revolution in consequence of the Doctor's attempts to bring about a climatic change by the aid of various chemical combinations. From the day that he carries out his plan, lighting the streets with his wonderful "Ox hydric" acid and impregnating the atmosphere with its exciting vapours, everything is upset in the place. People quarrel, seize each other by the hair, make love at hazard, horses run away, the surrounding vegetation acquires an abnormal development, and the most angelic women become bad-tempered and capricious. The town council, moreover, declares war against a neighbouring community; and it is only when the beautiful Princess Prascovia succeeds in blowing up the doctor's laboratory that order is re-established. Some of the episodes are amusing enough, but the music scarcely equals Offenbach's usual standard of excellence. Among the most warmly-applauded morceaux, I may mention the semi-French and semi-Flemish duet sung by Dupuis and Judic, Judic's love song, her couplets entitled "La Guzla," Dupuis's serenade, and the duet of the magic word in the last act. Judic as Prascovia, and Dupuis in the part of the doctor, met with a most enthusiastic reception; and, thanks to their valuable co-operation, the composer of "La Belle Hélène" may claim another decided success.

BELGIUM.

By Royal decree the importation of cattle from Germany, England, Russia, Austria, and Turkey is prohibited.

PORTUGAL.

A telegram from Lisbon states that the Burmese Embassy has arrived there, and that the Ambassador and his suite are to be received by the King.

The Ministry counts upon having a majority in both Houses of Parliament.

The subscription which was initiated by the Queen for the relief of the sufferers from the recent floods has reached a considerable amount.

ITALY.

A Royal decree has been issued prohibiting the importation into Italy of horses coming from Egypt.

A brigand chief, said to be the last infesting the Neapolitan provinces, has been killed, near Salerno, in an encounter with the constabulary.

GERMANY.

The eldest son of the Crown Prince completed, on Saturday last, his eighteenth year, and came of age. In honour of the day the Emperor held a solemn Chapter of the Order of the Black Eagle, and Prince Frederick William (who, it is announced, will henceforward be called Prince William), the hereditary Prince of Baden, Weimar, and Mecklenburg-Strelitz, Prince William of Herse, and General von Bose, were invested. Queen Victoria conferred the Order of the Garter on the Prince, who is her eldest grandson, on the occasion. The Crown Prince remarked, during the ceremony, that this was the first occasion on which three members of one family had possessed the Garter at one and the same time.

AUSTRO-HUNGARY.

The Austrian Budget Committee had a long discussion, on Monday, upon the question whether any provision should be made for Austrian subjects to take part in the Paris Exhibition of 1878. The reporter of the committee, Herr Gompertz, proposed that the committee should sanction a grant of 600,000 fl.; but this was rejected, chiefly on financial grounds, by 15 votes against 11. In consequence of this decision Herr Gompertz resigned his post, and announced that a motion to grant the sum which he had proposed would be submitted to the Reichsrath on behalf of the minority of the committee.

An Imperial Letter Patent has been issued dissolving the Tyrolean Diet and ordering elections for the next Diet.

RUSSIA.

Placards have been anonymously posted up at Moscow demanding a Constitution for Russia on the Turkish pattern.

The language of the unofficial portion of the Russian press on the late Delhi ceremonial is very sarcastic.

The Senate has begun the trial of the persons implicated in the demonstration which took place before the Kasan Cathedral on Dec. 18.

TURKEY.

Instruction has been telegraphed by the Minister for Foreign Affairs to the representatives of the Porte abroad that, in conformity with article 17 of the Constitution, the equality of all the subjects of the Ottoman Empire is established, without prejudice on the ground of religion. By an Imperial Iradé it is decreed that non-Mussulman children are admissible into the military schools on precisely the same footing as Mussulman children.

Midhat Pasha has issued an official edict decreeing the entire disarmament of the civil population. With the exception of soldiers and policemen, and travellers under special permission, nobody is to be allowed to carry arms.

A despatch has been sent by the Porte to Serbia and Montenegro inviting them to enter into direct negotiations for the purpose of concluding peace, and hopes appear to be entertained that the negotiations will be successful.

SERVIA.

The Cabinet has decided, it is said, to accept overtures of peace with Turkey. The *Post* says that both Prince Milan and Prince Nicholas asked for counsel from St. Petersburg, and the Russian Government, in both instances, replied that it had originally discountenanced the commencement of war, and that it would now willingly see the Princes conclude peace on satisfactory terms.

An Orphan Home, established at Belgrade, by Dr. Ziemann, the agent of the Manchester Society, was opened on Saturday. The Prince and Princess, all the Ministers, and the Diplomatic Corps were present. The religious ceremony was performed by the Archbishop of Serbia. After this, Dr. Ziemann made a short address to the Prince, who replied warmly, thanking the English people for their generosity to his suffering countrymen, and especially the people of Manchester, who had established this Home. The Princess gave Dr. Ziemann the grand collar of the Takova.

EGYPT.

Baron Malaret has been appointed Comptroller-General, in accordance with the scheme of MM. Goschen and Joubert. Mr. Gerald Fitzgerald, of the Indian Civil Service, has accepted the appointment of Deputy Comptroller-General of the Revenue. A large leaven of Englishmen is now at work in Egyptian public offices.

UNITED STATES.

The easy passage through Congress, as anticipated, of the bill embodying the joint committee's plan for the decision of the Presidential election question has caused general relief and gratification throughout the country. The President, in returning the bill signed to the Senate, sent a special message, stating that he believes the bill gives an assurance that the result of the election will be accepted without resistance from the supporters of the disappointed candidate, that the highest official will hold his place without a questioned title, and that the country, through the adoption of the bill, has escaped imminent peril. The Commission was organised on Wednesday, and it was ordered that the proceedings should be confidential till otherwise determined. Now that the danger of trouble in the counting of the votes has passed away, the Secretary for War is ordering the troops assembled at Washington back to their original posts.

The action of the Florida Returning Board has been declared legal, constitutional, and irreversible, by a majority of the Committee appointed by the Senate to investigate the recent elections in that State; the counting of the votes, they decide, was carried out honestly and correctly.

The Louisiana Returning Board were arraigned at the Bar of the House of Representatives, last Saturday, for contempt. The board made answer denying the right of the House to make them violate the Louisiana laws by obeying the Investigating Committee's orders. The House, by a party vote, passed resolutions declaring the board in contempt, and remanded them to custody, ordering them to produce for the Investigating Committee all the papers relating to the Louisiana election.

Mr. Benjamin Hilt has been elected Senator for Georgia.

The librarian reports that at the close of the year 1876 the library of the United States Congress comprised 311,097 bound books and 100,000 pamphlets. There were 14,832 entries in the copyright department in the year.

CANADA.

Lord Dufferin, the Governor-General, in a speech at the National Club of Toronto, considered it as no small part of his good fortune that his connection with Canada should have occurred at a moment when probably she is in the act of making one of the greatest strides towards the establishment of her prestige, stability, and importance which has ever been recorded in her history. Even the casual observer could not have failed to mark the decisive manner in which Canada was gradually asserting her position as one of the most important communities in the civilised world, and this circumstance had had a visible effect upon the public opinion of both England and the United States.

THE CAPE COLONIES.

Sir Bartle Frere's appointment as Governor of the Cape is reported to meet with universal approval in the colony. Sir John Coode's visits to the harbours on the eastern coast are regarded with the utmost satisfaction. At Port Elizabeth, Port Alfred, and East London personal inspection has confirmed the hope of the possibility of carrying out effective works. The preparations for the Exhibition are progressing satisfactorily; the opening has been postponed until March 15. The Cape Parliament has been further prorogued until March 2. The action of the Government has tended to reassure the inhabitants of the north-eastern frontier. The news from the Transkei territory is satisfactory. Intelligence from the Transvaal announces that the Transvaal Volunteers claim victory at Magnet Heights, in which fifty of the enemy were killed. An English clergyman at Lydenburg has published a protest against the treatment of the natives in the Transvaal, in which he asserts that all the women and children taken are sent to Pretoria and indentured for five years to the farmers.

AUSTRALIA.

The New South Wales Parliament was opened, on Dec. 12, by the Governor, whose speech on the occasion explained that the length of the last Session had caused delay in calling Parliament together. He referred to the continued prosperity of the colony and to the increase of public revenue, which, although mainly due to the sale of land, is yet satisfactorily marked in all its branches. He touched upon the embodiment of an additional battery of artillery, the subject of duplicate cable communication with Europe, the arrival of the hydraulic engineer, the proposed modification of the mail contract via San Francisco, and the preparation of a scheme for the consolidation of the debt of the colony. He stated that railway communication is steadily progressing, and that additions to the present lines to the extent of sixty-four miles are to be opened within the next three months. Various new measures are to be submitted to Parliament during the present Session, one of the earliest of which will be a bill for the amendment of the existing electoral law. In the Legislative Council an address in reply to the Governor's speech was moved and agreed to without opposition; but in the Legislative Assembly a similar motion gave rise to an amendment moved by the head of the Opposition, which set forth the disapproval of the House at the delay in convening Parliament and dissatisfaction with the management of public affairs. A debate ensued which lasted through two sittings, and was characterised by a violent attack by the Opposition on the policy of the Government. The amendment was negatived, on division, by 32 to 25, and the original address in reply to the Governor's speech then put and agreed to. Sir Hercules Robinson returned to Sydney, on Dec. 10, from his tour in the southern districts and Victoria. A telegram from Sydney, dated Jan. 25, states that the Colonial treasurer has brought forward the Budget. The revenue of the colony for 1876 amounted to £5,000,000, and there is a surplus in hand of £1,679,608, part of which it is proposed to absorb by abolishing certain duties. The tobacco duty is, however, increased.

The Queensland Parliament was prorogued on Dec. 1 by his Excellency Governor Cairns. The close of the Session, which lasted eight months, was chiefly marked by the Government proposals for railway extension, which were, however, withdrawn in consequence of opposition from the Legislative Council, with a view to their re-introduction next Session. A revision of the Torres Straits mail was also discussed, but without result. The plague of kangaroos and other marsupials likewise occupied the attention of the Assembly, and a motion pointing out the desirableness of means being taken for their destruction was affirmed. The Governor's prorogation speech referred to the various measures passed during the Session, and congratulated the colony on the distinguished position attained at the Philadelphia Exhibition. Parliament was to meet again on Jan. 9. Sir Arthur Kennedy, the newly-appointed Governor of Queensland, was expected to arrive by the January Torres Straits mail from Hong-Kong, when Governor Cairns, who has been appointed to South Australia, would proceed to Adelaide via Melbourne.

During the performance of "La Muetta di Portici" at the Opera, at Ghent, on Sunday night, a demonstration was made by the audience against the Election Bill proposed by the Government in the Chamber of Representatives.

A despatch from Düsseldorf announces the death, last Saturday, after a short illness, of Duke William Eugène of Würtemberg, who was married to the Grand Duchess Wjera Constantinoovna of Russia, and was a Major in the 1st Regiment of the Würtemberg Uhlans.—The deaths are also announced of two celebrated German savants—Professor Poggenpfort, of the University of Berlin, and Professor Holmeister, the botanist, of the University of Tübingen.

NATIONAL SPORTS.

After a period of unexampled dullness, in which we may be almost said to have had no "national sports," the appearance of the weights for the spring handicaps has been the signal for renewed activity in turf circles. The entries, taken as a whole, were scarcely up to those of last year; but this is amply atoned for by the splendid acceptance obtained in nearly every case, which reflects the greatest credit on Messrs. Ford, Dorling, and the other handicappers. Class is also well represented in every race. In the Lincolnshire Handicap, Thorn, Controversy, Petrarch, Lollypop, Bruce II. (late Bruce), Warrior, Shillelagh, and Touchet are engaged. Rosebery heads the list for the Newmarket Handicap, and Coltness, Enguerrande, and Admiral Byng follow at a respectful distance. Controversy again appears in the City and Suburban, while Balfie, Forerunner, Julius Cæsar, Bruce II., Warren Hastings, Rosbach, Warrior, and Ernest are the most noticeable of the remaining acceptors. In the Great Metropolitan, Rosebery is once more at the head of the list; there is no other animal of any great form engaged; but we note that Lillian is left in, so possibly the wonderful old mare is to have another season on the turf before retiring to her well-earned rest. Both Rosebery and Controversy remain in the Chester Cup, and the fact of the former's name appearing in the long-distance races only looks as if, after all, staying is his strongest point, though the result of the Cambridgehire showed that he possessed a high turn of speed. Hampton comes next to them, so he is to return for the second time to the "legitimate" business. The three-year-olds in this race, with the exception of Rosbach and Touchet, are not a very bright lot. Altogether, the appearance of all the handicaps is eminently satisfactory, and gives promise of a thoroughly successful racing season.

We are now within a fortnight of the great Waterloo-Coursing Meeting, and so many dogs have been in reserve for the "blue ribbon of the leash," that the recent meetings have been scarcely so interesting as usual. Added to this, the ground in all parts of England has been in a terrible state from the incessant rain, so that the sport has been pursued under great difficulties. Betting has been fairly brisk on the Waterloo Cup, and Mr. Salter has held the position of first favourite for some time past. He will be represented by The Squatter, the dog that ran up to Donald last season; and, as he was then a late puppy, and is said to have improved wonderfully in every respect, backers have good reason for their confidence. The nominations of Colonel Hathorn and Messrs. Lawton and Brocklebank are also in high favour. Mr. Hedley has been elected judge for the third year in succession; and Heystead, who is well known in Ireland, will make his first appearance with the slips.

On Saturday afternoon last a sculling-match took place, on the Tyne, between two amateurs, W. Fawcus and J. G. Sowerby. It may be remembered that the former was amateur champion in 1871; and he secured a very easy victory, Sowerby being unable to show to advantage in the rough water, and ceasing to row some little distance from the finish.

Until within the last few days there have been no billiard-matches for money this season; but the champion and T. Taylor opened the ball a few days ago, and other engagements are sure to follow. In the match in question Cook conceded a start of 300 points in 1000, and won by no less than 365. We never saw him play better; and, as he compiled no less than 672 in five breaks, Taylor had little chance. His spot play was most deadly, and he exhibited a wonderful knowledge of strength throughout. Taylor also played well, especially at the commencement; but the balls broke against him from start to finish, and it was impossible to struggle successfully against such play as Cook exhibited. The same pair appeared again at Kennington-oval in an exhibition game, when Cook scored 1000 in 1h. 10 min., the fastest time on record; his largest break was 413, which included 136 spot strokes.

METROPOLITAN NEWS.

The Company of Goldsmiths have given £100 in aid of the funds of the Royal Albert Orphan Asylum.

The *Globe* states that Captain Hamber was, on Monday, elected editor of the *Morning Advertiser* by the committee of the Incorporated Society of Licensed Victuallers.

The Iron and Steel Institute general meeting has been fixed for March 21 and 22. The British Iron Trade Association's annual meeting will take place on March 23.

Much damage was caused by an exceptionally high tide in the Thames on Wednesday morning. At several places upon the south-east coast also the tides were unusually high.

Captain Sir George Nares was, on Saturday last, presented with the freedom of the Shipwrights' Company. After the presentation Sir G. Nares and his officers were entertained at a dinner at the Albion Hotel, Aldersgate-street.

On Tuesday evening the Lady Mayoress (Miss White) gave a juvenile ball at the Mansion House. The guests were about 1200 in number, and the limit of age was fixed at from eight to eighteen. The company began to arrive about six o'clock, and were received in the saloon by the Lord Mayor and his daughters, the Lady Mayoress and Miss Florence White.

At the weekly meeting of the London School Board, on Wednesday, an estimate was presented, showing that £506,353 is required to enable the board to satisfy liabilities up to March 25, 1878. This is equal to a rate of 5½d. in the pound. After a discussion it was referred to the finance committee to apportion that sum among the parts of the metropolis.

The committee of Crystal Palace proprietors who were appointed at the meeting on Dec. 1 have issued a report on the subject of the offer of Mr. Sawyer to lease the Palace and grounds at a fixed rental of £56,000 per annum. The committee are of opinion that Mr. Sawyer's offer should be accepted, the rental being sufficient to pay 2½ per cent on the ordinary stock.

The weekly return of metropolitan pauperism shows that the total number of paupers last week (the fourth week of January) was 85,567, of whom 39,229 were in workhouses and 46,338 received outdoor relief. Compared with the corresponding period in the years in 1876, 1875, and 1874, these figures show a decrease of 3582, 14,082, and 21,858 respectively. The number of vagrants relieved on the last day of the week was 758, of whom 559 were men, 168 women, and 31 children under sixteen.

The large space at the corner of Northumberland-avenue, directly opposite Trafalgar-square, has been let by the Metropolitan Board of Works as the site of a large hotel—to be named "The Grand Hotel."

Mr. H. Richard, M.P., presided, on Monday, at the annual meeting of the Protestant Dissenting Deputies, which was held at the Congregational Memorial Hall. The report stated that Mr. Osborne Morgan intends to introduce the Burials Bill at the earliest opportunity in the approaching Session.

Deputations from the east end of London, accompanied by a procession, waited upon the Metropolitan Asylums Board, last Saturday, and protested against the occupation of a large clothing factory in Limehouse as a temporary smallpox convalescent hospital. The board, however, decided by a large majority that the pressure of the epidemic demanded the immediate opening of such an institution.

An inquest was held, last Tuesday, on the body of the Dowager Countess Howe, who was killed by a fall from a window of her house in Charles-street, Berkeley-square. Evidence was given of the fact of the deceased lady having been in a very depressed state since the loss of her husband; and the jury, after deliberating a few minutes, returned a verdict of "Suicide whilst of unsound mind."

The annual prize of £50, offered by the Company of Goldsmiths, has, for the second time, been awarded to John Watkins, student at South Kensington, from the Birmingham School of Art, for a design for a shield, after a description by Virgil. E. J. Poynter, R.A., one of the judges, says it is the most able design that has ever been sent in. There were fifty-four competitors. The drawings are on view at the Royal Architectural Museum, Dean's-yard, Westminster.

The Lord President of the Council has appointed Mr. R. A. Thompson, Assistant-Director of the South Kensington Museum, to be Acting Director; and Colonel Herbert B. Sandford, R.A., Executive Commissioner for the Philadelphia International Exhibition of 1876, Acting Assistant-Director during the absence from the museum of Mr. P. Cunliffe Owen, C.B., who has been appointed Secretary to the Royal Commission for the Paris Universal Exhibition of 1878.

The fairy sketch, entitled, "Our Doll's House," which was produced as a holiday attraction at Mr. and Mrs. German Reed's entertainment, will be withdrawn at the end of next week, and a novelty, called "A Night Surprise," substituted on Monday, Feb. 12. Mr. West Cromer is the author, and Mr. German Reed composes the music. "Matched and Mated," which is as attractive as ever, and Mr. Corney Grain's new sketch, "Spring's Delights," will retain their places in the programme.

A farewell meeting in connection with the visit of the Rev. J. Henson (the original of Mrs. Harriet Beecher Stowe's "Uncle Tom") to this country took place, on Tuesday evening, at the Metropolitan Tabernacle—the Earl of Shaftesbury in the chair. There was a large attendance, and much interest was felt in Mr. Henson's narrative of his adventures in slave life. It was stated that the object of his mission—that of raising funds to release him from pecuniary difficulties—had been more than accomplished, and that he would return to America with £600 clear to assist him in his last days, he being eighty-eight years of age.

The conviction of the American Spiritualist, Dr. Slade, has been quashed by the Middlesex magistrates, on the ground that it omitted four important qualifying words of the section of the statute under which Mr. Flowers, at Bow-street, committed him for three months as a rogue and vagabond. The words omitted were "by palmistry or otherwise." Fresh summonses were, however, issued on Tuesday, at Bow-street, against Dr. Slade and Mr. Simmonds, for conspiracy to defraud, and against Dr. Slade also under the Vagrancy Act. Mr. Flowers, in granting the summonses, hoped that Sir J. Ingham, the chief magistrate, would hear the case.

A deputation, representing the council of the National Chamber of Trade and various vestries and district boards of the metropolis, waited on the Home Secretary, last Monday, to lay before him the grievance caused through the water rate being charged upon the annual value of property, which value had so greatly risen of late years. The deputation also advocated an amalgamation of the companies under one central body. Mr. Cross said that all he could do was to promise that the views of the deputation should receive attention.—Another deputation sought the aid of the Home Secretary to secure for Battersea and such places direct representation on the Metropolitan Board of Works, and Mr. Cross promised that the matter should receive his consideration.

The fifth annual soirée of the Metropolitan Board Teachers' Association took place, yesterday week, at the City Terminus Hotel, and was very fully attended. Entertainments of a varied character had been provided for the visitors, beginning with a miscellaneous concert, creditably sustained by the members of the association. The concert was followed by a dramatic performance and elocutionary recitals; after which "Kalulu" and the d'Alvinis gave their respective performances in the pillar hall. The programme, which was carried out under the superintendence of Mr. R. W. Coldwell, gave entire satisfaction. A ball and supper followed the music and recital. Many members of the Metropolitan School Board were present. In the course of the evening it was stated that out of 1800 certificated teachers in the district under the control of the metropolitan board 500 were members of the association.

Under the sanction of the Christian Blind Relief Society, directed by Mr. T. Clarke, their honorary secretary, an entertainment, defrayed by benevolent subscriptions, is annually given to the poor blind people living in the metropolis. Upwards of two hundred afflicted persons, accompanied by their respective guides, were hospitably received, on Tuesday evening, in the large hall of the Eastern Tabernacle, Burdett-road, kindly lent for the occasion by the Rev. A. G. Brown, the minister. A good plain tea was provided, followed in the course of the evening by speeches, songs, and glees by the blind choir conducted by Mr. and Mrs. G. S. Pyne, recitations, the distribution of oranges, and last, though not least, the presentation of one shilling to each guest. The society, under whose direction the festival is given, is dependent on voluntary contributions, is managed by honorary officers at small cost, and is the only one of the blind relief associations that grants pensions to persons under forty years of age.

The total number of births in London last week was 2572, and of deaths 1425. Allowing for increase of population, the births exceeded by one, whereas the deaths were 270 below, the average numbers in the corresponding week of the last ten years. The deaths included 86 from smallpox, 22 from measles, 21 from scarlet fever, 3 from diphtheria, 40 from whooping-cough, 21 from different forms of fever, and 11 from diarrhoea. Of the persons who died from smallpox last week, 38 were certified as unvaccinated, 22 as vaccinated; in the remaining 26 cases the medical certificates did not furnish any information as to vaccination. The fatal cases showed a decline in East London, whereas they were more numerous in the west,

central, and south districts. The Metropolitan Asylum Hospitals, with accommodation for 900, contained 830 smallpox patients on Saturday last. Excepting smallpox, the fatal cases of each of these zymotic diseases were considerably below the corrected average weekly numbers. The mean temperature was 59.0 deg., which was 1.3 deg. above the average of the last sixty years.

With a view to the establishment of an association of a literary, artistic, and scientific character, available for a wide district of Surrey, a conversazione was held on Wednesday night in the Masonic Hall, Camberwell New-road, and was fully attended. The provisional committee of the proposed new association includes the names of Mr. Le Neve Foster, M.A., Mr. Glaisher, F.R.S., Mr. Hyde Clarke, F.S.S., and Mr. F. H. Varley, F.R.A.S., and others. Addressing the company last evening, Mr. F. Pike explained that the aim of the committee would be to affiliate themselves with the Society of Arts and South Kensington Museum, to promote first-class lectures on science and art, purchase philosophical apparatus, give concerts and conversaziones, to hold classes for science and languages, and to establish a reading-room and library of reference. For these purposes a public meeting is to be held in the course of the present month. At the conversazione a fair collection of works of art, scientific apparatus, articles of virtù and curios, was on view, lent by various contributors. Musical selections were given by the glee party of the 1st Surrey Volunteers, under the direction of Mr. Cozens.

CALLS TO THE BAR.

The following gentlemen were, yesterday week, called to the Bar:—

Lincoln's Inn:—Henry Brettingham Adams, B.A., Cambridge; Benjamin Edward Somers, of Merton College, Oxford; George John Chapman, B.A., Oxford; Thomas Cyprian Williams, LL.B. Cambridge; Charles Swann Shield, B.A., Cambridge; Urquhart Attwell Forbes, University of London; Henry George Willink, B.A., Oxford; George Stuckey Lean, jun., B.A., Oxford; John Mitchell Chapman, LL.B. Cambridge; Arthur Royle Harding, B.A., Oxford; Henry Stanton, jun., B.A., Oxford; John Sutterfield Sanders, B.A., Oxford; Hubert Winstanley, George Lewis Denman, LL.B. Cambridge; Henry Storer Bowen, B.A., London; Frederick Leechmere Paton, B.A., Oxford; Richard Booth B.A. Cambridge; Frederick James Norman Pearson, B.A., Oxford; William James Wright Ingham, B.A., Cambridge; and Ng Choy, of Hong-Kong, China.

Inner Temple:—John Pickersgill Rodger, (holder of a certificate of honour, second class, Hilary Term, 1877); William Wallace Craig, M.A., Oxford; William Hamilton Phillips, B.A., Oxford; Berthold Robert Stansfeld, M.A., Cambridge; Arthur Andrew Cecil Dunn-Gardner, M.A., Oxford; James Dominick Dwyer, George Hone Hone-Goldney, B.A., Cambridge; Henry Hatchell Warren, B.A., Oxford; Ernest Beauchamp Nelson, B.A., Oxford; Francis Lea Stourbridge Smyth, Oxford; John Heywood, B.A., Cambridge; Abraham Lionel Hart, LL.B. London; Robert Alexander Milligan Hogg, B.A., Cambridge; George Macan, B.A., Cambridge; Arthur Baptist Noel; Augustine Robert Whiteway, M.A., Cambridge; George Mervyn White, B.A., Oxford; Arthur Brins Smith; Lancelot Edward Lawford, B.A., Oxford; Francis Ernest Colenso, B.A., Cambridge; John William Broadfoot; Percival Broadbent; Marie Lewis Alexandre Hughes; William John Richardson, B.A., Cambridge; Thomas Sutherland, Cambridge; Herbert Parker Reed, and William Frederick Barry, B.A., Dublin.

Middle Temple:—Thomas Austin Guerin, Charles Edmund Fox, Patrick Alexander Donald Carnegie, Alfred de Bathe Brandon, of Trinity Hall, Cambridge; Eugenius Charles Jackson, Charles Richard Ansonbury Birch, James Blekenisopp, Alexander Cophill Wylie, Gaupat Varrattam Maikar, Albert Edward Nelson, Walter Coates, Slade Butler, of Christ Church, Oxford, B.A.

Gray's Inn:—Miles Walker Mattinson, "Bacon Scholar," Gray's Inn, T.T. 1874, first-class studentship, T.T. 1875, certificate of honour T.T. 1876.

A TECHNICAL UNIVERSITY FOR LONDON.

A scheme of this kind is engaging the serious attention of many thoughtful and influential citizens, and its features have been already indicated in various ways, not only directly in the shape of definite proposals, but in reports and pamphlets. It is evident that, by the serious consideration they are giving to some such organisation, the great companies are rebutting the charges so recently brought against them, and are showing that now the time has arrived in which they may act with more widely extended purpose and in more complete union they are willing to observe those duties which are, after all, their highest privileges. The old medieval order has changed, but it has only now given place to the new in the sense of a really adequate opportunity for establishing a system of such technical education as would be consistent with the operations of a number of guilds representing various "crafts." It may be hoped, however, that we shall soon really see, either on the Thames Embankment or elsewhere, not far from the civic centre, a large industrial university in full and successful operation, in the maintenance of which both the opulent and the less wealthy companies of the City contribute.—*City Press*.

ROYAL SOCIETY FOR THE PROTECTION OF LIFE FROM FIRE.

At the general court of this society, held at their offices, 66, Ludgate-hill, yesterday week, the establishment of additional escape stations at Bognor and Glastonbury was reported. The authorities of the towns thus benefited have made suitable provision for the efficient working of the machines granted to them by the society. The total number of escapes now placed out by the society is forty-nine. Amongst the rewards voted by the committee for exertions displayed in the saving of life at fires are testimonials, with £2 each, to Police-Constables Savage and H. Cockram, of the Y Division, for services at a fire in Ossulston-street, Somers' Town; testimonial, with £3, to Police-Constable Henry Goring, 459, Paddington Division, who rescued, under circumstances of much difficulty, the life of an aged lady at a fire in St. Mark's-road, Notting-hill, on July 25 last; testimonial, with £5, to Fireman Rhymes, who saved six lives by means of his escape at a fire in the Mile-end-road, in June last; testimonial, with £2, to Daniel Fortune, labourer, for exertions in rescuing two children at a fire in Killeagh, in the county of Wexford, Ireland, in August last. A sum of £5 was voted to the sister of the late George Lee, the fireman who died from the injuries he sustained whilst endeavouring to save life at the fire in St. John-street, Clerkenwell, last July.

LIFE-BOAT SERVICES.

A meeting of the Royal National Life-Boat Institution was held, on Thursday, at its house, John-street, Adelphi. Rewards amounting to £700 were voted to the crews of various life-boats of the institution for services rendered by them during the past month, in which period they saved 101 lives from various wrecks. The silver medal of the institution and its thanks inscribed on vellum were voted to Captain O. S. Cameron, R.N., Inspecting Commander of H.M. Coastguard at Newcastle, Ireland, and £4 to two coastguardsmen for putting off in their boat, and at great risk saving the crew of four men of the brigantine Fame, of Maryport, which was wrecked off Newcastle during a strong wind from the S.E., and in a very heavy sea, on Jan. 3. The silver medal and thanks of the institution, on vellum, were also awarded to Mr. John Payne, Chief Officer of H.M. Coastguard at Skerries, Ireland, for wading into the surf on two occasions and saving, at great risk, one of the crew of the smack Falcon, which was wrecked there, in a gale from E.S.E. and a very heavy sea, on Jan. 2. Other rewards were granted to the crews of shore-boats for saving life from wrecks on our coasts; and payments amounting to £1349 were ordered to be made on some of the 256 life-boat establishments of the institution.

There is to be an International Horticultural Exhibition at Oporto in June next.

THE CHURCH.

PREFEMENTS AND APPOINTMENTS.

Ridgway, John Marcus, to be Vicar of Cookley.
 Fynes-Clinton, Charles Henry; Rector of Blandford Forum, Dorset.
 Griffith, F. Pelham; Chaplain to H.M. Legation, Guatemala.
 Eildard, Joseph Stephen; Rural Dean of Ealing.
 Johns, Joseph William; Curate of Leamington Priors.
 McComas, C. E. A.; Vicar of Marton, Warwick.
 Norton, William; Rector of Alford.
 Sadler, William; Rector of Dumbleby, Lincolnshire.
 Schwartz, A. J.; Vicar of Tolleshunt Major.
 Sedgwick, J.; Rector of Birdbrook.
 Fidebottom, Frederick Radclyffe; Rector of Siltan, Dorset.
 Frey, Ralph Henry; Vicar of Hartley, Wintney.
 Woodland, Eldred; Vicar of St. James's, Milton, Portsea.
 Jackson, H.; Curate of Batley; Vicar of Morley.—*Guardian*.

The Bishop of London has removed from Fulham Palace to London House, St. James's-square.

An organ has been presented by a parishioner, Mrs. Wells, to St. Edmund's Church, Warkton, Northamptonshire.

The Rev. H. Seymour Roberts, LL.D., has been appointed superintendent of the Metropolitan Mission of the Society for Promoting Christianity Amongst the Jews.

A handsome tablet has been erected at Christ Church, Pera (the memorial church), by Viscountess Strangford, in memory of her husband, the late Lord Strangford.

At the annual meeting of the Leeds Church Extension Society it was stated that nearly £57,000 had been promised towards the proposed fund of £100,000 for building churches in the borough.

The Rev. Samuel Hobson, M.A., on leaving the curacy of Alford, Lincolnshire, has been presented with a silver coffee-service from the parishioners, and Keble's "Christian Year" from the National School children.

The annual meeting of the City Branch of the English Church Union, on Tuesday evening, was attended by Mr. Pelham Dale, the inhibited Rector of St. Vedast's, who declared he resolve not to obey any injunction received by him from Lord Penzance. If deprived of his benefice, he would earn his living by teaching, but would not surrender an iota of his priestly character.

The Bishop of Chichester presided at the annual meeting of the Church Schoolmasters and Schoolmistresses' Benevolent Institution last Saturday. The total income of last year was £5514, and twenty-four annuitants were elected. Upwards of £3900 has been granted in cases of temporary distress since 1857; ninety-eight disabled teachers have been elected to annuities, and thirty-nine teachers' orphans to weekly allowances.

A new church, to be called the Holy Innocents, which has been erected on the Glebe at Hornsey, was consecrated by the Bishop of London last Saturday. Among those present were Mr. W. C. Alexander, who had contributed £1000; Mrs. Peter Robinson, who gave £500 and a stained-glass window in memory of her husband; and Mr. M. Powell. The building has been erected from designs by Mr. Blomfield, at a cost of £6200, and will seat upwards of 600.

A handsome stained-glass two-light window, by Messrs. Leaton, Butler, and Bayne, of Garrick-street, has been placed in the parish church of St. Mary, Seymour-street, Euston-square, to the memory of the beloved wife of the Vicar, the late Mrs. Stevenson, who died at Eastbourne on Ascension Day, 1876. The window has been erected by the congregation, as an expression of regard and affection for the deceased lady, as well as of their appreciation of the great services rendered to the parish by their zealous and valued pastor, the Rev. Thomas Stevenson, M.A.

It has been decided immediately to proceed with the restoration of the nave of Salisbury Cathedral, at a cost of nearly £6000, towards which the Dean of Salisbury has given £3000. Other contributions have also to be received, leaving about £600 to be made up. In addition to the foregoing, £1000 is required for the pavement of the nave and nave aisles, and £1030 for the restoration of the north porch. The new pen choir screen is in course of completion, as well as the new organ, and the painting of the arcade on the south side of the choir is to be continued, the work having been undertaken by local artist. The late Miss Grace Everard, of Laverstock Hall, near Salisbury, by her will bequeathed £1000 towards the restoration fund of the cathedral, free of legacy duty.

THE UNIVERSITIES.

OXFORD.

At Merton, Mr. J. Quine, from King William's College, Isle of Man, has been elected to a Mathematical Postmastership.

At Exeter, Messrs. T. W. Gould, from Cheltenham College, and A. W. Dennis, from Marlborough College have been elected to Classical Scholarships; Mr. H. L. Porter, from King William's College, Isle of Man, to a Mathematical Scholarship; Mr. H. A. Hill, from Manchester Grammar School, to a Symes exhibition.

At Trinity, Messrs. H. A. Miers, from Eton; P. A. Barnett, from the City of London School; and C. E. Golland, commoner, of Brasenose (late of Magdalen College School), have been elected to Classical Scholarships.

EXORDAT.—Balfour, Trinity.

In all cases of equality the names are bracketed.

Mr. Donald McAlister, Senior Wrangler, is son of Mr. Donald McAlister, of Liverpool, and formerly of Tarbert, Cantire. He was born in Perth in May, 1854, was educated in Aberdeen, and at the Liverpool Institute, at the latter under the Rev. John Sephton, late Fellow of St. John's College. Mr. McAlister's school and college distinctions are as follows:—1869. First Class Oxford Junior Local. 1870. First Class Oxford Senior Local. 1871. Gold medal of the Royal Geographical Society; two national silver medals of the Science and Art Department for mechanics and magnetism and electricity; highest place in the Cambridge Senior Local, with Albert Memorial Scholarship of £145. 1872. Highest place in the Oxford Senior Local, with Lord Derby's prize, and award of two exhibitions—one of £100 to Balliol College, and one of £280 to Worcester College, Oxford. These were subsequently declared national. National gold medal for acoustics, light and heat; national bronze medal for physical geography, and Holt Scholarship of £130. 1873. Highest place in the Matriculation of London University, with an exhibition of £50; three national gold medals in magnetism and electricity, mathematics, and theoretical mechanics; silver medal in physics; exhibition of £100 at St. John's College, Cambridge. 1874. First Class, Wright's prize and exhibition in college May examination; first bachelor of science and in preliminary scientific examination for bachelor of medicine in London, and first class in honours in mathematics. 1875. First class in college May examination and foundation scholarship. 1876. Sir John Herschel's prize for astronomy. Mr. McAlister's college tutor was Dr. Parkinson, his private tutor Mr. Routh.

Frederick Brian de Malbisse Gibbons, the second Wrangler, is the eldest son of Mr. F. B. Gibbons, a barrister of the Middle Temple, residing at No. 1, Pembroke-gardens, Kensington. He was born at Egham, Surrey, on July 5, 1854; and was educated by Mr. Philip Wells, of Loudoun House, St. John's-wood, up to June, 1868, when he passed the Oxford Local Examination in Latin, Greek, French, and mathematics in the first division, and obtained a prize. He also passed several examinations at South Kensington, for which certificates of the first class were granted. In 1868 he was presented by Mr. Gordon to Merchant Taylors' School, where he yearly gained the chief mathematical prize. In 1873 the Parkins Exhibition was awarded to him, and an open scholarship at Gonville and Caius College; there he maintained his position as a mathematical scholar, and gained the first prize of the year on each occasion. Mr. Ferrars was his college tutor, and Mr. Houth his private tutor. Mr. Gibbons is not a mere student, for from 1869 to 1873 he served in Captain Fawcett's company of the South Middlesex Rifle Volunteers, under the command of Lord Ranelagh.

Mr. R. C. Rowe, the third Wrangler, is son of Mr. Richard Rowe, of Kingsdown, Bristol, and was born in December, 1853. He was educated at the grammar school of his native city, under the Rev. Dr. Caldwell, from which, in 1873, he proceeded to Trinity College, having gained a minor scholarship there in the previous December. He was elected sizar in March, 1874, and exchanged the minor scholarship and sizarship for a foundation scholarship, which he still holds, at Easter, 1875. Mr. Rowe is also a graduate of London University, where he has been successively first exhibitor of matriculation and exhibitioner and University scholar in mathematics. His college tutors were Mr. Blore and Mr. Image; his private tutor, Mr. Routh.

Mr. James Parker Smith, the fourth Wrangler, is the eldest son of the late Archibald Smith, of Jordan-hill, Renfrewshire, who was Senior Wrangler in 1836, and grandson of the late Vice-Chancellor Sir James Parker, who was seventh Wrangler in 1825. Mr. J. P. Smith was born in 1854, and educated at Winchester College. On entering Trinity he obtained a minor scholarship in classics and mathematics, being bracketed with Mr. Rowe; he was elected to a foundation scholarship in his first year. His college tutor is Mr. Prior; his private tutor, Mr. Routh.

Yesterday week the ship Earl Dalhousie, 1047 tons, Captain David Jarvis, was dispatched from Plymouth for Sydney, with a large number of free and assisted Government emigrants. The Earl Dalhousie has been fitted out for the present voyage under the special direction of Mr. H. Speed Andrews, the dispatching officer to the New South Wales Government, by the Agent-General of which Government the ship was chartered. She takes out forty-one married couples, 135 single men, twenty-nine single women, forty-two boys, thirty-two girls, and nine infants—making a total of 332 souls, equal to 283 adults, the whole of whom are under the medical care of the surgeon, Mr. James Smith.—The acting Agent-General for South Australia has received the following telegram from the Government at Adelaide:—"Harbinger, emigrant-ship, arrived safely, Jan. 23." The New Zealand Shipping Company (Limited) have been advised by cablegram that the Otaki arrived at Otago, all well, on Jan. 28. The vessel sailed from London, with 108 passengers, on Oct. 24.—The Leicester arrived last week, all well, at Wellington. This vessel sailed from London, with New Zealand Government emigrants, on Oct. 22.—The Waipa, which sailed from Plymouth, with Government emigrants, on Oct. 27, 1876, for Canterbury, New Zealand, has arrived out.

The third annual exhibition of the Ipswich Fine-Art Club was opened on Monday. It is the best collection of works of art that the county of Suffolk has seen, and bears evident marks of the progress made by some of the younger artists during the past year. The constitution of this club is peculiar; it has been formed to encourage a taste for art among the inhabitants of the neighbourhood, but the exhibition is restricted to works of artists who may claim to be Suffolk men. The South Kensington authorities give their assistance by the loan of valuable pictures, and other works of art, which are national property. Both Mr. T. Woolner, R.A., and Mr. E. Poynter, R.A., are represented by works of theirs in this exhibition. Mr. S. Read sends one of his best and finest works, the "Church of Notre Dame de Breu;" another of his pictures is lent by its owner, Mr. S. Westhorp. Mr. F. G. Cotman sends "An Anxious Heart," which we engraved for our Christmas Number; also, a beautiful sunny piece called "Peace and Sunshine." Mr. W. R. Symonds, in his portrait of a little girl, shows high talent, and a marked improvement of execution. Mr. J. R. Wells contributes some of his pictures of marine subjects. Among others whose works appear are Messrs. E. Morgan, W. Batley, T. Smythe, J. Duval, J. Moore, and Miss Churchyard. The arrangements were made by Mr. E. Packard, jun., the honorary secretary, to whom is chiefly due the credit of instituting this yearly exhibition of the works of Suffolk artists.

By the will of Cesare Alessandro Bressa, Doctor in Medicine and Surgery, signed Sept. 4, 1835, that gentleman left all his property, after paying certain legacies, in remainder expectant on the expiration of a life interest, to the Royal Academy of Sciences of Turin, with power to convert and put the capital out to interest in the way deemed most profitable; and with the interest of this property a biennial prize was directed to be established, and adjudged in the following manner:—"The net interest of the first two years to be given in premium to that person, of whatever nation or country he be, who shall have, during the previous four years, made the most important discovery, or published the most valuable work on natural and experimental philosophy, natural history, mathematics, chemistry, physiology, and pathology, as well as geology, history, geography, and statistics. The net interest of the following two years to be given only to an Italian, who, by judgment of the above-named Academy of Turin, shall have made the most important discovery, or have published the most important work on any of the above-mentioned sciences. The prize will continue to be distributed in the same order." The academy has accepted the task, with the intention of fulfilling to the best of their ability the generous wishes of the testator, and the first open prize will be given in the year 1879. The value amounts to 12,000 Italian lire, or about £370 sterling. In accordance with the spirit of Dr. Bressa's will, the academy will choose the best work or discovery, whether or not it be presented by the author. The prize in no case will be given to any of the national members of the Academy of Turin, resident or non-resident. In the year 1881 the second Bressa prize will be given for the preceding quadrennial term 1877-80, according to the above rules, to an Italian. And so on every four years there will be a Bressa prize for competition among scientific men of any part of the world, and every four years a Bressa prize which can be competed for by Italians only.

NEW BOOKS.

Objectionable as it is in tone and style, wild and hurling as are very often its words, extravagant as are some of its views, and strange as are the signs of ignorance it occasionally exhibits, there is, nevertheless, something worth reading in *The Ottomans in Europe*, by John Mill (Weldon and Co.), a volume on the cover whereof are the English and Turkish flags represented in friendly union. From that fact the bias of the writer may be readily conjectured. Red-hot, indeed, is his sympathy with the Turks; and at white heat is his wrath against the Russians. Nor is there any desire here to question the righteousness of his sympathy or of his wrath; but it may be allowable to wish that he had been less declamatory, less abusive, less denunciatory, less suggestive of the lady who weakened her own cause by protesting so much. It may be allowable, also, to wish that he had been less perverse and more regardful of facts. For surely it is little short of sheer perversity to be so far from seeing in the Turkish Empire the proverbial "sick man" as to call it "an Empire that is in its boyhood at present, or rather let us say (emerging from it, half man and half boy, with the dawning flush of youth on his face, a torrent of rich vermillion blood rushing through his arteries, and his nerves vibrating with celestial fires." This is rather too strong a statement to make in the teeth of history, which shows that Turkey has been gradually losing ground since the battle of Lepanto, in 1571, having had Hungary wrenched from her in the seventeenth century, the Crimea in the eighteenth, and, so far as independence or quasi-independence of her territorial dominion is concerned, Greece, Moldavia and Wallachia (now combined into Roumania), Servia, and Egypt in the nineteenth. Had it been simply asserted that the Turk, if brought to bay, is capable of making a sturdy resistance and of dying hard, leaving to his enemies but Pyrrhic victories, our author would have been more likely to meet with attention as a sober and reasonable expositor of probabilities. Moreover, as a few specks will suffice to throw suspicion upon the soundness of a peach or other fruit, so a few instances of glaring ignorance or carelessness will suffice to discredit a whole work. And when it is found that an author can put upon paper such astounding errors as are to be found in the volume under consideration, his general weight is diminished to a greater extent, perhaps, than is quite justified by the peculiar nature of the blunders. Now, at p. 243 our author writes, when speaking of "autonomous administration," in this incredibly erroneous fashion—"The absolute meaning of the word [autonomous] is SELF-ACTING [sic] . . . but all English phrases and institutions have to be modified before they can be adopted or understood in the East, and . . . so far as the claims of Russia are concerned, it would be much better to use the noun instead of the verb (sic), and call the thing an automaton, 'an image moved by springs.'" So that, according to him, "automaton" is the noun substantive corresponding to "autonomous," and means "an image moved by springs." After this, it is not very wonderful to find that Pliny, though it is not stated which Pliny, is credited at p. 279 with the saying—"Fortune favours the brave;" or that, in the author's opinion, the only thing of any consequence which Russia has to offer either to her native inhabitants or to subjugated peoples is "the knout," vide pp. 220-232. It may be advisable to refer the author to so very accessible a work as the "Grand Dictionnaire Universel du XIXe Siècle," wherein, under the article relating to Russia, he will read: "On a aboli le knout sous le règne de Nicolas; et Alexandre II. a aboli la peine du fouet. On a maintenu la verge (25 coups seulement)." Be it observed that our author's many blemishes have been dwelt upon not for the purpose of bringing his book into disfavour, but, on the contrary, for the sake of forewarning those who might otherwise justly complain that they had been led to expect more than was proffered, and that they had received no hint of the trial to which their sense of a proper, dignified manner of writing upon a grave subject would be exposed, and of the discrimination they would have to use in separating the wheat from the exuberant tares. Such persons might, but for due caution, let themselves be blinded, by the prejudice which the author's intemperate zeal and other failings are sure to excite, to the merits which his work undoubtedly possesses. For instance, he has evidently ransacked bluebooks with amazing diligence, and has collected therefrom a mass of evidence, which cannot be neglected, though it may not be regarded as conclusive. He has furnished his volume with two useful and important maps, showing at a glance "the aspirations of Pan Slavism," as represented and inculcated, respectively, by two distinct and, in many points, antagonistic parties. He makes some good hits and intersperses some noteworthy remarks and facts amidst his furious ravings over "Bulgarian and other atrocities," although his manner of attacking Mr. Schuyler and Mr. Schuyler's memorable "report," whatever ground there may be for the accusations brought against the American gentleman, will certainly not commend itself to general admiration. He tells some very reasonable truths about the excellent qualities of the Turks, and about their moral superiority, in many respects, over their adversaries, as well as about the trying times through which Turkey was passing when all kinds of impossible demands were made upon her; about the consideration which, under such circumstances, was her due; and about the difficulty and long delay we, in our more favoured land, have experienced in carrying out in deed reforms accomplished in word and by enactment. And much else he says, which it were well for both Turk-lovers and Turk-haters to bear in mind: only it is a matter of regret that he should have expressed himself in a fashion so unlikely to produce any wholesome impression.

Among the neat little volumes containing the series of "Ancient Classics for English Readers" that entitled *Demosthenes*: by the Rev. W. J. Brodribb, M.A. (William Blackwood and Sons), is distinguished above its fellows, or, at any rate, if memory can be trusted, above some of them, by a very useful little map, an appendage not always necessary, or even desirable, but where, as in this case, much to be desired, not less ornamental and suggestive of completeness than the bushy tail which finishes off a squirrel. The volume, besides, has had for its author a gentleman who is not only well known as an accomplished, elegant, and erudite scholar, but who has also won reputation in the field of classical literature by the process of actual publication. Of Demosthenes, again, there is no reader, however English and however innocent of Greek, who has not heard and has not formed some conception—of his person, of his character, of his eloquence, of his ingenuity, a combination sufficient of itself to justify the Roman poet's well-known words touching the nation whom the muse had so richly dowered, and the Englishman's eulogy, somewhat differently applied: "such cunning they who live on high have given to the Greek." Almost the youngest schoolboy, or boy not yet at school, is familiar with the feat, if not with the name, of that famous Greek who is fabled to have conquered his natural vocal deficiencies by speaking with pebbles in his mouth and by standing upon the seashore and declaiming against the loud-resounding waves, until he became by assiduous practice a happy intermixture of the Boeotian and the Chrysostom. Mr.

Brodrick has done his work with the loving labour and in the appreciative spirit which were to be expected; if he have failed to give an adequate idea of the great Athenian orator's irresistible eloquence, the explanation is not so much that he has borrowed his specimens from inferior versions as rather that the original could not have full justice done to it even by a Brougham, or a Kennedy, or a Collier, or another. When Mr. Brodrick, in comparing Demosthenes and Cicero, remarks that both "were willing to die rather than survive their country's disgrace," a grim smile may play about the lips of those who remember that they were both, at any rate, trying to escape when they came by their death. As regards the trite anecdote relating to the compliment which Æschines is said to have paid Demosthenes on the subject of the celebrated "Crown" oration, Mr. Brodrick gives only half the story as told by Cicero and others, according to whom Æschines first read to his Rhodian pupils his own speech against Ctesiphon, and afterwards, by request, the reply of Demosthenes, exclaiming, when the pupils applauded vociferously, with magnanimous self-abnegation, "Ah! if you had but heard him!" Some authorities, giving, as Mr. Brodrick gives, only half the story, confine themselves, on the contrary, to the portion which he has omitted. According to them, Æschines read his own speech only, and, when the pupils applauded vociferously, wondering how he could have been beaten, exclaimed, "Ah! if you had only heard the reply!" And, especially if a part only of the anecdote is to be recorded, this latter version is by far the more credible and natural; for it seems as if the most magnanimous of human beings could never have done full justice, in his delivery, to a speech in which he and his father and his mother and all that belonged to him, and all that concerned him, were covered with such abuse as that with which Æschines was overwhelmed by Demosthenes. Not even when the abuse is perfectly understood to be intended in a semi-Pickwickian sense, and is little more than claptrap addressed to the gallery.

Save the preface, which is addressed, no doubt, rather to those who have to cater for children than to childhood itself, *The Puzzle of Life, and How it has been Put Together*, by Arthur Nicols, F.R.G.S. (Longmans), appears to be, in style, language, and scope, eminently adapted for its purpose, which is to awaken among the little folk an interest "in the history of life upon the Earth," and "give them the taste for more extended study in after years." The writer, indeed, has already put his work to the best possible test, and has received the most satisfactory evidence of its probable success in "the liking for it shown by some intelligent children, who have seen it in manuscript." Whether the title is well chosen, and whether it was advisable to represent that what has been done by scientific men in building up their cosmic system resembles the piecing together of a puzzle-map, may be a matter of opinion; for a sharp child, an "enfant terrible," might be capable of sardonically pointing out that you can never be sure that you are right in your arrangement of a puzzle-map, until you have it complete, and that you may sometimes discover, when you have only a piece or two left, that you have made a mistake at the very beginning. However, whether the pieces fit together in one harmonious whole or not, they are, separately, well worthy of contemplation and study, and they will not only lead to profitable thought and exercise the organ of causality, but they will also excite wonder, admiration, and, it may be, thankfulness. For it is hardly possible to look upon the illustrations with which the volume has been furnished by Mr. Frederick Waddy, representing, in the most graphic style, all manner of extinct animals, without thanking Goodness that the said animals, especially those whose names have the common termination "saurus" have been improved from off the face of the earth. Unless, indeed, a reader be inspired with that English spirit of fight evinced by the author, who heaves a sigh and records his regret at the impossibility of any longer seeing a "set to" between two specimens of a once existing gigantic race of stags. No doubt little mouths will gape with astonishment at the tale which tells that coal is but "compressed sunlight," that Paris is "a great city built of the shells of dead animals," and that, in the words of Mr. Sampson Brass, "all manner of games" are performed, during the lapse of ages, by forests, and oceans, and mountains, and icebergs; and it is to be hoped that the owners of the little mouths will grow up with a desire of inquiring further into such matters. But they should be very cautious in their reception of evidence—more cautious than the guide, philosopher, and friend who has written the little book intended for their benefit, and who seems to be a trifle too easily satisfied. For instance, at page 120, he says that "in a cave in France" there was discovered "a picture of a fight between some reindeer scratched upon a piece of slate," and that "it shows that the reindeer, which now only inhabits the Arctic regions, must have been common then in France." Many people would call this a somewhat sweeping statement.

A prodigious number of curious, striking, excellent, and useful illustrations enhance the value and embellish the pages of *The Aquarium: its Inhabitants, Structure, and Management*, by J. E. Taylor, Ph.D., &c. (Hardwicke and Bogue), a volume which is "intended as a handbook or popular manual to our public aquaria, so as to render them still more effective as a means of education." One cannot but hope, if not believe, with the author, that the aquarium is more likely to extend its popularity than to go, as some croakers prophesy, the way of the "spelling bee," seeing that, especially in these days of increased devotion to natural history, the former may well arrest the attention of reasonable beings, whilst the latter would, perhaps, find its fitting arena in the common-room of an asylum for idiots. It is pleasant to find the author showing due appreciation of the charming works associated with the name of Gosse, and, as it were, inciting readers to procure for themselves the gratification of reading such books as "Rambles of a Naturalist on the Devonshire Coasts." The author commences with two chapters devoted to "the history of aquaria." He then proceeds to discourse about the "principles of the aquarium;" about the "construction of fresh-water aquaria;" about "amphibians and fishes of the fresh-water aquarium;" about "the aquatic garden and its plants;" about "mollusca, insects, &c., of the fresh-water aquarium;" about "the aquarium as a nursery for the microscope;" about "marine aquaria for rooms;" about "our public aquaria" at the Zoological Gardens of London and Dublin, at the Crystal Palace, at Brighton, at Westminster, and elsewhere; about "mammalia, reptilia, and fishes of public marine aquaria;" about Victor Hugo and the octopus; about "crustacea, echinoderms, annelids, &c., of marine aquaria;" and about "sea-anemones and other zoophytes, &c., of marine aquaria." He also offers a few words of warning and of advice to persons who are of opinion, as regards private aquaria, that they "only give a lot of trouble, and are always getting out of order." Moreover, he has appended to his work the ever-helpful index. On the whole, then, it would appear that his is the book for those whom the study of the aquarium concerns.

Robertson of Brighton, as he is frequently called, rather by way of deference than of familiarity, or, in more formal terms, the Rev. F. W. Robertson, of Trinity Chapel, Brighton, was a

man of such acknowledged superiority as a bold thinker and a powerful preacher that it was not unnatural to suppose that his *Notes on Genesis* (Henry S. King and Co.), fragmentary as the several lectures collected under that title are, would make a volume worthy of public attention. He was not the man to shrink from admitting and fearlessly facing whatever difficulties might be caused by scientific criticisms of the Mosaic cosmogony or by strictures upon the system of morality apparently taught in the book of Genesis. He, in the words of his biographer, the Rev. Stopford Brooke, did not "shrink from putting his congregation in possession of the results of German criticism upon Genesis. He made them acquainted with the discussion on the Jehovah and Elohim documents, but he did not deny the Mosaic compilation of these documents. He discussed fully the question of the universality of the Flood. He spoke with a boldness, adorned with a rare reverence, upon the vexed and generally avoided subjects of the confusion of tongues, the destruction of the cities of the plain, and the temptation of Abraham. In no case, however, was his preaching destructive, but constructive. Men went away from his chapel opposed, it is true, to the popular theory of Inspiration, but deeply convinced of an inspiration." This is not the place to treat of such serious subjects, which would necessarily have to be treated off-hand, if treated at all, or to enter jauntily upon ground where angels might fear to tread. It will suffice to say that the volume apparently contains only the undeveloped form of the lectures, and that whoever reads them, though he may not find his doubts and scruples removed or his mind set perfectly at rest, will certainly meet with much doctrine which it were well to take to heart, and will find nothing to encourage him in the belief not uncommonly held by a certain class of persons who lay claim to reason and who seem to think that, if Moses cannot be considered sound in his geology, he must, by consequence, be equally wrong in the matter of his ten commandments.

The recent British naval expedition to Smith Sound in the direction of the North Pole has not yet ceased to occupy public attention. Many readers will feel a temporary disposition, at least, to take up Lieutenant Julius Payer's narrative of the Austrian Arctic voyage beyond Novaya Zemlya from 1872 to 1874. An English translation, in two volumes, of this exceedingly interesting story is published by Macmillan, entitled *New Lands Within the Arctic Circle*. It relates the unexampled adventures of the officers and crew of the *Tegetthoff*, a small steamer fitted out at Bremen for the work of exploration, under the command of Lieutenant Weyprecht, while Lieutenant Payer, an engineer officer, commanded the surveying and sledging parties ashore. Their vessel was caught in a drifting ice-field, from which it could never be released, and was helplessly carried to and fro, during nineteen long months, at the mercy of the winds and currents, till it was stranded on the unknown coast of Franz Joseph Land. The third summer was partly devoted to exploring the shores, channels, and inlets of the newly-discovered archipelago, beyond the 82nd degree of latitude, making an important addition to our geographical knowledge. Having accomplished this task, the brave Austrians left their ship fast held in the clutches of the icebergs, and by sledges and boats escaped to Novaya Zemlya, whence they returned to Europe in a Norwegian whaler. Their fortitude, skill, and valour, amidst tremendous perils and hardships, cannot be too highly esteemed. In one respect, it will be seen, this Arctic expedition had peculiar opportunities for observing the phenomena of ice-drifts loosely continuing on the open sea in winter. No previous explorers, that we can remember, were ever in a position to describe the amazing convulsions of those vast floating masses, from the effects of increasing frost, as the winter quarters of our ships have usually been fixed along shore, firmly inclosed in motionless fields of ice. The first volume of Lieutenant Payer's work contains a very instructive and complete summary of the whole subject of Arctic navigation, historical, geographical, and physical, with an account of the ice formations, their conditions and changes, and the best appliances for a nautical conflict against them. The Royal Geographical Society of London has long since recognised the merits of Lieutenant Payer, which have just obtained a high token of approval from the Emperor of Austria; and we have great pleasure in commending his book.

THE QUARTERLIES.

The *Quarterly Review* appeals most powerfully to public interest by an article on the Eastern Question, which will be perused with interest as a party manifesto. We shall be glad if such is indeed its character, inferring that Ministers would in such a case be more likely to be actuated by sober discretion than led astray by imagination. It is, in fact, very sensible and rather dull. The Arctic Expedition is the theme of another essay which will attract much attention, reinforced as it is by two excellent maps. The most remarkable article in the number, however, is the review of Mr. Brewer's calendar of the State Papers referring to the divorce of Henry VIII., in which it is contended that Wolsey was the real author of the measure. Dr. Carpenter's *Mental Physiology* and the proposed South African Confederation are the subjects of two other articles of considerable value.

The *Church Quarterly* challenges general attention by the remarkable article on the life of the late Prince Consort, attributable to Mr. Gladstone, in which, correcting "the inevitable Baron," the ex-Premier lays down sound constitutional doctrines not materially differing from those exhibited in practice by Lord Palmerston, to the displeasure of the Court. The essay on Positive and Cosmic Religion is entitled to high praise as the work of a deep thinker and scrupulously candid controversialist. The able paper on Henry VIII.'s divorce surprises us by the admission that "the poor are not to be lured into" English churches. The other articles are nicely adapted to the meridian of the clerical book club.

The *British Quarterly* has a very good essay on the letters of the Emperor Julian, an able but too antagonistic criticism of Mr. Herbert Spencer's sociology, and a paper on the Servian war written in Belgrade, disfigured by strong party feeling, but containing much valuable information respecting the history of the transactions preliminary to the campaign.

The *New Quarterly* opens with an article by Miss Cobbe on Schopenhauer's pessimism, more just in its estimate of the system than of the man. Dr. Hueffer treats an interesting subject with ability in his account of the Albigenses; but the leading attraction of the number is George Meredith's "House on the Beach," a tale full of Mr. Meredith's usual epigrammatic brilliancy, although, as also usual with him, rather huddled and unsatisfactory in the conclusion.

The *Morning Post* states that the marriage of Lieutenant-Colonel Ramaden, Coldstream Guards, and Miss Mabel Lindsay, daughter of the late General the Hon. Sir James Lindsay, K.C.M.G., will take place before Lent; and that a marriage is arranged to take place between Mr. Reginald Macleod, second son of Macleod of Macleod, and Miss Northcote, eldest daughter of the Chancellor of the Exchequer.

MUSICAL PUBLICATIONS.

Among recent publications by Messrs. Chappell and Co. are several charming pieces by M. Gounod. "When thou art near" is a song with much grace of melody, supported by a light and well-contrasted accompaniment. It will suit most voices of average capacity, and can scarcely fail to please most tastes. "Marche Militaire," and "Marche Religieuse," by the same composer, are effective instrumental pieces; the first in the jubilant style, the other, as its title implies, of a serious character. The military march is published both as a pianoforte solo and as a duet for two performers; the other march being issued for the organ, and also in an arrangement for the harmonium. Messrs. Chappell have likewise brought out a transcription, for pianoforte solo, of the little "descriptive piece" by Mendelssohn, entitled "The Evening Bell," the origin of which is stated to have been as follows:—Mendelssohn was staying with Mr. Attwood, at Norwood, in 1829, and was obliged, for some reason or other, to take his departure, deferring his journey to London, however, as long as possible, despite the frequent warning of the gate bell, which told him that his carriage was in attendance. Upon his arrival in town he penned this composition—the foundation of which is the solitary note of the gate bell—the same night, and forwarded both the pianoforte and harp parts (the latter intended for Miss Attwood) to his host the following day.

From Messrs. Duncan Davison and Co. we have several agreeable vocal pieces, by Mr. Wilford Morgan, the well-known tenor. "The Ship's Away" (chanson d'adieu), "Fisherman's Morning Song," "Be true to me," "My Love at Sea," "I'll love her till I die," and "My heart is thine for ever" are all characterised by an agreeable flow of vocal melody and are within the reach of singers and accompanists of moderate powers.

We have from time to time noticed Messrs. Augener and Co.'s valuable publications of classical pianoforte music, in beautifully printed large octavo volumes, at remarkably low prices. The collection now includes pianoforte works by Bach, Beethoven, Brahms, Chopin, Mendelssohn, Mozart, Schubert, Schumann (the only complete uniform edition of this composer), Weber, and others. Recently, detached works have been issued separately, some of which have already been specified by us. Among the latest of these extracts are the "Kreisleriana" (op. 16) and the "Faschingschwank aus Wien" (op. 26) of Robert Schumann, works eminently characteristic of the genius and individuality of that composer.

The gale which swept over the country the early part of the week proves to have been very severe, and several accidents, some of them fatal, are reported.

The *Glasgow News* announces that Dr. Henry Muirhead, of Bushyhill, Cambuslang, has offered to the University of Glasgow the sum of £2100 as an endowment of a demonstration-ship of physiology in connection with the chair of Institutes of Medicine.

The Old Testament Company, at the conclusion of their forty-second session, on Friday last, had finished the revision of Ezekiel, and proceeded with that of I. Kings as far as chap. x. 29. They have now revised the Pentateuch twice, and the Books of Joshua, Judges, Ruth, I. and II. Samuel, the Psalms, Isaiah, Jeremiah, and Ezekiel for the first time.

A large number of persons attended at the Auction Mart, Tokenhouse-yard, on Thursday afternoon, for the sale of her Majesty's Opera House, held for terms expiring at Michaelmas, 1891. The auctioneer described the premises minutely, and the biddings slowly advanced from £20,000 to £21,000, £22,000, £22,500, £23,000, £23,500, £24,000, £25,000, £26,000. No advanced bid being made, the auctioneer knocked it down to the gentleman who made the last offer, but he immediately declared that he had misunderstood his instructions and had gone further than he was authorised, and declined to sign the contract.

The Authorised Revision of the English Bible may not be completed and published for two or three years. It is the work of the best Hebrew and New Testament Greek scholars in England, with the best aid of German and other foreign students; and it will unquestionably be the very best translation for popular use. But, for the more exact study of the Scriptures, it will be still desirable to learn the numerous variations in different ancient copies of the original text, and the diverse renderings of particular phrases into our own language, which have been deliberately preferred by the most competent former translators or commentators. Messrs. Eyre and Spottiswoode, the Queen's Printers, have just published a volume of the greatest permanent utility for this purpose. It consists of the present Authorised Version, with two sets of foot-notes at the bottom of the page; the first set presenting all the various translations proposed for any particular word or phrase; the second class of notes showing all the variations of early Hebrew or Greek manuscripts, and of the most approved editions of the text. These are identified either by the initials of their names or by chosen alphabetical letters, referring to a catalogue and brief account of them all, which occupies four pages at the beginning of the volume. The editors for the Old Testament are the Rev. T. Cheyne and Mr. S. R. Driver, and for the New Testament the Rev. R. L. Clarke and Mr. Alfred Goodwin. They have received much assistance from an unpublished edition of the New Testament, prepared by the Rev. Canon Westcott and the Rev. Dr. Hort. Two of the editors of this "Various Reading and Rendering Bible" are members of the Revising Companies appointed by Royal Commission.

The manufacture of pianofortes is an important business in London, where, it is estimated, nearly thirty thousand of these most popular musical instruments are yearly made. An interesting little treatise, by Mr. Edgar Brinsmead, entitled "The History of the Pianoforte," which is published by Messrs. Cassell, Petter, and Galpin, has reached its sixteenth thousand. It may be read through at one sitting, as it is comprised within seventy pages, but contains a large amount of curious and pleasant knowledge upon a subject which is, we should think, rather good to talk about in any drawing-room, seeing that a specimen of the article is sure to be standing there, and some of the ladies may perhaps be willing to be told something about it. Mr. Edgar Brinsmead is one of a house engaged in this trade and manufacture, who have the merit of introducing a valuable improvement, the "check repeater action." He has, for his own part, studied the antiquarian and historical associations of the pianoforte. The progress of invention, skill, and practice, in the construction of stringed instruments, from the ancient harp and lyre, and the early dulcimer, through the clavichord, the virginal, spinet, and harpsichord, to the first pianoforte made at Padua, in 1710, is described in this modest essay. Anecdotes of Sebastian Bach, Handel, Mozart, and other great composers and musicians, also here find place; and the rise of the leading manufacturers, Broadwood, Erard, and others, in the last century is briefly related. Other chapters give an account of the modern pianoforte, its construction, successive improvements, and approach to perfection. Some useful practical hints complete the work.

DINNER GIVEN BY THE MAYOR OF LIVERPOOL TO THE POOR.

"COMING THROUGH THE RYE." BY HUGH CARTER.
AT THE INSTITUTE OF PAINTERS IN WATER-COLOURS.

"COMING THROUGH THE RYE."

This pleasing, simple figure of a little rustic maiden bearing a pitcher of water through the corn-fields, has nothing at all to do with the subject of a well-known Scottish song, from which the above line of verse is quoted, and which expresses a very different sort of feeling. Mr. Hugh Carter has given the child a look of innocent sweetness, and of gentle frankness, which is very engaging; and we do not expect she will trouble her little heart with any embarrassing questions for several years to come. The picture has been exhibited at the Institute of Painters in Water Colours.

THE RUINS OF MYCENÆ.

We present this week several views of the ruins of this ancient and famous Greek city, to which attention has lately been called by the excavations there carried on by Dr. Schliemann, with the permission of the King of Greece. Our Special Artist attending the Conference at Constantinople, Mr. Melton Prior, went to Athens, and thence to Mycenæ, for the express purpose of making these sketches, which will no doubt be interesting to many of our readers.

Mycenæ, as every student of classical history and literature is aware, was a powerful city-state of the Peloponnesus, now called the Morea, for ages preceding the rise of Athens. It seems to have enjoyed a sort of "hegemony," or political and military headship, among the Greek principalities before the era of republican governments. The siege of Troy, under whatever circumstances it really took place, and whatever may be thought of the veracity of Homer's "Iliad," is likely to have been conducted by the Greeks under the command of a King of Mycenæ, whose name may possibly have been

Agamemnon. It was, therefore, quite an appropriate task for Dr. Schliemann, after his late exploration of the supposed site of Troy, on the coast of Asia Minor, near the entrance to the Dardanelles, to engage in similar operations at the site of Mycenæ. That place is further associated with the tragedy of Agamemnon's murder by the wicked contrivance of his adulterous wife Clytemnestra and her paramour Ægisthus; a subject which employed the genius of each of the three Greek tragic poets, Æschylus, Sophocles, and Euripides, either in the principal action or its consequences to the son and daughter of Agamemnon. This story was believed in later times; and it is mentioned by historians and topographers, writing after the Christian era, that the tombs of Agamemnon, of his father Atreus, and of his daughter Electra, were then to be seen at Mycenæ; but that the bodies of Ægisthus and Clytemnestra, who were slain by Orestes to avenge his father's death, had been excluded, and were buried outside the city walls.

The most certain historical event, after all, concerning Mycenæ, is the fact of its being destroyed, in the year B.C. 458, by the people of Argos, a neighbouring city which had formerly been subject to Mycenæ, and over which King Agamemnon had ruled. This city was then razed to the ground. Its site is about seven miles from Argos, upon a raised recess between two high summits of the mountain range that bounds the east side of the Argolic plain. The Acropolis, the upper city or fortress, of which the entire circuit is yet to be seen, was built upon the top of a steep and rugged hill, between two streams; its length is about 400 yards, and its breadth 200 yards. Within this inclosure the ground rises considerably; on the summit are the openings to subterranean chambers, built of large irregular stones lined with plaster. There is a great gate at the north-west angle, and a

postern gate to the north-east. In the great gate, which is called the "Gate of the Lions," the doorway is formed of two massive blocks of stone, with another laid across them, which upper stone is 15 ft. long, 4 ft. wide, and 6 ft. 7 in. high; and above this stands a triangular piece of green limestone, 12 ft. long, 10 ft. high, and 2 ft. thick, upon the face of which two lions are sculptured in bas-relief. The lions are represented standing on their hind legs, one at each side of a round pillar or altar, upon which their fore paws rest; the pillar, which broadens at the top, has a capital decorated with a row of four circles between parallel fillets. Below the mound of the Acropolis, at some little distance towards the modern village of Mycenæ, is a series of underground chambers, which has been called the Treasury of Atreus; they are cells of a conical form, the largest about 50 ft. in diameter at the floor, and their doorways have Tuscan or Doric half-columns. The Cyclopean architecture of the older ruins of Mycenæ differs entirely from what is found in other ancient cities of Greece, and their antiquity is probably much greater.

According to Dr. Schliemann, the walls belong to three distinct periods, the oldest portion being the underlying part, which resembles the architecture of Tiryns. They surrounded the Acropolis, the lower city extending to the south-west, and being still marked by traces of Cyclopean walls and other remains. One of the most curious results of Dr. Schliemann's excavations is the discovery that the city was reinhabited after its capture by the Argives in B.C. 458, although its very site had been so completely forgotten by Strabo's day that he declares no vestiges of it were in existence. The new Mycenæ seems to have lasted about two centuries; at all events, the fluted vases found among its rubbish are of the Macedonian era, and come down to the second century B.C. Below the later city lie the ruins of the Mycenæ of Homer, and these

have already yielded an immense number of objects to Dr. Schliemann's workmen.

It is the opinion of Dr. Schliemann that he has discovered the identical tombs of Atreus and Agamemnon, of Cassandra, another daughter of the last-named King, and of Eurymedon, his charioteer, according to the local tradition which Pausanias has preserved. He has opened five tombs cut in the rock, in which he found two gold cups, a gold diadem, some bronze and crystal vessels, a quantity of fine pottery, knives and lances, and, finally, the bones of a man and a woman, covered with ornaments of pure gold. In another double circular sepulchre, as we learn by a telegram this week, he has found four golden vases, richly ornamented, and two gold signet-rings, one engraved with a palm-tree and seven figures of women. These and other treasures, belonging to the Greek Government, are to be deposited in a museum at Athens. We hope to give more illustrations of the subject.

FEASTING THE POOR AT LIVERPOOL.

On Monday week the Mayor of Liverpool (Mr. Alderman A. B. Walker) gave the first of two banquets to the aged and deserving poor of the town. The banquet was held in St. George's Hall, where a similar entertainment was held when Mr. Walker occupied the office of Mayor, two years ago. We give an illustration of the scene, which was one of lively enjoyment. St. George's Hall, as every visitor to Liverpool knows, is a magnificent Grecian building. The principal room is about 170 ft. long and 74 ft. wide, surrounded with porphyry columns and marble statues, and the roof, 84 ft. high, is splendidly decorated. The hall is large enough for 2000 persons to be comfortably seated; and there is a grand organ at one end. Such a superb place of assembly, devoted upon this occasion to an entertainment provided for those who could seldom indulge in the simplest festivity elsewhere, is highly suggestive of reflection touching the wide contrasts in our social life.

LITTLE COOKS.

Many well-meaning people of the Podnap type who cling fondly to the "goose step" as the best means of social progress were wont to object to the passing of the Education Act on the plea that the "lower classes" (to use an objectionable phrase ever on their lips) would be and-by be over-educated. But we very much question whether they would retain this opinion were they to read "The Scholars' Handbook of Household Management and Cookery." This invaluable little text-book should provide us with a rising generation of skilled cooks and housekeepers. Witness the following testimony of Her Majesty's Commissioners to the value of the same author's "Manual of Domestic Economy," in use at the Industrial Schools, founded by Messrs. Baird, at the Gartsherrie Ironworks:—"The girls, in three months, can be taught plain cooking, washing, and cleaning, enough to prepare them for service, or to make them useful to their mothers at home. They are all instructed in Tegetmeier's 'Domestic Economy' at school, so that their minds have been directed to many useful principles. On going to service after such a course, a girl would probably get £1 more wages for the first half-year's service." Such being the results obtained from the study of the "Manual of Domestic Economy," may we not expect a greater harvest of good to be gleaned from the use of the simpler handbook before us in every school under the jurisdiction of the London School Board? This excellent "Scholars' Handbook" was compiled by Mr. W. B. Tegetmeier, at the request of the London School Board; and we shall be surprised if it is not soon used in every School-Board school in the kingdom. Though the elements of our daily food are specified, and the philosophy of food is expressed, there is not a sentence an intelligent child cannot readily understand, so clearly and succinctly is the whole written. As a practical cookery-book, confined to advice on every-day dishes, it may effect a national reform in an important branch of domestic economy. Mr. Tegetmeier is careful to point out not only the most palatable, but also the most nutritious tid-bits; and his remarks on the *pot-au-feu* should be printed in large type for circulation in every poor man's home. Then, clothing, ventilation, and everything appertaining to home comfort will be found dealt with in the same rational, terse manner. In fine, "The Scholars' Handbook" (with its value enhanced by its appendix of household hints) should furnish us not only with a nation of little cooks (and thereby contribute not a little to the national sum of happiness), but likewise make every English home healthier and more comfortable than it is.

The Report of the Emigration Commissioners of New York, presented to the Legislature of that State on the 19th ult., states that since May, 1847, of the 8,000,000 emigrants reported as arriving in the United States, nearly three-fourths of the whole number landed at that port. In 1876 the number landed was 113,979, of whom 71,265 were aliens, and 42,714 citizens or persons who had before landed in the United States. Of the aliens 21,035 were from Germany, 13,314 from Ireland, 8,447 from England, and 22,400 from Scotland; and the rest from Russia, Norway, and other European countries. The Labour Bureau of the department furnished employment for 10,240 persons, of whom 5364 were males.

NEW BOOKS AND PUBLICATIONS.

Now ready, at all the Libraries, in 3 vols.,
DIANA, LADY LYLE.
By W. HEPPWORTH DIXON.
HURST AND BLACKETT, 13, Great Marlborough-street.

Now ready, 2 vols., with illustrations, 21s.,
MY YEAR IN AN INDIAN FORT. By
Mrs. GUTHRIE, Author of "Through Busha."

FIRST DISTRIBUTION OF GENUINE COPYRIGHT ENGRAVINGS.

"THE STRAND ART-UNION ASSOCIATION."

Having the exclusive right, with previous to destroying the plate, and after satisfying subscribers, issue to the public, at the cost of production, a limited number of genuine copyright engravings from the ORIGINAL STEEL PLATE of the late Sir Edwin Landseer's celebrated Picture.

"THE HIGHLAND BREAKFAST."

Now exhibiting at the SOUTH KENSINGTON MUSEUM. The principal aim of the Association is to issue, from time to time, "Genuine Works of Art" from the most celebrated Artists; and it is earnestly to be hoped that with the assistance of the general public, who so much prize real Engravings, this system will not only supersede the rapid issue of spurious imitations of Engravings.

"THE STRAND ART-UNION ASSOCIATION."

COUPON.

"THE HIGHLAND BREAKFAST."

331, Strand. W. A. TWITCHEN, Esq., Secretary.

The above Coupon should be cut from this Paper and sent with a P.O. for 2s. 6d., payable to the General Post Office, to W. A. ROWLANDS' ODONTO is of inestimable value in preserving the teeth. It eradicates tartar, removes spots of incipient decay, and polishes and preserves the enamel, to which it imparts a pearl-like whiteness. 2s. 6d. per Box.

ROWLANDS' MACASSAR OIL prevents hair falling off or turning grey, strengthens weak hair, cleanses it from scurf and dandruff, and makes it beautifully soft, pliable, and glossy. Price 3s. 6d., 7s. 6d., and 12s. per Bottle. Ask any Chemist for Rowlands' articles, and buy none but Rowlands'.

BREIDENBACH'S WOOD VIOLET PERFUME, fresh as morning-gathered flowers, 2s. 6d. 6s., 10s. per Bottle. Breidenbach's MACASSARINE, invaluable for preserving the Growth of the Hair, 1s., 2s. 6d., 5s. per Bottle. Of all Chemists, and the Makers, 157B, New Bond-street, W.

GOLDEN HAIR.—ROBARE'S
 AUREOLINE produces the beautiful Golden Colour so much admired. Warranted not to injure the hair. Price 5s. 6d. and 10s. 6d., of all Perfumers. Wholesale, HUVENDE and SONS, 5, St. Mark-lane, W. and 10, Old Broad-st., City-road, E.C. London; Finaud and Meyer, 37, Boulevard de Strasbourg, Paris; 31, Graben, Vienna; 44, Rue des Longs Chariots, Brussels.

DOES YOUR HAIR TURN GREY?
 Then use HERRING'S PATENT MAGNETIC BRUSHES and COMBS. Brushes, 10s. and 15s. each. Combs, 2s. 6d., 5s., 7s. 6d., 1s., 10s., and 2s. each. Pamphlets upon application.—5, Great Marlborough-st., W.; 33 and 35, City-road; and of all Perfumers.

A LADY having a Simple RECIPE that at once safely removes SUPERFLUOUS HAIRS, preventing their appearance, has pleasure in forwarding it upon application to Mrs. BLACKNELL, Verwood Villa, Thornton Heath, Surrey.

NOSE MACHINE.—A contrivance which, applied to the nose for an hour daily, so directs the soft cartilage of the nose that an ill-formed one is quickly shaped, 10s. 6d. Sent free for stamps.—ALEX. ROSS, 248, High Holborn.

ROSSETTER'S HAIR RESTORER.
 CERTAIN—HARMLESS—REFRESHING.
 N.B.—Its success having led to many spurious imitations, the public are cautioned against substitutes.

VALUABLE DISCOVERY for the HAIR.
 If your hair is turning grey, or white, or falling off, use "The Mexican Hair Restorer," for it will positively restore in every case Grey or White Hair to its original colour, without leaving the disagreeable smell of most "Restorers." It makes the hair charmingly beautiful, as if newly grown, promoting the growth of the hair on bald spots where the glands are not decayed. Ask any Chemist for "The Mexican Hair Restorer," price 3s. 6d. Prepared by HENRY C. GALLUP, 493, Oxford-street, London.

FLORILINE.—For the Teeth and Breath.
 Is the best Liquid Dentifrice in the world; it thoroughly cleanses, partially-decayed teeth from all parasites or living "animalcules," leaving them pearly white, imparting a delightful fragrance to the breath. Price 2s. 6d. per Bottle. The Fragrant Floriline removes instantly all odours arising from a foul stomach or tobacco smoke, being partly composed of honey, soda, and extracts of sweet herbs and plants. It is perfectly harmless and delicious as a berry. Prepared by HENRY C. GALLUP, 493, Oxford-street, London. Retailed everywhere.

JOHN GOSNELL and CO'S CHERRY TOOTH PASTE gives a beautiful Set of Teeth, makes the Teeth of pearl-like whiteness, and protects the enamel from decay.—Of all Chemists and Perfumers, at 1s. 6d. per pot.

PEAR'S TRANSPARENT SOAP.
 For the Toilet, the Nursery, and for Shaving.
 "Is an article of the purest and most careful manufacture and one of the most refreshing and agreeable of balms to the skin." "JOURNAL OF CUTANEOUS MEDICINE." Edited by Mr. CHARLES WILSON, F.R.S.
 Sold by Chemists and Perfumers everywhere.

WHITE and DELICATE HANDS.
 FAVENT'S CYTHERIAN CREAM renders the hands beautifully white and soft, hovers chapped. Instructive treatise, 1s. 2s., 3s., 6d.—BANGER, 100, Oxford-st., London. 15 stamp.

THE COAL-TAR SOAP.
WRIGHT'S SAPO CARBONIS
 DETERGENT.—Antiseptic, Detergent, Disinfectant. The most healthful, agreeable, and refreshing TOILET SOAP in the world. By its daily use, freedom from infectious diseases is secured; the complexion improved; pimples, blotches, and roughness removed; and the skin made clear, smooth, and lustrous.
 "In our hands it has proved most effective in skin diseases."—The Lancet.
 "It is the only true antiseptic soap."—British Medical Journal in Tablets, 6d. and 1s. each, of all Chemists.
 W. V. WRIGHT and CO., Southwark-street, London.
 Caution.—Beware of spurious imitations.

EGERTON BURNETT'S ROYAL WELLINGTON SERGES,
 repeatedly supplied by him direct to the Royal Family. See opinions of the London fashionable press. "The Court Circular," "The Queen," "Civil Service Gazette," "Myra's Journal," "The Young Englishwoman," &c., unanimously testify to the superiority of Egerton Burnett's Serges as compared with the material for ladies' wear. Special make for gentlemen. Woven from the finest wools, dyed by a patent process which salt water will not affect, of a light yet warm texture, they are adapted for all seasons of the year, and surpass all others in elegance and durability.
 Orders are being daily received for these excellent goods from all parts of the kingdom. Prices per yard, 1s. 2d., 1s. 6d., 1s. 10d., 2s. 2d., 2s. 6d., 2s. 10d., &c.; also extra light Yarns specially finished for hot weather. Book of Patterns, with over 100 shades, post-free.
 EGERTON BURNETT, Woollen Merchant, Wellington, Som.

NEW MUSIC.

HEMY'S PIANOFORTE TUTOR.
 Sixth Edition.—contains the Elements of Music, with a large selection of the most beautiful Airs by Wallace, Balfe, Benedic, Meyerbeer, Gounod, and other popular composers. Mr. Hemy's book has run through the largest number of editions of any work of the kind, and has thoroughly established itself as the only Instruction Book for the Pianoforte of use without a master, or for use by it to be put into the hands of the young student. To Teachers of the Pianoforte this book is invaluable; it contains a new and improved system of counting time, and a selection of Duets for Master and Pupil. To be had of all Musicellers in town and country; or for 24 stamps, post-free, from METZLER and Co., 37, Great Marlborough-street, London, W.

CHAPPELL and CO.'

THE GLASGOW BURNS MEMORIAL.

The bronze statue of Robert Burns, erected in George-square, Glasgow, where stand also those of several other famous men, was publicly unveiled, by Lord Houghton, on Thursday week. Jan. 25 was chosen, as being the birthday of the popular Scottish poet. The movement which was brought to a close with this demonstration originated in 1872, when Glasgow awoke to the desirability of erecting a statue to the poet; and, in order that as many as possible might take part, a shilling subscription was commenced. This was not confined to Glasgow; the bulk of the subscriptions received were from persons resident there; but a large portion of the amount was contributed by other towns and places in the west of Scotland, and also by Scotchmen in distant parts of the world. It is stated that subscriptions were received from residents in Constantinople, Madrid, St. Petersburg, Canada, the United States, the Australian colonies, and South America. When the subscriptions had reached £1600, the committee requested Mr. George Ewing, a Glasgow sculptor who had already done much good work, to submit for consideration a model for a statue and pedestal. The design was considered satisfactory, and the commission was given to Mr. Ewing, who completed the statue in the autumn of 1876. The work of casting the statue was intrusted to Messrs. Cox and Son, bronzefounders, Thames Ditton, near London. They made the casting in October, and it is one of the most successful which they have produced. The total cost is about £2000. The statue is founded upon Nasmyth's portrait, and is considered one of the best representations of the poet. The pedestal is of grey Aberdeen granite; and its sides will exhibit four bronze bas-reliefs, contributed by the towns of Ayr, Kilmarnock, Paisley, and Greenock, with sculptured groups of subjects from the poems of Robert Burns.

Glasgow Green, which is a spacious park on the banks of the Clyde, at the east end of the city, was the spot selected for the marshalling of the procession. Here, between eleven and twelve o'clock, an immense concourse of spectators assembled to witness the beginning of the ceremonies of the day. All the various trades unions and guilds, recognised by banners emblazoned with designs new to heraldry, but gorgeous with bright colour and devices in every stage of art, arrived on the green and took up the positions allotted them by marshals. Numerous bands played airs which are associated with Burns's best-known songs. A few minutes after noon the procession, having been organised, made a start, headed by a detachment of mounted police and the band of the 26th Regiment. Then came the Statue Committee, the Burns Clubs of Glasgow, Kilmarnock, Paisley, Ayr, and Greenock, Mr. Ewing (the sculptor), and a deputation of working men from Edinburgh in carriages. All the bands in the procession, of which there were nearly a hundred, played, all along the line of route, "There was a lad was born in Kyle," "Scots wha ha' wi' Wallace bled," and "Auld Lang Syne." After the carriages came a cavalcade of the carters of Glasgow, mounted on stout Clydesdale horses decked with ribbons and flowers. The carters wore quaint and picturesque broad Kilmarnock bonnets, with eagles' plumes and broad bright saashes. A lorry, embowered with evergreens, and accommodating a band, preceded a second vehicle, which had been converted into a representation of a thatched roadside public-house, where Tam O'Shanter and Souter Johnny were wont to get "unco' fou' and awfu' happy." Here the landlord in short hose and scarlet nightcap was personated by a boisterous toper who

STATUE OF ROBERT BURNS AT GLASGOW.

too truly exhibited to his admiring friends that "aye the ale was growing better." Tam O'Shanter and Souter Johnny were represented by a pair of ancient cronies, while the landlord was ever ready to "laugh a ready chorus." The Tarbolton Lodge of Freemasons, of which Burns was a member, came next, bearing a number of relics of the poet, including the minute-book and a letter which he sent to the Right Worshipful Master; while Brother M'Coeh, the present Master, wore the badge referred to by Burns in his farewell to the lodge. Then came in succession representatives of the trades of Glasgow, each headed by a band, and identified by trade flags and trade models. The most elaborate display of banners was that made by the Foresters, many of whom were attired in the costume of the order. The procession marched through the chief thoroughfares of the city, taking in the way Argyle-street, Charing-cross, Sauchiehall-street, and St. Vincent-street, to George-square, which was reached about two o'clock. Here an assemblage, numbering, it was computed, 60,000, had congregated.

Lord Houghton had lunched with the Lord Provost, magistrates, and Corporation of the city in the Council Chambers at one o'clock. The members of the Town Council, in their official robes, accompanied his Lordship to George-square. For an hour previously rain had fallen in heavy showers; but shortly before the arrival of the city councillors and their accomplished guest the sky cleared, and the ceremony of unveiling the statue was accomplished in fair if not fine weather. Having taken the chair, his Lordship, before unveiling the statue, said that it was an ancient custom to preserve the memory of good and great men, of their deeds and characters, by erecting their images in stone or metal. This was done by the ancient Greeks and Romans; and it was still to be done, after the wide spread of modern literature and general education. Though every class of people could now learn the history of the past, and the lives of its statesmen, warriors, artists, inventors, and men of letters, there was a natural desire to look upon their figures. In the figure of Robert Burns there was nothing to the Glasgow Scotchmen new or strange. They would recognise in him a friend of their childhood, with whom they had associations ever fresh and dear. He had spoken of the statues of eminent men in the lands of classical antiquity. But in a still more ancient country, he meant Egypt, there was a colossal figure of some god or hero called Memnon. Of this statue there was a strange and beautiful tradition. It was believed that, by some magical attraction and supernatural sympathy, the rays of the rising sun drew forth at morning from the inanimate stone sounds of exquisite music which charmed and entranced all who had the good fortune to be within range of hearing.

"Now, gentlemen," said Lord Houghton, "I have a fancy that the ardour of your affections and the light of your imaginations might also draw from this statue a song of about a hundred years ago—a strain of beauty and truth that might go to your heart of hearts. And into what words might that music be interpreted? Might it not sing to you, 'I, whom you have placed here in love and honour—I was one of yourselves. Few, if any, of you here have not had greater advantages and better chances of common life than I had.' It pleased the Lord of the spiritual and the material universe to endow me with a vivacity of

UNCOVERING THE BURNS STATUE AT GLASGOW.

fancy and power of melodious expression which have made my poems the intellectual companions of the best and wisest men, and my songs the solace and delight of countless high and humble homes; and yet I never thought that this glorious faculty separated me from my fellow-men, or that it exempted me from the ordinary needs and destinies of humanity. The most prized of my utterances came from me while following the plough, casting the seed, or tending the kye. I never claimed a right to idleness or luxury, or yearned for aught but the glorious privilege of being independent. I knew the value of my gift, but all the more I gave all I could to my country and my countrymen. I thought not of myself, but of my work. I took up a sacred old song that touched me, and I did my best to make it perfect for the pleasure and the profit of mankind. I aroused the patriot heart with 'Scots wha ha' wi' Wallace bled,' and I purified the old rough ballad without damaging its humour or its grace, and infused into it what was tender and true. I studied as far as I had the means the masters of the great English tongue; but I loved the best, and wrote the best, the language of my forefathers, my childhood, and my people. Somewhat thus, gentlemen, would this mental voice speak to you. The Egyptian figure of this legend I have made use of now stands in mute and lonely grandeur amid a waste of land. This, your friend and poet, will look with kindly and grateful eyes for generations to come on the tides of men who will traverse the busy streets of this multitudinous city. From him they will learn a lesson, of which Scotland may be proud; for through his difficult and may be faulty life, he never lost the manly endurance, the simplicity of manners, the spirit of fraternity she ever teaches her sons, and which has enabled them to go forth conquering, and still to conquer, in the battle of material life, in the conflicts of intelligence and skill, and to spread to the farthest confines of our earth the name and fame of Robert Burns." (Loud and prolonged cheering).

Baillie Wilson, as chairman of the statue committee, then formally handed the statue to the Lord Provost, who accepted it on behalf of the city.

The vast crowd in the square finally sang, in the most impressive manner, "Auld Lang Syne," and the proceedings terminated.

MUSIC.

Handel's "Solomon"—the fifteenth in the long list of his English oratorios—is a remarkable work, not only on account of its great intrinsic merits, but also as the production of a composer the decline of whose physical powers is nowhere evident in it, the choruses being generally characterised by sublimity, beauty, and science equal to any examples to be found in his earlier productions. The noble movements for double choir, "Your harps and cymbals sound," "From the censer," and "Shake the dome," and those for a single choir, "May no rash intruder" (the "Nightingale Chorus"), "Draw the tear from hopeless love," and "Thus rolling surges rise," are splendid examples of power and genius. The work was for a long time—like some others of Handel's oratorios—very unjustly neglected. It was twice performed in 1859, was afterwards given in 1862, but not again until 1870, and it was repeated in 1874. Its repetition by the Sacred Harmonic Society yesterday (Friday) week included, as on former occasions, the use of those elaborate additional accompaniments specially supplied by Sir M. Costa. The choruses were given with great effect, especially the "Nightingale Chorus," which had to be repeated. Madame Edith Wynne produced a special impression by her delivery of the air "Can I see my infant god?" as did Madame Patey in "What tho' I trace," which was encored. Miss Julia Wigan was much applauded in her solo "Thy sentence, great King," as was Mr. H. Guy in "See the tall palm." Mr. Maybrick having been efficient in the one solo, "Praise ye the Lord," assigned to the bass. Sir M. Costa conducted, and Mr. Willing presided at the organ, as usual.

The Burns Concert, given at St. James's Hall, on Thursday week, in commemoration of the poet's birthday, included the special attraction of Mr. Sims Reeves's singing—his songs on the occasion having been "Ye banks and braes," "Auld Lang Syne," and "Macgregor's Gathering," the last encored. Many other national songs were effectively given by Misses José Sherrington, Annie Sinclair, Hunter, and Eileen Richardson, Madame Antoinette Sterling, Mr. Pearson, Mr. Thurley Beale, and Mr. Walker. Miss Hunter (who came from Scotland) made a marked impression, and gained an encore by her delivery of the ballad, 'O' a' the airts.' The band of the Scots Fusilier Guards contributed some instrumental pieces. Mr. Sidney Naylor acted as accompanist of the vocal pieces.

The Popular Concert of Saturday afternoon included the first performance of a string quartet (in D minor) by Mozart—a comparatively early work, produced in 1773, being one of sixteen quartets that preceded the celebrated ten. Although far from elaborate in style and treatment, there is much beauty, especially in the second movement, an andantino grazioso, in D major, which had to be repeated. The last movement, a fugue, is suspected to have been added or completed by some other hand. The quartet was finely played by Herr Straus, Mr. L. Ries, Mr. Zerbini, and Signor Piatti. Brahms's "Liebeslieder Walzer," for pianoforte duet, with vocal quartet, were given, as at the evening concert of Jan. 15, with Mdlle. Marie Krebs and Miss Agnes Zimmermann, as pianists; and Mdlles. Sophie Löwe and Redeker and Messrs. Shakespeare and Pyatt as vocalists. The lady pianists played, also, as at the concert just referred to, Chopin's rondo for two pianos; and Saturday afternoon's programme closed effectively with Mendelssohn's second pianoforte trio (in C minor), finely played by Miss Agnes Zimmermann, Herr Straus, and Signor Piatti.

At the evening Popular Concert of Monday last, Mr. Henry Holmes reappeared as leading violinist, his performances having been in the prominent part of Schumann's string quartet in A major (from op. 41), in Schubert's first pianoforte trio (in B flat), and in the fifth number of Spohr's six "Salonstücke," op. 145. Mr. Holmes's skilful playing is too well known to require fresh eulogy. In the piece last named he was encored; but, instead of repeating it, he played a quaint old "gigue" by Corelli. Miss Agnes Zimmermann was the pianist, her solo having been the third of Beethoven's sonatas (in C major, from op. 2). Mdlles. Thekla Friedländer and Redeker sang some duets by Schumann and Rubinstein with much effect, an encore of one of the pieces having been replied to by singing another duet. Sir Julius Benedict was the accompanist. Herr Joachim is to appear at the concert of next Monday evening.

The annual service at St. Paul's Cathedral in celebration of the Conversion of St. Paul, on Thursday week, included the performance of a special anthem, composed of selections from Mendelssohn's oratorio "St. Paul," with band and augmented choir.

One part of the programme of this week's London Ballad Concert was appropriated to popular songs of Ireland. The vocalists announced were Mesdames Sherrington, Cave Ashton,

and Antoinette Sterling; Mr. Sims Reeves, Mr. E. Lloyd, and Mr. Maybrick.

Mendelssohn's "Hymn of Praise" ("Lobgesang") and Rossini's "Stabat Mater" were given on Thursday, by the Royal Albert Hall Choral Society, conducted by Mr. Barnby; the solo singers announced having been Madame Lemmens-Sherrington, Miss Anna Williams, Miss L. Braham, Madame Antoinette Sterling, Mr. Sims Reeves, Mr. Cummings, and Mr. R. Hilton.—Next Thursday Mr. W. Carter will give his cantata, "Placida," and Mozart's "Requiem," the latter work for the first time there.—Verdi's "Requiem" is in active rehearsal, and will be given on Monday, Feb. 19.

This (Saturday) afternoon the Crystal Palace concerts will be resumed with the thirteenth performance of the twenty-first series. The occasion will be rendered commemorative of the birthday of Mendelssohn, from whose works the programme of the day will be selected. An adagio from an unpublished symphony for stringed instruments will be introduced. Herr Joachim will appear for the first time this season, and will play the violin concerto; another special feature being that grand tone-picture, the "Scotch Symphony." These and other interesting performances will make up an unusually attractive concert.

The paragraphs in the German papers purporting to give particulars of dates with regard to a repetition of the performances at Bayreuth appear to be premature. Herr Wagner has issued a letter (which the *Musical Times* publishes) to the committees of the various Wagner Societies, in which he proposes that they should amalgamate into one general society, to be called the "Society of Patrons of the Festival Plays at Bayreuth," with a view to avoid the public sale of vouchers for seats, or of speculation therewith. He wants the new society, in the first place, to dispose of £5000 worth of seats among its members, and furthermore to make efforts towards obtaining a Government grant for another sum of £5000 per annum, to be set aside for the purchase of free seats to be distributed among persons chosen by the Government.

THEATRES.

LYCEUM.

This theatre has again been distinguished by a movement in the right direction—that of dramatic reform. The liberty with works of great genius taken by inferior playwrights, who have presumptuously affected to adapt them for the stage, has all along been denounced by the high-class critic as a sacrilegious outrage. There is an assortment of such hybrid productions, among which the Cibber-Shakespeare "Richard the Third" is a prominent transgression. The work of Shakespeare, thus ostentatiously desecrated, forms in itself a colossal drama, with a number of *Æschylean* characters, for which it is difficult to find representatives in an ordinary company. Cibber undertook to make the task easy, not only by abridging the tragedy, but by recasting it, introducing into it scenes and speeches from other Shakespearean plays, together with some of his own; omitting also more than one great character and much of the action of the original; the whole being so cleverly arranged that its representation was within the means of any theatrical troupe possessing a performer capable of sustaining the rôle of Richard. Moreover, by the alteration and introduction of single lines, what are called points were supplied, which a popular actor by a degree of technical skill, might render very effective. It was natural, therefore, for great actors to prefer a drama so constructed and so readily available to stage purposes and to the personal distinction of gifted individuals. Accordingly, we have generally had the tragedy in a mutilated and depraved form, accompanied sometimes by the exhibition of exceptional talent, not sufficient, however, to relieve the transaction altogether from censurable characteristics, which only the parties immediately interested would care to excuse. This great wrong, however, has not gone altogether without protest. Several years ago Mr. Phelps produced a version at Sadler's Wells, which gave the original play almost in its entirety, and which might have established itself on the boards, but that unfortunately the theatrical editor intruded interpolations which vitiated the text of the dialogue, and somewhat corrupted the incidents of the action. Mr. Henry Irving has sought to improve on this experiment. He has presented his audience with a pure text, but has excised, nevertheless, some of the speeches and scenes. He has preserved, too, some of the original characters, but has deprived them of much that the poet intended to belong to them. One of these is the wonderful character of Queen Margaret, which the poet, in the mere wilfulness of his genius, thrust on the audience with marvellous skill and apposite effect. But the adapter has contented himself with Margaret's two first scenes. The third, in which the malignant prophetic unites with Queen Elizabeth and the Duchess of York in uttering a triad chorus of maledictions, is wanting. It was done, however, in the Sadler's Wells version, and was productive of great results in the hands of Mrs. Warner in the first instance, and of Miss Glyn in the second; who, in combination with the representatives of the Queen and the Duchess, both of whom did their best to deliver the declamatory speeches with force, made a decided impression, and excited the audience to a sense of grandeur and sublimity. We regret that Miss Bateman had not the opportunity of exemplifying her great elocutionary powers, which the retention of the scene in question would have afforded. It must, however, be confessed that the permitting Margaret to have her full scope in the play gives to her such a towering ascendancy that Richard is scarcely himself, after having been more than once dwarfed in her presence. Mr. Irving succeeded in maintaining the part of Richard in a prominent position. His delineation is marked with extraordinary intelligence, and we may add, without exaggeration, with decided originality. We shall not be far wrong if we describe his Richard as the best of his parts. He brought out distinctly the several attributes of the Satanic character. His self-conscious villainy, his keen perception of the strength or weakness of others, his self-determination to become king, the force of his indomitable will, the persistency of his ever-present cunning, his readiness to avail himself of the services of others, and his habitual ingratitude—all make up an ensemble which, however familiar it may be, still, every time it secures attention, creates a little astonishment, and the "involuntary applause" which "wonder" necessarily implies. Mr. Irving must be credited with having suggested all this, and harmonised it all in a portrait which attests his talent and taste. In some points he went beyond this; the electric shocks which testify to the actor's possession of genius were not wanting wherever they could be given with propriety. Other parts also deserve commendation. Mr. E. H. Brooke was chivalrous as Richmond, Mr. T. Swinbourne effective as the Duke of Buckingham, and Mr. T. Mead remarkably suggestive as the first murderer. The smaller parts had been studied with care; in one instance with too much for legitimate success. Mr. J. Archer's Catesby risked ridicule in obtruding an impetuosity of obedience, for which there is little warrant

in the text. We recommend him to subdue the demonstration of interested servility, which, by attracting too much attention to a subordinate part, disturbs the harmony of the *mise-en-scène*. The new scenery by Mr. Hawes Craven is excellent, and interprets the features of old London with truth and picturesque arrangements, that give to them, each and all, an artistic value.

A two-act comedy by Stirling Coyne, entitled "My Wife's Daughter," was revived at the Globe on Monday, the title being changed to "Squabbles."

The Gaiety Theatre Matinees continue to attract fashionable audiences to favourite revivals and occasional experiments. Mr. H. J. Byron's drama of "Dearer than Life," assisted by the clever acting of Mr. Toole, still maintains its popularity. The part of Michael Garner is one exactly suited to Mr. Toole's idiosyncrasy. He is well supported by Mr. Collette, in the rôle of Bob Gassitt, originally acted by Mr. Henry Irving. Mr. Young, a new actor, distinguishes himself as Uncle Ben. The popular farce of "The Steeplechase; or, Toole in the Pig-skin," has also been successfully played. A new burlesque by Mr. H. J. Byron, called "The Bohemian G'yurl," was produced at the Opera Comique on Wednesday.

An original drama has been produced at the East London, by Mr. E. Towers, entitled "Pomona," a fascinating girl brought up by gipsies, and fairly performed by Miss Jenny Grainger. The part of the hero, Ralph Branscombe, is powerfully sustained by Mr. Carden, whose reputation is greatly increasing.

ROYAL INSTITUTION LECTURES.

METALS AND THEIR USES.

Dr. C. R. Alder Wright, in his second lecture on the Metals, given on Thursday week, commented on some of the correlations existing between certain chemical changes and their thermal disturbance. He stated that one metal cannot displace another in a solution, unless the second metal evolves more heat in uniting with the other constituents of the compound than does the first metal; and this he illustrated by the lead-tree, in which the lead is displaced in lead acetate by zinc, forming zinc acetate; and by the Arbor Diana, or silver-tree, in which silver is displaced by mercury, and mercury acetate is produced. He then referred to a table exhibiting the amount of heat evolved by various metals and other elements when combining with oxygen or sulphur. In the case of iron oxide, he stated that little thermal disturbance occurs when the oxide is reduced to metal by carbon oxide or by hydrogen; but the opposite may occur when the conditions of the experiment are changed. Thus, when a stream of dry hydrogen is led over iron oxide at about 500 deg., iron and steam are generated; whilst a current of steam led over metallic iron at the same temperature produces hydrogen and iron oxide. Dr. Wright next described and illustrated some of the ingenious processes by which metals are obtained from complex ores. Thus, in the "dry process," iron is extracted from copper pyrites by a series of operations during which the iron and part of the sulphur is oxydised, and a compound of sulphur and copper formed, from which the copper is subsequently extracted by a series of operations. He then explained the very complicated "wet process" for obtaining the same results. Among the processes illustrated was Pattinson's method for obtaining pure metallic silver from argentiferous lead by means of crystallisation. The latter part of the lecture was devoted to the various properties of the metals and their practical applications. 1. Metallic lustre, utilised especially in mirrors, for which metallic silver, as well as amalgams of tin and mercury, are now employed. Some of Faraday's "ruby gold," an impalpable powder suspended in a fluid, was shown to retain its brilliancy after the lapse of many years. 2. Colour. Most metals are white; copper, gold, and the yellowish alkaline earthy metals (calcium, barium, and strontium) being exceptions. Alloys of coloured and colourless metals exhibit regular gradations of tint. 3. Metals are opaque at ordinary temperatures, but very thin films transmit a characteristic colour; thus, gold at the 200,000th of an inch gives a greenish tint. 4. The density of metals was shown to vary from platinum, 21.50, to lithium, 0.59. Aluminium (2.60), from its lightness and strength, is now used for optical instruments. 5. The physical structure of metals greatly varies. Bismuth readily crystallises, while wrought iron is very fibrous; some metals are hard and brittle, others soft; others very malleable and ductile, and others possess much tenacity—properties which may be modified by alloying, as shown in steel, brass, phospho-bronze, &c. All these properties were fully illustrated by explanations of various manufactures in metals, such as gold-beating, pin and pen making, wire-drawing, and the production of foil, sheets, and leaves, accompanied by series of very interesting specimens, kindly supplied by eminent firms.

ANTS.

Sir John Lubbock, Bart., M.P., F.R.S., at the Friday evening meeting on Jan. 26, gave an account of his long-continued observations and experiments upon ants, of which we can give but a brief summary. Each nest contains males, females, and workers, or imperfect females, and has more than one queen; and some genera have soldiers, with large heads and powerful jaws. The length of ant-life is unknown; but Sir John has kept specimens since 1874, which are still perfectly vigorous. Some species keep domestic animals; some are bold, others timid and intelligent, others greedy, and others phlegmatic. Some species, cowardly when alone, fight desperately in numbers. The smell of ants is keen; they do not seem to use their eyes much; and they are deaf to sounds which we hear. Each species generally lives by itself; but sometimes individuals of another species are domesticated. Some species carry off the pupæ of others, and make the young ones slaves, on whom they so much depend as to starve if not fed by their captives. Sir John divided a nest of the common black ant into two halves, and found that, after more than a year's separation, they recognised each other, while strangers from a different nest were driven out or killed. He also proved by experiments that ants help injured companions, but the degree of compassion and feeling differ in them, as in men. Of some ants rendered insensible by chloroform (friends and strangers) nearly all were taken and thrown away. Of others, made dead drunk, the friends were carried into the nest to recover, but the strangers were ejected. Sir John considers that there is probably much division of labour in an ant's nest, but the facts are not easy to ascertain. When ants first emerge from the pupa state, they devote themselves to the care of the young and other duties within the nest, but do not come out foraging till they are older and more experienced. Sir John observed that, during the winter months, special ants were evidently told off to fetch in supplies for the community. With regard to their intelligence, his experiments showed that some species possess much ingenuity, while others led to an opposite conclusion—proving that, however interesting their habits may appear, the instincts of ants are strictly limited. Their mode of fighting is very various. Some ants transfuse their foes with their terrible mandibles; others trust to numbers,

one party seizing an enemy while another dispatches it; one small species devours the dead left on the battle-field of the larger species; others jump on the backs of their larger foes and cut off their heads from behind; while others roll themselves up into balls and never fight. Ants are useful to plants from the number of insects they destroy, while they are prevented from robbing them of their honey either by a chevron-de-frise of hairs pointing downwards, which the ants cannot ascend; by sticky secretions; by the flower being closed by lips, bars, or beards of hair; by the flower-stalks being slippery or bent over, or by pendulous flowers. In conclusion, Sir John observed that—even after the observations of Smith, Belt, Bates, Emery, Mayr, and, above all, of Forel—few subjects of natural history offer a more wide or promising field of study than the habits of ants. Many diagrams and interesting apparatus illustrated the discourse.

SPIRIT OF ITALIAN, FRENCH, AND GERMAN MUSIC.

Mr. Ernst Pauer, in his second lecture on the Nature of Music, given on Saturday last, after expressing his opinion that the German school of music was the most perfect, as fulfilling all the requirements of science, art, and taste, made some remarks on Italian music, and the influence exercised upon it by climate and scenery, the people and their innate deep sense of beauty, their religion, their political institutions and history, and their melodious language. The characteristic of the Italian school has been the undue exaltation of the human voice, which, by its nature and limited compass, has led composers (for instance, in the "aria di bravura") frequently to sacrifice truth, correctness, and unity to the singers: yet Italian music is pre-eminent for the thoroughly vocal construction of the melodies, their broad, easy flow, and their freshness, vigour, clearness, and precision. What Italian music might attain to may be seen in Mozart's "Don Giovanni" and "Nozze di Figaro," where perfect Italian form is combined with great intellectuality. The illustrations given were two harpsichord lessons by Scarlatti, "La Sera," a Venetian boat song, and a Neapolitan tarantella. While noticing the great influence of foreign composers upon French music, Mr. Pauer referred to the earlier development of the chanson, or song, than in other countries, and deduced reasons for describing the special features of French music as grace, great clearness, rhythmical life and expression, varied harmonious changes, with much piquancy, or the power of exciting and maintaining attention; and also as possessing the peculiarly French qualities, "savour faire" and "savour vivre," being thus so well adapted for social amusement. After commenting upon the great improvement due to foreign composers, Mr. Pauer alluded to the works of Rameau, Couperin, Hérold, Auber, Halévy, and Gounod; and regretted the injurious influence of Paris upon the popular taste. He also pointed out the superiority of the story in the French "opéra-comique" over that of the Italian "opera-buffa." The illustrations given were two pieces by Couperin and a rondeau by Rameau. Passing on to German music, Mr. Pauer alluded to the check its progress received by the Thirty Years' War, and to the too great influence of the chorale and organ. Its modern foundation is due to Johann Sebastian Bach, who profitably studied the works of foreign contemporaries, and introduced the system of scientific composition which was gradually developed by Mozart, Haydn, Beethoven, and others, by whom the superiority of it was undoubtedly settled, though for a long time not acknowledged. By their earnest training, and by their mastery over the details of instrumental music, the Germans have been enabled to give intensity of expression to their compositions; and in them they aim not merely to give pleasure and charm the senses, but to express the noblest, purest, and highest language of the soul. The illustrations included a bourrée by J. S. Bach, an andante by Beethoven, and a rondo by Weber.

THE HUMAN FORM.

Professor Garrod, in his third lecture, given on Tuesday last, resumed his illustrated description of the structure of the human skull, and its remarkable adaptation to the functions of the brain, manifested in all our sensations and movements; and specially alluded to the tongue, the teeth, and the mechanism connected with breathing and swallowing. In respect to the greater dignity and beauty of the human head as compared with the head of the lower animals, the Professor referred to Camper's facial angle—that is, the angle contained by a line drawn from the middle of the ear to the edge of the nostrils, and another drawn from the latter point to the superciliary edge of the frontal bone. This angle, in apes from 45 to 60 deg., in negroes about 70 deg., varies from 75 to 85 deg. in Europeans, who consequently possess the largest amount of brain and potentiality for mental work. In Greek sculpture this angle is sometimes exaggerated, to idealise the work, of which the Apollo Belvedere is an example. The apparatus for the erection of the head having been noticed, the Professor proceeded to describe the structure of the thorax, or chest, consisting of the sternum or breast-bone, twelve pairs of ribs, with their cartilages, inclosing the heart, lungs, and the other important organs engaged in respiration, digestion, and circulation. The lecture concluded with a description of some of the joints, resembling hinges, endowed with due provision against injury by friction in the oil of the synovial membrane, and guarded against jarring by padding of cartilage. The lecture was much elucidated by models and diagrams.

Mr. Francis Galton, F.R.S., will give a discourse on the Typical Laws of Heredity on Friday next, the 9th inst.

The Dean of Westminster presided, last Saturday, at the first of a course of lectures on the Laws of Health, by Professor Corfield, at the Society of Arts; and, in opening the proceedings, remarked that this was a subject in which the members of all religious denominations might take part without any fear of disunion, and that there was no reason why we should not look at things exactly as they are in themselves, and make the very best use of any instruction which we received, without suspecting anybody, and without running our heads against our neighbours. Dr. Corfield began his lecture by explaining such terms as "constitution," "temperament," "idiosyncrasy." He explained that different diseases might be looked for at different periods of life, and counselled everyone to find out his weak point—if any such should exist, from hereditary tendencies or otherwise—in order to guard against its being fixed upon by disease. Treating at great length of the causes of infant mortality, he strongly urged upon mothers to nurse their own children; and, alluding to infectious maladies, stated that in the first forty-six weeks of last year only one among such children as were between the ages of one and five, and had been vaccinated, had died of smallpox, and it was found that this child had contracted the disease before vaccination.

Dr. Humphry Sandwith, C.B., gave a lecture, at 29, Queen-square, on the subject of Serbia and the Eastern Question. At the close of the address, one of the audience asked if the Jews were persecuted in Serbia. Dr. Sandwith said there was no religious persecution, but Jews were not allowed to settle

in the interior, on account of their opening spirit-shops and commencing a system of usury.

Professor Leone Levi gave, at King's College, his second lecture on Work and Wages. Canon Barry presided, and there was a large attendance of the working classes, for whose benefit the course has been organised. The staple of the learned Professor's discourse was devoted to the social and industrial position of the wage-earning class, and to the effect of machinery on the wage funds.

Mr. W. Chandler Roberts, F.R.S., gave a lecture at the South Kensington Museum, last Saturday, on the Means Adopted for Ensuring Accuracy in the Coinage; Mr. R. A. Hill, of the Mint, occupied the chair.

A meeting of the Royal United Service Institution was held, on Monday evening, under the presidency of Sir Henry Codrington, K.C.B. The first paper read was by Rear-Admiral J. H. Selwyn, on Steam Boilers and Fuel. The question of boiler corrosion and its prevention was also dealt with by Admiral Selwyn, and taken up, together with other points in the paper, at some length in the discussion which followed, which was participated in by Professor Barff, Mr. Lewis Obrick, the chairman, and others. Lieutenant J. T. Bucknell, R.E., then exhibited and explained the self-registering sounding apparatus, jointly patented by himself and Mr. Casella, the well-known philosophical instrument-maker, of Holborn-bars; its principle being a pressure-gauge acted on by the increasing density and consequent pressure of sea-water at increasing depths.

In the course of a second and concluding lecture on the Philosophy of Language, at the London Institution, on Monday evening, Mr. E. B. Tylor stated that on the previous occasion he had examined real words and grammatical words which had no real meaning of themselves, but served to modify the real words used. From this he proposed to consider the structure of language, and how it was put together. Starting with negro-English and the commonest vulgarisms, he compared these with corresponding formations current in foreign languages, such as "I go, do I?" translated from the Bengalee, and showing the intention to place particular stress on the pronoun at the expense of obvious redundancy. Similar examples of the apparently redundant use of the pronoun in French were given, and, incidentally, the weakness of certain rules of ordinary grammar were attacked, as in Lindley Murray's dictum that "a" becomes "an" before a vowel, the fact being that "an" simply meant "one" and became "a" for the sake of euphony before a consonant. Again, on the division of words he was by no means sure that expressions such as "of the man" should not be regarded as compound words in the dative case, merely broken up for the sake of convenience. In this way the English would be an agglutinated language consisting of sense words, modified by the use of grammatical particles, which were called by the Chinese "empty words" to distinguish them from full or sense words. Specimens of agglutinated words taken from the Esquimaux were compared with inflected words in the Latin in illustration of the lecturer's contention that the Greek and Latin were agglutinating languages, differing only from the so-called barbarous languages of Tartary and North America in running rather more into what was called inflexion. "May not," "mayn't," and "won't" strictly followed the definition of inflexion. A Cherokee verb was written on the black board, with multitudinous inflexions and transpositions of the root for variations of the meaning. Why was it, then, that so much had been made of inflexion? It seemed to him a kind of pretension to elevate the Greek, Latin, Hebrew, and Arabic over the agglutinating languages, maintaining, as he did, that the English, by throwing off the accretions of antiquity, left the older languages far behind in power and delicacy of expression. Utter lawlessness and confusion was shown in the grammatical distinctions of gender, especially in the Latin languages. A clean sweep had been made in this respect in the English, rendering this language the envy and admiration of foreign grammarians. It was well that English had these high practical qualities, for statistics showed that it would probably absorb all other languages. Should the extraordinary increase of English-speaking people continue at the existing ratio, there would in twenty years be 860,000,000 speaking English, as against 124,000,000 speaking German and 70,000,000 speaking French. Much was it to be regretted that such a language was encumbered with a ridiculous and absurd alphabet. What was wanted was a carefully-drawn phonetic alphabet, which would enable people to express English and foreign words, which would be a pronouncing, not a mispronouncing, alphabet.

The decay of the City guilds was the subject of a paper read before the Social Science Association, on Monday evening, by Mr. A. Smith, who commented upon the manner in which these institutions disposed of their wealth, and contended that the secrecy of their proceedings was contrary to the national spirit. In the discussion that followed some gentlemen contended that a commission of inquiry on this matter should be appointed by Parliament; while others strongly condemned the attacks which had been directed against the guilds and the "wild and random statements" which were frequently made in regard to them.

An extraordinary meeting of the Fellows of the Statistical Society was held, on Tuesday evening, at King's College, when a paper was read by Mr. Archibald Hamilton on the Economic Progress of New Zealand.

At the meeting of the members of the Institution of Civil Engineers, on Tuesday night—Mr. Stephenson, the President, in the chair—a paper by Mr. John Head was read on the Employment of Refuse Vegetable Substances for Raising Steam.

The Rev. Canon Farrar gave on Wednesday the first of a course of lectures to ladies, on the Early History of Christendom, at Queen's College, 43, Harley-street.

Professor Corfield's second lecture, at the Society of Arts, on the Laws of Health, was given on Thursday.

At the meeting of the Physical Society this day (Saturday) the following communications will be made:—Professor Osborne Reynolds on Vortex Motion; Mr. C. J. Woodward on Apparatus to Illustrate Wave Motion.

The state apartments of Windsor Castle are open to the public.

Sir Brydges Powell Henniker, Bart., has been appointed private secretary to the Right Hon. George Selater-Booth, M.P., President of the Local Government Board, in the room of Mr. Philip Lutley Selater, F.R.S., resigned.

The annual meeting of the subscribers to the Saverlake Cottage Hospital was held at the Townhall, Marlborough, last Saturday, under the presidency of the Marquis of Ailesbury. The income of the hospital last year amounted to over £800. A subscription has been entered into to present the hospital with a portrait of the Rev. J. O. Stephens, the hon. secretary.

THE ASHTABULA CREEK DISASTER.

American papers and letters have told full particulars of this terrible accident on the Lake Shore Railroad, in Northern Ohio, on the night of Dec. 29, which was mentioned in telegrams a month ago. The train, consisting of eleven cars drawn by two engines, reached the bridge over Ashtabula Creek about eight o'clock, and was moving at a low rate of speed. The engines had crossed in safety, when the bridge, without warning, gave way, and the whole train, with the exception of the leading engine, the couplings of which broke, was precipitated into the ravine, a distance of seventy-five feet. The banks are steep, and the furious snowstorm that had been raging for several hours rendered it difficult for those who hastened to the scene of the disaster to reach the wreck. To add to the horror of the situation, the cars took fire from the stoves, and many passengers who were not killed outright by the fall were burned to death. Imprisoned by heavy fragments of the broken cars, or unable to move on account of injuries, men, women, and children met death in that agonising manner. Some, it is supposed, were drowned.

Help arrived early from the Ashtabula village, but nothing could then be done to save life except to remove the wounded, who had already been taken from the cars to places where they could have surgical attention. The heat from the burning wreck was intense; and, in the confusion of the moment, the means which might have been used to extinguish the flames were not thought of until too late. At the waterworks, within 150 yards of the burning cars, lay 500 ft. of hose, the coupling of which exactly fitted a plug within pistol-shot of the fire, the plug being connected with a powerful pumping apparatus, and there being sixty pounds of steam in the pump boiler. The hose could have been pouring a stream on the fire within five minutes but for somebody's fault or stupidity.

A survivor describes the scene in vivid style:—"The first thing I heard was a cracking in the front part of the car, and then the same cracking in the rear. Then came another cracking in the front, louder than the first, and then came a sickening oscillation and a sudden sinking, and I was thrown stunned from my seat. I heard the cracking, and splintering, and smashing around me. The ironwork bent and twisted like snakes, and everything took horrid shapes. I heard a lady scream in anguish, 'Oh! help me!' Then I heard the cry of fire. Someone broke a window, and I pushed the lady out who had screamed. The train lay in the valley in the water, our car a little on its side, both ends broken in. The rest of the train lay in every direction, some on end, some on the side, crushed and broken. The snow in the valley was nearly to my waist, and I could only move with difficulty. The wreck was then on fire. The wind was blowing from the east, and whirling blinding masses of snow over the terrible ruin. The crackling of the flames, the whistling wind, the screaming of the hurt, made a pandemonium of that little valley, and the water of the freezing creek was red with blood or black with the flying cinders."

The number of persons killed cannot be accurately stated, as it is not known exactly how many there were in the train, and it is thought some bodies were entirely consumed by the flames. The official list of the killed, and those who have died of their injuries, gives the number as fifty-five, but it is supposed to be somewhat higher. One of them was Mr. P. Bliss, the musical composer of many of the hymn tunes in the Moody and Sankey collection; both he and his wife were killed. Our illustration is a view of the scene of this great railway disaster.

CHAMBERS OF AGRICULTURE.

The annual meeting and dinner of the Devon and Cornwall Chamber of Agriculture, one of the oldest and largest agricultural chambers in the kingdom, was held, on Thursday week, at Devonport; Mr. Soltan Symons, late a candidate for the representation of Devonport, presiding. Congratulation was expressed at the large share of attention which agricultural matters had received in Parliament, but the Agricultural Holdings Act was unanimously declared to be abortive in operation, and its being made compulsory was demanded. The reintroduction next Session of the Prisons, Highways, and Valuation Bills was urged, but the power conferred on surveyors of taxes was rigorously opposed. Mr. Trelawny, eldest son of Sir John Trelawny, was elected president.

At the annual meeting of the Leicestershire Chamber of Agriculture, held last Saturday—Sir A. Palmer presiding—several speakers objected to the present system of waterside markets, and advocated the slaughter of animals at the port of debarkation, as adopted with success in the trade in American meat. Mr. Albert Pell, M.P., pointed out that the difficulty lay in obtaining the concurrence of foreign countries in the plan. A resolution was eventually passed regretting that more stringent means were not adopted by the Privy Council for preventing the constant importation of animals infected with contagious diseases. At the dinner subsequently held, Mr. Pell spoke on the relations between landlord and tenant.

Mr. Hunter Rodwell, Q.C., M.P., was, on Saturday, elected president of the Cambridgeshire and Isle of Ely Agricultural Society, whose annual show of stock, &c., is to be held at Ely on July 25 and 26.

Sir Henry Jackson, M.P., of Llantillis Court, Monmouth, was elected president of the Monmouth Chamber of Agriculture, at Chepstow, on Monday. The Chamber passed a resolution that nothing short of the most stringent measures would meet the requirements of the Contagious Diseases (Animals) Act. The Privy Council was censured for their inactivity in the matter.

Two gun-boats were, on Monday, launched at Barrow, one named the Foxhound, and the other the Forward.

The subscriptions for the widows and orphans of Inspector Drewett and Constable Shorter, of the Berks police, who were murdered near Hungerford last month, have reached £1500.

Lord Granville was robbed of his watch at the New-street railway station, at Birmingham, last Saturday, while waiting on the platform for the arrival of a train.

It appears from the agricultural returns just issued that for the whole of the United Kingdom the cultivated area in 1876 was 47,393,000 acres, exclusive of heath and mountain pasture land, and of woods and plantations. This total exceeds that of 1875 by 80,000 acres. Between the years 1869 and 1876, 1,293,000 additional acres were returned as having been brought under cultivation.

The Art Loan Exhibition at Lynn continues to receive increased attention, and it has proved successful in every respect. Paintings by Raphael, Vandike, Rubens, Paul Veronese, Sir P. Lely, Sir J. Reynolds, and Landseer are exhibited, and in addition to these there are shown many articles of great value. Two fine landscapes by David Cox, offered to the committee by Lady Buxton for £1200, have been sold for 1700 to Mr. M'Lean, of the Haymarket, thus producing a profit of £500, which is to be devoted to St. Margaret's Church Restoration Fund.

ASHTABULA BRIDGE, THE SCENE OF THE DISASTER ON THE LAKE SHORE RAILROAD, NORTHERN OHIO.

THE LATE CORNELIUS VANDERBILT.

This eminently successful citizen of New York, who died on the 4th ult., in the eighty-third year of his age, had passed through a very busy and enterprising life. He was the son of a small market-gardener on Staten Island, probably of Dutch

1814, before he was twenty-one, he contracted with the War Office to supply six military posts with provisions. This contract he regularly performed, by nightly trips with his boat, visiting each of the six forts once a week, during a period of six months. He was now enabled to build a schooner, and enter upon the coasting trade; he had already married an excellent young woman, Miss Sophia Johnson. Before long he was the owner of three vessels, employed along the coasts of North and South Carolina and Georgia. But he found it more advantageous to enter the service of Mr. T. Gibbons, of New Jersey, one of the earliest proprietors of river steam-boats in America. Vanderbilt and his wife at one time managed an hotel in New Brunswick which Mr. Gibbons had established. But having saved a round sum of money after a few years, Vanderbilt preferred to leave Mr. Gibbons, and to run steam-boats of his own. In this business he was still prosperous, and of thirty-eight steamers he owned, at one time or another, not one was lost by wreck, or fire, or boiler explosion. He was worth about 400,000 dollars at forty years of age, but had no mind to retire, though he had once said he would do so whenever he had 20,000 dollars; and his mother reminded him of that modest resolution.

Mr. Vanderbilt went into a larger field of speculation in 1851, starting a line of isthmus transit through Nicaragua, in opposition to the Panama Railroad and the Pacific Mail Steamship Company, for the California traffic. His feat of bringing a new steam-boat, named the Central America, up the San Juan river, warping her up the Castillo rapids, to place her on Lake Nicaragua, was a bold and skilful performance. Two years later, in a steam-ship of his own, the North Star, he visited Europe, and was very well received. He soon afterwards established a new line of Atlantic steam-ships between New York and Havre. One of these fine ships, the Vanderbilt, he munificently presented to the American Government, as a free gift, at the outbreak of the Civil War. It was accepted, and, being fitted with a ram and armed with guns, was used as a cruiser in pursuit of the Alabama.

Mr. Vanderbilt had, since 1857, been a large shareholder of the New York and Harlem Railroad; he became its president in 1863, when its shares had risen from the lowest value to a fair position. He next took up the Hudson River Railroad, and effected great improvements and extensions, laying down a double line of rails, increasing the number of trains, and building new freight depôts, or goods stations, one of which covers the whole site of the square formerly called St. John's Park. The New York Central Railway was, in 1868, by Mr. Vanderbilt's management, brought to an amalgamation with the Hudson River line, with a joint capital of thirty-five million dollars. This amount of stock has since been more than doubled, and a second double line has been constructed from Albany to Buffalo; the whole of the connected railway property is worth ninety million dollars, paying eight per cent dividend. It is supposed that "Commodore" Vanderbilt was the

richest man in America, his reputed wealth exceeding that of the late Mr. A. Stewart. He had four sons and nine daughters; his eldest son, William Vanderbilt, has been vice-president of the railway company, and is to carry on his father's great undertakings. The first Mrs. Vanderbilt having died, the Commodore, in 1869, at the age of seventy-five, married a

THE LATE CORNELIUS VANDERBILT, OF NEW YORK.

family. It is said that the first money he earned, at sixteen years of age, was a hundred dollars for the job of ploughing, harrowing, and planting an eight-acre "lot" which belonged to his mother, at that time left a widow. He invested the money in a boat, with which he began running to and fro between the island and New York city, carrying goods and passengers; while half his earnings were daily given to his mother. During the war of 1812 between Great Britain and the United States, when the harbour was blockaded and Fort Richmond was besieged, he used at night to convey military reinforcements to that fort, not without considerable risk. He gained five hundred dollars by this service, and, in

THE LATE M. TRAUTSCHOLD, ARTIST.

Miss Crawford, of Alabama. He was not in the habit of ostentatious gifts, but he bestowed a million dollars to found the "Vanderbilt University," on unsectarian principles; and he also founded, at his sole cost, "the Church of the Strangers," in Mercer-street, of which the Rev. Dr. Deems was appointed pastor for life. In his personal habits, the late Mr. Vanderbilt is said to have been very abstemious, seldom drinking wine, and his house was plainly furnished; but he was fond of driving the best horses that could be got for any price. He sometimes indulged in a quiet rubber of whist.

Commodore Vanderbilt's will was read on the 9th, and the

H.M.S. EURYALUS.

petition for its admission to probate was presented to the Surrogate. It was drawn in January, 1875, and has a codicil, made in June, 1875. The bulk of the property is left outright to William H. Vanderbilt, the bequests to all other persons amounting only to a little more than 15,000,000 dols., reckoning railway shares at their par value, and of this 15,000,000 dols. about half goes to the four sons of William H. Vanderbilt, Cornelius Vanderbilt, jun., getting much the largest share. Nothing is given in the instrument to public or charitable purposes, but friends of the Commodore say that William H. Vanderbilt is to carry out a plan of his for the construction of an hospital or home for the benefit of persons employed on the Vanderbilt railroads. It is also understood that the Commodore placed a large sum in the hands of his eldest son to distribute among his most valued friends, no mention of whom has been made in the will.

DUDLEY GALLERY EXHIBITION.

So long as the gentlemen forming the committee of the Dudley Gallery abstain from occupying the best places on the walls with their own productions, so long will the General Exhibition of Water-Colour Drawings command the confidence of the public. The original idea of the association was to give an opportunity for the exhibition of the works of those artists who are necessarily excluded from the walls of the two water-colour societies from their not being members; and the loyal carrying out of its programme is what gives peculiar attraction to this the earliest of our spring exhibitions.

As art, when expressed by simple form, is not nearly so much appreciated or understood in this country as it ought to be, it may be as well to premise that there are placed in the middle of the room several interesting pieces of sculpture. C. B. Lawes has two ideal female busts (641 and 643) in terracotta, charming in expression and excellently modelled. F. Junack, two cleverly grouped boys, which he calls "The Twin Naturalists" (639) and Melchior Auderegg, a small whole-length figure of "F. Morshead, Esq., of Winchester" (642), a piece of exquisite manipulation rarely seen in this country. The technique of this sculptor was never acquired in England. Then there are two busts by Mrs. Thornycroft—a lady whose works we should like to see more frequently in our exhibitions. The one is a marble bust of Milton's "Il Penseroso" (640), which she endows with a sweet unexaggerated sentiment; and the other is a most recognisable portrait-bust of Princess Louise of Hesse.

Turning to the pictures in our book, we find the place of honour occupied by Mark Fisher's "Winter's Day" (97), in which a shepherd unfastens a rustic gate that his sheep may pass through. Overhead are stretched the gaunt arms of the leafless trees, and away beyond the snow-covered country looks cold and cheerless. Around this picture, or in its immediate neighbourhood, will be found several interesting works of our coming artists. Immediately beneath it, for example, is a lady, seated on a yellow sofa, during "The Reign of Terror" (96), by Percy Macquoid, which is remarkable for careful drawing and good colour. The corresponding picture above Mr. Fisher's snow scene is called a "Study from Nature" (98), and represents a red, curly-headed boy in blue dress thrumming a guitar. The artist is the Marchioness of Waterford, who evidently wields an impetuous, but by no means an unartistic, pencil. Patience is what she chiefly desiderates, and when her models are red-haired we would advise her to eschew blue. On each side of the winter scene already referred to hangs a glowing landscape, and both of them are pictures of tone and quality. The one to the left shows a girl and child driving home leisurely two or three cattle by a road leading up from a rocky brook which we see in the hollow on our left. Its author, Tom Lloyd, calls it appropriately "The Close of Day" (82). The pendant to this is Ernest Waterlow's "Hill Farm," with a duck-haunted pool in the foreground, with a girl beyond driving home some calves. Both artists seem to have chosen the fall of the gloamin for their subject, and it is curious to note how similar the means are which they use in expressing it. Close to the last named hangs "The Last of the Heather" (113), with two girls coming down the hillside towards the spectator. The author, Tristram I. Ellis, is another of our promising young landscapists; but his usual success has scarcely attended him in this case. As the picture hangs, we can scarcely say what growth it is, whether wild or cultured, through which the girls are marching.

Joseph Knight has two sweet little bits in this part of the gallery, called "The Brook" (104) and "Farm Buildings" (91), which we see beyond a common; but his chief contribution hangs in the place of honour on the opposite wall. "Twilight" (324) he calls it; and he conveys very impressively this idea by the disposition and outline of his masses, by a brashy pool in the foreground, and some houses peeping up dimly on the ridge beyond. So effectually, indeed, has Mr. Knight realised for us twilight, that we experience relief and refreshment in looking up at Marie Stillman's "Bloom Time" (325)—a girl filling her lap with apple-blossom. We could afford to see more of this artist, whose colouring is so bright and effective without being in any way exaggerated.

This reminds us that lady artists are well represented in the present exhibition. Close by hang "One of the Queen's Marys" (321), by Mrs. Arthur Luxmore, the Vicar of Wakefield's "Sophia Primrose" (322), by Mrs. H. Champion; "Point Pescade, Algiers" (320), from the dashing pencil of Madame Bodichon; a very clever picture of a rustic boy piping from under a fern-frond to his attentive terrier (79), by Catherine A. Sparkes; and a carefully manipulated "Portrait of T. D. Webb, Esq." (317), by Edith Martineau. A still more effective piece of limning by the same artist hangs on the opposite wall. It represents a lady artist, of earnest and almost severe mien, pencil in hand, looking towards her supposed sitter. Adrian Stokes has proved himself worthy of his model in his "Portrait of Mrs. Charles De Lacy-Lacy" (80). E. Clifford, in his only contribution—a lifesized portrait of "The Hon. Mrs. Cowper-Temple" (141)—has scarcely made the most of his sitter. That he is literally correct in his drawing there can be no doubt; but he has missed the beautiful spirit of his subject; or, if his sitter persisted in wearing so nun-like a garb, and an expression so remarkably resigned, he would have been perfectly justified in remonstrating. The picture (142) by E. S. Guinness, hanging close by, of a girl leaning against a tiger skin, is surely too fair and too intelligent for "A Circassian Slave." There is much more of ethnological truth in "Aunt Chloe's Visit" (171), by Alfred E. Emslie. Aunt Chloe is a gorgeously-attired negro lady, who, with her husband, in garments equally faultless and complete, has come on a visit to the home of her humbler sister. The four little "darkies" evidently regard the advent of their rich kinsfolks as an event which must be made the most of, and they disport themselves accordingly. The picture is full of negro humour, and cleverly painted.

R. Phené Spier sends one of the richest bits of Jacobean architecture in England, and although the "Second Court of St. John's College, Oxford," is rather a limited subject, he has managed to treat it with much pictorial feeling. In the

"Haymaking" (164), close by, John H. Dearle has allowed his clouds to come too far forward. John Charlton is very correct in the drawing of the cob which we see "Getting Impatient" (156) at the door where he is tied up; and J. C. Dollman, another sound animal-painter, shows thorough knowledge of canine nature in "Chains and Slavery" (172), as seen at Antwerp. Five dogs, whose breeds are scientifically differentiated, fastened to a vegetable cart, are waiting with more or less satisfaction while a girl bargains with their master for some cabbages. Near this hangs Mary Goddall's "Jacqueline" (173), a pretty, bright-eyed girl, in blue-trimmed mob cap. We would call attention also to Charles Earle's "Venetian Market-Card" (179), Henry Darvall's "Early Morning on the Thames, from Charing-cross Bridge," George L. Hall's rocky "Coast of South Wales" (192), and Albert Goodwin's "Delectable Mountains" (196), sloping down to the sea, as drawings all worthy of admiration, although our space permits of our only naming them.

In the far ends of the gallery hang many pictures of high merit. The place of honour is occupied by J. C. Moore's portrait of Earl Granville's second daughter (210), an interesting little girl, sitting with a guitar in her lap. In spite of a slight tendency to stiffness, this quaint manner of treating children's portraits seems to find favour with artists and their patrons, as may be seen from the number of imitators in the present exhibition. On one side of the portrait just named hangs a remarkably clever picture by Frank Walton, and on the other a masculine drawing by Hamilton Macallum. The former, "Under the West Cliff, Bournemouth" (205), represents a barren stretch of sea sand, where utter loneliness is intensified by the presence of three rooks. The sense of space is excellent, and the glimpse of the distant sea gives relief to the eye; the latter shows some fishermen hauling up a yawl with a "Yo, heave, oh!" (220). The sandy headland beyond is reflected in the summer sea, and gulls flit about in familiar proximity. J. M. Jopling sends a capital picture of an old fisherman and his wife or daughter, seated on a low sea-wall, "Mending Nets" (207); but the picture is too high to be appreciated in detail, but its local truth and colouring will be readily recognised by those familiar with St. Monan's, Fifeshire.

We like the tender effect of greenery in the trees which overshadow the Shallows (221) of Alfred Parsons; the careful modelling of Leyden Pocock's "Pensativa" (431); the vigorous way in which Sutton Palmer has rendered the tumultuous "Fall of the Orchay" (224); the dark, yet rich and luminous effect in James Macbeth's "Gareloch Head" (238); and the faithful rendering of the cloud and mist "Under the Cliffs at Whitby" (252), by E. Ellis. T. R. Macquoid's "Old Gateway, Spain" (278), is one of the best pictures this artist has done lately. The two figures against the sunny grey wall give force and character to the whole. Walter Field is, perhaps, a little sketchy in his "Waste Land" (310), on which sheep feed very keenly, as sheep generally do when under a sky threatening rain, as we have here; but, in spite of this, the drawing has all the appearance of being a transcript from nature.

Such artists as C. Napier Hemy, E. J. Poynter, and H. Stacy Marks are fairly represented in this exhibition; but they can well afford to be only named. The general character of the drawings, numbering in all 638, are not beyond the usual average.

THE LATE HERR TRAUTSCHOLD.

The death of this esteemed German artist was lately announced. Wilhelm Trautschold was born in 1815, at Berlin, and came over to this country in 1846, when he accompanied his friend, the late Baron von Liebig, who was desirous of having the portraits of some of his English friends painted by Trautschold. He became resident in England, having many commissions to paint in Liverpool, where he married an English lady in 1850. Soon after his marriage he and his wife travelled through Italy and Germany. On their return they settled in London, residing in Fitzroy-square. Herr Trautschold painted many fine pictures, portraits, figure-subjects, and landscapes. It was in the last-mentioned branch of art that he met with the most signal success at the chief exhibitions of this country. One of his works, "A Scene in the Black Forest," which was exhibited at the Academy in 1866, had its merits generally acknowledged by the public as well as the press. This picture was bought by the committee of the South Kensington Museum for their collection. The artist was from time to time called over to Germany to paint some celebrated man. He painted the late Baron von Liebig four times; the last portrait was done shortly before the death of that eminent chemist. This picture has been chosen as a model for the statue to be erected at Munich, and has already been copied for the Portrait Gallery of Great Men in that centre of art. Trautschold's fine drawings of the New Forest scenery, in Hampshire, were admired, in 1875, at the special Exhibition of New Forest Views in London. His last journey to Germany was principally undertaken for the benefit of his health, which had been failing in the last twenty years. His death occurred, on the 7th ult., at Munich. The well-known "German Athenaeum," last week, got up an "In Memoriam" exhibition of a small but choice collection of the late Herr Trautschold's works in the different branches of art in which he was master. Personally, as a character of rare excellence, Trautschold was much admired and beloved by all who knew him, and especially by those friends who witnessed the heroic manner in which he bore extreme sufferings during many years, till released by death.

H.M.S. EURYALUS.

This new ship, one of eight swift unarmoured cruisers already built, of the Inconstant and Bacchante class, was launched, on Wednesday last, at Chatham Dockyard. The Euryalus was laid down in November, 1873, and has therefore taken three years to construct. It will, however, be another year before she is completed and ready for sea. She has a displacement of 3932 tons, or, in builders' measurement, a tonnage of 1906 tons. This gives her superiority in size over the Active, whose displacement is only 3078 tons, and a considerable inferiority to the Shah, whose displacement is 6040 tons. Like her sister-ships, the Boadicea and Bacchante, she holds, therefore, a middle position between the large unarmoured cruisers, like the Shah, Inconstant, and Raleigh, and the small corvettes, the Active and Volage. Her length is 280 ft.; breadth, 45 ft.; depth of hold, 15 ft. 7 in.; draught of water—forward, 20 ft. 4 in., and aft, 22 ft. 10 in.; indicated horse power, 5250 ft. Her armament is, in common with that of other vessels of this class, feeble. It will consist of two revolving 4½-ton guns, fourteen similar guns to be used broadside; and two sixty-four-pounder chase guns. From this it will be seen that the Euryalus will not carry any guns of armour-piercing power. The 4½-ton gun does not use the Palliser projectiles, either shot or shell, at all. The shells it uses are the common 107 lb. 14 oz., and the shrapnel, 115 lb. 10 oz.; it also uses case-shot of 69 lb. It is, of course, vastly superior to the old-

fashioned sixty-four pounder, which uses only 56 lb. 14 oz. common shell, 65 lb. 10 oz. shrapnel, and 50 lb. 8½ oz. case-shot. The armament of these vessels has long been a vexed question—whether, if it be merely intended to attack the enemy's maritime commerce, it is not too strong; or whether, if it be supposed to afford protection against attacks from other ships of war, it is not too weak. But there can be no doubt that the Euryalus is capable of performing good service in naval warfare.

WILLS AND BEQUESTS.

The will and two codicils, dated Aug. 10, 1871, July 2, 1873, and July 12, 1875, of Colonel Charles Towneley, late of Towneley, Lancashire, who died, on Nov. 4 last, at Towneley Hall, were proved in London on the 18th ult. by his sons-in-law, Lord Norreys and Lord Alexander Francis Charles Gordon Lennox, and Mr. Henry James Stonor, the executors, the personal estate being sworn under £160,000. The testator bequeaths to Mr. Stonor £100; to his secretary, Matthew Houghton, £200 for each year's service, but not to exceed in the whole £2000; to Mademoiselle Briand, the friend of his daughters, an annuity of £50; and there are annuities to his housekeeper, the lady's-maid of his late wife, and his herdsman, and legacies to the servants who have been five years in his service at his death; the whole remainder of his personality, and such part of his real estate as he can dispose of by will, he leaves to his three daughters, Lady Norreys, Lady Alexander Gordon Lennox, and Lady O'Hagan.

The will, dated Aug. 10, 1874, of Mr. Thomas Greenwood, late of Sandfield Lodge, Hampstead, who died on Dec. 12 last, has been proved by Mrs. Marianne Greenwood, the widow, and Herbert Greenwood, the son, the executors, the personal estate being sworn under £90,000. The testator bequeaths to his wife an immediate legacy of £1000 and all his household furniture; he also gives her the interest of £30,000 for life, and a power of appointment at her death over £15,000, part thereof. There are legacies to his trustees; and the residue of his property, real and personal, he leaves to his said son.

The will, with two codicils, dated Feb. 19, and Aug. 28, 1874, and March 21, 1876, of Mr. Edward Moss, late of No. 78, Inverness-terrace, Baywater, who died on Dec. 8 last, was proved on the 10th ult. by Mrs. Sophia Moss, the widow, Samuel Moss, the son, David Benjamin, Louis Joseph, and Montague Davis, the acting executors, the personal estate being sworn under £90,000. The testator bequeaths to the Deaf and Dumb Asylum, Burton-crescent, £200; to the London Hospital, Mile End-road, £100; to the Jews' Soup Kitchen Society, £25; to the Jews' Hospital, Norwood, the Jews' Hand-in-Hand Society, the Jews' Widows' Home, and the Jews' Orphan Asylum, 19 guineas each; and there are many other legacies, including one to the Zetland Lodge of Freemasons of Montreal, of which deceased was for twenty-five years treasurer. To his wife he gives his residence in Inverness-terrace, a pecuniary legacy, and £1500 per annum for life, and the residue of his property upon various trusts for his eleven children.

The will and codicil, dated Aug. 15 and Nov. 27, 1873, of Mr. Louis Arthur Lucas, late of Manchester, who died, on Nov. 20 last, on board the steam-ship Massorah, in the Red Sea, has been proved by Nathaniel Cohen, Edward Behrens, Louis Davidson, and Alfred Gutierrez Henriques, the executors, the personal estate being sworn under £60,000. The testator bequeaths to the Jews' Infant School and the Jews' School, both at Manchester, £200 each; to the Manchester Royal Infirmary, the Southern Hospital, Manchester, the Jewish Board of Guardians, and the Reform Synagogue, Park-place, Manchester, £100 each; to the Colonel of the 1st Manchester Rifle Volunteers, £50, to be distributed by him in prizes to the regiment; to the Presbyterian minister of the parish of Dunoon, Argyshire, £50, to be distributed by him among the poor inhabitants of such parish; and there are other legacies. The rest of his property he leaves upon trust for his five sisters—Mrs. Cohen, Mrs. Behrens, Mrs. Davidson, Mrs. Henriques, and Miss Agnes Charlotte Lucas.

The will, dated Aug. 1, 1876, of the Hon. Henry Walpole, late of the Carlton Club, Pall-mall, who died on Nov. 6 last, at the Hôtel de Venise, Mentone, was proved on the 19th ult. by Spencer Walpole, the acting executor, the personal estate being sworn under £45,000. The testator bequeaths the watch formerly belonging to Garrick to his brother, the Earl of Orford, to be held as a heirloom, and some other legacies; the remainder of his personality he gives to his wife, the Hon. Mrs. Cecilia Elizabeth Walpole, for life; on her death there are some further legacies, and the following charities take £100 each—viz., the Blind School, St. George's-fields, the House of Charity, Greek-street, Soho, St. George's Hospital, the Society for the Propagation of the Gospel in Foreign Parts, and St. Andrew's Hospital, Clewer, near Windsor; the residue of the personality is then given to the next of kin of his brother, the Hon. Frederick Walpole. All his real estate is devised upon the same uses as those declared in the family settlement of the Woolterton estate, in the possession of the Earl of Orford.

The will, dated Nov. 11, 1857, of Mr. Joseph Francis Gillett, late of No. 115, Piccadilly, who died on Dec. 6 last at St. George's Hospital, was proved on Dec. 23 last by Thomas Cuvelje, the acting executor, the personal estate being sworn under £30,000. There are some legacies, and the rest of his property, real and personal, testator gives to his brother, Francis Alfred Gillett.

The will, dated July 3, 1876, of Mr. Park Nelson, late of No. 11, Essex-street, Strand, and of Parson's-green, Fulham, who died on Dec. 19 last, was proved on the 12th ult. by Robert Rogers Nelson, the son, and Joseph John Morgan, the executors, the personal estate being sworn under £18,000.

The will of Mrs. Anne Mary Perceval, widow of Michael Henry Perceval, Esq., of Spencer-wood, Quebec, Lower Canada, and eldest daughter of the late Sir Charles Flower, Bart., who died, in her eighty-seventh year, on Nov. 23 last, at Lews Castle, Stornoway, the seat of her son-in-law, Sir James Matheson, Bart., was proved on Dec. 22 last under £16,000; in addition to which she died possessed of real estate at Mill-hill, Middlesex.

The will, dated April 12, 1875, of the Rev. Fletcher Fleming, M.A., of Rayrigg and Belfield, in the county of Westmorland, who died on Nov. 11, 1876, was proved on Dec. 29, 1876, at Carlisle, by James Christopher Wilson and George Edward Moser, the executors, the personal estate being sworn under £16,000. The testator bequeaths £500 towards building and partly endowing a chapel of ease at Biscay How, near Bowness (the land for which chapel he had already conveyed to Lord Decies and George Edward Moser); £100 to St. Mary's Schools, Birkthwaite; £100 to the Grammar School at Bowness; and £50 in various local charities. The testator directs inventories to be made of all the family pictures, books, plate, and various trinkets (including the watch said to belong to old Sir Daniel Fleming) in and about his residence at Rayrigg, and directs that the same shall be of the nature of heirlooms. After various pecuniary legacies, he bequeaths an annuity to his wife; and, subject thereto, he devises his freehold estate called Belfield, at Windermere, aforesaid, together

with the plate, pictures, and other family heirlooms thereto attached, to his sister, Jane Isabella Fleming, for life, remainder to sink into residuary real estate. He devises the family seat called Rayrigg, with the lands, grounds, and woods thereto belonging to his said wife for life; and from and after her decease he devises his said estates at Rayrigg, together with his farms and all other his real and personal residuary estates whatsoever, to his two sisters, Barbara Fleming and Jane Isabella Fleming; and from and after their deaths to the use of Hugh Raincock and his sons in tail, with remainder to the Rev. Hugh Fleming and his eldest son living at testator's death in tail; and in default of the issue of the eldest son of the said Rev. Hugh Fleming, to the use of Lawrence Harrison and his sons successively in tail, with remainders to the use of William Harrison and John Baldwin and their second sons successively in tail; with remainder to his right heirs. The testator directs that all persons becoming entitled to his said freehold estates shall apply for an Act of Parliament or obtain the license of the Crown to assume the surname and bear the arms of Fleming. The testator forbids any reference to the Court of Chancery in respect to his said estates, and appoints his said trustees arbitrators in the event of any dispute arising as to the construction of his said will.

OBITUARY OF EMINENT PERSONS.

HON. G. M. FORTESCUE.

The Hon. George Matthew Fortescue, of Boconnoc, Cornwall, and Dropmore, Bucks, died on the 24th ult., at his seat near Lostwithiel. He was born May 21, 1791, the second son of Hugh, first Earl Fortescue, K.G., by Hester, his wife, daughter of the Right Hon. George Grenville, and succeeded to the Dropmore estates at Lady Grenville's death, in 1864. He was educated at Eton and at Edinburgh, was formerly in the Army, and served on the Staff in India. From 1827 to 1832 he sat in Parliament for Hindon. He married, 1833, Lady Louisa Elizabeth, youngest daughter of Dudley, first Earl of Harrowby, and leaves issue.

RIGHT HON. P. ERLE.

The Right Hon. Peter Erle, Q.C., brother of Sir William Erle, late Chief Justice of the Common Pleas, died on Jan. 28, at his residence, 12, Park-crescent. Mr. Erle was admitted a member of the Middle Temple on June 11, 1817; called to the Bar on June 1, 1821; made Queen's Counsel on July 10, 1854; Bench of the Middle Temple on Nov. 22, 1854; treasurer, 1864; Chief Charity Commissioner for England and Wales, and a Privy Councillor, 1872. Mr. Erle was in his eighty-third year.

LIEUTENANT-COLONEL G. WARDE.

Lieutenant-Colonel George Warde, of Squerryes Court, Kent, J.P., formerly Captain 85th and 51st Regiments, the representative of the Kentish branch of the Wardes of Hooton Pagnell, in Yorkshire; son of the late Admiral Charles Warde, of Squerryes, K.H., by Marianne, his wife, daughter of A. W. Gregory, Esq., of Styvichall, in the county of Warwick. He was born Jan. 1, 1827; married, Aug. 28, 1862, Lady Harriet North, daughter of Francis, sixth Earl of Guilford; and died on the 23rd ult.

THE REV. F. FLEMING.

The Rev. Fletcher Fleming, M.A., of Rayrigg and Belfield, Westmorland, was descended in a direct line from Sir Daniel Fleming, a distinguished Royalist, who died in 1701. He was grandson of the Rev. William Raincock, Rector of Ouseby, in Cumberland. His father, the Rev. John Fleming (Prebendary of Llandaff Cathedral), assumed the name of Fleming on succeeding to his uncle's estates at Rayrigg. The deceased gentleman was born on Aug. 22, 1795, and married Emily, granddaughter of General Boscawen, third son of the first Viscount Falmouth, who married a niece of the first Duke of Marlborough. He took his degree at St. John's College, Cambridge, and was appointed Rector of Grasmere in 1857.

The deaths are also announced of:—

Captain John Hall, R.N., on the 24th ult., aged ninety-two. Viscount de Stern, on the 19th ult.

Lady Simpson, widow of Sir John Simpson, Knight, on the 21st ult., aged eighty-three.

Colonel Clement Hemery, A.D.C. to the Queen, on the 16th ult., aged sixty-five.

William Fowler, Esq., J.P., of Whittington Hall, Derbyshire, on the 20th ult., aged fifty-six.

Lieutenant-Colonel the Hon. George Augustus Spencer, late 63rd Regiment, 60th Rifles, 37th Regiment, and Coldstream Guards, on the 18th ult., aged seventy-two.

The Rev. C. B. Douglas, Vicar of Pembroke, South Wales, J.P. (son of the late J. K. Douglas-Willan, Esq., of Twyford Abbey, Middlesex), on the 19th ult., aged fifty-six.

George Matcham, Esq., LL.D., of Newhouse, and Hoadlands, Surrey, J.P. and D.L., nephew of the great Lord Nelson, in his eighty-eighth year.

The Rev. Joseph Pullen, B.D., formerly Fellow and tutor of Corpus Christi College, Cambridge, and Gresham Professor of Astronomy, and late Vicar of St. Benedict's, Cambridge, on the 20th ult., aged sixty-nine.

The Rev. Henry Dudley Ryder, Canon of Lichfield, on the 19th ult., aged seventy-three. He was eldest son of the Hon. and Right Rev. Henry Ryder, Bishop of Lichfield and Coventry, and nephew of Dudley, first Earl of Harrowby.

Augusta, Princess de la Trémouille, widow of Prince Louis Stanislas Kotzka de la Trémouille, eldest daughter of Colonel the Hon. Alexander Murray, and granddaughter of John, fourth Earl of Dumfries, at Naples, on the 22nd ult., aged sixty-six.

Lord George William Loftus, late of the Grenadier Guards, at Nice, on the 19th ult. His Lordship was the second son of John, second Marquis of Ely, K.P., P.C., by Anna Maria, his wife, daughter of Sir H. W. Dashwood, Bart., and was uncle and heir presumptive to the present Marquis of Ely.

The Right Hon. Caroline Maria, Countess of Limerick, on the 24th ult., aged thirty-six. Her Ladyship was the daughter of the late Rev. Henry Gray, Vicar of Almondsbury, son of the last Lord Bishop of Bristol and brother of Bishop Gray of Capetown, and she was married, in 1862, to the third Earl of Limerick, by whom she has issue one son, Viscount Glentworth.

The Dowager Marchioness Townsend, on Jan. 27, at her residence in Queen Anne-street, Cavendish-square. She was the eldest daughter of Rear-Admiral Lord George Stuart, C.B., sixth son of John, first Marquis of Bute. Elizabeth Jane, Marchioness Townsend, was born July 18, 1803, and married, Aug. 18, 1825, John, fourth Marquis Townsend.

A conference took place in Dublin, last Monday, on the Education Question. The Roman Catholic Archbishops of Cashel and Armagh and the Bishops of Ardagh and Elphin represented the Irish hierarchy, and Messrs. Butt, M.P., Mitchell Henry, M.P., and John George MacCarthy, M.P., expressed the views of Irish members of Parliament. Mr. Butt's bill in reference to University education was discussed.

CHESS.

TO CORRESPONDENTS.

All communications relating to this department of the Paper should be addressed to the Editor, and have the word "Chess" written on the envelope.

H. I. C. (Burlington).—The best specimens of American chess problems will be found in the New York *Times*, *Harvard Times*, and *Detroit Free Press*.

G. J. P. (Stepney).—We shall be glad to assist you if you will state precisely what you wish us to do. There is nothing wrong in your description of the problem or the solution appended.

W. B. C. (The Hamlet).—The game referred to appeared in our issue of Aug. 14, 1869. You will find that the moves are correctly recorded, if you play them carefully.

F. V. B. (Brighton).—In Problem No. 1675 White can play K takes B in reply to your proposed making move.

Dolly (Liverpool).—We have not space for the analysis; but it shall be forwarded to you if you will inform us of your exact address.

N. M. (Warwick).—We prefer the English notation, and certainly have no intention of introducing any other.

S. J. (Calcutta).—Without special trial it would be impossible to estimate the value of such odds as "the first player agreeing not to check his adversary until he can effect checkmate." We are inclined to think that the suggestion has been discussed before, but cannot at present refer you to the publication in which the arguments appeared.

H. L. (Durham).—You can obtain the *Chessplayer's Chronicle* on application to Dean and Son, Fleet-street, London.

B. W. (Regent's Park).—Accept our cordial thanks for your obliging communication.

A. Davis (Salmon).—Your solutions of Problems Nos. 1706 and 1707, although somewhat late in the field, are quite right.

J. S. (Liverpool).—Three commonplace checks in a three-move problem! Too rudimentary; nevertheless, try again.

W. G. (Whitby).—A very fine conception; but cannot White play 2. K to B2nd, in reply to P to Q R3rd, as well as in the variation P takes B.

Connect Solutions of Problem No. 1717 received from B. Lewy, Dolly, Deep Ho, X. A. S. Turner, and W. L. E.

Connect Solutions of Problem No. 1718 received from J. K. T. Guest, H. B. J. Byng, East Marden, Only Jones, J. de Housay, R. Boush, W. F. Payne, Simplex, Cant, P. O. Eggers, Mechanic, W. Leeson, R. H. Brooks, Lotta, J. S. W. G. Wheatley, Dolly, H. Blinger, W. Nelson, A. G. R. T. R. Y. J. Williamson, Americaine, Woolwich Chess Club, H. M. S. Bruijer, Long Stop, E. Frau, Latta, D. H., and A. Wood, Triton.

Problems received from J. H. Scott and T. Guest.

SOLUTION OF PROBLEM No. 1718.

WHITE.	BLACK.	WHITE.	BLACK.
1. Q to K 4th	P takes Q	3. R takes Kt.	Mate.
2. Kt takes P (ch)	K moves		
	* If K takes R, then Q to Q 4th (ch), &c.		

PROBLEM No. 1720.

By J. G. FINCH.

BLACK.

WHITE.

White to play, and mate in three moves.

CHESS IN LONDON.

The following is the concluding game in a match between Professor WAYTE and Mr. J. I. MINCHIN, just decided at the St. George's Chess Club. Nineteen games were played in all, of which Professor Wayte won eleven, Mr. Minchin seven, and one was drawn.—(*Queen's Knight's Game*.)

WHITE (Prof. W.)	BLACK (Mr. M.)	WHITE (Prof. W.)	BLACK (Mr. M.)
1. P to K 4th	P to K 4th	20. Q to B 3rd	B to K sq
2. Kt to Q B 3rd	Kt to Q B 3rd		
3. Kt to K B 3rd	P to K Kt 3rd		
4. P to Q 4th	P takes P		
5. Kt takes P	B to Kt 2nd		
6. B to K 3rd	K Kt to K 2nd		
7. Q to Q 2nd			
	We are disposed to prefer this line of play to B to K 2nd.		
8. Castles	Castles		
9. B to K 2nd	P to Q R 3rd		
10. P to K R 4th	P to Q R 3rd		
11. P to K B 3rd	P to K B 4th		
12. B to Q B 4th (ch)	K to R 2nd		
13. K to Kt sq			
	Better in our judgment than either P takes P or Kt to K 4th. The former course would have the effect of assisting Black to develop his forces, and, in the latter case, there follows:—		
14. B takes B	B takes Kt		
15. Kt takes P	P to B 6th		
	When White must retreat the B. If he should capture the P. Black can continue with R takes B, B to B 3rd, &c.		
16. B takes B	P to K B 5th		
17. K to R sq			
	White displays remarkable judgment in his conduct of the opening. If he had played Kt takes Kt, with the view of winning the Pawn, the following is a probable continuation:—		
14. Kt takes Kt	P takes B		
15. Kt takes Q	P takes Q		
16. Kt to K 6th	B takes Kt		
17. B takes B	B to R 3rd		
18. K to R sq			
	and, although White wins the Pawn by Kt to Kt sq, Black secures an equivalent in "time."		
14. Kt takes Kt	P to Q Kt 4th		
15. B to Q 5th	Kt takes Kt		
16. B takes Kt	B to Q 2nd		
17. B takes Kt	B takes B		
18. Kt to K 2nd	B to K 4th		
19. B to Q 4th	Q to K 2nd		

and Black resigned the game and the match.

A special telegram from Madeira states that the Livingstone mission has had a great effect in diminishing the slave trade.

Mr. Forster, M.P., in reply to the statements of a deputation from the Bradford journeymen brushmakers respecting the employment at brushmaking of the inmates of the Clifton Reformatory, Bristol, and the Manchester City Gaol, came to the conclusion that they have a very strong case.

The regulations for the posting of newspapers with a late fee at the General Post Office are now as follow:—Foreign mails, without fee, 6 p.m.; inland mails, without fee, 5.30 p.m.; foreign and inland mails, with 4d. fee, 6.45 p.m.; with 1d. fee, 7.15 p.m. To maintain this reduction in the late fee payable between 7 and 7.15 p.m. from one penny to one halfpenny, it will be necessary that newspapers for foreign countries on which the fee is paid should invariably be presented at the public counter in bundles, apart from those for the United Kingdom, and also that those for Scotland, Ireland, and for large towns, such as Liverpool, Manchester, Birmingham, Bristol, &c., when exceeding twenty in number, should be tied up in separate bundles.

NOVELS.

A primitive community of fisher-folk is picturesquely limned by the author of "The Queen of Connaught" in the new three-volume novel entitled *The Dark Colleen* (R. Bentley and Son). This fresh and unconventional romance opens on the morrow of a storm on Eagle Island, which is situated off the west coast of Ireland, and is inhabited by an honest, superstitious set of Celts, who elect their own king every year, and live peacefully in a style of civilisation of their own fashioning. An idea of the vastness of the world outside Eagle Island is first conveyed to the mind of the sweet heroine, Morna Dunroon, by a handsome shipwrecked sailor, whom she first sees lying senseless on the shore, very much as Haidée discovered Don Juan. Ere Captain Emile Bisson quite recovers, however, he narrowly escapes being thrown back into the sea by the superstitious Celts, who, returning in a rough curragh—"a boat covered with a tarred canvas or hide"—from a fishing expedition, fear to leave what they regard as a dead body on the sands, or give it burial, lest it should bring ill-luck to the island. The scene in which Morna begs her father, the grim king of Eagle Island, to save the castaway from this fate is portrayed with great vigour. The French Captain revives. A Don Juan by nature, he would amuse himself during his convalescence by trifling with the affections of Morna, in whose bosom he has kindled a love for himself. But Morna's purity is proof against him. Of a roving disposition, Captain Bisson at length tires of Eagle Island. He persuades a genial, whisky-loving priest, Father Moy, to marry him to Morna; and, together, they depart for France, the islanders taking leave mournfully of the young queen of their hearts, but nothing loth to lose the Frenchman, as the fishing has been bad ever since his sojourn among them. Once he has won Morna, the fickle Captain neglects his young wife for a smart coquette of a French girl, Euphrasie, the divinity of the Fleur-de-Lys café in the seaport of Hantour. A flirt with Euphrasie, the lively click-clack of the dominoes on the marble tables of the café, the cannoning of billiard-balls, have more charm for him than the quiet of home with Morna in Bernise. He permits his mate, Nicolo Louandre, who has fallen in love with her, to spirit Morna away in his ship, the Hortense, from which, however, she leaps into the sea on discovering that her husband is not on board. A skilful swimmer, Morna swims ashore, and wearily plods back to her home, there to find Bisson exhibiting the rooms to his new love. They part—the Captain remaining in France, Morna journeying back alone, heartbroken and crushed by his faithlessness, to Eagle Island. She has more dangers to encounter ere she is welcomed back by her father and the friends who love her. As for Captain Bisson, judgment is wrought on him in a second storm, which wrecks his vessel on Eagle Island, and casts ashore his dead body, on which rests a gold locket containing a portrait, which Morna recognises with a spasm of "unutterable pain" as she reads beneath it the inscription, "Euphrasie Bisson." This is but a brief outline of the story of "The Dark Colleen," whose chief charm is its vivid delineation of the weird inhabitants of Eagle Island and of the varying aspects of this lone spot in the ocean, according to whether the Atlantic peacefully laps its shores or dashes with the fury of the tempest on its rocks. The fresh and bracing ozone of Eagle Island will, in fine, be found a healthy change from what the author rather severely terms "the emasculating breath of modern culture and modern thought."

"A foolish girl playing at being in love, and a young man helping her in the game." Thus charitably does a wall-flower of Mrs. Cox's gay ball at Lakeville comment on the flirtation Lil Temple is engaged in with Mr. Leigh Ward in the opening chapter of *Storm Driven* (Samson Low and Co.), by Mary Healy. There is another admirer of Lil Temple at the party, an undemonstrative, but no less earnest one—Mr. John Bruce, who, from the lowly position of a street newsboy, has risen to be a painter of talent. Which will she choose? The sprightly man of the world, Mr. Ward, makes all the running whilst the sun shines on Lil. When her father dies by his own hand, her mother dies, and Lil and her sister are suddenly plunged from comfort into poverty, the brilliant wooer slackens in his attentions for a while, until he meets his inamorata in Paris, whither she accompanies the wealthy Mrs. Cox as companion. Here Mr. Ward is smitten afresh with Lil's beauty. "Yet Lil was not strictly beautiful; she was merely pretty, very fresh, and her movements were perfectly graceful; she had a peculiarity which arrested attention; her eyes were very blue, while the eyelashes which shaded them were black, and the heavy hair quite dark." There's a love scene between Mr. Ward and the pretty American girl—a love scene interrupted by Mrs. Cox, who grows so violently jealous that she abruptly leaves Paris the same night, to the amazement of her forsaken companion, who finds herself alone and friendless in the great city on the morrow. Her fickle admirer flits from Paris at the same time. A scandalous rumour has been spread about her in the American circle which formerly gave her welcome. Everywhere a cold shoulder is turned to her; and, her small store of money growing less each day, she seeks cheap lodgings in a humble quarter of Paris. There she is befriended by a good-natured fellow-lodger, Mlle. Finette, a sprightly little actress, who introduces Lil to the life behind the scenes, from which her sensitive nature shrinks. We need scarcely add that she is ultimately rescued, in the nick of time, by John Bruce, her silent lover, who, now an artist of repute in Paris, is able to show his sense of Mrs. Cox's conduct to Lil when the gay American widow, returning to Paris as La Signora Principessa di Castel-della-Rocca, wishes, in vain, to have her portrait painted by the successful young painter. "Very well, John," are the last words uttered by Lil Temple in "Storm Driven;" and, as they point to a probable union between John Bruce and the heroine, with the "happy-ever-after" result usual in novels if not in actual life, the reader should be satisfied. Several characters besides those mentioned above—notably, Lil's elder sister, blessed with a calm, equable nature, and a blunt millionaire who takes a fancy to Lil—are clearly portrayed; but the mercurial Mrs. Cox stands out most clearly in this well-told story, the easy, conversational style of which is especially praiseworthy.

The Cork Town Council has resolved by a unanimous vote to present the freedom of the city to Mr. John Pope Hennessy.

A War Office circular directs that the auxiliary cavalry and mounted rifle volunteers are to adopt the system of drill ordered for the cavalry in the regulations of last year.

After an exciting contest, the poll relative to the purchase of the Warrington Gasworks by the Corporation has been declared in favour of the purchase.

The Duke of Beaufort, who upon different occasions has voluntarily given several hundred pounds to guard the preservation of the Wye, and is proprietor of the most important fisheries on the river, has been unanimously elected chairman of the Wye Board of Conservators, in place of the Rev. Henry Blisset, resigned.

Established 1800. Terms, Cash only.

KINAHAN'S LL WHISKY.
KINAHAN and CO., London, finding that, through the recommendation of the Medical Profession, the demand for their OLD LL WHISKY for purely medicinal purposes is very great, submit with pleasure the following analysis by Dr. Haasall:—
"I have very carefully and fully analysed Samples of this well-known and popular Whisky, the samples were soft and mellow to the taste, aromatic and pleasant to the smell. The Whisky must be pronounced to be pure, well-matured, and of very excellent quality. The medical profession may feel full confidence in the purity and quality of this Whisky."

LORNE "THE PERFECTION OF
HIGHLAND WHISKY."
UNRIVALLED FOR "TODDY."
Wholesale of the Sole Proprietors: GREENLEES BROTHERS, 1, Gresham-buildings, E.C. Distilleries, Argyllshire.

NATURAL MINERAL WATERS
OF
VICHY.

Property of the French Government.
CELESTINS.—The water of this spring is very agreeable, sparkling, and richly acidulated. It is recommended for Complaints of the Kidneys, Gravel, Gout, Diabetes, Rheumatism, &c.
HAUTEVILLE.—This spring contains a greater quantity of carbonic acid, and is especially recommended as a table water.
GRANDE-GRILLE.—For Complaints of the Liver and Biliary Organs, Indigestion, &c.
HOPITAL.—For Stomach Complaints, &c.
VICHY WATERS are pleasant to the taste, and may be drunk pure or mixed with wine or spirits.
CAUTION.—See that the name of the particular water required is on the capsule.
Sold by all Chemists, Wine and Mineral Water Merchants.
Price One shilling per Bottle.

In consequence of Spurious Imitations of
LEA and PERRIN'S SAUCE,
which are calculated to deceive the Public, Lea and Perrins have adopted a NEW LABEL, bearing their signatures, "LEA and PERRIN'S," which signature is placed on every bottle of WORCESTERSHIRE SAUCE, and without which none is genuine. Sold wholesale by the Proprietors, Worcester; Cross and Blackwell, London; and Export Oilmen generally. Retail, by Dealers in Sauces throughout the World.

COCK'S READING SAUCE
is the best and most economical Sauce ever manufactured FOR FISH, ENGLISH SOUPS, GRAVIES, &c.
It only requires a trial to convince the purchaser of its excellence.
CAUTION.—The genuine is protected by Trade Mark—viz., CHARLES COCK'S Signature on a white ground across the Reading Arms.

D. R. DE JONGH'S,
KNIGHT OF THE LEGION OF HONOUR,
KNIGHT OF THE ORDER OF LEOPOLD OF BELGIUM,
LIGHT-BROWN COD-LIVER OIL.
Proved by twenty-five years' medical experience to be THE PUREST.

THE MOST PALATABLE
THE MOST EASILY DIGESTED.
THE MOST RAPIDLY EFFICACIOUS.

DR. DE JONGH'S
LIGHT-BROWN COD-LIVER OIL.
THE ONLY KIND
which produces the full curative effects in

CONSUMPTION AND DISEASES OF THE CHEST,
CHRONIC BRONCHITIS, WINTER COUGH,
DEBILITY OF ADULTS AND CHILDREN.

SELECT MEDICAL OPINIONS.

Sir G. DUNCAN GIBB, Bart., M.D.,
Physician to the Westminster Hospital.
'The value of Dr. DE JONGH'S LIGHT-BROWN COD-LIVER OIL as a therapeutic agent in the treatment of diseases of a chronic character, has been admitted by the world of medicine; but, in addition, I have found it a remedy of great power in the treatment of many Affections of the Throat and Larynx, especially in Consumption of the latter, where it will sustain life when everything else fails.'

DR. SINCLAIR COGHILL,
Physician to the Royal Hospital for Consumption, Ventnor.
'I have convinced myself that in Tubercular and the various forms of Strumous Disease, DR. DE JONGH'S LIGHT-BROWN COD-LIVER OIL possesses greater therapeutic efficacy than any other Cod-Liver Oil with which I am acquainted. Dr. DE JONGH'S OIL is now the only Cod-Liver Oil used in the Royal National Hospital for Consumption and Diseases of the Chest.'

DR. PROSSER JAMES,
Lecturer on Materia Medica, London Hospital.

"DR. DE JONGH'S LIGHT-BROWN
COD-LIVER OIL contains the whole of the active ingredients of the remedy, and is easily digested. Hence its value, not only in Diseases of the Throat and Lungs, but in a great number of cases to which the Profession is tending its use."

DR. HARDWICK,
Medical Officer of Health, Paddington.

"In the class of Tubercular Diseases,
including Consumption, so prevalent in our great centres of population, the use of Dr. DE JONGH'S LIGHT-BROWN COD-LIVER OIL is attended with manifold advantages; and I know of no therapeutic agent which, in connection with judicious sanitary measures, is so better calculated to stay the ravages of these great consuming

THE ILLUSTRATED LONDON NEWS

No. 1961.—VOL. LXX.

SATURDAY, FEBRUARY 10, 1877.

WITH TWO SUPPLEMENTS } SIXPENCE.
By Post, 6d.

THE ILLUSTRATED LONDON NEWS.

LONDON: SATURDAY, FEBRUARY 10, 1877.

If the art of "letting down" is not the characteristic of statesmen in general, it is the undeniable accomplishment of those members of the Cabinet who piece together the paragraphs of the Royal Speech at the opening of the Parliamentary Session. After a long and oftentimes dull recess, there is always a flutter in the political atmosphere as February approaches. This year the excitement has been more palpable. We have all been in a state of vague expectancy that when the doors of the Palace of Westminster were thrown open we should find there some sort of clue to that Eastern mystery which baffles our curiosity. Those who were in this frame of mind must have felt something like a cold shiver on reading the ten paragraphs of her Majesty's Speech which refer to the all-absorbing question of the

day, and scanning the meagre programme of Legislative promises which follows. The Speech is throughout cold, colourless, and unpretentious to the last degree. In this case the modern and judicious practice of framing the Royal Address with a view to baulk criticism and avert controversy has been carried to an extreme, and this negative pre-eminently marks the State document laid before Parliament on Thursday afternoon. Its statement of naked facts can hardly be contested; its promises are too modest to be incapable of fulfilment.

Limited as is the space given in the Speech to the merest outline of the course of events in the south-east of Europe, which have so rivetted public attention for the last six months at least, that outline is ingeniously constructed to suggest a consistent policy on the part of her Majesty's advisers, and to avoid the slightest revelation as to the future. Nevertheless, these dry and innocent-looking paragraphs are likely to be the text for exciting, if not fierce, debates. The Government will be challenged to reconcile acts which have apparently been so inconsistent, and to account for the ludicrous failure of a Conference in which the six Great Powers of Europe urgently but vainly sought to induce the Porte to accept moderate reforms, with "effectual guarantees," in the interests of the Christian populations. Probably before the lapse of another week Lord Beaconsfield and his colleagues in either House will be prepared with a full, if not an adequate, answer to these inquiries. The supreme object of the Cabinet throughout this prolonged crisis has been, we are told, "to maintain the peace of Europe, and to bring about the better government of the disturbed Provinces, without infringing upon the independence and integrity of the Ottoman Empire." As a matter of fact, it may be freely said that there has been a deplorable failure to realise any one point of this programme. The holding of a Conference at all, and the circumstances attending it, were hardly consistent with the "independence of the Ottoman Empire;" peace has thus far been preserved, but war "looms in the distance;" and the measures best adapted "to bring about the better government of the disturbed provinces"—viz., those recommended by the Guaranteeing Powers—were singularly frustrated by the obstinacy of Turkey. How far our Government were responsible for this break down is a question which will be keenly canvassed in Parliament, though probably without any definite result.

The interest of the public is naturally more absorbed in the future than in the past. If her Majesty's Ministers were able to give an assurance that Russia would not declare war against Turkey without the consent of her allies in the late abortive Conference, or that the mysterious downfall of Midhat Pasha would not prevent the successful realisation of those sweeping reforms which the Porte has so prodigally promised, public opinion would be ready to condone the past shortcomings or mistakes of Lord Beaconsfield's Administration. But so long as the European horizon remains overclouded, and no beneficial result can be claimed as the outcome of the policy reflected in the Queen's Speech, the Government, although supported by a majority in Parliament will remain in the position of those who, with the best intentions, have failed to achieve success.

The probability that debates on foreign politics will occupy an unusual share of attention during the Session doubtless accounts in a great degree for the meagre programme of domestic measures. The bills promised are measures for dealing with the Universities of Oxford and mainly the remnants of last Session—such as the two Cambridge by the agency of Commissions; the Prisons Bill, which was thrown over last year by the prolonged debates on education, and which will provide for a further transfer of local taxation to the Imperial exchequer; and the bill for amending the laws on the valuation of property. Further legislation is proposed relative to factories and workshops, and the bankruptcy laws are to be once again amended. The Government also desire—and not too soon—to improve the law regulating the summary jurisdiction of magistrates, and to introduce several practical reforms affecting Ireland and Scotland, including one bearing upon the Supreme Court of Judicature in the former country. The work thus cut out for Parliament may be necessary, but is not inviting. It is the laudable practice of Lord Beaconsfield to refrain from crowding the Queen's Speech with promises that cannot be realised. A measure for the further increase of the Episcopate is known to be in preparation, and a bill for dealing with the Burials grievance is confidently expected by the clerical supporters of the Government. Sir Stafford Northcote will be unable to signalise his accession to the responsible duties of leader of the House of Commons by any brilliant financial operation. A declining revenue and increased expenditure, though leaving no room for a popular Budget, will test his capacity as Chancellor of the Exchequer.

The prologue has been spoken. What the real drama of the Session will be depends upon unforeseen events—most of all upon the momentous consequences which will flow from the reckless rejection by Turkey of the terms offered by the Powers, and the course which, under these trying circumstances, the British Government may think fit to pursue. Never did a Session open with so inscrutable a future before it.

THE COURT.

The Queen drove to Newport on Thursday week and to Ryde the next day. The Earl of Carnarvon had an audience of her Majesty at Osborne and the same evening dined with her. Lieutenant-General Sir T. M. Biddulph arrived at Osborne.

The Queen, Princess Beatrice, and Prince Leopold attended Divine service on Sunday, performed at Osborne by the Rev. George Connor, Vicar of Newport.

The Queen, accompanied by Princess Beatrice, came to Buckingham Palace, on Wednesday, from Osborne. Prince and Princess Christian also arrived at the palace. The Earl of Derby, Secretary of State for Foreign Affairs, had an audience of her Majesty. Quo-Ta-Zhan, Envoy Extraordinary and Minister Plenipotentiary of the Emperor of China, was introduced by the Earl of Derby to the Queen, and presented his credentials. Lew-Ta-Zhan was presented at the same time. Sir Thomas Wade, K.C.B., her Majesty's in China, was in attendance, and afterwards presented to her Majesty the suite of the Chinese Envoy. Princess Beatrice was present during the reception. The Minister Resident for Venezuela, M. José M. Rojas, was introduced by the Earl of Derby, and presented his credentials. The Queen held a Council, at which were present the Duke of Richmond and Gordon, the Earl of Derby, the Earl of Beaconsfield, the Marquis of Salisbury, and the Right Hon. R. A. Cross. Mr. Charles Lennox Peel was Clerk of the Council. The lists of Sheriffs for England and Wales were pricked by the Queen. The Earl of Beaconsfield, the Marquis of Salisbury, the Duke of Richmond and Gordon, and the Right Hon. R. A. Cross had audiences of her Majesty. The Right Hon. T. E. Taylor (Chancellor of the Duchy of Lancaster) had an audience of the Queen, at which the list of sheriffs for the Duchy of Lancaster was pricked.

The Queen opened Parliament in person on Thursday. Her Majesty, accompanied by Princess Louise and Princess Beatrice, proceeded in state from Buckingham Palace to the Houses of Parliament.

Princess Beatrice went to the Court Theatre on Wednesday. Her Royal Highness sent a large quantity of articles last week to Crathie, for the furnishing of a Christmas-tree with gifts for Sunday-school children of the parish; the annual Christmas treat to the scholars having been deferred, owing to the inclemency of the weather.

THE PRINCE AND PRINCESS OF WALES.

The Prince and Princess of Wales went to the "meet" of the West Norfolk Hounds, at Harpley, yesterday week; the Prince had an excellent day's hunt. Their Royal Highnesses, with Princes Albert Victor and George of Wales, attended Divine service, on Sunday, at Sandringham Church. The Rev. W. Lake Onslow and the Rev. Canon Duckworth officiated. On Monday the Prince and Princess were present at the meet of the West Norfolk Hounds at Gayton Thorpe. Their Royal Highnesses, accompanied by their children, returned to Marlborough House on Tuesday. The Prince and Princess, with their elder children, were present, on Wednesday, at the farewell benefit of Mr. John Parry at the Gaiety Theatre. The Prince visited the Queen and Princess Christian at Buckingham Palace and the Duke of Cambridge at Gloucester House. The Princess visited the Duchess of Cambridge at St. James's Palace. On Thursday their Royal Highnesses were present at the opening of Parliament by her Majesty.

By command of the Prince a concert will be given at the Royal Albert Hall, on the 19th inst., when Verdi's "Requiem" will be performed.

The Prince, the Grand Master of the English Freemasons, has appointed Sir George Elliot, M.P., to be Provincial Grand Master of South Wales, Eastern Division.

Lady Emily Kingscote has succeeded Miss Knollys in waiting on the Princess, and Major-General Sir Dighton Probyn has succeeded Lieutenant-Colonel Teesdale in waiting on the Prince.

The Duke of Connaught returned to Dublin on Monday. His Royal Highness paid a visit to the Duke and Duchess of Marlborough at Dublin Castle.

Parliamentary dinners were given, on the eve of the opening of Parliament, by the Premier, the Chancellor of the Exchequer, Earl Granville, and the Marquis of Hartington. Countess Granville held a reception.

MOVERS AND SECONDEES OF THE ADDRESS.

We give the portraits of two members of the House of Lords, and two members of the House of Commons, to whom, in each House respectively, was intrusted the motion, on Thursday, for the customary Address in reply to the Queen's Speech at the opening of Parliament.

Viscount Grey de Wilton, as he is styled by courtesy, his title as a peer being Baron Grey de Radcliffe, moved the Address in the Upper House. He is the eldest son of the Earl of Wilton; his proper name is Arthur Edward Holland Grey Grosvenor Egerton. It appears that Sir Thomas Egerton, Bart., of Egerton and Oulton, Cheshire, was raised to the Peerage in 1784, as Baron Grey de Wilton, of Wilton Castle, Hereford; but in 1801 he was created, by letters patent, Viscount Grey de Wilton and Earl of Wilton. The barony of Grey de Wilton expired upon his death in 1814, but the earldom and viscounty devolved upon his grandson, the Hon. Thomas Grosvenor, second son of Robert, first Marquis of Westminster. He married Lady Mary Margaret Stanley, a daughter of the twelfth Earl of Derby, and her son, born in 1833, is the subject of our present notice. Lord Grey de Wilton has been an officer of the Life Guards, and sat in the House of Commons for Weymouth from 1859 to 1865, and for Bath in 1873 and 1874; he was called to the House of Lords, by the title of Baron Grey de Radcliffe, in 1875. He has married a daughter of the Earl of Craven.

The Earl of Haddington, a Scottish representative peer, seconded the Address in the Lords. He is George Baillie Hamilton Arden, son of the late Earl, whom he succeeded in 1870. This earldom was bestowed by James I. (James VI. of Scotland) on Sir Thomas Hamilton, a Scottish Judge and Secretary of State, who had previously been created Earl of Melrose. The present Earl is the eleventh in succession, and Baron of Binning and Byres. He was born in 1827, and he has married a daughter of Sir John Warrender, Bart. He has estates near Tarporley, in Cheshire, and has been High Sheriff of that county, to which Lord Grey de Wilton also belongs.

Viscount Galway, an Irish peer, sits in the House of Commons as M.P. for North Notts. He is George Edmund Milnes Monckton Arundel, son of the sixth Viscount Galway, whom he succeeded last year. The Moncktons, of Boroughbridge, near York, are an old Yorkshire family, but one of them obtained, in 1727, two Irish peerages, as Baron Killard, in the county of Clare, and Viscount Galway. The present Lord Galway was born in 1844; his mother was a sister of Mr. Monckton Milnes, now Lord Houghton. He was educated at Harrow, and at Christ Church, Oxford. His father sat in Parliament about thirty years, for East Retford.

Mr. John Torr, M.P. for Liverpool, was formerly a merchant

of that town, but retired from trade in 1869. He was born in 1813, in Lincolnshire, but has long resided and carried on business in Liverpool; he was one of the Liverpool Dock Board and chairman of Liverpool College. He is also one of the council of the Royal Agricultural Society. He has sat for Liverpool since 1873.

The portraits are from photographs by the following photographers:—Lord Grey de Wilton, by Mr. Ernest Edwards, of Baker-street; the Earl of Haddington, by Mr. T. Rodger, of St. Andrews; Lord Galway, by Messrs. Barraud and Jerrard, Gloucester-place, Portman-square; Mr. Torr, by Messrs. Maull and Co.

THE VOLUNTEERS.

A special meeting of the commanding officers of the metropolitan volunteer corps was held, yesterday week, at the offices of the National Rifle Association, Pall-Mall, at which it was unanimously resolved that it is desirable to hold a field-day on Easter Monday, and a sub-committee was appointed to ascertain and report upon the most suitable locality.

The prizes gained during the past year by members of the 1st Administrative Battalion Tower Hamlets were presented to them, last Saturday evening, in the Guildhall, by the Lady Mayoress. The meeting was presided over by the Lord Mayor, and amongst those present were Lord and Lady Abinger, Lieutenant-Colonel Sir Fowell and Lady Buxton, and other ladies and gentlemen of distinction. The principal winner was Private Jeffries, the final winner of the regimental challenge cup. Lieutenant-Colonel Sir F. Buxton, in a short statement, reviewed the progress of the corps during the year, and hoped they would retain the high reputation for discipline and drill that they had reached.

A meeting of schoolmasters was held, last Saturday, in the school-room of St. Stephen's Church, Rochester-row, Westminster, in furtherance of a movement inaugurated in October last for the formation of a volunteer corps of schoolmasters. Lieutenant West occupied the chair. The secretary (Mr. Adkin) read the committee's report, from which it appeared that in case the profession failed to raise a battalion the following officers had expressed their willingness to attach schoolmaster volunteers to their corps:—Lieutenant-Colonel C. E. Howard Vincent, 40th Middlesex; Major Waller (on behalf of Colonel the Hon. Charles Lindsay), St. George's; Lieutenant-Colonel J. Stewart Oxley, 19th Middlesex; Major Irvine, 1st Surrey; and Lieutenant-Colonel Leighton, 39th Middlesex (Artists). For several reasons the committee recommend the acceptance of the offer of the last-mentioned officer. The secretary said that Colonel Leighton had promised that as soon as the number of schoolmasters who joined the corps was sufficient they should have a separate company officered by gentlemen of their own profession. The chairman moved the adoption of the report, which was seconded by Mr. Baker, and, having been supported by several speakers, was adopted.

On Thursday week, at the annual soirée of the first (Chelsea) company of the South Middlesex, Sergeant Pullman, the winner of the Queen's Prize at Wimbledon last year, who is a member of the company, was presented with an illuminated memorial recording his success.

The annual dinner of the D company of the London Brigade was held, on Thursday week, at the Holborn Restaurant, Captain Earl Waldegrave presiding.

Captain Baxter entertained the members of No. 3 company of the St. George's to a dinner at the Criterion last week, a large company being present, amongst whom were Major Waller and most of the officers of the regiment.

Lieutenant-Colonel H. M. Hozier, late Royal Artillery, having been appointed to the command of the 10th Kent (Royal Arsenal) Artillery Volunteer Brigade, entertained the officers and men, to the number of more than 300, at a dinner in the Woolwich Skating Rink on Saturday last.

Mr. T. H. Sidebottom, M.P. for Stalybridge, distributed the prizes won during the year by the 10th Cheshire, in the public hall of the borough, Colonel Wilkinson presiding. Mr. Sidebottom spoke in eulogistic terms of our reserve system, and of the efficient service which our volunteers are at any moment prepared to afford.

AGRICULTURE.

At a meeting of the Warwickshire Chamber, yesterday week, resolutions were passed to the effect that, as slaughtered carcasses could be brought across the Atlantic for consumption in England, the reply of the Privy Council to the central chamber respecting the prevention of cattle disease was unsatisfactory; that foreign cattle should be slaughtered at the ports of embarkation, if possible, or, at any rate, at the ports of debarkation; and that uniform compulsory regulations for the prevention of disease should be enforced.

The Gloucestershire Chamber, last Saturday, unanimously passed a resolution condemning as unsatisfactory the answer given by the Duke of Richmond and Gordon to the agriculturalists' deputation respecting the prevention of the spread of contagious diseases in animals.

At a meeting of the Worcestershire Chamber, on Saturday, it was resolved that no efficient protection would be afforded to home flocks and herds until all foreign fat stock was slaughtered at the port of landing and all store stock underwent a quarantine of fourteen days; Irish stock, and the vessels used in its importation, being more vigilantly inspected.

The operation of the Agricultural Holdings Act of 1875 was the subject under consideration at the first monthly meeting for the present year of the Farmer's Club. The prevailing opinion was that the Act had been beneficial to farmers; and, even although it had not been extensively made use of, it yet laid down a principle of compensation for improvement which was of the greatest importance to the agricultural interest.

A council meeting of the Central and Associated Chambers of Agriculture was held, on Tuesday morning, at the Salisbury Hotel—Earl Fortescue in the chair. The noble chairman said that, presiding, as he did, for the first time as chairman, he wished to assure them that it would be his earnest desire to discharge the duties of the honourable office to which he had by their favour been called to the best of his ability. To that office he attached increasing importance. The advantage of chambers such as that was that it brought into contact and into business and friendly discussion landowners and those occupying land. He believed the interests of these two classes were to a very great extent identical, and they could be best promoted by frank, friendly, and courteous discussion amongst themselves. The principal business of the chamber was to consider the reply of the Lord President to the proposals for the prevention of cattle diseases.

The fourth annual meeting of delegates representing seventy branches of the North Essex District of the National Agricultural Labourers' Union, was held at Witham, Essex, on Tuesday. Mr. Joseph Arch presided. The secretary reported an increase of members and funds, and a disposition was manifested to offer the most determined opposition to the Dunmow Farmers' Defence Association, who are asking to reduce wages 1s. a week.

TURKEY AND CONSTANTINOPLE.

The protocols, or minutes of the proceedings, at the late Conference at Constantinople, which have now been published, do not materially differ from the brief accounts that were previously current of what took place there to the breaking off of diplomatic negotiations. A great surprise, however, has been occasioned in the present week by the sudden fall of Midhat Pasha, the Grand Vizier and Prime Minister of the Sultan, who so recently managed to hold his Government in an attitude of firm opposition to the European Powers, and who had contrived a plausible scheme of constitutional reforms for the whole Turkish Empire. He is not only dismissed from office, but signally disgraced and sent into exile without an hour's delay. This astonishing transaction was performed by the mere act of Sultan Abdul Hamid personally, as still absolute ruler of Turkey. It took place last Monday, when Midhat Pasha was sent for, and the Imperial order banishing this Minister from Turkish territory was read to him immediately on his arrival at the palace. The Porte has sent a despatch to its Ambassadors abroad declaring that Midhat Pasha has been exiled because his conduct has been of a nature to shake the confidence reposed in him. It is added, however, that this event will not change the policy of the Government, and that it is the Sultan's desire that the Constitution should be carried out.

After being informed of his dismissal from office, Midhat Pasha was at once sent on board the Imperial yacht Izzedin, which immediately started for the Mediterranean, in order to convey him out of Turkish territory. Syria, in the Grecian Archipelago, is believed to have been the place to which he was carried.

Various reports reach us of the circumstances which led to this event. In some quarters it is asserted that the dismissal of the Grand Vizier was due to the fact that his schemes of Constitutional reform were regarded by the Sultan as encroachments on the Imperial prerogative. In other quarters it is said that Midhat Pasha was engaged in a conspiracy against his Majesty. In the official announcement of the dismissal the measure is said to have been taken in virtue of Article 113 of the Constitution, giving power to the Sultan to expel from the country all persons recognised as endangering the safety of the State. It is said that on Sunday night proofs of Midhat Pasha's guilt were laid before the Sultan. The plot is described as one to depose Sultan Abdul Hamid, and to place the ex-Sultan Murad upon the throne. The Sultan is said to have given Midhat Pasha the choice between remaining in Turkey and being placed on his trial for high treason, or quitting Ottoman territory immediately. Midhat Pasha chose the latter alternative, and expressed a wish to proceed to Brindisi, whither he has already started. But the authenticity of the above details is contested; and in diplomatic circles it is doubted that Midhat Pasha really contemplated overthrowing the Sultan. The Grand Vizier was nominated to the post as recently as Dec. 19 last, when Mehmet Ruchdi Pasha resigned on the alleged ground of ill-health. Some political correspondents say that Midhat Pasha had long been opposing the Sultan, who wished to make concessions to the Conference. Edhem Pasha, the new Grand Vizier, was formerly Turkish Ambassador at Berlin. He sat in the Conference as one of the delegates of Turkey, Safvet Pasha being the other. His appointment, in the opinion of some friends of Turkey, will be conducive to conciliation.

The Imperial Hatt appointing Edhem Pasha to the post of Grand Vizier also expresses the firm determination of the Sultan to apply the Constitution, and proceeds to mention various bills to be submitted to the Chamber of Deputies, principally concerning the organisation of the internal administration on the principle of decentralisation and the equitable selection of the sub-governors of the provinces. The Hatt further announces, with reference to the reorganisation of the Turkish finances, that the Porte intends to obtain the assistance of competent European financial administrators.

At Berlin, where Edhem Pasha was Ambassador prior to the assembling of the Conference, it is considered that his appointment is merely provisional, and that ere long he will be succeeded by Mahmoud Pasha, who will, it is supposed, abrogate Midhat's Constitution, and reopen negotiations with the Powers. In Vienna public opinion is divided as to the result; apprehensions of war have been considerably revived.

The appointment of Edhem Pasha to be Grand Vizier has been followed by further changes in the Turkish Ministry. Kadri Bey has been made a Pasha and been appointed President of the Council; Djavid Pasha, who was Minister of Justice, becomes Minister of the Interior, and his former post is filled by Hassim Pasha, hitherto Governor of Adrianople. Odian Effendi, who had come to London on a mission concerning the bondholders, has been recalled to Constantinople. Sadyk Pasha is recalled from the embassy at Paris to be Governor of the Vilayet of the Danube.

The Turkish Government has addressed a circular note to its representatives abroad, which has been communicated to the Governments represented at the Conference. The note is couched in energetic terms, and upholds most emphatically the independence of Turkey and the integrity of the whole Empire. It enumerates the institutions created by the Grand Vizier, and, in conclusion, contests the right of third parties to interfere between the Porte and its subjects respecting internal affairs.

Our Illustration, this week, of the neighbourhood of Constantinople is a view of the "Marble Tower," part of the ruins of the "Castle of the Seven Towers," on the west shore of the Bosphorus. That shore of the famous strait dividing Europe from Asia is faced by an ancient wall from the mouth of the Golden Horn, near the Mosque of Eyoub in Stamboul, to the western end of the Bosphorus, opening there into the Sea of Marmora. The wall, constructed by the Greek Emperors, was adorned with many fine slabs of marble bearing inscriptions and sculptures, some of which yet remain, and are very interesting to the archaeologist. The Heptapyrgion, or Castle of the Seven Towers, also called the Strongylon by the Byzantine historians, overlooked the Sea of Marmora at the western end of the Bosphorus. Part of the remains of the old building was till lately used by the Turkish Government as a military storehouse; but the only tower which now continues to stand there is the one shown in our Illustration. The city walls have a circuit of twelve or thirteen miles, but are in a very dilapidated condition.

Mr. G. B. Heneage Marton, of Capernwray, has been appointed High Sheriff of the county of Lancaster.

The freedom of the City of Waterford was presented to Mr. Butt, on Tuesday, in recognition of his carrying the Municipal Improvements (Ireland) Bill.

The Edinburgh Orchestral Festival, under the direction of Sir Herbert Oakley, the Reid Professor of Music at the University, begins this day (Saturday), and will finish with the Reid Concert next Tuesday. For the three performances the Professor has engaged the services of Mr. Charles Hallé as solo pianist and conductor, together with his fine orchestra, which will, with other players, make up a band of seventy performers. Herr Straus will be the leader.

THE MARBLE TOWER, CASTLE OF THE SEVEN TOWERS, CONSTANTINOPLE.

THE EIGHTY-ONE TON GUN AT SHOEBURYNESS: THE TARGET, AND EFFECTS OF SHOT.

FIGHT BETWEEN TWO POLAR BEARS.

FIGHT BETWEEN TWO POLAR BEARS.

The terrific wild beast combat which a German artist, Ludwig Beckmann, has represented in the picture we have engraved actually took place, one day last year, in the Zoological Gardens at Oologne. It is to be hoped that the attendant keepers were able to separate these infuriated enemies before either of them had suffered mortal injury. The visitors to our own Zoological Society's Gardens in Regent's Park have often remarked the unsociable temper of the white bears, which seem never disposed to amicable play with each other, or to entertain the friendly greetings of their human admirers. In this respect they behave differently from the brown and black bears, some of which, more especially the noble Russian, the biggest and handsomest of them all, readily stand at the barred front of the dens, and delight to catch the nuts thrown into their gaping jaws. The Arctic or Polar bears, however, being exclusively carnivorous, desire none of the gifts of ordinary visitors to the Gardens, but sullenly devour the fish or pieces of flesh doled out by official hands. This species of bear, which never becomes familiar with man in captivity, is only at home in the ice-fields of the frozen North. It is found alike on the shores of Greenland, and in the archipelago of desolate islands between Baffin's Bay and Behring's Strait, or those of Spitzbergen and Novaya Zemlya, pursuing the seal and the walrus, as well as the fishes in open parts of the sea. Sometimes, it is said, a white bear has been carried by a floating iceberg to the coasts of Iceland or Lapland, where the poor famished creature, when it has landed, will fiercely attack every living thing, reindeer, cattle, or even mankind, to satisfy its raging hunger. The bear will often prowl about the snow-huts of the Esquimaux, and has been known to attack men in boats, or attempt to climb through the portholes of ships. Lord Nelson, when he was a young Midshipman on board H.M.S. *Racehorse*, just a hundred years ago, somewhere on the west coast of Greenland, first proved his intrepid courage in single combat with a bear, which he strove to kill with the butt-end of his musket when he had no more powder and shot.

FOREIGN AND COLONIAL NEWS.

FRANCE.

(From our Correspondent in Paris.)

Thursday, Feb. 8.

Although the news of Midhat Pasha's disgrace caused a profound sensation on the Bourse, the Parisians have not been particularly affected by it. To them M. Jules Simon's recent speech on the liberty of the press, the suspension of M. Rochefort's journal *Les Droits de l'Homme*, and the judgment of the Cour de Cassation respecting the legality of the famous mixed Commissions instituted after the Coup d'État of 1851 are far more interesting incidents than the downfall of another Turkish Grand Vizier.

The suspension by the Tribunal of Correctional Police of the *Droits de l'Homme* for six months, for having "outraged" the Government, as it is termed, produced a painful impression in Paris, although, during its brief career of eleven months, M. Rochefort's journal has frequently had recourse to even coarser and more intemperate language than even Felix Pyat's *Combat* or Jules Vallès' *Cri du Peuple*, the leading organs of the advanced party during the Paris Commune ever indulged in. The severe sentence has been generally disapproved of, the more so as the paper's career has been one long series of condemnations. M. Bolâtre, the responsible manager of this fiery democratic organ, and who, in private life is simply a shoemaker and conicierge, has appeared no less than fifteen times in a court of law during the past twelvemonth. He has some five or six years' imprisonment to undergo, and some £2000 to pay by way of fines, damages, and law costs, while several of his contributors have severe penalties to discharge. The extraordinary violence of language in which the journal has indulged justifies these condemnations from a legal point of view; still it is not measuring out equal justice to deal so severely with a Democratic organ and allow the Bonapartist and Monarchical journals to insult the Republic, the Government, and the Legislature, and invariably escape scot free.

M. Rochefort's journal will probably reappear under another name, the Chamber having repealed the obnoxious decree of 1852, which placed those papers which sought to evade judgments of suspension or suppression at the mercy of the authorities. At the same time, the press law of 1848 has been called into requisition, pending the adoption of a new series of measures—M. Jules Simon, formerly the enthusiastic partisan of complete liberty for the press, having formally declared that the Government would not remain in office unless provided with the means of punishing newspapers for their attacks. This change of front on the part of the Vice-President of the Council has produced a painful impression among the public at large, and more especially among M. Jules Simon's private friends.

The appeal of the *Avenir de la Haute Saône*, recently fined by the Cour de Besançon for having criticised the acts of the notorious mixed Commissions which Louis Napoleon instituted shortly after the Coup d'État, to try alleged political offenders in the provinces, has been rejected by the Cour de Cassation, which bases its decision on the doctrine that the plébiscite which consecrated the Second Empire also formally legalised the new Emperor's past acts as President of the Republic. A decision in this sense was, in a measure, expected, the Cour de Cassation being notoriously composed of Bonapartist magistrates. Still, the judgment has caused some little sensation, especially as, only the other day, M. Grévy formally called a Bonapartist orator to order for attempting to justify these same commissions, whose acts the President of the Chamber stigmatised as crimes.

Some interesting Parliamentary debates are being looked for, the Radical party having resolved to interpellate the Government concerning its home policy, and M. Raspail having brought forward a bill authorising the Roman Catholic clergy to marry. This latter measure cannot fail to provoke an animated discussion, although, in all probability it will eventually be rejected by the Chamber. I may mention that rumours are again rife respecting the resignation of the Duc Decazes and Admiral Fourichon.

Marshal MacMahon gave a second grand ball at the Elysée on Tuesday night, when, as usual, the military element predominated. M. Gambetta was present, and exchanged a few courteous remarks with the President of the Republic.

The body of a little girl, five or six years of age, and respectably dressed, has been found near Bagneux, in the environs of Paris, at the bottom of a well into which she is conjectured to have been thrown. The corpse is being exhibited at the Morgue, and attracts great crowds.

The theatrical events of the week have been the production of "L'Hetman," a drama in verse by M. Paul Deroulède, at the Odéon, and of "La Marjolaine," a new operetta by the author of "La Fille de Madame Angot," at the Renaissance.

"L'Hetman," the author's first dramatic effort, is full of promise, although the plot is somewhat disjointed, and the verses are of unequal power. The subject chosen is "patriotism," and the heroes of the piece are the Cossacks of the Dnieper, who have revolted against Ladislas IV., King of Poland. In the last act there are some striking dramatic scenes, and the finale is very effective. Of "La Marjolaine" it need only be said that, although amusing, it is far from equalling M. Charles Lecocq's previous productions.

SPAIN.

The elections for the Councils-General will be held on March 3, and the Councils will meet on the 21st. The election of senators will take place in the beginning of April. The Cortes will resume their labours at the end of that month.

A Royal decree has been published dismissing Senor Eldugyen from his post of Prefect of Madrid on account of a disagreement with his superiors. The Marquis of Bedmar is spoken of as his successor.

The state of siege hitherto existing in Old Castile has been abolished.

ITALY.

The Chamber of Deputies has passed a bill abolishing imprisonment for debt.

The Pope's health is stated to be re-established. His Holiness received, on Wednesday, the students of the English College, who presented his Holiness with an address and an offering of Peter's pence.

Telegrams from Sicily state that Signor Corrado Lanza, a rich proprietor of Noto, in the province of Syracuse, has been captured by brigands and assassinated. A large body of soldiers has been sent in pursuit.

HOLLAND.

In the Chambers the Government has introduced a bill granting to the Dutch Indies the right of introducing a gold standard, together with the silver standard already existing, the gold to consist of ten-florin pieces.

BELGIUM.

About 1000 persons, after attending a Liberal meeting at Brussels, last Saturday night, paraded some of the streets, shouting, "Down with the Ministry!"

On Monday night demonstrations against the Catholic Club and the Jesuit Convent at Antwerp were made by some persons who had been attending a Liberal meeting. A conflict occurred with the police, and two arrests were made.

GERMANY.

The German Crown Prince and Princess have founded a scholarship of 1000 marks annually, to be at the disposal of the headmaster of the Cassel Gymnasium, in recognition of the services rendered by that establishment in the education of their eldest son, Prince William. The scholarship is to be available for four pupils of the school passing on to the university, and is to be entitled "The Prince William Scholarship."

By an Imperial Decree published on Tuesday, the German Parliament has been summoned to meet on the 22nd inst.

In Monday's sitting of the Upper House of the Prussian Diet, Count Schulenburg put a question regarding the eventual removal of the sequestration laid upon the property of ex-King George of Hanover. Herr Tiedemann, Government Commissioner, in reply, said in case King George should hold out his hand, the Government would accept his advances as soon as his Majesty gave the necessary guarantees for keeping his promises. It would not, however, abandon its position so long as the Guelph party continued stirring up war and hatred against Prussia.

Herr Ledderhose, President of the district of Lower Alsace, opened the session of the Committee of the Province of Alsace-Lorraine on Monday. Replying to the President's opening speech, Herr Flurer, who occupied the chair by right of seniority, expressed himself in terms of loyalty to Germany. The committee afterwards elected its presidents, Herr Schlumberger being nominated first, and Baron Zorn Bulach second president.

AUSTRO-HUNGARY.

The negotiations between the Austrian and Hungarian Ministers on the Bank question have not resulted in the establishment of any agreement.

Last week the first ball was given in the new palace of the British Embassy at Vienna. Several archdukes and most of the members of the aristocracy and diplomatic corps were there to see for the first time all the state apartments thrown open for such a festival.

RUSSIA.

The Grand Duke Constantine has been to Berlin. He paid a visit to Prince Bismarck before starting for St. Petersburg, and on the same day the Imperial Chancellor had several interviews with the Russian Ambassador to the German Court.

The Grand Duke Nicholas, Commander-in-Chief of the Army, went to Odessa on Tuesday. His health is restored, but he requires change of air.

Prince Gortschakoff's circular to the diplomatic agents of Russia expresses the belief of the Government that it has proved to Europe that it is deeply interested in the maintenance of peace in the East. Now that the Eastern Question has entered upon a new phase, the Government, before coming to a decision on the matter, has instructed its representatives to ascertain what course the treaty Powers intend to pursue in view of the refusal of the Porte to accede to their wishes.

The strength of the army along the Pruth is now 220,000. Its organisation, it is now affirmed, is excellent, the men are in splendid condition, and the entire force ready for instant action; the statements circulated respecting its demoralisation and the prevalence of sickness were much exaggerated. All the assertions of foreign newspapers in regard to the calling out of the Russian Landsturm are declared in official circles at St. Petersburg to be completely erroneous.

A new Russian loan was announced in the Berlin newspapers on Tuesday. Subscriptions are invited for the twelfth series of Five per Cent Mortgage Credit Bonds, amounting to 10,000,000 silver roubles.

Judgment has been delivered by the Senate in the case of the persons who participated in the demonstration which occurred on Dec. 18 last before the Kasan Cathedral. Three of the accused have been discharged; the remainder being condemned, some to penal servitude and others to transportation.

On the 25th ult., the University of Moscow celebrated the 122nd anniversary of its foundation, in honour of which a bust of Lomonosof was inaugurated, and a speech about his merits delivered by the Rector, Professor Solovief, the author of the most voluminous of modern histories. The number of students in the University is now 1509, of whom 695 belong to the medical faculty. Its library contains 173,024 volumes.

The Prussian correspondent of the *Times* reports that the brother of the Ameer of Kashgar has arrived at St. Petersburg on a special mission.

DENMARK.

In order to give sufficient time to the members of the Landsting, or Upper House, the King has prolonged the Session of the Diet until March 31.

ROUMANIA.

There has been a change of Ministry at Bucharest; but it is stated that the change has nothing to do with the foreign policy of the Government.

AMERICA.

The counting of the electoral votes began on the 1st inst. at Washington. There was a great crowd, but perfect order prevailed. Vice-President Ferry presided, opening the certificates. Speaker Randall sat alongside. The certificates when opened were handed to four tellers, Senators Allison and Ingalls, Republican representatives; Cook and Stone, Democrats. The certificates were read in full, the States being called alphabetically. The count was made without objection thus:—Alabama and Arkansas for Tilden; California and Colorado for Hayes; Connecticut and Delaware for Tilden; Florida was then called; and, on double returns being read, the Vice-President announced that under the Electoral Law Florida goes to the tribunal for decision. The count here ceased, and will not be renewed till the tribunal has decided the case of Florida. The majority of the Committee of the House of Representatives appointed to investigate the recent elections in Florida has made a report, the conclusions of which are exactly contrary to the report of the Committee of the Senate on the same subject. The latter declared that the act of the Florida Returning Board was legal, constitutional, and irreversible, and that the counting of the votes was correctly and honestly carried out.

A suit has been begun against Mr. Tilden, in the United States District Court, for 150,000 dols. for non-payment of income tax.

President Grant has sent a Message to Congress on the subject of the resumption of specie payments, in which he says that, though it may not be desirable to fix an earlier date than that provided for the actual redemption of legal tenders, it is certainly desirable to hasten the day when paper-money and gold shall be of equal value.

The Appropriation Bill, fixing the salary of the President at 25,000 dols., was passed by the House of Representatives.

A bill has been proposed to Congress for the equipment of several Arctic expeditions.

The *New York Herald* publishes intelligence that an engagement has been fought between the United States troops and a body of Indians, in which the latter were defeated with heavy loss. Four soldiers were killed and six wounded.

BRAZIL.

On the 1st inst. the Parliament was opened by Princess Isabella, acting as Regent during the absence of the Emperor. In the course of the speech the conclusion of a postal convention with Great Britain was announced.

THE CAPE COLONIES.

Advices from Cape Town to Jan. 16 have been received, from which it appears that the draft of Lord Carnarvon's Permissive Bill on the subject of South African Confederation, together with his despatch in regard thereto, had been published, and were likely to meet with opposition on account of the views expressed in them.

A body of Zulus are reported to have entered Transvaal territory, and to have attacked the natives, of whom they killed eighty-four.

INDIA.

The *Times* correspondent at Calcutta, in his weekly telegram, states that the Government *Gazette* of Saturday furnishes further particulars regarding the famine. The condition of Bombay has not improved, and the numbers on the relief works have increased to 337,000. In Madras the number of persons on the works is 1,015,000, besides persons receiving gratuitous support. The Supreme Government has authorised the Madras Government to begin the Chingleput Extension Railway, if, after consulting Sir Richard Temple, they consider the measure necessary. Sir Richard Temple has submitted suggestions which he thinks will reduce the expenditure by £100,000 monthly in the districts of Bellary, Kurnool, and Cuddapah. These suggestions are exclusion from the relief works of all persons, not in actual distress, rigorous exaction of task work, and reduction of wages to bare subsistence. Bengal and Burmah are exporting large quantities of grain to the distressed districts.

AUSTRALIA.

No definite understanding has been arrived at on the subject of cable communication with England by the Inter-colonial Conference, the sittings of which at Sydney have just been brought to a close.

The English cricketers played against the Auckland team on the 2nd inst., winning easily.

A telegram from Cairo announces the arrival there of Mr. Gerald Fitzgerald, who has been appointed Deputy Controller-General of the Egyptian Revenue.

The yacht *Sunbeam*, belonging to Mr. Thomas Brassey, M.P., arrived at Yokohama on Jan. 29, and sailed thence for England, by way of Hong-Kong, Singapore, Ceylon, and the Suez Canal, on Saturday.

Captain Adams of the Dundee whaler *Arctic*, has received a letter informing him that the United States Government have placed at his disposal 300 dols. to purchase a pocket chronometer, in recognition of his kindness to the crew of the *Polaris* whom he brought home in 1873.

From Brisbane we have the announcement of the loss of the mail-steamer *Singapore*, on an island of the Cumberland group. The passengers and crew were saved.—The steamer *George Washington*, bound from Halifax, Nova Scotia, to Newfoundland, has been wrecked off Cape Race. All on board, numbering twenty-four persons, perished.

The King of the Hellenes has conferred the Knighthood of the Royal Order of the Saviour on several foreigners eminent in the world of letters and science, the English gentleman selected on this occasion being Mr. Edward Stanford, of Charing-cross, "for the services rendered by him to geographical science."

It is announced that the payment of interest due to the holders of the Turkish Guaranteed Loans of 1854 and 1871, the money for which lies at the Bank of England, and which, according to arrangement between the Porte and Messrs. Stewart and MacEwen, was to be made at once, is deferred till sanctioned by a vote of the Ottoman Parliament.

A communication has been received from the Secretary of State by the Wisbeach Town Council sanctioning the promotion by the Corporation of a bill in Parliament for the construction of a floating dock, at a cost of £200,000.

The Duke of Norfolk has approved of a scheme by which the Shrewsbury Hospital in Sheffield, founded by his ancestors, will be of increased utility to the town. Under the new regulations, forty in-pensioners will receive allowances of 10s. 6d. and 14s. per week each, twenty out-pensioners 5s. to 7s., and forty female out-pensioners 7s. per week.

THE MAGAZINES.

The scene of the *Cornhill*'s leading fiction, Mr. Blackmore's "Erema," has shifted from America to England, and the chief interest of the present instalment is centred in the little uncomplaisances incident to the captivating American heroine's settlement in the old country. An older novelist—Fielding—is the subject of a very sound and thorough piece of criticism by Mr. Leslie Stephen; and another department of the literary history of fiction is ably illustrated in Mr. Ralston's essay on the popular legends of Bulgaria. Along with this may be taken a pleasing survey of the folk-lore of the county of Donegal, with some excellent stories of fairy changelings; and Mr. R. C. Caldwell's vigorous metrical imitation of a Tamil legend of a great drought, with its fine ringing refrain. "Great Storms" is a paper unfortunately but too seasonable under present circumstances; the greatest ever recorded is, it seems, the West Indian hurricane of 1780.

Macmillan aims rather at instruction than entertainment this month. The first contribution is one of especial value, from the pen of Mr. J. S. Lefevre, giving an analysis of the relative force of the English and of the principal foreign navies. The result is calculated to flatter national pride and confidence, it appearing that, owing chiefly to the exceptional circumstances which have of late years retarded the development of the French and American fleets, the English fighting power at sea is at present almost equal to the whole of the rest of the world. Another important paper is the palliation which Mr. Goldwin Smith, as a veteran University reformer, offers for the defects of the Act of 1854. The most interesting of the other contributions are Mr. Crosskey's account of the organisation of the Birmingham Liberal Association and Mr. A. W. Ward's endeavour to trace the plots of dramas by Lessing and Goethe to the love-history of Dean Swift.

Blackwood has nothing of interest beyond the continuation of "The Woman Hater" and the commencement of what promises to be a singularly bright and piquant story, "Pauline." Nothing, so far, can be fresher than the descriptions of Hebridean scenery, or more lively than the conversational passages at arms. The rest of the contents disclaim any higher pretensions than the furnishing of padding.

Fraser's papers are highly miscellaneous; and the only one of any considerable public interest—Dr. Carpenter's lecture on mesmeric and allied phenomena—has been pretty well anticipated by the reports in the press. Most, however, are very readable, especially a highly-interesting notice of the Maggio, or popular drama of the Tuscan peasantry. "Carnot's Plan for Invading England," now made known from a recently-edited document, is calculated to cause as much amusement in our time as uneasiness in its author's. "A portion of the troops," observes "the organiser of victory," "can be made up of convicts and galley-slaves—such of them as may be found to possess the physical and moral qualities requisite in the men of this expedition." "English Local Etymology" promulgates some sound rules on the subject, in the guise of a critique of the Rev. Isaac Taylor's work. The reviewer of Mr. Kingsley's biography appears less anxious to laud his hero than himself.

The *Fortnightly Review* contains a number of very thorough and searching papers; though none, perhaps, are calculated to strongly arrest public attention except Mr. Lowe's merciless exposure of the consequences of allowing University teachers, by examining their own pupils for degrees, virtually to award certificates to themselves. There can be no doubt that the enormous disproportion between pass and class degrees seriously lowers the value of both; it is surprising that the holders of the latter have not long since insisted on reform. Dr. Appleton's essay on "America and International Copyright" will convince many readers that there is more to be said for the American view than they imagined. The recent biography of Titian and Mr. Wallace's work on Russia are the subjects of remarkably full and able notices. A new feature in the *Review* is a list of the most remarkable books of the month, with a short description appended to each.

The *Contemporary Review* is understood to be traversing a crisis in its history. It is meanwhile, at any rate, exemplifying the maxim *Carpe diem* by a better number than it has put forth for a long time. The most remarkable paper is perhaps the criticism on "Daniel Deronda" by Professor Dowden, who, if possibly a little too resolutely bent on finding matter of admiration everywhere, reveals many traits which have escaped the scrutiny of critics less gifted with the faculty of analysis. The keynote of the essay is struck in the observation, "In 'Daniel Deronda,' for the first time, the poetical side of George Eliot's genius obtains adequate expression." Another important article is an examination of the bearing of the evidence derived from vegetable palaeontology on the Darwinian theory, by Mr. R. Carruthers, who pronounces it unfavourable to the hypothesis of "the struggle for existence." He admits, however, that "the facts of palaeontological botany testify to development." "Transcendentalism" is the subject of one of Mr. Henry Holbeach's quaint incisive papers; and Miss Cobbe, in replying to Mr. Lowe's defence of vivisection, assumes the moral ground on which her side of the question is impregnable. Dr. Bucknill, having examined the working of the American system, strongly dissuades us from instituting any legal restrictions upon the liberty of habitual drunkards. It is, of course, impossible for Mr. Freeman to write upon the Eastern Question without saying something effective; but he has evidently long got beyond the state of mind which allows of a temperate and rational discussion of the subject.

Mr. Justin McCarthy's "Miss Misanthrope" remains the chief attraction of the *Gentleman's Magazine*. Miss Misanthrope's ambition to inhabit the metropolis and possess a latch-key is gratified, but she is beginning to find that the character of a hermitess is not easily enacted in the middle of London. "Masks" is another of Mrs. Linton's bitter and passionate protests against social conventionalisms. Mr. Hepworth Dixon seeks to determine the site of Cana, and Mr. James Hutton gossips pleasantly about "Calcutta in the Olden Time."

The *Atlantic Monthly* has a highly important communication on the present condition of South Carolina, by a Southern gentleman. Between the corruption of one political party, the lawlessness of another, the incapacity of the blacks, and the animosity of the whites, the prospects of any tolerable government seem distant indeed. The number also contains a beautiful poem on the excavations at Olympia, by E. C. Stedman; and "A Dutch Picture," one of Mr. Longfellow's most successful pieces of word-painting, and instinct with hearty human character as well.

"Proud Maisie," the *pièce de résistance* of *London Society*, continues as bright and sparkling as ever, with hints and glimpses of deeper feeling. The rest of the magazine is also very readable.

In *Briggravia* we have to note Mr. Proctor's astronomy, Mr. Mew's excellent paper on some of the less-known Spanish novels, the broad humour of "An Office Secret," and a pretty rodom entitled "Alice," with a pretty illustration by Mr. Rudolf Blind.

Tinsley and the *Argosy* are readable and amusing. There is nothing very interesting in *The Month*.

We have also received Good Words, Good Things, the Monthly Packet, the Charing-cross Magazine, the New Monthly, the Argonaut, Potter's American Magazine, Science Gossip, the Churchman's Shilling Magazine, Things in General, Weekly Welcome, Golden Hours, Sunday at Home, All the Year Round, the Victoria Magazine, the St. James's Magazine, and Cassell's Magazine.

METROPOLITAN NEWS.

The Cutlers' Company have presented ten guineas to the North-Eastern Hospital for Children, Hackney-road.

Mr. John Parry's benefit at the Gaiety Theatre, on Wednesday, realised £1300.

The whole question of the water supply of London has been referred to a committee of the Metropolitan Board of Works, with instructions to report to that body by October.

Sir George Nares will (says the *City Press*) be entertained at a banquet, on Tuesday next, by the Grocers' Company, upon being presented with the freedom of that guild.

A conference of delegates of co-operative societies was held, last Saturday, in the Lecture Hall of the National Temperance League; Mr. Thomas Hughes presided.

Cardinal Manning will preside at Dr. Corfield's lecture on the Air we Breathe, which will be given, in the large room of the Society of Arts, this (Saturday) evening, at half-past eight.

The managers of the Metropolitan and City Police Orphanage have received £50 from the Company of Goldsmiths. There are at the present time 200 children in the orphanage.

The new Commission of Sewers for the City of London was opened at Guildhall, on Tuesday, by the Lord Mayor, and Mr. Deputy Hore was elected chairman for the ensuing year.

The fifty-sixth annual court of the governors of the Seamen's Hospital Society, Greenwich, was held, at the City Terminus Hotel, on Wednesday—the Duke of Northumberland in the chair.

The receptions of the Lady Mayorees (Miss White) at the Mansion House will be held, during the season, on the first and third Tuesdays in each month, from three to five in the afternoon, beginning on Tuesday, the 13th inst.

The Lord Mayor presided, yesterday week, at the annual distribution of prizes to the students of the City of London College in Leadenhall-street. Lord Hatherley presented the prizes and gave an address.

Messrs. Sampson Low, Marston, and Co. have issued the first monthly part of "Street Life in London," containing photographic illustrations of "London Nomads," "London Cabmen," and "Covent-garden Flower-Women."

The annual ball of the Royal London Yacht Club will take place on Monday next at Willis's Rooms—The New Thames Yacht Club has arranged its programme for the forthcoming season as follows:—May 19, opening cruise; May 25, cutter races; June 7, schooners and yawls; June 16, race from the Thames to Harwich.

The annual Christmas soirée of the West-End Branch of the Royal Association in Aid of the Deaf and Dumb, took place at St. Saviour's Lecture Hall, 272, Oxford-street, on Wednesday evening, under the presidency of Sir Antonio Brady. A curiosity in the entertainment was the performance of a play in signs, the Rev. S. Smith being the interpreter.

The mixed committee appointed by the Wesleyan Conference to consider the best mode of carrying into operation the principle adopted last year of admitting laymen into the governing body of the denomination met, on Tuesday, at the Mission Hall, Bishopsgate, and agreed to a number of recommendations on the subject. It was decided that the Mixed Conference should be composed of 220 ministers and 200 laymen.

At a meeting held at the Mansion House, on Wednesday, to consider the present position of the Crystal Palace, a resolution was passed declaring that, in view of the great public advantages of that institution, it was desirable that it should be maintained for the public benefit. Some noblemen and gentlemen were appointed a committee to consider the matter and to communicate with the directors.

At the monthly board meeting of the Christian Knowledge Society, on Tuesday, there was a large attendance of members, and the gentlemen proposed by the authorities for the tract committee were carried by overwhelming majorities. A book called "Mary," published in 1872, was condemned by the episcopal referees; and the demand for it in the depository, on Tuesday, before it was withdrawn, was great.

Highgate-road Chapel, erected in the Grove, Highgate-road, at a cost of upwards of £6000, was opened, last week, under favourable auspices. Mr. J. Coxeter, of The Grove, Highgate-road, initiated the movement for building the chapel by presenting a freehold site, at a cost of £1200, to the London Baptist Association, in addition to subscribing liberally to the building fund. The London Baptist Association also contributed £1500.

Dr. J. Lawrence Hamilton writes to us from 34, Gloucester-terrace, Hyde Park:—"A misapprehension has arisen as to the *bond fides* of my offer of 100 gs. towards a fund for introducing art into hospitals because of the condition that 1000 subscribers should also each contribute a similar sum. I withdraw such condition. I will gladly give 100 gs. to a responsible committee, as soon as one is formed, to promote the art fund of the hospitals of London."

A deputation went to the Home Office, yesterday week to urge the necessity of the "rookeries" in St. Giles's and St. Martin's being removed gradually, so that the working classes should not be deprived at once of their homes, and, as a consequence, of their occupations. The deputation were informed that the Home Secretary was desirous that the changes under the Artisans' Dwellings Act should be made with as little inconvenience as possible.

The weekly return of metropolitan pauperism shows that the total number of paupers last week (the fifth week in January, 1877) was 86,132, of whom 39,466 were in workhouses, and 46,666 received outdoor relief. Compared with the corresponding periods in the years 1876, 1875, and 1874, these figures show a decrease of 2791, 13,392, and 21,537 respectively. The number of vagrants relieved on the last day of the week was 680, of whom 497 were men, 157 women, and 26 children.

There was a discussion, at the weekly meeting of the School Board for London, on the condition of pupil-teachers, introduced by a statement from the Rev. J. Rodgers, chairman of the school management committee, respecting the educational requirements of the whole country. A resolution was passed instructing a deputation about to be received by the Vice-President of the Committee of Council to urge upon him the desirableness of making certain specified alterations in the pupil-teachers' indentures.

Dr. Lyon Playfair, M.P., presided at the annual meeting of the Women's Education Union, which was held, yesterday week, at Willis's Rooms. Princess Louise having been re-elected president, on the motion of Mr. S. Morley, M.P., seconded by the Rev. M. Pattison, a resolution was moved by Mrs. W. Grey approving the scheme for supplying and testing the professional training for higher-grade teachers proposed by the Teachers' Training and Registration Society. This was seconded by the Rev. Dr. Abbott, and carried.

At the meetings of the committees of the Shipwrecked Mariners' Society, held at Hibernia Chambers, London Bridge—Captain the Hon. F. Maude, R.N., in the chair—it appeared from the minutes which were read by the secretary (Captain Symons, R.N.) that the late disastrous gales had drawn very heavily upon the society's funds—1120 widows, 1668 orphans, and 8 parents having been relieved since Jan. 1, including the half-yearly grants to widows; amounting in all to £4663. The society lent a helping hand to 10,386 persons during the past year. Contributions were announced from the Misses Hewitt (fourth donation), £100; Lord Overstone, £50; Mrs. B. Wood, £20; W. W. W., per Coutts, £50; Grocers' Company, £100; trustees of the late W. Thorgate (annual), £70; East and West India Dock Company, £21; Mrs. E. A. Mundy, £50; P. Cazenove, £20; Goldsmiths' Company, £50; and Merchant Taylors', £26 5s. Also legacies from Miss Jane Mudie, £100; and Captain Burch, £50.

At a recent meeting of the Council of Foreign Bondholders it was unanimously resolved that this council highly appreciates the services and exertions of Mr. Francis Bennoch, F.S.A., during the period he has discharged the duties of their chairman in the years 1874-5-6; and wishes to mark their sense of the value of those services and exertions to the corporation of foreign bondholders by appropriating £500 as a testimonial to Mr. Bennoch, of which they would request his acceptance. Mr. Bennoch decided that one half the amount should be appropriated to charitable or educational purposes, and the other moiety expended in commemorative plate. The latter has been on view for several days at Elkington's, Regent-street, and the tea-tray bears this inscription:—"Presented (with other plate) to Francis Bennoch, Esquire, F.S.A., by the Council of Foreign Bondholders, in recognition of the valuable services rendered by him to the corporation while acting as chairman during the years 1874-5-6. December, 1876."

The annual meeting of the governors of the Marine Society, presided over by Lord Romney, was held on Tuesday. The report described the means adopted to replace the old Warspite, which was destroyed by fire. The *Clio* was lent for temporary service by the Admiralty, and ultimately the Conqueror, line-of-battle ship, was chosen by the society, the boys occupying their new quarters on Dec. 6, while permission was given that the new vessel might bear the old name of Warspite. The Mansion House Fund and other contributions produced £6300 net; but, as the total expenses caused by the fire and the fitting up of the two ships reached £9600, it was necessary to sell out £2100 of the funded stock, thus diminishing the annual income. The society is, however, in a better condition than before, although at present the annual subscriptions are very small, and the income is little more than sufficient to keep up the old scale of 200 boys, whereas it is earnestly desired to maintain at least an additional hundred. The committee appeal for help to enable them thus to increase the number. Of 137 boys in the merchant service who have returned from their voyages during the past year, 132 have "very good" on their certificates, two only "indifferent." From the Royal Navy the returns are, as usual, most favourable.

Last week 2565 births and 1528 deaths were registered in London. Allowing for increase of population, the births were 28 and the deaths 147 below the average numbers in the corresponding week of the last ten years. The deaths included 103 from smallpox, 22 from measles, 23 from scarlet fever, 4 from diphtheria, 41 from whooping-cough, 20 from different forms of fever, and 18 from diarrhoea. The 231 deaths were 8 below the corrected average number from the same diseases in the corresponding week of the last ten years. The fatal cases of scarlet fever, diphtheria, whooping-cough, and fever were considerably below the corrected average weekly numbers, whereas those of smallpox and diarrhoea showed an excess. The deaths from smallpox, which had been 79 and 86 in the two previous weeks, further rose to 103 last week, the highest weekly number since the commencement of the present epidemic, except that returned in the first week of January. The fatal cases showed a marked increase in North London, and were also more numerous in the West and East districts. Different forms of violence caused 45 deaths: 40 were the result of negligence or accident, including 18 from fractures and contusions, 7 from burns and scalds, 3 from drowning, 2 from poison, and 9 of infants under one year of age from suffocation. Five deaths were caused by horses or vehicles in the streets.

THE CHARITIES OF LONDON.

The Classified Directory to the Metropolitan Charities for 1877, published by Messrs. Longmans, states that, so far from the charitable income of London having seriously diminished, it appears to have increased, the grand total for 1875 being £4,114,849, as against £3,975,581 for 1874, or an increase of £139,268. To this, however, must also be added the incomes of numerous institutions which do not make returns and the amount distributed in church and chapel congregations. There are also the amounts received by fraudulent charities, reaching, according to the Earl of Shaftesbury, a yearly total of £250,000, and in addition the receipts of mendicants, begging-letter writers, and others who prey upon the charity of the public. The aggregate total may therefore be put down as between £4,000,000 and £7,000,000.

The following is the classified list of the income of the various charities for 1875:—Four bible societies, £235,595; fourteen book and tract societies, £98,588; sixty-two home missions, £422,766; ten home and foreign missions, £155,370; twenty-two foreign missions, £762,085; eight church and chapel building, £39,994; twenty-four charities for the blind, £47,622; seven for deaf and dumb, £16,276; nine for incurables, £38,232; six for idiots, £68,885; eighteen general hospitals, £269,337; ten consumption hospitals, £15,911; five ophthalmic hospitals, £12,835; three orthopaedic hospitals, £4019; four skin hospitals, £3050; seventeen hospitals for women and children, £55,326; five lying-in hospitals, £7076; twenty-two miscellaneous special hospitals, £89,294; thirty-three general dispensaries, £23,003; fourteen provident dispensaries, £9258; two institutions for vaccination, £2750; five ditto for surgical appliances, £10,337; thirty-five convalescent institutions, £39,719; thirteen nursing institutions, £3642; 172 institutions for the aged, £400,411; ninety-eight institutions for general relief, £283,797; twenty-six food institutions, loan charities, £9448; 100 voluntary homes, £102,778; fifty-four orphanages, &c., £160,288; sixty-seven institutions for reformation and prevention, £94,776; 112 institutions for education, £482,418; fifty-three ditto for social improvement, £56,002; sixteen ditto for protection, £63,893; making in all 1050 institutions, with a gross total income of £4,114,849.

THE IMPERIAL DURBAR AT DELHI: PROCLAM

ATION OF THE QUEEN AS EMPRESS OF INDIA.

THE OPENING OF PARLIAMENT BY THE QUEEN.

Parliament was opened on Thursday afternoon by her Most Gracious Majesty in person. The ceremonial was favoured with the proverbial Queen's weather, the day proving to be as fine as an early English spring could be expected to produce. The comparatively short distance along which the procession had to pass from Buckingham Palace across St. James's Park, through the Horse Guards, and thence by way of Parliament-street to Palace-yard had been gradually filling throughout the morning, and by one o'clock the streets were densely crowded. The ground throughout the entire route was kept by the police under the charge of Captain Harris and Colonel Pearson, Colonel Henderson, the Chief Commissioner, reserving himself for attendance upon her Majesty. The force on duty numbered 3201 men of all ranks, including the usual contingent of mounted police. During the morning from an early hour the carriages of peeresses and other ladies having the right of admission to the House were passing on to Westminster, the amusement of watching the carriages forming almost the only occupation of the people in the streets. In the Government offices and at the Chapel Royal in Whitehall, at the Whitehall Club, and at the shops in Parliament-street the windows were all well filled, single seats having been sold in considerable numbers at a guinea each. At Gwydyr House, the former home of the Poor Law Board, the officials of the Charity Commission were present in full force; and even in Richmond-terrace, from which only a side view could be obtained, the balconies were crowded.

The reception of the Queen was of characteristic cordiality, the warmest greeting, perhaps, coming from the Westminster boys, who were stationed between St. Margaret's and the Abbey, and whose shrill cheers met with special acknowledgment from her Majesty. An escort of Life Guards and Yeomen of the Guard preceded the Royal carriage—a handsome new coach, drawn by eight cream-coloured horses. Her Majesty seemed in excellent health, and unceasingly bowed as hats went off, handkerchiefs were fluttered, and cheers rang out in token of the people's loyalty. Princess Louise and Princess Beatrice sat opposite the Queen. In accordance with what has been the custom of late years, the Queen alighted at the Peers' entrance to the House of Lords; and her doing so was the signal for the Royal Standard to be run up the flagstaff on the summit of the Victoria Tower, for "God Save the Queen" to be played by the band of the Coldstream Guards, and for a Royal salute to be fired.

The assemblage in the House of Lords was exceptionally attractive, the galleries and benches being graced by the presence of a larger number of peeresses than usual, the Countess of Dudley prominent among them from the magnificence of her diamonds, and the Chinese Ambassadors adding novelty to the scene. All assembled rose when the Royal procession entered. Near her Majesty—who was attired in mourning, but whose dark dress was lightened by the jewels and orders she wore—were the Prince and Princess of Wales, Princesses Louise and Beatrice, and the High Officers of State, including the Earl of Beaconsfield, who held the Sword of State. Her Majesty having taken her seat upon the Throne, and the members of the House of Commons having been summoned to appear at the bar, the Lord Chancellor read the Royal Address, as follows:—

THE QUEEN'S SPEECH.

MY LORDS AND GENTLEMEN,

It is with much satisfaction that I again resort to the advice and assistance of my Parliament.

The hostilities which, before the close of last Session, had broken out between Turkey on the one hand and Servia and Montenegro on the other, engaged my most serious attention, and I anxiously waited for an opportunity when my good offices, together with those of my allies, might be usefully interposed.

This opportunity presented itself by the solicitation of Servia for our mediation, the offer of which was ultimately entertained by the Porte.

In the course of the negotiations I deemed it expedient to lay down and, in concert with the other Powers, to submit to the Porte certain bases upon which I held that not only peace might be brought about with the Principalities, but the permanent pacification of the disturbed provinces, including Bulgaria, and the amelioration of their condition, might be effected.

Agreed to by the Powers, they required to be expanded and worked out by negotiation or by conference, accompanied by an armistice. The Porte, though not accepting the bases and proposing other terms, was willing to submit them to the equitable consideration of the Powers.

While proceeding to act in this mediation, I thought it right, after inquiry into the facts, to denounce to the Porte the excesses ascertained to have been committed in Bulgaria, and to express my reprobation of their perpetrators.

An armistice being arranged, a Conference met at Constantinople for the consideration of extended terms in accordance with the original bases, in which Conference I was represented by a special Envoy, as well as by my Ambassador.

In taking these steps, my object has throughout been to maintain the peace of Europe, and to bring about the better government of the disturbed provinces, without infringing upon the independence and integrity of the Ottoman Empire.

The proposals recommended by myself and my allies have not, I regret to say, been accepted by the Porte; but the result of the Conference has been to show the existence of a general agreement among the European Powers, which cannot fail to have a material effect upon the condition and government of Turkey.

In the meantime, the armistice between Turkey and the Principalities has been prolonged, and is still unexpired; and may, I trust, yet lead to the conclusion of an honourable peace.

In these affairs I have acted in cordial co-operation with my allies, with whom, as with other foreign Powers, my relations continue to be of a friendly character.

Papers on these subjects will be forthwith laid before you.

My assumption of the Imperial title at Delhi was welcomed by the chiefs and people of India with professions of affection and loyalty most grateful to my feelings.

It is with deep regret that I have to announce a calamity in that part of my dominions which will demand the most earnest watchfulness on the part of my Government there. A famine not less serious than that of 1873 has overspread a

large portion of the Presidencies of Madras and Bombay. I am confident that every resource will be employed not merely in arrest of this present famine, but in obtaining fresh experience for the prevention or mitigation of such visitations for the future.

The prosperity and progress of my colonial empire remain unchecked, although the proceedings of the Government of the Transvaal Republic, and the hostilities in which it has engaged with the neighbouring tribes, have caused some apprehensions for the safety of my subjects in South Africa. I trust, however, that the measures which I have taken will suffice to prevent any serious evil.

GENTLEMEN OF THE HOUSE OF COMMONS,

I have directed the Estimates of this year to be prepared and presented to you without delay.

MY LORDS AND GENTLEMEN,

Bills relating to the Universities of Oxford and Cambridge, and for amending the law as to bankruptcy and letters patent for inventions, will be laid before you.

Your attention will be again called to measures for promoting economy and efficiency in the management of the prisons of the United Kingdom, which will, at the same time effect a relief of local burdens.

Bills will also be laid before you for amending the laws relating to the valuation of property in England, for simplifying and amending the law relating to factories and workshops, and for improving the law regulating the summary jurisdiction of magistrates.

Legislation will be proposed with reference to roads and bridges in Scotland, and the Scotch Poor Law.

You will be asked to constitute one Supreme Court of Judicature in Ireland and to confer an equitable jurisdiction on the County Courts in that country.

I commend to you these and other measures which may be submitted for your consideration, and I trust that the blessing of the Almighty will attend your labours and direct your efforts.

This ended the ceremonial. The Queen, descending the steps, kissed the Princess of Wales on the cheek and gave her hand to be kissed by the Duke of Cambridge and the Duke of Teck, who stood together in the gangway beside the Bishops, and to the Prince of Wales. The brilliant assemblage immediately broke up, and the Royal procession drove from Old Palace-yard amid the clanging of the bells, the salvoes of artillery in the park, and the loyal cheers of the populace. The crowd had in no way decreased as the procession returned, and her Majesty was greeted with the same heartiness, the Princesses also smiling and bowing graciously to the people.

The Lord Chancellor took his seat upon the woolsack at a quarter past four o'clock, the ceremony of swearing in the new peers being at once proceeded with. There was a large attendance of peers on both sides of the House, and the galleries were well filled with ladies. The bar and the front of the throne were crowded with members from the Lower House. Viscount Ashford was the first peer to take the oath, being introduced by Lord Skelmersdale and Lord Henniker. Lord Redesdale took the oath as an Earl; also Lord Airey. The Lord Chancellor simply introduced such peers as took their seats by right of succession; but with the new peers the quaint old ceremony of perambulating the House was gone through. At twenty minutes to five o'clock the Earl of Beaconsfield was introduced to the House by the Earl of Derby and the Earl of Bradford, accompanied by the Earl Marshal (the Duke of Norfolk) and the Deputy Grand Chamberlain, the patent of the Queen of the viscounty of Hughenden and the earldom of Beaconsfield was read by the Reading Clerk, Mr. Bethell; and the noble peer took the oath and subscribed the roll. The ceremony of perambulating the house having been gone through, the noble peer left the House, and, returning at five o'clock, took his seat on the front Ministerial bench, amidst loud cheers from that side. A few minutes afterwards the Marquis of Salisbury entered the House and took his seat, being received with loud cheers from both sides. The proposer and seconder of the Address then entered the House in full uniform, and took their seats immediately behind the Earl of Beaconsfield and the Duke of Richmond and Gordon.

At a quarter past four the Lord Chancellor rose and proceeded to read the Speech from the Throne. After which Viscount Grey de Wilton rose to move the Address, and, after having prayed the indulgence of their Lordships on this his maiden speech, he remarked that the first ten or twelve paragraphs of the Speech had naturally been devoted to the all-absorbing questions of the day. He would not occupy their Lordships' time by presuming to sketch the history of the past two years. That story would be told by those who had been the three principal British actors in this great drama, who were most capable of giving them information, and on that information, taken in conjunction with the papers, they would be able to form a sound judgment, unprejudiced by the speeches of those who in various parts of the country had thought fit to attack the Government, unfurnished with information, without which no true or just judgment could be formed. The public had ranged themselves on each side with a zeal not always tempered by discretion, and many reflections had been made which, he thought, bore rather hardly upon Russia, who ought, at all events, to have had credit given to her for sincerity of intention. There had, on the other hand, been advocates of what had been termed a pacific policy; but he could not see how we could insist upon a pacific policy being carried out unless we were prepared to carry it out by force of arms, which we were not. The result of all the agitation had been that the Government had received a great deal of advice of a miscellaneous character, and they had been congratulated on the fact that they had changed their policy, but when the time came he thought it would be found that they had done nothing of the kind, but that they adhered still to the principles of the Treaty of 1856 as modified by that of 1873. They had based their policy on two cardinal points—first, the preservation of the peace of Europe, and, secondly, on the maintenance of the integrity and independence of the Ottoman Empire. He admitted that the Conference had to a certain extent failed, but not altogether, because it had demonstrated the unanimous desire of at least six of the Great Powers to preserve the peace of Europe, and it had unquestionably led to the promulgation of an unparalleled measure of reform in Turkey in the shape of a constitution published with great ceremony and solemnly sworn to by the Sultan. He believed that when the whole of the documents were submitted to their Lordships they would agree that the policy of the Government had been a wise one, and, should war eventuate, this country would neither directly nor indirectly be

involved, and that the national honour would be in the safe keeping of his noble relative below him, who he believed had the support and approbation of the great majority of the nation.

The Earl of Haddington seconded the Address.

Earl Granville criticised the conduct of the Government at great length. Referring to the Eastern Question, he said that he was not one of those who thought the Treaty of 1856 ought to be abrogated; but while it was maintained the parties to it ought not to disregard the moral obligation which it imposed upon them to protect the Christian subjects of the Porte, and he was not sure that the Government would not have been wise to follow the lines of the memorandum published in the Life of the Prince Consort, and be careful to see that no additional protection was given to Turkey without perfect security for the Christian subjects. On more than one occasion, when he was Foreign Minister, remonstrances were addressed to the Turkish Government upon cruelties to her Christian subjects, and redress was obtained; and in 1871 he told the Turkish Ambassador that he was not to rely upon the support of this country in all possible circumstances, but he must look for one of the main safeguards in the good government of the Christians. He regretted that the rejection of the Berlin Memorandum was not followed by a substitute on the part of the British Government, and he blamed the subsequent conduct of the Government in first questioning the truth of the atrocities in Bulgaria, and, while decorations and promotions were bestowed upon the perpetrators, still doubting the connivance of the Government. He wanted to know who had been punished for the first, and whether the Government had any information as to the newspaper statements that the cruelties were still going on. He criticised the differences between the statements of the Ministers during the autumn as to the policy of the Government, and especially found fault with the Prime Minister's Guildhall speech, in which Russia was distinctly taunted with being unable to carry on a lengthened campaign. No reference was made to the Emperor's solemn declaration of pacific intentions. They did not know the instructions to Lord Salisbury nor what had taken place in the Conference; but he should be surprised if it were not found that the noble Marquis, whether he had acted most judiciously, had been most sanguine in his work. But the thing that created the most anxiety was as to what would be the result of the Conference. If we took no action, and Russia, for some reason, did nothing, the Christian population of Turkey would be in a worse position than now. What he recommended was that the country should use its influence to persuade the Powers of Europe to unite in insisting upon Turkey performing her promises towards her Christian subjects. If we did not succeed, we should be no worse off than now; and he was not sure that England was not the only obstacle to such united action. At all events, if that policy were pursued, whether it succeeded or failed, it would meet with the approbation of all classes of the country.

The Earl of Derby, upon rising, was received with a cheer from the Ministerial benches. After a few preliminary remarks, his Lordship proceeded to pass in review the policy of the Government on the Eastern Question. What, asked the noble Earl, is the course which things have taken. They had from the first been opposed to interference, being of opinion that the disturbances in the disaffected parts of the Turkish Empire would be speedily put down by the Porte. They were in favour of the Andrassy Note, but they could not agree to the Berlin Memorandum because it involved the possibility of an armed interference in the affairs of Turkey. They had always repudiated a military occupation of any part of the Sultan's dominions; and he expressed his opinion that to have adopted the Memorandum would have led to a war. At the same time, after the rejection of the Memorandum, he warned the Turkish Government that the times had changed since the Crimean War, and that the Ottoman Court could no longer rely upon our protecting her should she continue to set herself against the reforms promised. Then, continued the noble Earl, came the Conference itself, and as to that the House will have the fullest opportunity of being informed. I am glad to see that the fullest justice has been done, not only to the course taken by Government in sending out the noble Marquis upon the mission to Constantinople, but also to the ability with which he has discharged his arduous duty, notwithstanding that I have heard it said that the Conference has failed in a most woful manner. Before, however, your Lordships decide that it has so failed you must consider what was the object we had in view. If you look at it in this light, which all Europe does not, of pressing on the Porte a certain scheme of reform, and that the Porte had refused that scheme, then the Conference did not attain its object. But I say, and I think the noble Marquis will say also, that what was brought forward at the Conference was not an end, but a means to an end. The object we had in view was twofold, first, the preservation of peace; and secondly, some amelioration of the internal affairs of the Christian provinces of Turkey, which would secure Europe from the anxiety and disturbances of the last two years. Is it not then a little premature to say that the Conference has failed in bringing about either of these two objects? If the prospects of European peace are improved, the Conference has not been a failure; but of that I am bound to speak with reserve, because practically the decision rests on a single Power and almost on a single man, and a graver responsibility than that which devolved upon the Emperor of Russia never devolved on any human being. But I do say this, that if peace is desired, and I fondly hope and believe it is, then the Conference has done good service in preparing the way for it. In the first place, it has gained time, and that is anything but of small importance. Compare the state of feeling which exists in Russia now, so far as we have any means of ascertaining, to what existed three or four months ago. Then every report we had told us of general excitement, of ardent enthusiasm for war; now the reaction has come, and among the influential classes in this country there is a growing disposition to consider calmly the chances and risks of war, and not to rush into it. I say, taking all the circumstances of the case into consideration, that, if nothing else had been done, the labours of my noble friend and his colleagues would not have been in vain. But, my Lords, that is not the most important part of the work which the Conference has done. It has enabled us to know more clearly than we did before what it is that Russia asks and what it is that the Porte will be prepared to accept. I do not lay more stress than the noble Earl does upon the new Constitution which has been proposed; but I should like to see whether it is fairly and honestly put into force. At any rate, we know this: there are certain things which it rejects; and, mainly through the energy and skill of my noble friend, the original Russian proposals, which I do not think ever had any chance of being accepted, have been cut down in a most material degree. The question now is whether the difference between that which can be peacefully obtained from the Porte and that which might be forcibly wrung from it is such as to give any cause for war. But there is another point in connection with the Conference to which I have to call attention. It has put an end to a state of things full of danger. We know that very little more of the

exasperation which the defeats in the Servian campaign, which became Russian defeats, would have made it impossible almost for Russia to avoid keeping out of the war. That state of things has also passed away. The Russian volunteers have gone home without, I think, any very particular affection toward their Servian brethren. What the result will be no man can undertake to say; but of this I am sure, that the Conference has put us in a far better position as regards the prospects of peace than we would have been without. Then as to the other objects of the Conference—the improvement of the internal administration of the Christian provinces of Turkey—the objections taken by Turkey are almost exclusively objections not to the reforms themselves, but to the guarantees required for their execution. I think the Porte was wrong in the position it took. As with individuals in embarrassed circumstances, it would have been much wiser for them to have put the matter into the hands of trustees, and submit to conditions which might have been disagreeable, but which, at all events, would have avoided the risk of war. The Porte, however, has acted on its own responsibility in carrying out administrative reforms. I will not venture to predict the issue, but I believe the situation is fully understood at Constantinople, and there is a very sincere desire on the part of the Turkish Government to avoid giving reasonable cause of offence to the European Powers. I think in these circumstances we have a plain course before us. We have plainly stated to the Porte that we could not, in the event of force being used, undertake to protect it against the consequences of the violation of its own engagements. We are not bound by any treaty engagements to guard the Porte against what it may itself do; but I think that we ought to bear in mind the precise nature of the Treaty of 1856, by which we undertook to respect the integrity and independence of the Ottoman Empire, and those treaties were not made so much for the protection of Turkey as for the peace of Europe. The noble Lord concluded by saying that the fullest information would be found in the papers about to be laid on the table.

The Duke of Argyll charged the Ministry with making a complete change of policy, and expressed his opinion that every insurrection against the Turkish Government was legitimate. The way to avoid a sanguinary war was for this country to use every effort to establish European concord on this question.

The Earl of Beaconsfield was of opinion that if we had recourse to coercion the massacres in the Christian provinces would have been greatly extended. To treat the question successfully, they must treat it like statesmen, and must know who was to be responsible hereafter for the condition of these populations, and what change in the distribution of territory in a most important part of the globe might follow.

After a few words by Lord Cardwell,

The Marquis of Salisbury protested against the policy too popular with some Governments in past times of holding out vague threats of coercion with a very hazy idea of what was to be the result. To coerce the Porte we must send a fleet into the Bosphorus and bombard Stamboul, and the effect of that would be to produce anarchy in every part of the Ottoman Empire, where in many parts there were still an armed Mohammedan and an unarmed Christian population.

Lord Waverley expressed his disapproval of the policy of the Government, after which

The motion for an address was agreed to, and their Lordships adjourned at ten minutes to nine o'clock.

HOUSE OF COMMONS.

Although hon. members were summoned to meet at half-past one o'clock, the doors of the House of Commons were opened at twelve; and very soon afterwards a few of those who were desirous of securing good places entered the House, and took their seats in the usual way by depositing their hats in the chosen spots. The first to enter the House was Sir Charles Dilke, and he was followed by Sir G. Bowyer, Mr. Forsyth, Mr. G. Bentinck, Sir G. Campbell, Sir W. Hart-Dyke, Colonel Hogg, Mr. Rowland Winn, Mr. Charley, Mr. Macdonald, Mr. Kay Shuttleworth, Mr. Russell Gurney, Mr. Beresford Hope, Mr. Meldon, Sir H. D. Wolff, Mr. Floyd, Mr. Mowbray, Sir G. Balfour, Mr. Hubbard, Dr. Cameron, Sir R. Peel, Sir J. C. Lawrence, Mr. T. B. Potter, &c. The Speaker entered the House shortly before a quarter to two o'clock, and took his seat in the chair of the Chief Clerk. He was attired in his state robe. Prayers were said, and directly afterwards the Speaker went through the ceremony of shaking hands with the members present, to the number of, perhaps, 150. The list of members who had been selected by ballot to attend in the Upper House to witness the opening of Parliament by her Majesty was then read by the Chief Clerk, and, at a quarter past two o'clock, Colonel Clifford, the Yeoman Usher of the Black Rod, entered the House, and, having advanced to the table with a due observance of the customary forms, announced that her Majesty commanded the immediate attendance of that hon. House in the House of Peers. The Speaker, who had previously taken the chair, at once obeyed the Royal summons, and, preceded by the Sergeant-at-Arms, bearing the mace, and followed by a large number of hon. members, left the House for the bar of the Upper House. On his return, after an absence of twelve minutes, the sitting was suspended till four o'clock.

The House resumed at five minutes to four o'clock. The following members elected during the recess took the oaths and their seats:—Mr. Freemantle for Buckinghamshire, Mr. Samuelson for Frome, Mr. Barran for Leeds, Mr. W. Wilson for Donegal, Mr. L. Courtenay for Lisakeard, Mr. Gerard Noel on his re-election for Rutland, after being appointed First Commissioner of Works, and the Lord Advocate for the University of Glasgow. A new writ was moved for Dublin University in the room of Mr. Gibson, who has accepted the office of Attorney-General for Ireland.

The Speech from the Throne having been read by the Speaker, Lord Galway moved the Address in reply to her Majesty's Speech. He congratulated the House on the fact that her Majesty had been enabled once again to open Parliament in person, and, referring to the statements contained in the Speech with regard to the Eastern Question, he expressed his strong approval of the policy that had guided the action of the Government on this important subject—a policy that was based on a sincere desire to maintain the peace of Europe. He argued that the Conference had been productive of great benefit already, and was of opinion that the best results were still to be expected from it. The great object they ought all to have in view was the better government of the Turkish provinces generally, so as to increase, as far as possible, the comfort and happiness of all classes of the people. He regretted that the promises made at the termination of the Crimean War had not been fulfilled, and that the influence of this country in Turkey had in various ways been allowed to diminish. He urged the necessity of sound reforms in Turkish government, and deprecated any attempt to import the elements of religious feeling into this intricate and delicate question, and terminated this portion of his speech by expressing his entire confidence in the action of her Majesty's Government. Having congratulated the House on the assumption by her Majesty of her new title of Empress of India, and on the satis-

factory state of our relations with the Colonies, he glanced at the measures promised by the Government during the coming Session, expressing his satisfaction therewith, and concluded by moving the Address.

Mr. Torr, in seconding the motion, expressed the regret that he believed was shared by both sides of the House at the loss it had sustained by the removal of the Prime Minister to the Upper House, although, he said, they must all rejoice at the honour which her Majesty had been pleased to confer on that eminent statesman. Turning to the Eastern Question, he entered a strong protest against the language in which that subject had been discussed by some of the opponents of the Government, and expressed his confidence in the efforts of her Majesty's Government to promote a satisfactory solution of the difficulty. He approved the objects of the different measures promised in the Royal Speech.

The Marquis of Hartington, who was received with cheers from the Opposition benches, congratulated the Government on having, in the Speech from the Throne, attained a level, he would not say of dulness, but of repose and reserve such as had not often been achieved by their predecessors. He pointed out that the Royal speech contained no mention of the extradition treaty with America, nor of the fugitive slave question, upon which the Royal Commission of last year had reported, nor of the subject of the Maritime Contracts Bill. He admitted that the Prisons Bill might effect certain desirable improvements in our prison administration, and remarked, in view of the financial part of the question, that the Government had reason to be thankful that they had not been enabled to carry the measure during the past Session. He supposed the House might now resign all hope of any comprehensive scheme for dealing with the question of local government; and, speaking next of the Eastern Question, remarked that the policy of the Government up to the end of last Session had been one of active non-intervention, which meant that they would keep a ring for the combatants, but would not interfere themselves. This policy had, however, undergone a change, for no sooner had Parliament separated than it became a question of whether the attitude of England should be changed from one of non-intervention to one of active interference; and so extraordinary was the action of the Government, that there would have been nothing inconsistent with their conduct in their giving material aid to the Porte. He called attention to the strong vigorously-worded despatch addressed by Lord Derby to the Porte after the Bulgarian atrocities had created so profound a sensation, and asked what steps had been taken by the Turkish Government to comply with the demands of that despatch, or failing such compliance on their part what steps had been taken by her Majesty's Government to ensure compliance? He also asked why it was that the Government had been induced to make proposals in September which they had declined to make in June, and whether the consequence of their inaction up to that time had not of necessity involved them in a share of the responsibility for the blood that had been shed during the Servian War? He explained that nothing was known of the object or result of the visits of Lord Salisbury to the different European Courts before the meeting of the Conference. He reminded the House of the language used by Lord Beaconsfield in his speech at the Mansion House, when he had said, on the eve of the Conference and after having received the most urgent assurances of the Russian Emperor of the pacific intentions of that potentate, that if there was to be war, England was not a country that cared to consider how long it should last. He admitted that the result of Lord Salisbury's mission had been to do much towards restoring the good feeling that had formerly existed between England and Russia, and much towards carrying out, as far as was possible, the object with which he was sent there. He had told Turkey and the world in plain language what was his view and that of the country of the treaty of 1856; and there was no doubt that, as stated in the Speech from the Throne, there was a general agreement among the European Powers. It was, however, to be regretted that the main object of his mission had not been successfully achieved, and that the proposals of the Government had not been accepted by the Porte. He trusted, therefore, the Government would avail themselves of the present opportunity of informing the country not only as to what was their present position, but also as to what was to be their policy on this question in the future. He might have offered his congratulations on the establishment of something like an improved constitution in Turkey, but he thought that the news which had been received from Turkey within the last day or two could hardly be regarded as a good augury of the working of the new constitution. Doubtless the peace was preserved, but what sort of peace was it? for, as they had been told by the Chancellor of the Exchequer, that, unless accompanied by a full measure of internal reform, the peace, after all, would be but a hollow one. He concluded by expressing a hope that the Government would do all they could not to weaken but to strengthen the concert at present existing among the powers of Europe with reference to the Eastern Question.

The Chancellor of the Exchequer rose, amid loud cheers, to reply to the observations of the noble Marquis. He thought the House could hardly have expected that the fugitive slave question should be specially referred to in the Royal Speech; and, with regard to the extradition treaty, he had to state that temporary arrangements had been already made. As to the Maritime Contracts Bill, it was not the intention of the Government to drop that measure. With regard to the Eastern Question, he admitted that the noble Lord had placed him in a position of embarrassment, inasmuch as the papers on that subject were not before the House. They would, however, be in the hands of members to-morrow; and in the absence of those documents the noble Marquis had been led into an erroneous view of what was the policy of the Government. He asserted that the Government stood at the present moment in an exceedingly hopeful position, and argued that the Conference could not be called a failure, inasmuch as it had produced an exceedingly good understanding among the six Powers—an understanding that ought not to be imperilled by putting a wrong construction on what was done by those who were parties to it, and by emphasising everything that could possibly tell against the country.

The Marquis of Hartington: For "country" read "Government."

The Chancellor of the Exchequer said the noble Lord drew a distinction between the country and the Government. All he could say was that, if the noble Lord denied that the Government did represent the country, the sooner he took steps to bring the matter to a proof the better. He denied that the policy of the Government had been shift or evasive, and argued that the course they had pursued had been the right and proper one. He lamented the rejection by the Porte of the proposals put before it, and added that the course to be hereafter pursued must necessarily demand grave deliberation. He might, however, say that the Government desired, as far as possible, to avoid anything that

might lead to hostilities, and they were anxious to promote common action among the Powers. What the Government had been anxious to do was not to obtain a new Constitution for Turkey, but to secure sufficient guarantees for the reforms that were needed. Their policy was expressed in that paragraph of the Royal Speech in which they said they were desirous of maintaining the peace of Europe, and securing the better government of the disturbed provinces, without infringing on the independence and integrity of the Ottoman Empire. To secure these objects they were bound to show that they were respecters of treaties. He read certain extracts from the instructions given to Lord Salisbury to show that the Government left with the Porte the responsibility of rejecting the proposals made to it.

Mr. Gladstone deprecated the reference made to Lord Salisbury's instructions as contrary to usage; and, referring to the part he (Mr. Gladstone) had taken in the discussion of the question, asserted that he should be prepared, in the debates that would hereafter take place, to stand by every word he had written or uttered on the subject. With regard to the future policy of the Government, he contended that no scheme for the settlement of the disturbed provinces would be satisfactory that left everything at the arbitrary disposal of the Turkish Government. It had been denied that her Majesty's Government had changed their policy, and he would not grudge them the pleasure which that assertion seemed to afford; nevertheless, he recognised with gladness certain features for which he had formerly looked in vain, especially the admission of the responsibility of the Government in regard to the mode in which the rule of the Ottoman Government was exercised, and the absence of the statement that the policy of the Government was that of non-intervention. When asked what must follow the rejection by Turkey of the proposals of the Conference, the Chancellor of the Exchequer had stated that that was a matter for the grave consideration of the Government; and after that statement he (Mr. Gladstone) would not press the matter further. He concurred in the eulogiums that had been passed on Lord Salisbury, and argued that it was clear that Turkey had placed herself outside the Treaty of 1856 by her disregard of the stipulations into which she had entered.

After a few words from Mr. Gathorne Hardy, who, in reply to a remark by Mr. Gladstone, said the Government were quite satisfied that they did represent the opinion of the country on the Eastern Question, the motion was agreed to and the House adjourned at twenty minutes past nine.

NATIONAL SPORTS.

After a long and dreary period of inaction, racing men assembled in great numbers at Birmingham, last Tuesday, and were well repaid by two days of very interesting sport. The much-improved Chilton secured a couple of races in such style that, though he has incurred penalties, he is sure to be backed either for the International Hurdle-Race at Croydon or the great event at Liverpool; but, as Jones has exposed him thus early, it is probable that he has something better in the stable for these events. Slight odds were laid on little Rat-catcher (11 st. 8 lb.), who was started in preference to Chilton for the Birmingham Grand Annual. He was probably second best, but was eased as soon as it was found that he had no chance with Abdallah (10 st.), who thus landed the race for the Irish division, for the third year in succession, Mrs. Starr having won it in 1875-6.

The coursing at Lytham was rendered additionally interesting by the running of several dogs that will probably take part in the Waterloo Cup, and most of them acquitted themselves well. The North and South Lincolnshire Stakes was divided between Revaltas, by Rocketeer—Restless Peggy, and Bombard, by Brigade Major—Sweet Briar; and Mr. Haywood, the owner of the former dog, is said to have a better in his kennel; while Barabbas and Beeswing are both superior to Bombard. The fact that Bombard has divided no less than three Produce Stakes at Lytham is one more proof that greyhounds, like racehorses, are wonderfully partial to certain ground. Beardwood, by Blackburn—Bessie, defeated Dyazgura, by Cockie; Leekie—Lucina, in the final course of the Clifton Cup. The Lytham Cup was divided between Cash Down, by Cashier—Sister to Alluring, and Spitfire, by Lara—Bianca. Hares were fairly plentiful, but wild. Mr. Hedley acted as judge, and Luff handled the slips.

A great match at football, under Rugby rules, took place at Kennington-oval, last Monday, between England and Ireland, fifteen a side. The former was remarkably strong; but it could not fairly be said that the Irish team was a representative one, so their defeat, by two goals and two tries to nothing, was not surprising, as they were fairly overmatched all round.

Joseph Bennett (ex-champion) and T. Taylor played one of the most obstinately-contested billiard-matches ever seen at the Gaiety Restaurant last week. It was £1000 up level, on a championship table, for £100 a side; and as Bennett was once such a very fine all-round player, and was said to have quite recovered his best form, odds of 6 to 4 were laid on him at starting. Except upon one occasion, when Taylor held a lead of 96 points, the two were never fifty points apart, and passed and repassed each other in the most extraordinary manner. The game could not be concluded in one evening, and at the cessation of play the scores stood Taylor 854, Bennett 820. On the following evening the marker called "931 all," and then Bennett reached 954 against 952; but eventually Taylor won by 27 points, amidst intense excitement. Bennett's long losing hazards were as brilliant as ever, and he played with better strength than his opponent; but Taylor's cannons were simply astonishing, and he kept putting in little breaks of 15 and 20, which are so very useful in a small-pocket table. Bennett's best breaks were 53, 40, 63, 40, and 32; while Taylor's greatest efforts only numbered 38 and 29. Messrs. Burroughes and Watts erected a very beautiful table for the occasion, and the long game was exceedingly well marked by T. Stuart. The two men are to play a return match, on precisely similar terms, in about ten days.

At a public meeting, held at Berkeley Castle, a national testimonial was set on foot to Mr. W. G. Grace, the champion cricketer, who contemplates retiring from that position to follow his profession of surgeon.

Coursing being in season, the publication (by Marion and Co., Soho-square) of four coloured photographs of this popular sport is not inopportune. These pictures are reproduced from the drawings of Mr. Richard Moore, an animal draughtsman of considerable skill; and they illustrate with spirit and fidelity four phases of coursing, a good idea of which may be formed from the views. No. 1 represents the hounds "In the Slips," No. 2, "Slipped," with the hounds darting after their prey; No. 3, "The First Turn;" and No. 4, "The Kill."

Mr. A. E. Miller, Q.C., a Bencher of Lincoln's Inn, has been appointed the legal member of the Railway Commission, in succession to the late Mr. Macnamara.

SKETCHES AT THE DELHI DURBAR.

OPENING OF THE NEW SCHOOL OF SCIENCE AND ART AT BRIGHTON BY PRINCESS LOUISE.

PRINCESS LOUISE AT BRIGHTON.

The new School of Science and Art at Brighton was opened, yesterday week, by her Royal Highness Princess Louise, accompanied by her husband, the Marquis of Lorne. It is a handsome building on the Grand Parade, erected by Mr. G. Lookyer, from designs by Mr. Gibbins, at a cost of above £10,000, of which about £4000 is yet to be subscribed. The building is in the modern Romanesque style, and is constructed of white brick and stone, with enrichments of granite and terra cotta, the decorative sculptures representing forms symbolical of art and science. The interior comprises separate class-rooms for both those studies, a lecture-hall or theatre, a professors' room, a laboratory, a museum, and a modelling room, with convenient offices. It will be a valuable institution for Brighton, and a new object of interest for the leisurely visitors and residents there. The foundation was laid by Sir Henry Cole, O.B., in June; and a grant of £1000 has been promised by Government.

Her Royal Highness and the Marquis of Lorne went down from London by a special train arriving before one o'clock. They were received at the Brighton station by the Mayor, Mr. Alderman Lamb, and five past Mayors, Aldermen Abbey, Bridgen, Cox, Hallett, and Martin, in their robes of municipal dignity, with the two members for Brighton, Mr. J. Ashbury, M.P., and General Shute, M.P., and Sir Francis and Lady Seymour. Mrs. Lamb, the Mayoress, presented her Royal Highness with a bouquet, and the Mayor presented an address of welcome, engrossed on vellum. This was read, and the Marquis of Lorne replied to it. The station was prettily decorated with red and white striped bunting, and with an arrangement of rare plants towards the door. There was a guard of honour of the 1st Sussex Artillery, with the band of that regiment. A procession of six open carriages, each drawn by a pair of horses, conducted the Princess and the Marquis of Lorne through the streets. The route was by Queen's-road, North-street, Castle-square, the Steyna, Pavilion Parade, and Grand Parade. A grand triumphal arch had been erected in Queen's-road near the station; flags and garlands hung on cords across the streets, and most of the houses on each side made a festive display.

Arriving at the School of Art, her Royal Highness and Lord Lorne were met by the committee of that institution, who were presented to them in the board-

room. The chairman of the committee, Mr. F. Merrifield, accompanied them through the science class-rooms, where Mr. A. Walker, the mathematical master, and Mr. W. Jago, the general science master, were introduced. Next, the Royal party were conducted up stairs to the art class-rooms, where they were received by Mr. A. Fisher, the Head Master. They passed through the elementary room, the art-master's room, the painting and antique room, then descended to the lecturer's preparation-room, and to the lecture-theatre, to which a number of lady-students were admitted. This inspection was brief and formal; but there was ample opportunity to discern the advantages of the institution, and her Royal Highness was not scant of commendation. There was the customary display of loyal and popular compliments outside, with a guard of honour of volunteers, a military band, and a party of the 20th Hussars in attendance.

Having concluded the ceremony at the School of Art, the

Princess and her husband were escorted to the Domo adjoining the Royal Pavilion, where a public meeting was assembled. The Mayor presided, and in a short speech explained the object of that day's proceedings. He thanked her Royal Highness, who was known to feel a deep interest in science and art, for her kindness in coming there. The Princess then, amidst the applause of the meeting, declared the Brighton School of Science and Art "open for all its purposes." The Marquis of Lorne addressed the meeting in an effective but not lengthy speech, setting forth the national and social advantages of science and art studies. He stated that there are now 3700 schools of art in the kingdom, with 470,000 pupils; and 1300 centres of scientific teaching, with 52,000 persons learning. His Lordship proposed a resolution declaring that this institution deserves the support of the inhabitants and visitors of Brighton. Mr. Ashbury, M.P., seconded the resolution, which was passed with unanimity. A vote of thanks was given to the Princess, on the motion of General Shute; and she was presented with a volume, illuminated and decorated by students of the School of Art, containing a record of the proceedings.

The Mayor afterwards entertained her Royal Highness and Lord Lorne, with two hundred other guests, at luncheon in the banqueting-hall of the Pavilion. They passed through the Free Library, Museum, and picture gallery, into that hall, which was beautifully adorned with a variety of flowers. After the luncheon the Princess and her husband enjoyed a drive along the sea front of the town, and then visited the Brighton Aquarium. Its manager, Mr. Reeves Smith, had prepared for them a suitable reception, with a guard of honour formed of the volunteers and hussars, and two bands. The Princess, on leaving, was presented with an album containing photographs of the Royal Aquarium.

THE SEMON CONVALESCENTS' HOME.

This institution is situated at Ilkley, in Wharfedale, Yorkshire, near the water-cure establishments known as Ben Rhydding and Ilkley Wells. It was built, in 1874, by Mr. Charles Semon, a Bradford merchant, and has been presented by him to the Corporation of Bradford, of which borough he was Mayor in 1865. It is intended to meet the wants of a class of invalids who cannot afford to pay the expense of going to such places

THE SEMON CONVALESCENTS' HOME, AT ILKLEY, YORKSHIRE.

as Ben Rhydding, but who are not so destitute as to need free quarters in a public hospital. Mr. Semon's gift was accompanied with the sum of £3000 to provide a fund towards working expenses. The home and surrounding grounds cover nearly six acres; and the total cost, including furniture and fittings, was £12,000. The establishment is to be used exclusively for "persons of slender means, whether born in the United Kingdom or elsewhere, and whether resident in Bradford or not, who are in a weak state of health, or who, having been ill, are tardily recovering, and require, for complete restoration to health, change of air, good food, rest, and kind treatment, together with medical supervision." The following cases are not to be admissible:—Persons who are blind and helpless, and children under ten years of age; persons who are recovering from smallpox, typhus, scarlet fever, or any other infectious or contagious disease; persons with open sores, or any form of disease requiring active treatment; persons subject to epileptic or other fits, or who are of unsound mind; persons suffering from cancer, confirmed pulmonary consumption, or any incurable disease; women advanced in pregnancy; persons in receipt of parochial relief. Admission to the home is at the uniform charge of twelve shillings and sixpence per week, payable in advance. This payment is to cover all charges, including a good substantial dietary. The site of the building is noted for its healthfulness; and the home is provided with heating and ventilating appliances so arranged as to render the atmosphere of the apartments suitable for delicate constitutions during the most inclement seasons. The institution is open for the reception of inmates during the whole of the year.

One of the principal aims of the founder was to make the home in all respects as agreeable to the inmates as though they were at an hotel or boarding-house, and to fix the charge at such a sum as should be just sufficient to cover actual cost, and yet make the inmates feel perfectly independent. The male and female inmates are separately accommodated in different parts of the building, save that all meals are taken in common. Some of the sleeping-rooms are fitted up for one person only; and some for two persons, but with separate beds. There are commodious, cheerful sitting-rooms, affording extensive views of the beautiful scenery of the district. Every requisite for comfort is supplied throughout the building. The grounds are well laid out, there are charming walks in the neighbourhood, and Bolton Abbey and woods are within a distance of about six miles.

Forms of application for admission and any further information may be obtained on application by letter addressed, "The Matron, Semon Convalescents' Home, Ilkley, Yorkshire."

LAW.

The Hon. Mr. Justice Lopes was entertained at a dinner at the Albion, Aldersgate-street, on Saturday evening last, by the members of the Western circuit, to celebrate his elevation to the Bench. About eighty of the past and present members of the circuit attended, and among those present were the Lord Chief Justice of England (Sir A. Cockburn), Lord Chief Justice Coleridge, and the Right Hon. W. N. Massey. Mr. C. G. Prideaux, Q.C., presided.

The office of Admiralty solicitor and registrar of public securities is to be abolished, and the duties are to be transferred to the Treasury.

The Judicial Committee of the Privy Council has decided, upon an appeal from Australia, that gold and silver mines are not conveyed in grants of Crown land in the colonies, unless the right to the minerals below the surface is expressly named.

Upon appeal it has been decided that the man Monck was properly convicted by the Huddersfield magistrates as a rogue and vagabond for holding a so-called "spiritualist séance," whereby he used subtle means to deceive. Barons Cleasby and Pollock agreed that the offence came within the Vagrancy Act; and Monck will, therefore, have to suffer three months' imprisonment with hard labour.

Judgment was given by the Irish Court of Exchequer Chamber, last Saturday, in a case in which a lady named Cecilia Mitchell, within three months of her death, had devised all her property, real and personal, to the Most Rev. Dr. Dorrian, Roman Catholic Bishop of Down and Connor, and to his successor in the bishopric, subject to some small bequests to relatives and a bequest of £2 annually to Dr. Dorrian for the purpose of masses to be said for the happy repose of her soul. The Judges unanimously, though on widely different grounds, decided that the bequests to Dr. Dorrian and his successor were void.

In the Court for the Consideration of Crown Cases Reserved, last Saturday, the case of James William Foster was heard. He was convicted of obtaining money by false pretences, selling as genuine tea sixteen packages of a compound of tea, sand, and other substances injurious to health. The question for the Court was whether the facts disclosed were sufficient to prove the defendant's guilty knowledge. The conviction was affirmed by the Court.

Charles Graham, alias Charles Lever, the man who deceived so many aspirants to the stage, and fraudulently obtained money from people whom he promised to engage as messengers, clerks, and so forth, was found guilty, at the Surrey Sessions, on Tuesday; and, it being his first offence, he was sentenced to only eighteen months' hard labour.

NEW BOOKS AND PUBLICATIONS.

NEW and POPULAR NOVELS.
Now ready, at all the Libraries, in 3 vols.
DIANA, LADY LYLE. By W. HEPWORTH DIXON.
TWO LILIES. By JULIA KAVANAGH.
ONE GOLDEN SUMMER. By Mrs. MACKENZIE DANIEL.
HER PLIGHTED TROTH. By Mrs. FRASER.
GLENCALM. By IZA DUFFUS HARDY.
HURST and BLACKETT, Publishers, 13, Great Marlborough-street.

EDUCATION. By Author of "Peep of Day."

1. **LATIN WITHOUT TEARS:** OR, ONE WORD A DAY. 8vo. 18mo. large type, 3s. 6d. "A very sensible little volume."—Public Opinion.
2. **READING WITHOUT TEARS:** A PLEASANT MANNER OF LEARNING TO READ. Part I. 8vo. 18mo. 2s. 6d. Part II. 18mo. 1s. 6d. Two Parts in One Volume, cloth antique, 5s.

THE IMPERIAL DURBAR AT DELHI: THE CHIEF HERALD READING THE PROCLAMATION.

THE IMPERIAL DURBAR AT DELHI: THE NIZAM OF HYDERABAD PRESENTING HIS "NUZZUR." Digitized by Google

THE IMPERIAL DURBAR AT DELHI.

We present some more complete Illustrations, following these already published, of the proceedings at Delhi upon the occasion of the splendid assemblage of Indian Princes and Ruling Chiefs, convened by Lord Lytton, Viceroy and Governor-General, for the solemn proclamation of her Majesty's new title as Empress of India. These Illustrations are again supplied by the Sketches of an esteemed correspondent, Lieutenant C. Pulley, of the 3rd Ghorkhas.

The large Engraving which occupies the two middle pages of this Number, shows the scene, on New-Year's Day, at the actual performance of the ceremonial, which took place, a few miles north of the city of Delhi, upon a superb canopied dais, erected for the occasion, decorated with flags and heraldic shields. A semicircular range of raised seats, under a canopy of corresponding design, stood on each side of the central dais, forming a grand amphitheatre, and was filled with the native Princes and Rajahs, all in gorgeous and glittering attire. It was an amazing display of rich variety in colours, gold, and jewels. The Imperial standard was hoisted, immediately after the reading of the proclamation, on the masts planted at the verge of the circle. There were seats for a large number of spectators at the back of the dais, which were occupied by many English Government officials, with their families and friends. The guard of honour, and the guns for saluting, were posted in front of the dais. Outside the circle were drawn up the troops, mustering 15,000, and consisting of six regiments of infantry deployed in front, with others in their rear, in line of quarter-columns; and of cavalry and artillery behind the infantry, with other batteries of artillery posted on each flank. The whole plan of this arrangement is shown by a "Bird's-Eye View," in the page Engraving in our present Supplement, for which we are also indebted to Lieutenant Pulley. The throng of native grandees and their attendants, with richly caparisoned elephants and horses, and with banners of all colours exhibiting a variety of devices, far exceeded any gathering to meet the Prince of Wales.

The Viceroy, who was accompanied by Lady Lytton and his daughters, with a brilliant suite, ascended the dais and took his seat on the Imperial throne. The heraldic trumpeters sounded a flourish, and Major Barnes, the Chief Herald, read the Imperial Proclamation in English; a translation in the Urdu language was read by the Foreign Secretary to the General Government of India. A salute of one hundred and one guns was fired by the artillery, and a *feu de joie* by the infantry. The Viceroy then delivered his speech, explaining the motives and consequences of this great political act. The National Anthem was played by all the military bands.

During several days before and after the Proclamation Day a long series of state visits were exchanged by the Viceroy with the native grandees and potentates of India, each of whom sojourned in his own separate camp on the plain, near the Viceregal Camp. They were guarded by detachments of their own troops; and our correspondent, as a military man, has been induced to sketch the curious diversities of figure, uniform, and equipment which he observed among these native soldiery. He has also furnished an Illustration of the scene in the Viceroy's tent, or Shamiana, when the young Nizam of Hyderabad came to present his "nuzzur," or complimentary gift, to the representative of the British Indian Empire.

The page Engraving of "Sketches at the Delhi Durbar" shows the appearance of different classes of native Indian troops. The African cavalry guard of the Nizam, consisting mostly of Somalis and Seedees, were under the command of Captain Ahmed Abdoolah, a native of Bagdad, and a very intelligent officer, who speaks English perfectly. These troopers are fine, smart-looking men, of whom the Nizam had brought only fifty to the Durbar; they wear a coat of dark blue with white facings, a scarlet waistcoat, a fez cap with long black tassel, breeches, and boots; they are mounted generally on Persian horses. Next to these, at the top of the page, stands beside his horse a native officer of the 3rd Bengal Cavalry. Some of these are very fine fellows, Sikhs, Pathans, Afghans, Afreedees, and others. Their uniforms differ, but they all wear the "puggree," which, wound round the head in Puthan fashion, one end falling down, is a very becoming head-dress; most of them wear also the "cummerbund." When in full uniform and mounted, with lance and pennant, they make rather an imposing array. The Sappers and Miners and the Punjab Pioneers are next to be noticed; these last are dressed in drab, with chocolate facings, and very useful men they are. The body-guard of the Princess of Tanjore wear a uniform resembling that of the old Sepoys of the East India Company's service, with the immensely big head-gear, in which, it was said, the Sepoy could carry three days' rations. These Tanjore guardsmen are still armed with old flintlock muskets, and their accoutrements seemed to be much in want of cleaning. Two soldiers, respectively of the Madras and the Punjab Infantry, are represented below, with an example of the head-dress of the Bengal Cavalry. The sketch taken outside the tent of the Rajah of Sumthar has not such a proper military aspect. The very tall man, wrapped in a long robe of worked silk, who stands in the middle, is an officer in the Rajah's cavalry. The man standing at his right hand, and holding a mace, is a "chobedar," or Gold-Stick in waiting, at the Rajah's Court; his dress is very bright and gay. These and the other men belonging to the Rajah's service were much at a loss for something to do, and were glad to have their portraits taken.

The Viceroy's elephant howdah, manufactured by Messrs. Hamilton and Co., of Calcutta, was a magnificent object. It was adorned with gold, silver, and purple velvet, and displayed the insignia of Royalty. In front stood the figures of Britannia and Minerva, each holding a spear; the former also bearing a cornucopia, the latter with an owl on her helmet. The four feet of the howdah, in carved silver, were formed to represent four animals, the British Lion and Bengal Tiger, couchant, the Unicorn, and the Dragon. The Imperial Crown, in purple velvet and gold, was placed between Minerva and Britannia; below it was the gold Star of India, with St. George and the Dragon. The Royal Arms, in gold on a silver ground, shone on the panels, and the rose, shamrock, and thistle were among the other decorations. Lord Lytton, sitting in this howdah on his way to the Durbar, was sheltered from the sun by a gorgeous umbrella and fanned with peacock-feathers.

Mr. Samuel Morley, M.P., who presided at the fifth annual meeting of the Provident Association of Warehousemen, Travellers, and Clerks, in the Memorial Hall, Farringdon-street, remarked on the tendency of young men of the present day to spend their leisure time in frivolous amusements.

A scheme for the erection of a new school of art in Manchester, on a site which has been secured in Cavendish-street, Oxford-road, was discussed at a meeting yesterday week. Lord Derby offered a donation of £500 to the building fund. The chairman, Mr. F. W. Grafton, stated that £15,000 more would be required to erect the buildings suitable for a school of art. Resolutions were adopted pledging those present to aid in any further efforts which might be made to carry out the work.

THE EIGHTY-ONE TON GUN.

The shooting trials of this huge piece of ordnance at Shoeburyness were resumed on Thursday week, when one shot was fired at the 47-inch target: and a shell was afterwards sent through a single eight-inch plate, merely to see if the shell would pass it without breaking up. Among the officers present were Lieutenant-General Sir Lintorn Simmons, Inspector-General of Fortifications; Major-General Campbell, C.B., Director-General of Artillery; Colonel Stokes, R.E., Colonel Nugent, R.E., Colonel Younghusband, R.A., Admiral Boyes, Admiral Houston Stewart, Colonel Goodenough, Captain Cleveland, R.N., Admiral Fellowes, Commander Hall, R.N., Colonel Colville (who represented the Duke of Edinburgh), Major Alderson, R.A., Major-General Sir John Aclay, R.A., Colonel Inglis, Colonel Frazer, Colonel Smyth, Captain Vivian, Assistant-Secretary for War; Mr. Burnaby, Chief Constructor for the Navy; Mr. Frazer, the inventor of the gun; Captain Jones, secretary to the Heavy Gun Committee; Captain Sale, R.E., and several other officers. In addition to these, the military representatives of most foreign Governments were on the ground. On account of the limited accommodation afforded in the splinter-proofs, not more than 500 tickets of admission were issued by the War Office. Most of the spectators came down by a special train of the London and Southend line.

The arrangements for the day were under the direct command of Colonel Fisher, R.A., the Commandant, who was supported by Colonel Curtis, R.A., Chief Instructor; Colonel Godby; Major Machell, Brigade Major; and Captain Goodeve, Garrison Adjutant. The handling of the gun was, as usual, left to Captain Ellis, R.A., assisted by Captain Watkins, Sergeant-Major Tristram acting as No. 1.

The target, which was constructed at the works of Sir John Brown and Co., of Sheffield, consists of four 8-inch iron plates, with 5-inch intervals between them, filled in with teak, the plates being fastened together by bolts 3 in. in diameter. The teak filling between the armour-plates is kept in position by old armour-plates and strutted piles at the ends of the target, and by a very heavy plate on the top. The piles and struts, which are 15 in. by 15 in. square, are anchored into a concrete foundation by means of huge iron bolts. There are three tiers of eight whole timber piles at intervals of 10 ft. and 8 ft. The massive framework of great bulks is strutted against these piles by diagonal and transverse timbers, the joints of which are strengthened by angle-plates of inch iron, held by inch bolts. Under the directions of Captain Ellis, a white mark was placed on the target 3 ft. 9 in. from the bottom and 6 ft. 5 in. from the left side, and on this the gun was laid. In front of it were the wires for measuring the velocity of the projectile. Between these and the gun was placed a screen of calico to test windage. The target was designed by Colonel Inglis, R.E.

To test the power of the gun against this target at a range of 120 yards, the gun was loaded with 370 lb. of pebble powder, in the form of 15 in. cubes, and a studded Palliser shot 42 in. in length, fitted with a copper gas-check, weighted with sand to 1700 lb., and plugged.

The scene at the firing of the gun, about twenty minutes past eleven, is the subject of the large Engraving which forms our Extra Supplement. The report was not so loud as might have been expected, and the blow of the shot on the target made very little noise. But the result fully came up to the expectations of the Heavy Gun Committee. The projectile struck the left side of the target, 2 ft. 8½ in. from the bottom and 6 ft. 3½ in. from the side—the shot dropping 13 in., an effect which is accounted for by the gun not "kicking up," as it is technically called, on being fired. The striking velocity was 1496 ft. per second—the energy being, therefore, 26,400 foot-tons, or 526 tons to the square inch. On examination of the hole made in the target it was ascertained that the shell had penetrated three of the iron plates and the teak, and buried its head about half way in the fourth, the projectile itself apparently breaking up in the target, the base being split into seven pieces. The further plate was bulged out 7 in. and cracked in three places. One of these cracks resembled the half of a circle, and the other two were jagged rents from right to left of it. The longitudinal sleepers in rear were driven back by the blow and shivered in pieces, while three of the bolts fastening them were forced out 3½ in. and two 2½ in. The concrete platform in rear of the whole was cracked with the jar, but in other respects the target appeared to be uninjured. On measuring the hole made by the projectile it was found that the extreme diameter was 20½ in. by 20½ in., and the internal diameter was 16½ in. in a horizontal and 17½ in. in a vertical direction. The flight taken by the shot showed a vertical deviation of about 15 in., and a lateral deviation of 3 in. The result was considered highly satisfactory, as the penetration of the shot was greater than the width of the target, the force exercised in bulging out the further plate 7 in. being sufficient to have forced the nozzle of the projectile clean through it. The estimated total penetration of the projectile is 49 in., its base lodging at the top 5 in., and at the bottom 7 in., from the outside of the first plate. The automatic gas check parted from the base of the shell on penetration, and fell a few yards to the front of the target.

One of the three-inch bolts of the target, weighing fully a dozen pounds, fell directly in the rear of the gun itself, and a portion of the base of the shell fell near the landing-stage, 200 yards from the gun, and buried itself in the ground. Smaller fragments were scattered close to the target.

The form of the target, and the effects of the shot, are shown in some of our Illustrations. In the afternoon, when a shell was fired at an eight-inch plate, it tore the plate asunder, and carried it away in two pieces, the shell bursting a few hundred yards beyond.

The gun has been taken back to Woolwich Arsenal for some alterations.

A circular has been issued from the Privy Council Office to all local authorities, urging the importance of strict inquiry as to the sanitary condition of the stock in their districts.

That portion of the new extension of the North-Eastern which lies between Leyburn and Askrigg has been opened for passenger traffic. The line, when completed, will extend to Ilawes, where it will meet the Midland branch from Hawes Junction on the Settle and Carlisle line.

Mr. Walter, M.P. presiding at a temperance conference at Newbury, strongly advocated the brewing of a lighter and less heady beer, resembling that of Germany, and the establishment of cafés after the model of those on the Continent, as the best antidotes to drunkenness.

The United Kingdom Alliance has received payment of a legacy of £600 from the executors of the late Mr. Edward Jones, of Wickwar, in Gloucestershire. One who knew him writes that in "his younger days he was a working man, but by industry and strict economy he realised sufficient to support himself in his old age, to leave £600 to the United Kingdom Alliance, and £300 to the National Temperance League. He was a member of the Church of England, and a staunch teetotaler for the last thirty-five years of his life."

ROYAL INSTITUTION LECTURES.

METALS AND THEIR USES.

Dr. C. R. Alder Wright, in his third lecture on Metals and their Chief Industrial Uses, given on Thursday week, gave experimental illustrations of the different powers of conducting heat and electricity possessed by different metals, which are much modified by impurities and varieties in their physical condition. Thus, the principle of the Davy lamp is due to the wire gauze cooling down the inflammable gases emanating from the flame, and the action of Siemens's pyrometer is due to the electric conductivity of metals varying with their temperature. The expansion of metals was next considered. The increase in length undergone by several of the more important metals was shown in averages obtained by various experimenters. 10,000 units of length at the freezing-point are increased at the boiling-point, in the case of mercury, by 180; cadmium, by 33 units; tin, 24; silver, 20; copper, 18; gold, 15; iron, 12; platinum, 9. The different expansion of metals is applied in making compensating pendulums; and the force has been employed mechanically for restoring the perpendicularity of leaning walls and other purposes. After giving experiments on the application of these properties, Dr. Wright adverted to the fusion of metals. Mercury is liquid at 39 degrees; tin at 230; lead, 330; silver, 1020; copper, 1090; gold, 1100; iron, 1500; platinum, 2000, centigrade. Alloys melt at a lower temperature than that calculated from their constituents in regard to fusing. Dr. Wright said that some metals, and especially alloys, expand in the act of solidifying, as water does; they thereby perfectly fill a mould, and give sharp castings. In large iron castings the grain of the metal must be specially considered when great strength is required, which is obtained by mixing different qualities. Illustrations were given of the different grains of pig-iron, and also of the processes of casting ingots, bell-founding, and casting stereotype-plates; and specimens of Sir Joseph Whitworth's "fluid-pressed steel" were shown. As a general rule, slow cooling makes metals softer, and a process which is termed annealing is used for wirework and rolled sheets. Dr. Wright considered the electric relations of the metals, showing how different electric states are generated in them by the action of heat or chemical agents under certain conditions, as exhibited in the thermo-electric battery, and in the results of Faraday's researches in chemo-electricity. Many interesting examples were exhibited of electrotyping, gilding, silvering, and other manufactures.

VORTEX MOTION.

Professor Osborne Reynolds, of Owens College, Manchester, began his discourse at the evening meeting, on Friday, the 2nd inst., with remarks upon the failure of mathematicians in their endeavours to discover the laws of the motion of fluids. Drawing a disc through water, he showed that the water moved round it, and drawing a plate through water obliquely, he said he felt a pressure more on one side than the other, which represents the important principle of the screw propeller; yet we have no means of calculating the resistance or knowing in what way the water moves to let the plate pass. Of the internal motion of a homogeneous fluid we can see nothing. This has baffled the mathematicians; and they have not availed themselves of analogous movements in nature, in which at last a clue has been found. About fifteen years ago Helmholtz mathematically investigated the properties of smoke-rings; Sir William Thomson suggested that these rings are the type after which the molecules of solid matter are constituted; and Professor Tait invented a simple and perfect process of producing them at will, which Professor Reynolds exhibited in a most interesting manner, projecting the rings across the theatre in the beam of the electric lamp. In 1851 the late Mr. Henry Deacon showed that minute vortex rings may be produced in water by projecting a drop of coloured water from a small tube; but it was not till four years ago, while Professor Reynolds was studying the action of the screw-propeller, that he was led to use colour to try and explain the anomalies which he met with; and by a series of experiments he obtained the results which he proceeded to explain and illustrate by means of a large glass trough illuminated by electric light. He observed that the action of the propellers was greatly affected when air was allowed to get down to the blades, and that a bubble of air will rise rapidly through water; and that when it was introduced behind the vane it extended itself into two long parallel columns, which showed little or no tendency to rise, and in which there was evidence of a rotational motion; they were, in fact, the central line of the systematic eddies behind the vane. Here was an explanation of the nature of the motion caused by an oblique plate. A cylindrical band of vortices were continually produced at the front of the plate, falling away behind in an oblique direction. This vortex action led to experiments with flat discs, and the Professor obtained similar results; employing coloured water, by which means the vortex rings were rendered visible, the part they play in almost every form of fluid was thus made very evident. Any irregular solid moving through water must from its angles send off similar lines of vortices; and as we ourselves move about we must be continually producing vortex rings and bands in the air. So, if we colour the surface of a vessel full of water and let drops fall into it, rings are produced, which descend two or three feet. The subject was very strikingly illustrated by the production of air rings and of coloured rings in the glass trough, and other interesting phenomena. The ease with which these rings move in water proves that they experience no resistance but what may be caused by their construction. Our limited space prevents us going further into detail respecting the various interesting points which arose during these investigations, such as why a solid body should experience resistance in fluids, which was shown to be due not only to surface friction, but chiefly to rigidity of form. The elasticity of vortex rings was specially noticed. Now that we have got the clue, by means of coloured water, the aid of mathematics is necessary and the theory of fluid motion, so important in navigation, may in time be placed on the same footing as other branches of mechanics.

FLORENCE BEFORE THE MEDICI.

Mr. John Addington Symonds gave the first of a course of three lectures on Florence and the Medici on Saturday last. After remarking how the Medici raised themselves from a plebeian station to sovereignty, and how intimately the most brilliant epoch in the history of the arts and literature of Italy is connected with them, Mr. Symonds alluded to the despotism which characterised the time of the Renaissance—nearly all the commonwealths being ruled by petty tyrants. This disunion, however, favoured democracy, and permitted the meanest citizen to attain to the highest rank; and, although from it came the civilisation of the modern world, it caused the political ruin of the nation, by the irruption of foreigners in the sixteenth century. Despotism was the end to which the Italian commonwealths tended, but Florence was the last to succumb. Having commented on the rise of free burghs in Italy out of the remains of Roman municipalities, and shown how, through the weakness of the emperors, the cities became sovereign states, the lecturer described the formation of two

great factions—the Guelf, which embraced the burgher population, and was headed by the Pope, and the Ghibelline, consisting of the nobles, which followed the Emperor. The Church prevailed, and the house of Hohenstaufen fell in 1266; after which time Guelf came to mean constitutional autonomy and Ghibelline the rule of the few over the many. The importance of Florence began under the Papacy of Innocent III. (1198–1216). She narrowly escaped destruction after the fatal battle of Montaperti, in 1260; but, after many struggles, the Guelfs finally triumphed in 1321. The political constitution, which consisted of six districts, each headed by two ancients, who ruled in concert with the "Potestà" and the Captain of the People, was modified in 1266 by the establishment of guilds, who became the lords of Florence, and every inhabitant must enroll himself in one of these to qualify himself to act as a burgher. The bitter opposition of the nobles was vain, and led to further repression, and the people became supreme. After giving some interesting details, Mr. Symonds described the gradual rise of a wealthy oligarchy and the consequent failure of a state-system, which answered very well during peace, but was not fitted for political conflicts or war. Having given a glowing description of Florentine industry and commercial prosperity, Mr. Symonds noticed the rise of the Degli Albizzi, the dictatorship of their chief, Maso (1393–1417), and the first appearance of Giovanni de' Medici on behalf of the over-taxed people in 1427. By devotion to banking Giovanni rose from poverty to great wealth; and thus, aided by his personal character, acquired much political influence. In conclusion, allusion was made to the intellectual achievements of Florence; as shown by Dante, Boccaccio, and Petrarch in literature; by Arnolfo, Orcagna, and Brunelleschi in architecture; by Giotto, Masaccio, and Ghirlandajo in painting; and by Donatello and Ghiberti in sculpture. Mr. Symonds noticed the beginning of the influence of the Medici in the protection given by Salvestro to the handicraftsmen in the rebellion of the ciompi, or wool-carders, in 1378.

STRUCTURE AND FUNCTIONS OF THE LIMBS.

Professor A. H. Garrod, F.R.S., in his fourth lecture on the Human Form, on Tuesday last, resumed his description of the joints of the limbs and their ligaments, referring to the influence of pressure in keeping them in place, and to the importance of the supply of lubricating fluid, especially to the elbow and knee joints, adding that the affection termed "housemaid's knee" is due to inflammation of the synovial sac. After alluding to the distinction of man from other animals in having his body supported by his lower limbs during locomotion, and his upper limbs free for prehensile and tactile purposes, the Professor proceeded to give a fully illustrated account of the structure of the upper limbs, consisting of the shoulder-girdle (the collar-bone and the blade-bone), the upper-arm, the fore-arm, and the hand. He pointed out how in the upper-arm versatility of movement is obtained at the expense of power, through the lever being placed so near to the fulcrum; and he commented on the elbow as a most superb piece of mechanism for giving a double motion—that of rotation, with power of lifting, by means of a cup-and-ball joint and a screw-hinge, which was well exhibited in a working model. After a detailed description of the structure of the hand and wrist, composed of carpal and metacarpal bones and phalanges, the lecture was closed with remarks on the mechanical powers of the hand and the use we make of it as a means of expressing our various emotions.

Dr. Wm. Pole, F.R.S., will begin a course of six lectures on the Theory of Music on Thursday next, the 15th inst. Next Friday Professor Guthrie will give a discourse on Solid Water.

An interesting lecture was delivered at the London Institution, last week, by Mr. George Meredith, on the Idea of Comedy.

In lecturing at the Royal United Service Institution, yesterday week, Major-General Sir F. Goldsmid urged that our having charge of 40,000,000 of subjects professing the faith of Islam gave us a great responsibility as regarded Eastern affairs.

The free lecture at South Kensington, last Saturday evening, was given by Professor Reynolds, on Vortex Motion.

Professor Leone Levi gave, last Saturday afternoon, the third of a course of lectures to members of working men's clubs and institutes, in the large theatre of King's College. The subject of the address was the Budgets of the Working Classes. Mr. Mundella, M.P., who took the chair, attributed the decline of pauperism, in the face of the depression of trade, to the greater providence of the working classes, contending that their tastes and habits had improved.

The Victoria (Philosophical) Institute held a meeting on Monday evening—Dr. O. Brooke, F.R.S., in the chair. After the election of new members, Mr. David Howard, F.O.S., read a paper upon the Structure of Geological Formations as an Evidence of Design; after which a paper by Principal Dawson, F.R.S., on the Recent Discovery of Numerous Flint Agricultural Implements in America, was read.

At the first ordinary meeting of the Society of Engineers, on Monday, Mr. Thomas Cargill, the president for the year, delivered his inaugural address. In the course of his remarks he commented upon a variety of topics of public interest, railway accidents, the unsheltered condition of our coasts, and the overflow of the Thames being amongst these.

The proposed reform in the teaching of orthography was the subject of discussion at the rooms of the Social Science Association on Monday evening. The Rev. Dr. Rigg presided, and two papers suggesting some improvements in the present system were read by Messrs. E. Jones and W. Storr.

Under the presidency of Lord Coleridge and under the auspices of the Trades Union Congress, Sir J. Stephen lectured on Tuesday evening upon our penal code. A resolution calling upon the Government to take steps this Session to codify the criminal laws was moved and seconded by the secretaries of two trade unions, and supported by Earl Fortescue, Lord Justice Bramwell, and other gentlemen. It was passed unanimously.

An address in the interests of Disestablishment was given on Tuesday in the Congregational Memorial Hall by the Rev. J. G. Rogers.

At the close of the winter term of the Army Medical School at Netley, on Tuesday, Sir Garnet Wolseley assisted in the distribution of prizes. The "Sir Ranald Martin" gold medal was won by Dr. Moorhead, of the Indian army, in competition with nine each of the British and Indian armies and eight of the Royal Navy. Sir Garnet Wolseley characterised perseverance and unselfish devotion as the secret of success in life, and ridiculed the tribe of discontented grumblers who harped on their grievances in the clubs and in society.

The first of a series of lectures on practical education in music was delivered by Mr. E. Pauer, on Tuesday, in the theatre of the South Kensington Museum. The aim of this series of lectures is to point out the most practical way of teaching music; to indicate the readiest manner of recognising the requirements of the pupil, and of attaining an entirely

satisfactory result. The best means of working out the scheme would, according to Mr. Pauer, be to carefully ascertain the class of music for which each pupil was best fitted by nature, and to develop the natural speciality. Many persons had a natural faculty for music which remained throughout life undeveloped; and the object of the careful teacher should be to search out such latent power, and then to cultivate the pupil, who was perhaps only diffident out of a reputation for incurable dulness. He deprecated over-teaching, and too much care given to technical facility, which was often present in a pupil who had none of the higher musical feeling. After some further hints in the above direction, given alternately to teacher and pupil, Mr. Pauer concluded by playing on the piano a selection of music from the most popular composers.

MUSIC.

THE CRYSTAL PALACE.

The event of last week was the Mendelssohn celebration, at Saturday's concert, in commemoration of the birth of the composer, on Feb. 3, 1809. Saturday's programme comprised works drawn from different periods of his career, including one—from the numerous manuscripts left at his death—which had never before been given here. This was an adagio in E flat, from a symphony for stringed instruments composed in 1823, the twelfth of a series of such works, all produced before the symphony for full orchestra, now known as No. 1. The adagio referred to is full of calm, melodious beauty, but is not marked by any of that characteristic individuality that is to be found in some of the composer's works immediately following it. The piece includes some important incidental passages for violin solo, and these were finely played by Herr Joachim, who made his first appearance this season on the occasion. His chief performance, however, was in the noble violin concerto, which he gave, as often before, with grand tone and style and brilliant execution. The reception of Herr Joachim was of the most enthusiastic kind.

The concert opened with the overture composed for a German performance of "Ruy Blas," a brilliant prelude, which has much analogy with the style of Weber, and was well contrasted by the sombre romanticism of the grand symphony in A minor, known as the "Scotch Symphony" from its embodying the impressions received by Mendelssohn in 1829—long before its composition—during his tour in the Scottish Highlands.

The vocal music at Saturday's concert consisted of the air "Then shall the righteous," from "Elijah," well sung by Mr. E. Lloyd, who also gave the chamber song "The Garland," with still greater success; and three part-songs—"For the New Year," "The Wandering Minstrel," and "Remembrance"—by the Crystal Palace Choir, whose most successful display was in the first of these pieces. The orchestral performances were of the usual high order, and Mr. Manns conducted with his well-known skill.

This week's Monday Popular Concert brought back Herr Joachim, who met with a reception as enthusiastic as that with which he was greeted at the Crystal Palace concert of the previous Saturday afternoon. The great violinist displayed his exceptional qualities of tone, style, and mechanism in the leading parts of Beethoven's "Rasoumowski" quartet in C major, and that by Haydn in G, from op. 64—his solo performance having been in the unaccompanied "Chaconne," from the fourth of Bach's sonatas for violin solo, an encore of which was replied to by playing the "Bourrée" from the second sonata of the same set. Mdlle. Maria Krebs played, with much effect, Clementi's pianoforte sonata in C (from op. 34); and Mr. E. Lloyd sang, with taste and expression, Beethoven's "The Quail," and a graceful new song, "When thou art nigh," by Gounod. Mr. Zerbini was the accompanist.

The first of three concerts of chamber music, given at Langham Hall, by Mr. Carrodus and Mr. Edward Howell, took place on Tuesday evening, when Beethoven's second quartet (in G) and that by Mendelssohn in D (No. 1 of op. 44) were finely played, led by Mr. Carrodus in association with Mr. V. Nicholson (second violin), Mr. Doyle (viola), and Mr. E. Howell (violinello). The special powers of the first and last named of these artists were displayed with high success, respectively, in Bach's "Chaconne" for violin alone, and a sonata by Boccherini. Mr. E. Lloyd was the vocalist, and Mr. H. Thomas the accompanist.

The London Ballad Concert of Wednesday evening included a second selection of old English ballads, in consequence of the success of a similar programme on Jan. 24.

The Royal Albert Hall Choral Society gave fine performances, on Thursday week, of Mendelssohn's "Hymn of Praise" ("Lobgesang") and Rossini's "Stabat Mater." The three important symphonic movements of the first work were excellently given by the orchestra, and the vocal solos were effectively rendered by Misses Anna Williams and L. Braham and Mr. Sims Reeves. In the "Stabat Mater" the soloists were Mesdames Lemmens-Sherrington and Antoinette Sterling, Mr. Cummings, and Mr. R. Hilton. The delivery of the duet "Quis est homo," by the two ladies, and of the aria "Cujus animam," by Mr. Cummings, produced a special effect. Mr. Barnby conducted and Dr. Stainer presided at the organ.

The concert given by Mr. William Carter at the Royal Albert Hall, on Thursday evening, included the performance of his own cantata "Placida," and Mozart's "Requiem," the latter of which was given for the first time there. The solo singers announced were Mesdames Lemmens-Sherrington and Patey, Mr. E. Lloyd, Mr. W. H. Monk, Mr. L. Winter, and Signor Foli.

"The Messiah" is to be given by the Royal Albert Hall Choral Society on Wednesday next (Ash Wednesday), conducted by Mr. Barnby. The solo singers announced are Mesdames Lemmens-Sherrington and Patey, Mr. Sims Reeves, Mr. Shakespeare, and Signor Campobello.

Mr. Kuhe's seventh annual Brighton Festival opens on Tuesday and closes on Feb. 24. The performances will include "Acis and Galatea," a new cantata by Mr. F. Clay, entitled "Lalla Rookh;" Verdi's "Requiem;" "The Creation;" Madame Sainton-Dolby's cantata, "The Legend of St. Dorothea;" Mr. J. F. Barnett's cantata, "The Ancient Mariner;" "The Messiah" and several miscellaneous selections. The orchestra—headed by M. Sainton and Mr. Viotti Collins as principal violins—is numerous, and comprises many of the best instrumentalists of our opera bands. Mr. Kuhe will conduct, with the exception of some pieces to be directed by Mr. Arthur Sullivan, among which will be his symphony in E and his music to "The Merchant of Venice." Many eminent vocalists are engaged, including Mesdames Lemmens-Sherrington and Patey, Mr. Sims Reeves, Mr. E. Lloyd, Mr. Cummings, and Signor Foli; and pianoforte solos will be contributed by Madame Arabella Goddard and Mr. Kuhe.

The Philharmonic Society will again—this year, as last—give two morning concerts in addition to the usual eight

evening concerts. The dates of the latter are Feb. 22, March 8, 22, April 16, 30, May 28, June 25, and July 9; the morning performances being fixed for May 14 and June 11. Among the many interesting works to be given will be the new symphony by Johannes Brahms, which has recently attracted so much attention in Germany.

Madame Nilsson has received, at Vienna, a magnificent bracelet from the Emperor of Austria, and has been named singer to the Court.

An illustration of the new Imperial Court Theatre in Vienna is published in last week's *Builder*, which says it is designed in the style of the Italian Renaissance, covers an area of nearly half an acre, and is divided into a square centre building, flanked by two one-storied wings, and from which projects towards the façade a nearly semicircular rotunda. The construction was begun in 1875, and may take up another four or five years. The estimated cost is £500,000.

Mr. George Tolhurst, whose death was recently recorded, was chiefly known by his oratorio of "Ruth," which has been performed in London and elsewhere, and found many admirers. A new edition of this work, with the composer's latest revisions, is about to be published in a cheap and portable form. We believe Mr. Tolhurst left many works in manuscript in various elaborate forms of the art.

THEATRES.

It is a transition time with theatrical managements, and few important novelties require serious registration. The little comedy at the Globe, entitled "Squabbles," is a humorous two-act play by the late Mr. Stirling Coyne, originally entitled "My Wife's Daughter." The revived drama plays closely, and is likely to keep its place for some weeks. At the Opéra Comique Mr. H. J. Byron's new burlesque of "The Bohemian G-Yurl and the Unapproachable Pole," has a lively vein which will bear repeated working. By the latter title the author intends Thaddeus, here amusingly represented by Miss E. Farren; Devilshoof also finds a capital representative in Mr. E. Terry. Miss Kate Vaughan in the part of Arline gained great applause in a duet and dance with Miss Farren. Altogether, the new burlesque abounds in reasons for a prolonged success. The children's pantomime at the Adelphi was performed, on Saturday, for the first time since its production, as an evening entertainment, the part of Clown being undertaken on a sudden notice by Master Lauri, who proved a most efficient substitute for his predecessor, disabled by an accident, unconnected however with theatrical duty. "The Shaggy-raun" followed as the second piece. The house was crowded, and the performances greatly applauded.

At the Criterion, another adaptation by Mr. W. S. Gilbert of "Le Réveillon" has been produced under the title of "On Bail," which may be at once pronounced an improvement on "Committed for Trial." The supper scene has been added, forms an act by itself, and largely increases the general fun. Besides, it introduces to us Miss Fanny Josepha in a new character, the Duke of Darlington, which will much enhance her reputation as a dramatic artist. It is, indeed, an exquisite portrait of aristocratic condescension. The value of the revival is greatly increased by the careful acting of most of the parts. Yet something remains to be done; the humour is frequently too robust, and might be subdued with advantage.

The farewell benefit to Mr. John Parry took place, at the Gaiety Theatre, on Wednesday. The performances consisted of Sheridan's "Critic," supported by Messrs. Charles Mathews, Toole, Terry, Soutar, Royce, Maclean, and Byron; and Miss Litton, Miss E. Farren, Mrs. Leigh, and other members of Mr. Hollingshead's company. Mr. John Parry, in the language of the playbills, "endeavoured to recall reminiscences of bygone days under the title of 'Echoes of the Past.'" Mrs. German Reed and her company then performed the musical comedietta entitled "Charity Begins at Home." Mr. John Parry has been many years before the public, and merited the patronage of the intelligent. His musical entertainments, in particular, have been remarkably characteristic, and have even partaken of a peculiar quality of genius, which places him in the first rank of dramatic imitators.

A poor woman, living in Red Rock-street, West Derby-road, Liverpool, was recently informed by a lawyer's letter that a relative in Cheltenham, from whom she had no expectation whatever, had died and left her £70,000.

The annual meetings of the members of the Manchester and the Liverpool Chambers of Commerce were held on Monday. At the former the Eastern Question was considered from a commercial point of view, the principal speakers being Mr. E. Ashworth, who presided, Mr. Jacob Bright, M.P., and Mr. Hugh Mason; and at the latter the condition of trade and commerce generally was the most important subject, the chief speakers including Mr. Rathbone, M.P., and Mr. Samuel Smith, president of the Liverpool Chamber.

A good filter is a great blessing to a household. Mr. George Cheavin, of Boston, Lincolnshire, obtained at the Centennial Exhibition, Philadelphia, a first-prize medal and diploma of honour for his "rapid water-filter," no other prize or award having been given to any other exhibitor of filters. The following reasons (valid ones, it must be confessed) were assigned for the award:—"Firstly, rapidity of filtering process, especially in its application to river, rain, lake, or pond water, however foul, effectually relieving it of all impurities and organic matter; secondly, simplicity of construction; thirdly, facility with which cleaned; and, fourthly, durability." About thirty gold and silver prize medals and nearly a hundred first-class prizes in money have been awarded to this filter; and in every competition—beginning with the London International Exhibition of 1851—it has obtained the first, in many cases the only, prize given for filters.

An address was, yesterday week, presented to the Lord Lieutenant of Ireland by the council and members of the Irish Rifle Team Association, congratulating his Grace on his acceptance of office and praying his support for the organisation. The Duke of Marlborough, in reply, assured the association of his lively interest in its welfare. Lord Belmore and several other Irish peers have signed a memorial in favour of an application to admit the members of the association to compete for the Queen's prize at Wimbledon.—His Excellency, on Saturday afternoon, visited Christ Church Cathedral, now nearly completed, and the new Synod Hall, built by Mr. Roe. On this occasion the covered bridge connecting the cathedral with the hall was opened for the first time, and his Grace, who was accompanied by the Duchess of Marlborough and other members of his family, was conducted over the cathedral, the crypts of which were illuminated with coloured lamps.—The Lord Mayor of Dublin entertained the Lord Lieutenant on Tuesday night at a dinner in the Mansion House. About 700 gentlemen were invited to meet his Grace, including many of the nobility and gentry, the Judges, and the heads of the various professions.

THE IMPERIAL DURBAR AT DELHI.

A SKETCH AT THE DELHI DURBAR.

THE VICEREGAL HOWDAH.

GENERAL BIRD'S-EYE VIEW OF THE IMPERIAL DURBAR AT DELHI.

THE CHURCH.

PREFEMENTS AND APPOINTMENTS.

Andrews, Robert, to be Chaplain of Hanwell Lunatic Asylum.
 Arncliffe, Henry Thomas; Succentor of Salisbury Cathedral.
 Arnott, Arthur P.; Incumbent of St. James's, Muthill, Perthshire.
 Coffin, B. C.; Vicar of Northallerton.
 Green, William Graham; Rector of Mavesyn Ridware, near Rugeley.
 Coulcher, George Bohun; Vicar of Lymington with West Hythe, Kent.
 Cook, J. S.; Vicar of Wobley.
 Cruikshank, E. R.; Rector of West Hackney.
 Daubeny, John; Precentor of Salisbury Cathedral.
 Dewe, George Downing; Rector of Felthorpe, Norfolk.
 Donaldson, A. B.; Archdeacon of Maritzburg, Natal.
 Drummond, Arthur Hishop; Vicar of All Saints', Boyne Hill, Berks.
 Edwards, H. Powell; Honorary Canon of St. Nicholas in Llandaff Cathedral.
 Edwards, Canon Wynne; Vicar of Llanrhadr.
 Horsley, John William; Chaplain of the House of Detention, Clerkenwell.
 Lewis, David, Rector of Trawsfynydd; Rector of Llangymlyw.
 Lindsay, John; Incumbent of St. Mary's, Dunkeld, Perthshire.
 Luce, J. J.; Vicar of St. Nicholas, Gloucester.
 Malaher, William Ernest; Rector of Weston Turville, Bucks.
 Margoliouth, Moses; Vicar of Little Linford, Bucks.
 Monington, Thos. Rateshall; Rector of Letcombe Bassett, Berks.
 Phipps, John Thompson; Assistant-Chaplain of Milbank Prison.
 Powell, Robert Walter; Minister of Holy Innocents', Hornsey.
 Sidebottom, J. S.; Vicar of Aymestrey, Herefordshire.
 Swayne, Robert George; Chancellor of Salisbury Cathedral.
 Tower, Charles; Prebendary of Gillingham Major in Salisbury Cathedral.
 Vansittart-Thornton, Augustus; Rector of St. Mellion, Cornwall.
 Wagstaff, J., Curate of Stanhope; Vicar of Bookhope.—*Guardian*.

Archdeacon Stow, who is taking great interest in the proposed separate diocese for Nottingham and Derby, writes to say that already £4500 has been subscribed towards the object, £1000 having been sent by the Duchess of Cleveland.

The Bishop of Manchester appeared on the stages of the Theatre Royal and Prince's Theatre, in that city, yesterday week, and addressed the members of the companies upon the principles which should guide them in seeking to elevate their profession.

The Dean and Chapter of St. Paul's have granted the use of the cathedral to the Infant Orphan Asylum, Wanstead, on Wednesday, May 9, for a special service to celebrate the jubilee of the institution, when the Lord Mayor and Sheriffs, with several of the Aldermen, have promised to attend.

The fine old parish church of Tavistock, already so grand in its architecture and internal decoration, has received another addition to its beauty. This consists of a four-light stained-glass window, erected by public subscription to the late Mr. Hornbrooke Gill, thirty-seven years a magistrate of Tavistock. It has been executed by Messrs. Mayer and Co., of Munich and London.

The Bishop of Winchester opened a series of special mission services at Bournemouth last Saturday. In his address he cautioned the clergy especially against the danger of religious excitement and self-adoration, and said that, while lamenting the unhappy divisions in the Church, there was some palliation in the fact that they were the outcome of religious zeal.

A beautiful stained-glass west window, executed from the designs of Mr. Thomas Boddington, of Gunnersbury Lodge, by Messrs. Heaton and Butler, has been lately presented by him to the parish church of St. Mary, Ealing. This is so remarkable a work that it is to be regretted that its elevated position should not allow its beauty of expression and detail to be as fully appreciated as in the case of the five windows of the chancel, also from the designs of the same distinguished amateur.

A telegram, dated Auckland, New Zealand, Feb. 2, was received by the Bishop of Lichfield, on Saturday last, Feb. 3, reporting that the election of the Rev. John Richardson Selwyn to be Bishop of Melanesia was confirmed by the General Synod of the Church in New Zealand on Jan. 26; and that the day appointed for his consecration was Sunday, Feb. 18. It is proposed to hold a simultaneous service in Lichfield Cathedral, at eleven p.m., on Saturday, Feb. 17, New Zealand time being between eleven and twelve hours in advance of Greenwich time.

The Bishop of London, yesterday week, consecrated the new parish church of St. Mary, Whitechapel, which has been erected on the site of the structure which was some time since demolished. The new church has been erected at a cost of more than £18,000, of which £12,500 has been subscribed by Mr. O. E. Coope, M.P. It partially occupies the site of its predecessor, which was erected in 1673. Mr. Ernest C. Lee was the architect. One or two relics of the old church have been preserved in the new building; for instance, a carved oak panel representing David, and said to be by Grinling Gibbons. The Rev. J. F. Kitto, the new Rector, has been during the last ten years Incumbent of St. Matthew's, Poplar.

THE UNIVERSITIES AND PUBLIC SCHOOLS.

At Oxford Mr. A. T. Butler, late scholar of Trinity College, has been elected to a classical, and Mr. W. N. Stocker (Christ Church) to a natural science fellowship at Brasenose College. Mr. A. M. C. A. Sappitt, commoner of Wadham College, has been elected to a Hody Exhibition of the annual value of £50 for the study of Hebrew.

At Cambridge the Smith's prizes have been adjudged as follows:—The first to M'Alister, St. John's, the Senior Wrangler of the year; the second is divided between Rowe and J. P. Smith, Trinity, who were Third and Fourth Wranglers respectively. Mr. J. C. Saunders, M.A., has been elected to a Resident Fellowship at Downing College.

The following are lists of the candidates who have passed the recent LL.B. examinations for honours at London:—

First LL.B. Examination.—Examination for Honours.—Jurisprudence and Roman Law.—First Class: Archibald Arthur Parkerd, B.A. (Exhibition), Worcester College, Oxford; Francis William Store, private study (obtained the number of marks qualifying for the exhibition); Philip Folliott Scott Stokes, B.A., private study; Frederick Charles Kolbe, B.A., University College. Second Class: Charles Alfred Russell, B.A., Gray's Inn and University College; William Frederick Hamilton, private study; Arthur Oldham Jennings, private study. Third Class: John William Evans, University College, and Howard Young, private study, equal; Charles Henry Ernest Fletcher, private study; Hugh William Elcum, University College and private study; Dudley Stewart Smith, private study; John William Piercey, private study, and John Kyme Wright, University College and private tuition and study, equal; Frederick Kilvington, private tuition.

Second LL.B. Examination.—Examination for Honours.—Common Law and Equity.—Third Class: George Sydney Davies, private study.

Mr. Gladstone, who has been on a visit to the Marquis of Ailesbury at Savernake Forest, went, with Mrs. Gladstone and Miss Gladstone, into Marlborough last Saturday, and, after taking lunch with the Mayor, visited the college, where an address of welcome was presented to him by the senior prefect, in answer to which Mr. Gladstone spoke at some length upon the subject of school life and its inestimable value and importance.

The name of Mr. Charles P. Kindersley was omitted by mistake from the list of University candidates who were successful at the recent competition for admission to the Royal Military College. Mr. Kindersley obtained the ninth place.

The Glasgow Corporation has increased the salary of its town clerk to £3500 per annum.

POLITICAL ITEMS.

Among the new peers created since the prorogation of Parliament in August last are the Right Hon. Benjamin Disraeli, created Earl of Beaconsfield; Viscount Bury, now Lord Ashford, called to the Upper House during the lifetime of his father, the Earl of Albemarle; Mortimer Sackville West, created Lord Sackville; General Sir Richard Airey, created Lord Airey; John Thomas Lord Redesdale, created Earl of Redesdale; and the two lords, Sir Colin Blackburn, created Lord Blackburn; and the Right Hon. Edward Strathearn Gordon, created Lord Gordon. During the Parliamentary interregnum the Marquis of Tweeddale and the Earl of Leven and Melville have died, and the new Scotch representative peers elected in their places are the Earl of Kellie and Lord Balfour of Burleigh. Among the peers who have succeeded to the family honours since Parliament was last prorogued are Charles Viscount Andover, who succeeds his father Charles John, seventeenth Earl of Suffolk and Berkshire; St. George Henry Viscount Lowther (who attained his majority on Oct. 4 last), who succeeds his father, Henry Lowther, third Earl of Lonsdale; the Hon. Thomas Lister, who succeeds his father, Thomas, third Lord Ribblesdale; the Hon. Jenico William Joshua Preston, who succeeds his father, Edward Anthony John, thirteenth Viscount Gormanston; Mr. Henry Charles Gage, who succeeds his grandfather, Henry Hall, fourth Viscount Gage; Florence George Henry, fifth Lord Boston, who died on the 3rd ultimo, is succeeded by his son, George Florence, who, being in his seventeenth year, will be placed among the minors on the roll of Parliament.

Among the new members of the House of Commons elected since the close of the last Session are:—Leeds: Mr. John Barran, vice Mr. R. M. Carter. Rutland: The Right Hon. Gerard James Noel, re-elected on accepting the office of First Commissioner of Works. County of Donegal: Mr. William Wilson, vice Mr. Thomas Conolly, deceased. County of Bucks: The Hon. Thomas Francis Fremantle, in the place of the Right Hon. B. Disraeli, raised to the Peerage. County Salop (Southern Division): Mr. John Edmund Severne, in the place of General the Hon. Sir Percy Herbert, deceased. Universities of Glasgow and Aberdeen: Mr. William Watson, vice the Right Hon. Edward S. Gordon, raised to the Peerage. Liskeard: Mr. Leonard Courtney, in the room of the Right Hon. Edward Horsman, deceased. County of Sligo: Mr. Edward Robert King Harman, vice Sir Robert Gore Booth, Bart., deceased. County of Waterford: Mr. James Delahunty, vice Sir John Esmonde, Bart., deceased. Frome: Mr. H. Bernhard Samuelson, in the place of Mr. Lopes, raised to the judicial bench.

Before the opening of the floodgates of talk in Parliament members have been to the last moment giving their opinions on political matters to their constituents.

The Winchester Conservative Association held their annual dinner at the Guildhall on the 2nd inst.—Colonel Nichol presided. Mr. G. Slater-Booth responded for the Ministry.

At a Liberal gathering at Newcastle, the same day, Mr. Cowen, M.P., predicted that the end of the approaching Session will find the Conservatives still in office. By that time, however, Mr. Cowen thinks Liberalism will present a more united and formidable front than it does at present.

At Winchester, in addressing the Conservative Association, Mr. Slater-Booth, M.P., referred to domestic legislation. He said the question of the reform of the local government of the country was full of difficulties, the details of which could not be readily mastered, and many years must elapse before a comprehensive scheme could be effected. The Government also had enough in hand to occupy attention for many Sessions.

Mr. Sandford, M.P., stated, at Maldon, that so far from the Marquis of Salisbury having been hoodwinked by General Ignatieff, it was a part of his instructions to put an end to the rivalry between the Embassies of Great Britain and Russia. Mr. Sandford advocated the annexation by Austria of the Slave provinces of Turkey.

Mr. Whitbread, M.P., addressing a meeting of the Liberals of Bedford, on Monday, dwelt at much length on the Eastern Question. The hon. gentleman criticised the conduct of the Government with some severity, but acknowledged that the late Conference had been productive of some good. Mr. Charles Magniac also addressed the meeting.

Mr. Rathbone, M.P., in addressing a meeting of the operatives at Liverpool, on Monday, said that he was afraid they could not expect a very great deal of work this Session. They found in times past that when people's heads were filled with foreign politics, they were apt to neglect home affairs.

A Liberal Association was opened at Middlesborough, on Monday night, at which Mr. J. W. Pease, M.P., the Hon. J. C. Dundas, M.P., Major Beaumont, M.P., and Mr. Isaac Lowthian Bell, M.P., were amongst the speakers.

At the annual meeting of the Bath Conservative Association, on Monday night, a vote of thanks was passed to Colonel Bousfield, M.P. for the borough, for his services in the House of Commons. The gallant Colonel, in replying, said he did not think the Government could be fairly blamed for what it had done on the Eastern Question, and the Marquis of Salisbury would be able to give a very satisfactory account of his proceedings.

On Tuesday several speeches were delivered. Mr. A. Brogden, M.P., and Mr. Bass, M.P., addressed a large meeting at Wednesbury, called to celebrate the reorganisation of the Liberal Association. Mr. Bass held that, whatever mistakes the Liberal party might have committed in bygone times, "Benjamin's mess was five times greater than any of the others." He deprecated the spirit in which the amended Education Act was framed, and pleaded for free schools and the assimilation of the borough and county franchise.

Mr. Mills and Mr. Johnson, the members for Exeter, addressed their constituents. They expressed their belief that Parliament would confirm the policy of the Government on the Eastern Question. The object of the Ministry has been to maintain peace and to uphold the national interest.

The opening meeting of the Liverpool Junior Liberal Association was held in the Hope Hall.—Mr. W. M. Oulton, the president, in the chair. Mr. W. Rathbone, M.P., Mr. Brown, M.P., and a number of local members of the Liberal party were present. Resolutions were adopted agreeing to support the association, and to endeavour to obtain a more adequate representation of Liberal principles both in municipal and Parliamentary government.

A meeting in support of the Permissive Bill was held at the Birmingham Townhall.—Mr. R. W. Dale in the chair. Apologising for non-attendance, Mr. Bromley Davenport, M.P., expressed regret that the Alliance should still waste time in the pursuit of an impossibility. Mr. P. H. Mantz, M.P., wrote that, having heard Sir Wilfrid Lawson so often, and heard his arguments so completely demolished, he regretted that so anxious a subject as temperance should be turned into ridicule. Sir Wilfrid Lawson, M.P., expressed pleasure that Mr. Chamberlain would vote for his bill.

At a meeting held in Edinburgh, the Lord Provost presiding, resolutions were adopted to the effect that greater attention ought to be paid to Scotch business in Parliament. The speakers included Sir R. Anstruther, M.P., Mr. Barclay, M.P., Mr. Ramsay, M.P., and Mr. Cowan, M.P.

It having been rumoured that Major Allen, M.P. for East Somerset, intended vacating his seat on account of ill-health and in favour of Sir Hardinge Giffard, the gallant member writes to give an emphatic contradiction to the rumour.

A vacancy has been caused in the representation of Wilton by the retirement of Sir Edward Antrabus, Bart., who has sat for the constituency since 1855.

A letter has been received by the Liberal Association at Halifax from Mr. John Crossley, M.P., in answer to the communication forwarded to him on Friday, in which he finally resigns his position as M.P. for the borough.

OBITUARY OF EMINENT PERSONS.

THE DOWAGER MARCHIONESS TOWNSHEND.

The Most Hon. Elizabeth Jane, Dowager Marchioness Townshend, died, on the 27th ult., at her residence, Queen Anne-street, Cavendish-square, aged seventy-three. Her Ladyship was the eldest daughter of Rear-Admiral Lord George Stuart, C.B., by Jane, his wife, daughter of the late Major-General James Stewart, and was granddaughter of John, first Marquis of Bute. She was married, Aug. 18, 1825, to John, fourth Marquis Townshend, Rear-Admiral, R.N., who died Sept. 10, 1863, and was mother of the present Marquis Townshend.

THE DOWAGER COUNTESS HOWE.

The Right Hon. Harriet Mary, Dowager Countess Howe, was killed by a fall from the window of her house, Charles-street, Berkeley-square, on the 29th ult. Her Ladyship was the daughter of Henry C. Sturt, Esq., by the Hon. Charlotte Penelope Brudenell, his wife, daughter of Robert, sixth Earl of Cardigan, and was sister to Lord Alington, who was created a peer in 1876. She was married, Feb. 3, 1846, to George Augustus Frederick Louis, second Earl Howe (elder brother of the present peer), and was left a widow Feb. 4, 1876.

LADY SMITH.

Pleasance, Lady Smith, widow of Sir James Edward Smith, M.D., founder and first President of the Linnean Society, died on the 3rd inst., in her 101th year. In the parish register of Lowestoft occurs the following entry, "Christenings, A.D. 1773, May 12th, Pleasance, daughter of Robert and Pleasance Reeve." Thus beyond all controversy the venerable lady who has passed away lived nearly four years beyond a century. What a wondrous span her life covers! The most momentous in the annals of England, we might say in the annals of the world. She was born before the great American War began, when George III. and Queen Charlotte were in the heyday of their reign, and Marie Antoinette and Louis XVI. were in full regal splendour at the Tuileries; Napoleon and Wellington were in their infancy, and the French Revolution a thing of the far future. Lady Smith's father was Robert Reeve, Esq., of Lowestoft, her mother, Pleasance, daughter of Thomas Clarke, Esq., of Saxmundham. Just eighty years ago her marriage took place, and her widowhood dated from 1828. To the very end her intellect was unimpaired. She had hardly ever known what illness was, she preserved all her teeth, and her eyesight was good. Seventy-two years ago Mr. Roscoe said of her that "he who could see and hear Mrs. Smith without being enchanted, had a heart not worth a farthing." At that period her beauty was remarkable, and Opie has perpetuated it in a picture of her as a gipsy. On her centenary the Queen sent her a copy of "Our Life in the Highlands," with these words written by her Majesty's own hand, "From Victoria R. to her friend Lady Smith on her birthday."

LADY EMILY PONSONBY.

Lady Emily Charlotte Ponsonby, who died on the 1st inst., at Hampton Court Palace, was youngest daughter of Henry, third Earl Bathurst, K.G. Her Ladyship was born Feb. 29, 1798, and married, March 16, 1825, Major-General the Hon. Sir Frederick Cavendish Ponsonby, K.C.B., K.C.H., G.C.M.G., &c., some time Governor of Malta, by whom, who died Jan. 11, 1837, she had three sons and three daughters. Of the former, the eldest, Major-General Henry F. Ponsonby, is Private Secretary and Equerry to the Queen.

SIR H. EARLE, BART.

Sir Hardman Earle, Bart., of Allerton Tower, in the county of Lancaster, died there on the 25th ult. He was born July 11, 1792, the fourth son of Thomas Earle, Esq., of Spekelands, in the county of Lancaster, by Mary, his wife, daughter and coheir of Thomas Earle, Esq., of Liverpool. Sir Hardman took an active part in railway and commercial affairs. He was created a Baronet Nov. 3, 1869. He married, Aug. 21, 1819, Mary, second daughter of William Langton, Esq., of Kirkham, in the county of Lancaster, by whom (who died March 25, 1850) he had four sons and seven daughters. Of the former, the eldest (now Sir Thomas Earle, second Baronet) was born in 1820, and married, in 1853, Emily, daughter of William Fletcher, Esq., banker, of Liverpool, and has seven sons and three daughters; the third is Colonel William Earle, Grenadier Guards, C.S.I.; and the fourth Arthur Earle, Esq., of Childwall Lodge, Wavertree, Liverpool.

ARCHDEACON GOOLD.

The Venerable Falkner Goold, M.A., of Rosbrien and Droghda, in the county of Limerick, Archdeacon of Raphoe, died at 29, Circus, Bath, on the 29th ult. He was born in May, 1808, the second son of the late Thomas Goold, Esq., of Merrion-square, Dublin, Master in Chancery, by Elizabeth, his wife, daughter of the Rev. Brinsley Nixon, Rector of Painstown, and was descended from a branch of the ancient Cork family of Goold. He was educated at Trinity College, Dublin, where he graduated B.A., 1830. In 1852 he was appointed Rector of Raymochy, and in the same year Archdeacon of Raphoe. He married, June 16, 1830, Caroline Newcomen, sister of Theresa, Countess of Eglinton, and had one son, who died unmarried, and several daughters. The Archdeacon succeeded to his property at the death of his brother, Wyndham Goold, Esq., M.P. for the county of Limerick, and was one of the principal landowners in that county. He had three sisters, of whom the eldest, Emily Mary, was wife of the Rev. John Wynne; the second, Caroline Susan, married Sir Robert Gore-Booth, Bart., of Lissadell; and the youngest, Augusta Charlotte, was the late Countess of Dunraven.

MR. MACNAMARA.

Henry Tyrwhitt Jones Macnamara, Esq., barrister-at-law, one of H.M. Railway Commissioners, died on the 2nd inst., at his

residence, 31, Linden-gardens, Bayswater. After practising as a special pleader, he was called to the Bar by the Hon. Society of Lincoln's Inn in 1849, and went the Oxford circuit. Macnamara soon acquired considerable business and a sound legal reputation. He was for some time Recorder of Reading, and for a short time previous to 1873 County Court Judge for Marylebone. In that year he was appointed, in conjunction with Sir F. Peel and Mr. Price, one of the Railway Commissioners.

MR. JAMES MERRY.

James Merry, Esq., of Belladrum, in the county of Inverness, J.P. and D.L., formerly M.P. for Falkirk, a well-known patron of the turf, died at his town residence, 68, Eaton-square, on the 3rd inst. He was born in 1805, the son of James Merry, Esq., of Glasgow, by Janet, his wife, daughter of William Crealman, Esq., and received his education at the University of Glasgow. For many years he was engaged in an extensive business as an ironmaster in the counties of Ayr and Lanark; but was more generally known in connection with the turf, on which he was both popular and successful. On two occasions he won the Derby, with Thormanby in 1860 and with Doncaster in 1873, and in the latter year he also gained the Oaks with Marie Stuart. He also won the Ascot Cup with Thormanby in 1861, and the St. Leger twice—viz., with Sunbeam in 1855, and with Marie Stuart in 1873. He sat in Parliament for the Falkirk district, in the Liberal interest, from March to July, 1857, and from 1859 to 1874. Mr. Merry married, in 1847, Ann, daughter of James McHardy, Esq., of Glenboig, in the county of Lanark, and leaves issue.

The deaths are also announced of—

John Meares, Esq., of Plas Llanestephon, in the county of Carmarthen, J.P. and D.L., on the 30th ult., aged eighty-one.

Captain W. J. Scudamore, R.N., on the 27th ult., in his eighty-ninth year.

Captain J. E. Davis, R.N., late of the Hydropathic Department of the Admiralty, on the 30th ult., aged sixty-one.

Nicholas Montgomery Archdale, Esq., of Crock-na-crieve, in the county of Fermanagh, J.P., brother of Mr. W. H. Archdale, M.P. for Fermanagh, suddenly, on the 2nd inst.

Charlotte, Countess Gnorowska, daughter of the late William Dawson, Esq., of St. Leonard's Hill, Berks, and Manchester-square, London, on the 24th ult.

The Rev. Richard Rowland Bloxam, Rector of Harlaston, Staffordshire, retired Chaplain R.N., eldest son of the late Rev. R. R. Bloxam, D.D., Rector of Brinklow, and nephew of the late Sir Thomas Lawrence, P.R.A.

The Ven. W. J. Read, M.A., St. John's College, Cambridge, Archdeacon of the diocese of Antigua, son of the Rev. William Read, M.A., Chaplain of the Chapel of Ease, Worthing, Sussex, on the 10th inst., at St. John's, Antigua.

Lady Georgina Milner, on the 2nd inst., in her fifty-seventh year. She was the daughter of Mr. Frederick Lumley, of Tikhil Castle, and married, on April 16, 1844, Sir William Mordaunt E. Milner, Bart., who died in 1867. On her only brother, Richard George, succeeding his cousin John, eighth Earl of Scarborough, her Ladyship and her sisters, Lady Frances Hill and Lady Henrietta L'Estrange, were granted the precedence of Earl's daughters in 1857.

Richard Corbet, Esq., of Adderley, Shropshire, J.P. and D.L., on the 25th ult., aged seventy-two. He was the second son of the late Sir Andrew Corbet, first Baronet, of Moreton Corbet, by Mary, his wife, eldest daughter of Thomas Taylor, Esq., of Lyme Hall, Cheshire. He succeeded to the estates of his kinsman, Sir Corbet Corbet, Bart., and was lord of the manors of Adderley and Market Drayton, as well as patron of five livings.

The Very Rev. Newenham Hoare, M.A., Dean of Waterford, at Luranah Villa, Upper Norwood, on the 1st inst., aged seventy-four. He was son of the Rev. John Hoare, LL.D., Chancellor of the Diocese of Limerick, by Rachel, his wife, daughter of Sir Edward Newenham, member for the county of Dublin in the Irish Parliament. Previously to his appointment as Dean of Waterford in 1850, he had been Archdeacon of Ardferd and Dean of Achonry.

In our notice, a fortnight since, of the French serial publication of M. Charles Yriarte's illustrated work on Venice, it was implied that the completion of it would occupy two years; but we are now informed that it will be completed in the present year.

General Sir John Adye, Governor of the Royal Military Academy, has announced that the prize offered for competition by Lord Napier of Magdala for the best essay in military history has been awarded to Gentleman Cadet A. P. Codd, to whom the prize is accordingly presented. The subject given was "A short account of the Battle of Waterloo, viewed strategically," and there were ten competitors. All the essays are declared to be creditable compositions, and that of Gentleman Cadet Corporal W. H. Turton is noticed with special commendation.

The first meeting of the Royal Archaeological Institute for the session 1877 was held at the society's rooms, 16, New Burlington-street, yesterday week—Mr. C. Drury Fortnum occupying the chair. A paper was read by Mr. Albert Hartshorne on the fine Monumental Effigy in Hughenden Church, Bucks. A discussion took place on the occurrence of the crescent, which appears thrice on a slab at the feet of the effigy, and on other heraldic peculiarities. Sir John Maclean gave an account of an incised stone discovered at Tintagel, in Cornwall; and Mr. Davey read a memoir of the recently-found Roman villa at Wantage, in Berks, exhibiting, at the same time, a gold coin of Tintomius, which was picked up amongst the debris. Mr. Soden Smith spoke in reference to a collection of fibulae from the island of Lewis in the Hebrides, which were exhibited by Mr. Church. Many choice examples of embroidery were shown on the walls and table.

A museum of hunting trophies, almost as interesting as the collection of living animals brought from India by the Prince of Wales, was inspected on Sunday by a few visitors to the Zoological Society's Gardens, previous to the opening of the exhibition to the public. Among those who took the opportunity of viewing the noteworthy specimens were the wife of the Chinese Ambassador and several ladies and gentlemen of the suite. As a matter of course, the ladies, having resolved upon making a complete tour of the gardens, were accommodated with wheeled chairs; but the chief of these illustrious strangers made a prolonged promenade of the most attractive departments, and, before leaving, declared, through an interpreter, that she had not walked so much during one day for the past fourteen years. The collection of prepared specimens and trophies occupies a room adjoining the reptile house, and has been arranged by Mr. Clarence Bartlett, who was engaged as naturalist to the Prince's expedition. The collection, diminished as it is by the removal of many tiger-skins and other memorials, presented by the Prince of Wales to his friends, is a remarkably fine one, comprising examples of species unknown to Europe.

CHESS.

TO CORRESPONDENTS.

All communications relating to this department of the Paper should be addressed to the Editor, and have the word "Chess" written on the envelope.

E.C.R.—The title of Captain Kennedy's book is "Waits and Strays, chiefly from the Chess-board." You can procure it from W. Morgan, 67, Barbican, London.
T.H.A. (Edinburgh)—The King must not pass over or on to any square attacked by an enemy's man; and of course a law applying to the King does not affect the movements of the R. The King, therefore, can castle on the Queen's side when the Q Kt square is attacked, and even if the R is en prise.
S.F.T.P. and Box.—Neither of the suggested defences to White's attack in Problem No. 1717 is good. If Black plays 1. B takes R, White continues with 2. Kt to K 6th (ch), and 3. P to K 4th, mate; and if 1. Q takes R, White mates at once—the Q being pinned—by 2. Kt to K 6th.
J.R.L. (Temple)—Dr. Forbes was known to be an admirable Oriental scholar. We know nothing of the other writer.
M.W. (Slough).—We cannot undertake to recommend teachers of chess.
CORRECT SOLUTIONS OF PROBLEM No. 1718 received from Vig. Jane N. P. S. Shenele, (Edipus, Drapers' College, and C. Egbert.
CORRECT SOLUTIONS OF PROBLEM No. 1719 received from H.B. H.B. Jun., Clive Crocky, J. Newman, Latta, B. Lewy, Blonkings, Dolly, Vig. G. E. Weary, Widdich Chess Club, J. Keeble, Cant. W. F. Payne, Hereward, T. R. n. Only Jones, R. R. R. R. W. Nelson, Simplex, R. T. King, Littleton, W. Lee, J. M. Turton, R. H. Brooks, Cantharokopho, C. Egbert, E. Frau, J. de Houtstern, G. H. V. E. H. V. J. H. Skelton, Newcomb, East Marten, G. A. Meeneer, Société Littéraire de Gand, A. Scott, E. Clarkson, Drapers' College, Wansford, D. Chasen, A. Wood, W. A. Bowles, W. B. J. Shephard, J. Harnden, P. S. Shenele, P. Q. Egbert, Black Knight, A. G. R. T. R. V. Americano, E. L. G. H. M. S. Brainer, Florentia, H. Rice, R. D. P. J. K. J. F. E. P. J. Lonsdale, Owlet, Una, H. W. Treachard, B. Lodge, W. Leon, Willie, E. H. Ross, F. Myers, and Box.
PROBLEMS received from J. B. R., P. C. Newton, and S. T. D.

SOLUTION OF PROBLEM No. 1719.
WHITE. BLACK. WHITE. BLACK.
1. R to Q sq. Any move. 2. B mates accordingly.

PROBLEM No. 1721.
By C. W., of Sunbury.
BLACK.

WHITE.
White to play, and mate in three moves.

CHESS IN LONDON.

One of the Games in the late Match between Professor WATTE and Mr. MINCHIN.—(Vienna Opening.)

WHITE (Mr. M.)	BLACK (Prof. W.)	WHITE (Mr. M.)	BLACK (Prof. W.)
1. P to K 4th	P to K 4th	19. Q to B 3rd	White has already obtained an excellent opening, and this move wins a Pawn.
2. Kt to Q B 3rd	Kt to Q B 3rd	20. B to B sq	Kt to K 5th
3. Kt to B 3rd	Kt to B 3rd	21. P to K R 3rd	B to Q 4th
4. B to Kt 5th	P to Q 3rd	22. Q takes P	Q takes Q
5. P to Q 4th	P takes P	23. Kt takes Q	B to B 4th (ch)
6. Kt takes P	B to Q 2nd	24. Kt to Q 4th	Kt to R 3rd
7. Castles	B to K 2nd	25. B to R 3rd	
8. B to K 3rd	Castles		

Black might have avoided the disadvantage of a doubled Pawn by exchanging Kts.

9. Kt takes Kt	P takes Kt	26. R takes B	B takes Kt (ch)
10. B to K 2nd	K to R sq	27. K to Q sq	K R to Q sq
11. Q to Q 2nd	Kt to Kt sq	28. P to Q 4th	P to Q R 5th
12. Q R to Q sq	P to K B 4th	29. B to B 5th	R P takes P
13. P to K 5th	B to K 3rd	30. R P takes P	K R to Q Kt sq
14. P to K B 4th	R to Q Kt sq		
15. P to Q Kt 3rd	B to R sq		

Black's fourteenth move was useless, as the R's Pawn cannot be moved with advantage, and must be supported by the R. It will be seen that the loss of time at this stage had a disastrous effect upon his game.

16. B to K B 3rd	P to Q 4th	31. P takes P	P takes P
17. Kt to K 2nd	Kt to R 3rd	32. B takes P	B takes P
18. Kt to Q 4th	Q to Q 2nd	33. R takes B	R takes P
		34. P to K 6th	Resigns.

CHESS BY CORRESPONDENCE.

Game played by correspondence, last year, between Mr. COATES, of Cheltenham, and Lieutenant-Colonel A.—(Scott's Gambit.)

WHITE (Mr. Coates).	BLACK (Lieut.-Col. A.)	WHITE (Mr. Coates).	BLACK (Lieut.-Col. A.)
1. P to K 4th	P to K 4th	12. By playing 12. Q to Kt 5th, Black might have secured a little time to develop his game.	
2. Kt to Q B 3rd	Kt to Q B 3rd	13. B takes Kt	P takes B
3. P to Q 4th	P takes P		
4. Kt takes P	Q to K R 5th		
5. B to K 3rd			

This move has been tried successfully in several correspondence games, and some of the variations springing from it have been lately analysed by Mr. Fraser, of Dundee, with a favourable result for White.

6. Kt to K 3rd	Q takes K P	14. P takes P	Q takes B
7. R to Q 3rd	B to Q 4th	15. B to Q 4th (dis.)	B to K 2nd
8. Castles	Q to K 2nd		
9. R to K sq	B takes R		
10. R takes B	P to Q 3rd		
11. B to Q 4th	Kt to K B 3rd		
12. Kt to Q B 3rd	Castles Q R		
13. B takes B	P takes B		
14. Kt to Q 4th, with a fine game.			

In the analysis referred to, which appeared in the Chessplayer, Mr. Fraser indicates the following line of play at this juncture—e.g.:

6. Kt to K 3rd	B to Q 4th	14. P takes P	P takes P
7. R to Q 3rd	Q to K 2nd	15. B to B 5th (ch)	K to Q sq
8. Castles	B takes R	16. B to B 6th	R to Q B sq
9. R to K sq	P to Q 3rd	17. B takes Q P	B takes B
10. R takes B	B to K 3rd	18. Q takes B (ch)	Q to Q 2nd

Black resigned, because he must now submit to the loss of the exchange.

CHESS INTELLIGENCE.

The annual meeting of the City of London Chess Club will be held at the club rooms, Newgate-street, on the 14th inst., when the treasurer's accounts and the report of the committee for the past year will be submitted to the members. Since the removal of this association to its present commodious quarters there has been a large accession to its numbers, and the club is now established upon a firm basis. The handicapped tourney is progressing satisfactorily, the Rev. Mr. Macdonnell and Mr. Potter occupying the chief places in the score list; and arrangements are being made for a series of consultation games between the leading players. As no better medium of instruction for our rising young amateurs could be devised than consultation with a master of chess, we are glad to observe that the importance of games so conducted is again recognised in the London clubs.

WILLS AND BEQUESTS.

The will and codicil, dated March 27, 1872, and Feb. 19, 1874, of Mr. Henry Tritton, late of Lombard-street, banker, who died on the 2nd ult., at Beddington, Surrey, were proved on the 26th ult. by Joseph Gurney Barclay, Joseph Tritton, the brother of the deceased, and the Rev. William Biscoe Tritton, the executors, the personal estate being sworn under £250,000. The testator leaves to his wife, Mrs. Elizabeth Ann Tritton, £2000, all his furniture, plate, household effects, horses, and carriages, the use and occupation of his house and grounds at Beddington, and an annuity of £1400; to his eldest son, Henry John Tritton, his freehold house at Ewell, all his real estate in the county of Kent, his pictures, his leasehold house in Great Portland-street, with the furniture, and such a sum as with the capital he has already advanced him will make up £20,000; to his son Edward William all his interest in Battersea Bridge and £21,000; to his son Wilfred Francis, £25,000; to his daughter, Mrs. Buller, £5000; to his daughter, Mrs. Hall, and his unmarried daughters, £2500 each; he also leaves additional legacies of £10,000 to each of his unmarried daughters and £3000 to each of his married daughters; to his brother Joseph all his share in the unsold portions of his late father's estate; to his executors 200 gs. each; to Dr. Alfred Meadows and the Rev. William Edward Heygate, 100 gs. each; to William Henry Covington, the senior clerk in his bank, £200; to James M. Barnes, another clerk in the bank, £100; and £1400 to be distributed by Mr. Barclay and Mr. Joseph Tritton among the other clerks in such bank. There are legacies and annuities to many of his servants, and £300 is given to his wife to divide among the others. The residue of his property he gives to his two sons, Henry John and Edward William. The testator sets out his religious belief, and states that he dies a faithful member of the Church of England.

The will, dated Jan. 3, 1874, of Mr. William Senhouse Gaitkell, late of Streatham, Surrey, who died on Dec. 14 last, was proved on the 17th ult. by William Ewbank Gaitkell, the son, Lewis Henry Randall Lyne, and Thomas Harris Devonshire, the acting executors, the personal estate being sworn under £100,000. The testator's wife being already provided for, he leaves her only some complimentary legacies; he gives to his son, William Ewbank, his residence at Streatham; upon the trusts of the marriage settlement of his late daughter Mrs. Jessie Sikes Foot, £14,000; to his son-in-law Mr. Foote, £2000; and he makes provision for his sons Charles Burr, Ernest, and Alfred Ashley; there are also legacies to his executors and some of his old servants; the rest of his property he gives to his two sons William Ewbank and Edward Forbes.

The will, with one codicil, dated Jan. 19, 1874, and March 23, 1876, of Mr. Christopher Wilson, late of Streatham, Surrey, who died on Dec. 21 last, was proved on the 11th ult. by Richard Wilson, the son, and Henry Boyes, the acting executors, the personal estate being sworn under £70,000. The testator bequeaths to his wife his furniture and household effects, £1000, and the annual income of £16,000 for life; to his sister, Mrs. Jane Benson, £100; and to Mr. Boyes and Miss Eliza Jeanette Maxwell, £50 each. The remainder of his property is to be divided between his seven children, Christopher, Richard, Ellen, Elizabeth, Jane, Mary Eliza, and Sarah.

The will and codicil, dated June 17, 1874, and Jan. 14, 1876, of Mr. George Smith, late of Potton, Beds, who died on Dec. 3 last, was proved on the 15th ult. by Henry Smith and George Smith, the sons, and Edward Thurlow Leeds Smith, the nephew, the surviving executors, the personal estate being sworn under £60,000. The testator, after making provision for his wife, Mrs. Emily Smith, gives £20,000 Consols to his said son Henry, and legacies to his other children. Testator's son George is appointed residuary legatee.

The will, dated Jan. 10, 1870, of Mr. David Forbes, consulting engineer, late of No. 11, York-place, Portman-square, who died on Dec. 5 last, was proved on the 5th ult. by John Henry Durham, the sole executor, the personal estate being sworn under £40,000. The testator bequeaths to his wife, Mrs. Julia Forbes, his household furniture, plate, and effects; to his executor, £500; to the children of his late brother Edward and his late sister Jane, living at the time of his decease, £500 each; and the residue to his said wife for life, but in the event of her marrying again one half of the income thereof only, and subject thereto, to his children.

The will, dated July 6, 1874, of the Rev. Gilbert Heathcote, formerly Vicar of Colerne, Wilts, and late of No. 1, Northfield, Ryde, Isle of Wight, who died on Oct. 28 last, was proved on the 2nd ult. by Mrs. Eliza Julia Heathcote, the widow, John Wellesley Thomas, C.B., George Atherley, and the Rev. Arthur G. Atherley, the executors, the personal estate being sworn under £25,000.

Major H. G. Rooper, of Godmanchester, late Adjutant of the Hants Militia, has been elected Chief Constable of Huntingdonshire, out of sixty-six candidates.

A valuable donation, consisting of 250 duplicate specimens from the Kew Museum, has been received at the City Industrial Museum, Glasgow.

According to the quarterly report of the Registrar-General, the returns of births, deaths, and marriages are, on the whole, satisfactory. The marriages are for the quarter ending September, 1876, and are below the average of that season. The depression of the marriage-rate below its usual standard is most striking in the northern counties and in Wales. The births are returned for the last three months of the year, and they exceed the average. The mortality in the same three months was low. The improvement is most striking in the towns. The season has been remarkable for its mild temperature, winds, and abundant rainfall. Smallpox, epidemic in London and in some of the large towns of Lancashire, has destroyed few lives in the rest of the kingdom. Scarlet fever is the ruling epidemic. The year 1876 was remarkable in this respect—in each of the four seasons its birth-rate was above, and its death-rate below, the average.

The sum of £24,000 having been raised towards enlarging the Norfolk and Norwich Hospital, to promote which object the Prince and Princess of Wales recently visited Norwich, a large meeting of governors and subscribers was held at the institution, last Saturday, under the presidency of the Earl of Leicester, who had contributed £13,000. The president said that the £24,000 promised would be increased to £27,000 if, instead of enlarging the hospital, a new one was built. Not only was he strongly in favour of the new hospital, but the Prince of Wales had written to him stating that he approved the reasons given for building a new hospital in Norwich instead of enlarging the present one, and asking him to announce, not only that he would be very happy to subscribe an additional £200 to the object in view, but that the Princess would give a donation of £100 also. This letter, which the president read, was received with loud applause. It was resolved, on the motion of the Sheriff of Norwich (Mr. William Cadge), seconded by Mr. Coleman, that a new hospital be built. It is estimated that the cost would be £35,000 or £40,000. One thousand pounds was thereupon promised by the Rev. J. Fisk, and other donations were announced.

NEW MUSIC.

LONDON AND COUNTY BANKING

COMPANY.

Established in 1826, and incorporated in 1875, under "The Companies Act, 1862."

Subscribed Capital—£5,750,000, in 75,000 Shares of £75 each. REPORT adopted at the Annual General Meeting, Feb. 1, 1877. ABRAHAM HODGSON PHILLIPOTT, Esq., in the Chair.

The Directors, in submitting to the Proprietors the Balance Sheet of the Bank for the half-year ended Dec. 31 last, have to report that, after paying interest to Customers and all charges, allowing for Rebate, and making provision for Bad and Doubtful Debts, the Net Profit amounts to £105,467 10s. This sum, added to £25,719 5s. 3d. brought forward from the last account, produces a total of £131,186 15s. 3d.

They recommend the payment of a Dividend of 5 per cent for the half-year, which will amount to £131,186 15s. 3d. to be carried forward to Profit and Loss New Account.

The present Dividend, added to that paid to June 30, makes 15 per cent for the year 1876.

The Directors, by resolution, are John James Oates, Esq., Edward Harbord Lushington, Esq., and William Henry Stone, Esq., who, being eligible, offer themselves for re-election.

By the retirement of Stephen Haggard, on account of ill-health, there is a vacancy in the Auditorship, which it is in the power of the meeting to fill up.

The Dividend, £1 10s. per share, free of income tax, will be payable at the Bank, or at any of the Branches, on or after Monday, the 12th instant.

GRATEFUL—COMFORTING.

E P P S'S C O C O A.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided his breakfast-table with a delicately flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."

OPENING OF PARLIAMENT: LORD BEACONSFIELD TAKING THE OATHS AS A PEER.

In regard to the domestic affairs of the country, the House of Commons has assumed—for the present, at least—an energetic and business-like spirit. The measures introduced by her Majesty's advisers cannot, as Lord Hartington observed, be regarded as constituting an ambitious programme. But the times are not propitious for anything resembling an heroic home policy. The more need there is, therefore, that any sound measures of administrative reform recommended by the Government should have early attention, and be sent up to the House of Lords before the greater part of the Session shall have been wasted in barren wrangles. It is gratifying to observe that such seems to be the disposition of the Lower House. Hitherto, it cannot be said that it has shirked its duties or wasted its time. It ought, we think, before the advent of Easter to have broken the neck (if we may use such a phrase) of the Legislative Business submitted to its judgment. Much will depend, of course, upon the sagacious guidance of the new Leader of the House, whose steadiness and avoidance of caprice may contribute largely to the progress of modest legislation. Doubtless, the Cabinet have kept some of their measures in reserve until opportunity warrants their introduction. The country, however, will approve the transaction of a comparatively small amount of business, if it be done well, rather than a much larger amount if it is to be done roughly, confusedly, and imperfectly. We are afraid that there is no prospect of retrenching public expenditure, the Civil Estimates of

which, already laid upon the table of the House, show an addition of somewhere about a third of a million sterling. The condition of the Revenue—unfavourably affected as it is by the languishing state of trade and commerce, coupled, as it threatens to be, with a considerable augmentation of National outlay—excites some apprehension of increased taxation. The Financial outlook is somewhat gloomy just now, though not altogether without some alleviations. We sincerely trust that, on the whole, the Session begun last week will be one fruitful of good; and if the Peace of Europe should be preserved it is hardly doubtful that material prosperity will speedily spring up and rapidly spread, not here only, but over the Continent of Europe.

THE COURT.

The Queen received at dinner at Buckingham Palace, after the opening of Parliament, the Prince and Princess of Wales, Prince and Princess Christian of Schleswig-Holstein, Princess Louise of Lorne, Princess Beatrice, and the Marquis of Lorne.

The Queen, accompanied by Princess Beatrice, left Buckingham Palace at ten o'clock a.m. yesterday week upon her return to the Isle of Wight. Her Majesty drove to the Victoria Station escorted by a detachment of the 1st Life Guards, and travelled by a special train on the South-Western Railway, via Clapham Junction to Gosport, and crossed in the Royal yacht *Alberta*, Commander Fullerton, to Osborne, arriving at a quarter before two. Prince Leopold remained at Osborne during the Queen's absence. Prince and Princess Christian returned to Cumberland Lodge, Windsor Park, from Buckingham Palace.

Her Majesty, Princess Beatrice, and Prince Leopold attended Divine service on Sunday, performed at Osborne by the Rev. Canon Duckworth, who dined with the Queen.

On Monday her Majesty gave audiences to the Marquis of Hertford (Lord Chamberlain) and Lord Henry Somerset (Comptroller to the Household), who presented the Addresses from both Houses of Parliament in answer to the Speech from the Throne.

By command of her Majesty, Colonel L. Gardiner attended the funeral of Admiral Sir Augustus Clifford, Bart., C.B. (which took place, on Tuesday, at Ryde), as a mark of respect to the memory of so old and faithful a servant of the Crown.

The Queen, with Princess Beatrice and Prince Leopold, has taken daily drives.

The Prince of Wales, by command of the Queen, held a Levée at St. James's Palace, on behalf of her Majesty, on Thursday. It is the Queen's pleasure that presentations to his Royal Highness at the Levée shall be considered as equivalent to presentations to her Majesty.

By order of the Queen the Albert Memorial Chapel, Windsor Castle, will be opened to the public on Wednesdays, Thursdays, and Fridays, from twelve to three, without tickets.

THE PRINCE AND PRINCESS OF WALES.

The Prince of Wales visited the Duke of Cambridge, at Gloucester House, on Saturday. His Royal Highness and the Princess of Wales, accompanied by their children, were present at the afternoon performance at the Duke's Theatre, Holborn. The Prince dined with Mr. Christopher Sykes, at his residence in Seymour-place. The Duke of Teck and Prince Edward of Saxe-Weimar were present. The Prince was present, on Tuesday, at the Hunterian oration, delivered by Sir James Paget, at the Royal College of Surgeons, Lincoln's-inn-fields; and in the evening his Royal Highness dined with the President (Mr. Precott Hewett) and Council of the College. The Princess, with Princesses Louise, Victoria, and Maude of Wales, visited the Duchess of Cambridge, at St. James's Palace, on Wednesday. The Prince and Princess have visited the Opéra Comique and the Globe Theatre. The Princess, accompanied by her children, has taken daily drives.

The Duchess of Edinburgh left Athens on Saturday last, upon her return to Malta. The Duke of Edinburgh and the King and Queen of the Hellenes accompany the Duchess to Corinth. Her Majesty's ship *Sultan*, Captain the Duke of Edinburgh, left the Bay of Salamis for Malta on Monday.

The Duke and Duchess of Abercorn have left their residence in Green-street, Grosvenor-square, for Biarritz.

The Duke and Duchess of Manchester have returned to Kimbolton Castle from London.

The Duke and Duchess of Cleveland and Lady Mary Primrose returned to Battle Abbey, last Saturday, from town.

The Duke and Duchess of Leeds have arrived in South Audley-street.

The Marquis and Marchioness of Ormonde have arrived at Kilkenny Castle, their seat in Ireland.

Entertainments have been given by his Excellency the French Ambassador and Marquise d'Harcourt, the Countess of Dudley, the Earl of Aberdeen, and Viscount Combermere.

FASHIONABLE MARRIAGES.

The marriage of Lieutenant-Colonel Ramsden (Coldstream Guards) and Miss Mabel Lindsay, second daughter of the late Lieutenant-General the Hon. Sir James Lindsay, K.C.M.G., and Lady Sarah Lindsay, was solemnised, at St. Mary's, Bryanston-square, on Tuesday. The bride—who was given away by her uncle, the Earl of Mexborough—wore a pearl-white satin dress, trimmed with Mechlin lace, and a long tulle veil over a wreath of orange-flowers; her ornaments were diamonds. The bridesmaids were Miss Lindsay (her sister), the Ladies Mary and Anne Savile, Lady Eva Greville and Miss Isabella Lindsay (her cousins), Miss Ethel Law (cousin of the bridegroom), and Miss Gosling (his step-niece). They wore dresses of white cashmere, embroidered with gold, and white Rubens hats, with plumes. Each wore a gold locket with the initials of the bride and bridegroom. The Hon. Eustace H. Dawnay (Coldstream Guards) was best man. The ceremony was performed by the Rev. Francis Holland, M.A., assisted by the Rev. R. Halpin, Chaplain to the Forces. After the wedding breakfast, at Lady Sarah Lindsay's residence in Portman-square, the bride and bridegroom left for Bnsbridge Hall, Godalming, to pass the honeymoon. The bride wore a travelling-dress of brown velvet, trimmed with Russian sable, and a bonnet and feather to match. The presents were valuable, and numbered over 200.

The marriage of Mr. Francis F. Gordon, youngest son of the late Lord Francis Gordon, to Miss Helen Reid, second daughter of the late Mr. Rawson Reid, of Stratford-place, took place, on Monday, at St. Paul's, Knightsbridge. The marriage ceremony was performed by the Hon. and Rev. Francis Byng and the Hon. and Rev. Robert Liddell, Rector of St. Paul's.

The marriage of Mr. T. Merthyr Guest and Lady Theodora Grosvenor, sister of the Duke of Westminster, will be celebrated the second week in March.

THE CHURCH.

PREFERRMENTS AND APPOINTMENTS.

Addison, Richard, to be British Chaplain at Madeira.
Atthill, William; Sole Charge of Wicklow, Norfolk.
Bolland, Henry; Rural Dean of Wolverhampton.
Bevan, Evan; Vicar of Llanellen, Monmouthshire.
Cator, William Lumley Bertie; Rector of Eakring, Notts.
Daeth, Wyndham C. H.; Rector of Buckhorn Weston, Dorset.
Darby, John Lionel; Archdeacon of Chester.
Dashwood, Robert Lewes; Rector of Stanford-on-Avon, Notts.
Etheridge, John H.; Incumbent of St. Mary's, Southtown, Suffolk.
Green, William Graham; Rector of Mavesyn Ridware, near Rugeley.
Gorton, Frederick Robert; Rector of Belstead, Suffolk.
Harrison, J.; Curate of Great Horkeley; Vicar of Royston, Herts.
Hatch, Walter M.; Rector of Birchington, Essex.
Jones, John William Wynne; Perpetual Curate of Aberdare.
Lewis Lewis; Vicar of Ockbrook, near Derby.
Mann William; Minor Canon and Precentor of Carlisle Cathedral.
Murray, F. W.; Honorary Canon in Rochester Cathedral.
Peach, Charles; Rector of Evenlode.
Radcliffe, John Randle; Vicar of Snitterfield.
Rogers, E. Jordan; Chaplain of the Tower of London.
Sorell, Joseph; Curate of Nunceaton.
Storrs, George Noel; Vicar of Thornton Curtis, Lincolnshire.
Thomas, David Richard; Vicar of Meifod, Montgomery.
Tylee, T. Gerard; Minor Canon of Carlisle Cathedral.
Wood, Thomas, of St. Ninian's, Sandwich; Vicar of Northbourne.
Woodhouse, Thomas Edward; Vicar of Wimble, Essex.—*Guardian*.

The Convocation of York will meet for the dispatch of business on April 17—one week before that of Canterbury.

The *Guardian* is informed that a telegram has been received announcing the safe arrival of the Bishop of Calcutta and his party at Calcutta on the 8th inst.

The east window of St. Jude's, Peckham, has been filled with Munich stained glass, by Messrs. Mayer, in memory of Mr. Aug. L. Cope, who took a great interest in this church.

The Bishop of Oxford has appointed, as his legal secretary, Mr. Thomas Marriott Davenport, solicitor, in the place of his father, who has resigned, after a long tenure of office under the late Bishop Wilberforce and the present Bishop.

Last Saturday the Bishop of Manchester consecrated the Church of St. Andrew, Livesey, Blackburn. The building, which has cost about £5500, contains 552 sittings, all of which are free; and Alderman Thompson, of Blackburn, has subscribed £500 towards an endowment fund.

The fine parish church of Tavistock has received another embellishment, in the shape of a four-light window, erected by public subscription to the late Mr. Hornbrooke Gill, thirty-seven years a magistrate of Tavistock. It has been executed by Messrs. Mayer and Co., of Munich and London.

The parish church of Christchurch, near Newport, Monmouth, was partially destroyed by fire, on Sunday night, owing to the overheating of the warming apparatus; and on Monday morning the Church of St. Oswald, Fulford, a village lying a little to the south of York, was destroyed by fire.

The following distinguished preachers have undertaken to deliver lectures on Friday evenings during Lent at the Church of St. Michael, Wood-street, beginning Feb. 16—viz., the Rev. Canon Miller, the Rev. Daniel Moore, Professor Stanley Leathes, Prebendary Cadman, Ven. Archdeacon Heasey, and the Right Rev. Bishop Claughton. The services, beginning at eight o'clock, will have a special interest for young men.

Under the authority of the Rev. B. Dale, who has been placed in charge of St. James's parish, Hatcham, by the Bishop of Rochester, forcible entry was made into the church last Saturday, and the arrangements completed for holding Divine worship. Accordingly, two services were held on Sunday—morning and afternoon—the sermon in the morning being preached by Dr. Craig, of Chatham, and that in the afternoon by the curate in charge. There was no disturbance.

A handsome memorial to the late Lord Lytton is about to be erected in Worcester Cathedral. It will consist of an altar tomb, on which will repose a portrait recumbent figure of the late Lord in white marble, with angels at the four corners. The tomb is designed by Sir G. G. Scott, R.A., after the manner of the ancient mediæval tombs, and will be executed in alabaster and coloured marbles, enriched with bas-reliefs and heraldic shields. Mr. Forsyth is the sculptor.

The Bishop of Lincoln has written to Sir Antonio Brady, objecting to the use of bags for the offertory as at variance (1) with the spirit and letter of the law of the Church, which prescribes "a decent basin;" (2) with the usage of the ancient Church of God; (3) as leading to great evils, being the receptacles of scurrilous scraps from newspapers and other things which had better not be mentioned; and (4) as against a true interpretation of St. Matthew iv. 5 and 6, which is not directed against public almsgiving; and (5) because, by means of the secrecy of bags, some of our rich men, who ought to cast much into the treasury of God, do, in fact, put into it the widow's two mites, without the widow's faith and love. His Lordship adds that the use of bags has been discontinued in several large churches in the diocese with good effect.

On Tuesday night a large number of ladies and gentlemen of the town and neighbourhood of Wolverhampton, chiefly members of the Church of England, assembled in the Exchange to witness the presentation of addresses and testimonials to the newly-appointed Archdeacon of Stafford, the Rev. J. H. Hes, who has laboured in Wolverhampton for a period of twenty years as Rector of the Collegiate Church. The testimonials consisted of a £500 Bank of England note, a handsome mahogany study-table and desk, a richly-decorated book of photographs of members of St. Peter's congregation, &c.—The parishioners of St. Saviour's and Kensington have presented £25 to the Curates' Augmentation Society, on behalf of the Rev. J. B. Doyle, in testimony of their appreciation of his services as Curate of the parish, this being the third year of his ministry among them.—The Rev. Fanshawe Bingham, on resigning the incumbency of St. James's, Muthill, has received a copy of Dr. Smith's "Dictionary of the Bible" and £115; and Mrs. Bingham a set of writing-table ornaments, as a mark of the esteem and personal regard felt for them by the members of their late flock.—As an acknowledgment of the labours of the Rev. W. J. Knox-Little during the recent Mission in Manchester, it has been suggested that new schools should be erected in Cheetwood, as one permanent memorial of the Mission.—The congregation of St. Mary's, Park-street, recently presented the Rev. Cosmo R. Gordon, LL.D., the Incumbent, with a handsome clock, a suite of drawing-room furniture, and a purse of £250, in recognition of the mode in which he has discharged his onerous duties in their parish.

THE UNIVERSITIES AND PUBLIC SCHOOLS.

OXFORD.

At Brasenose Messrs. G. V. Fiddes, Dulwich College; E. S. Marshall, Marlborough College; and R. J. H. Poole, Durham School, have been elected to Open Classical Scholarships; Mr. H. C. Bond, Marlborough Grammar School, to an Open Mathematical Scholarship. Messrs. Bentley, Bathow, and Wilkinson, from Manchester Grammar School, have been elected to scholarships founded by Sarah, Duchess Dowager of Somerset, for persons educated at the school mentioned.

At Oriel, Messrs. Chalmers, from the City of London School, and Thomas, from the Chelmeley School, Highgate, have been elected to Open Classical Scholarships; Mr. Hughes, from Richmond School, Yorkshire, to an exhibition.

At Pembroke, Messrs. Loughman, from Abingdon Grammar School; Buckland, from Crypt School, Gloucester; and Mullins, from Cheltenham Grammar School, have been appointed to scholarships.

At Wadham, Messrs. J. L. Jenkins and W. Dobinson have been elected to a Hody Greek Exhibition.

The electors to the Boden Sanskrit Scholarship have elected Mr. Arthur Venis Lazarus, of Balliol College, to the vacant scholarship.

Mr. T. Steele, of New College, has been elected to a Modern History Exhibition in this college. Mr. V. P. Sells, of Dulwich College, has been elected to a Physical Science Exhibition in this college.

Lord Northbrook, the late Governor-General of India, upon whom the honorary degree of D.C.L. was conferred last summer, has presented to the University a valuable collection of Indian bird-skins.

Mr. Froude has consented to be put in nomination for the Lord Rectorship of Glasgow University at the next election.—The *Scotsman* is informed that Principal Caird, of Glasgow, has received intimation of a munificent gift by a city engineer for the building of a common hall at the University. The estimates for the proposed addition to the college not having been adjusted, the exact amount of the donation has not been fixed, but it is believed that it will exceed £30,000.

Mr. Gibson, Q.C., was, on Tuesday, re-elected without opposition for Dublin University, his seat having been rendered vacant by his accepting the post of Attorney-General for Ireland.

Mr. J. Langfield Ward, M.A., of Pembroke College, Cambridge, Wrangler (1871), Le Bas prizeman (1873), has been appointed Head Master of Burnley Grammar School.

CHARLES KINGSLEY AND NORMAN MACLEOD.

The death of Canon Kingsley, two years ago, was an occasion for so much admiring and sympathetic comment upon his character and genius that his biography, compiled by Mrs. Kingsley, has claimed very general acceptance. It consists of two volumes, published by H. S. King and Co., entitled *Charles Kingsley, his Letters and Memories of his Life*. They will be found to supply a large amount of such records of his special habits of thinking and feeling, upon many subjects of interest, as might be desired by those who have long since recognised his very superior qualities of mind. It was about thirty years ago that the young country clergyman, till then only the author of "The Saint's Tragedy," appeared as a writer of prose fiction, at first connected with the exposition of those views of social reform which were ardently espoused in 1848 by many generous and benevolent persons. "Yeast" and "Alton Locke" were the productions of that stage of opinion, to which many English people of middle age can now look back with a not ungrateful sense that the lapse of time has kindly helped to solve their difficulties, or to make their disappointments more endurable, and to reconcile the strife of ethical and political doctrines. Charles Kingsley, by those early works of his, found and proved to the world his great powers of imaginative romance-writing which were afterwards displayed in "Hypatia," "Two Years Ago," and "Westward Ho." Though his most brilliant success was achieved in the department of the historical novelist, he must be confessed to have rather broken down as a professor of history, lacking, as he did, the judicial faculty and temper, and his political views were extremely vague. The private letters, conversations, and personal anecdotes given in these two volumes entirely confirm our previous notions of this estimable man, and show that, if not in every instance of the most correct and comprehensive judgment, his mind was one of the purest, sincerest, and most earnestly devoted to the cause of truth and right. He derived much good, in later life, from the reverent and diligent study of nature, of plants and animals, and of geology, with which he combined a passionate love of landscape scenery. It seems to have been the sport of fly-fishing that led him thus to find "sermons in stones, tongues in the running brooks." Those readers who are inclined to sympathise with Charles Kingsley in these pursuits will find much to gratify them in these two volumes of his Life and Letters. Still greater is the interest belonging to his office and work as a minister of the Church, both in his parish of Eversley and in the wider circle of his religious counsels to a large number of people in his acquaintance, as well as his appointments in the Cathedrals of Chester and Westminster. The biography of Kingsley, in this respect, may be compared with that of another eminent man lately deceased, whose influence, both in Scotland and in England, has been of an equally wholesome and invigorating kind. In the *Memoir of Norman Macleod, D.D.*, by his brother, the Rev. Donald Macleod (Daldy, Isbister, and Co.), we find the moral portraiture of a character perhaps more robust and healthy than that of Kingsley, with a jovial vein of playful humour, and with vast capacity of persuading and managing his fellow-men. Norman Macleod is not, of course, to be ranked anywhere near Kingsley in literary genius; but his writings, as well as his life and his teachings as a clergyman, bore a similar relation to the actual condition of mind in which most laymen were found in their generation disposed towards the Christian faith and its ideal of duty. These two liberal ministers and popular authors of the day have certainly done much to win for the creed of evangelical religion a degree of favourable attention in modern society which mere theological arguments might not have secured. The biography of Norman Macleod, which has already passed through several editions, is a delightful book on many other accounts, though some readers on this side of the Tweed may care less for the Scottish ecclesiastical affairs in which he was much employed, such as Disruption and the Free Kirk, the Sabbath Question, or even the Mission to Canada and to India. A multitude of our countrymen will always cherish the memory of Norman Macleod, at any rate, as the founder and editor of *Good Words*, and will be happy to make his personal acquaintance, as that of a thorough good fellow, in these two volumes of his life.

The report of the Royal Commission appointed in 1874 "to inquire into the causes of accidents on railways and into the possibility of removing any such causes by further legislation" has been issued. The Commissioners are unanimous in their opinion that no legislation is desirable which would impair the responsibility which the law imposes on railway companies to provide for the safety of their traffic. They have, however, come to the conclusion that some measures of a definite and decided character are necessary to afford the public additional safeguards against the preventable dangers of railway travelling, and these are duly set forth in the recommendations which are contained in the report.

THE GUICOWAR OF BARODA'S WRESTLERS.

BOATMEN ON THE MALABAR COAST.

FEEDING THE PIGEONS IN THE COURTYARD OF THE MOSQUE OF BAJAZID, AT CONSTANTINOPLE: SKETCH BY OUR SPECIAL ARTIST.

GOING TO A MINISTER'S BALL AT CONSTANTINOPLE: SKETCH BY OUR SPECIAL ARTIST.

FOREIGN AND COLONIAL NEWS.

FRANCE.

(From our own Correspondent in Paris.)

Thursday, Feb. 15.

Since the Franco-German war, in 1870, the Paris Carnival has never been particularly gay, and this year there has been less festivity than ever attached to it. The *bals masqués* given at the Opera and the various dancing-saloons still form the leading feature of the time, but were very thinly attended. It is evident that the custom of keeping Carnival is rapidly dying out among the Parisians, who, with the present general stagnation in business, moreover, find it difficult enough to provide for the necessities of the hour, without expending their money on inappropriate festivities.

There is a dearth of political news this week. The position of the Ministry remains the same, although there was an animated debate in the Chamber, the other afternoon, which nearly resulted in the overthrow of Duc Décazes. The matter under discussion was the official telegram from Constantinople announcing the fall of Midhat Pasha—a telegram which appeared in the columns of the London newspapers four-and-twenty hours earlier than in the Parisian journals. Duc Décazes formally denied that the telegram had been kept back by the Government, and indignantly repudiated an insinuation that he had profited by it to gain money on the Bourse. The Duke is being regularly attacked every day by the more advanced Republican organs, who appear determined to force him to resign. It is far from certain, however, that he will retire in presence of his growing unpopularity; indeed, it is rumoured that at a recent Cabinet Council his colleagues urgently begged him to remain in office, probably fearing that the resignation of the Foreign Secretary might lead to further serious Ministerial changes.

There has been an election this week in the department of Vaucluse, M. du Demoine, the clerical candidate, polling the largest number of votes; still, as he did not obtain the necessary majority, a second poll will have to be taken next Sunday. Yesterday the Court of Appeal confirmed the sentence of six months' suspension recently passed upon the ultra-Radical organ the *Droits de l'Homme*. The paper in question, foreseeing the result, had issued its last number a few hours previously, surrounded by a mourning border. A new journal called the *Radical* is to supply its place until the term of suspension has expired.

The Legion of Honour has been conferred on the Comte de Noé, draughtsman, the "Cham" of *Charivari*.

Great distress prevails among the working classes of Lyons, and it has been arranged that a grand fête shall be given at the Opera, on the 27th of this month, for their benefit. Madame de MacMahon, with numerous ladies in the highest ranks of Parisian society, have placed themselves at the head of the affair, which promises to be a brilliant success.

SPAIN.

King Alfonso has been confined to his bed through a cold. Count Heredia Spinola has been appointed to the post of Prefect, and has been succeeded as Mayor of Madrid by the Marquis Del Vilar.

By Royal decree the Senate has been dissolved, and fresh elections for that body ordered for April 5.

The municipal elections have passed off quietly.

A conciliatory understanding is reported to have been arrived at between the Spanish Government and the municipal juntas, who are said to have accepted the terms of a *convenio* to be submitted to the sanction of the Cortes.

General Martinez Campos has announced that the insurrection in Cuba will be so far suppressed by next May that he will be able then to return to Spain.

PORTUGAL.

The bill of indemnity demanded by the Ministry on account of the extraordinary measures adopted during the financial crisis has been voted by the Chamber of Deputies.

H.R. Majesty's despatch-vessel *Salamis*, belonging to our Channel squadron, has arrived in the Tagus.

HOLLAND.

In Wednesday's sitting of the Second Chamber the Government presented a bill modifying the electoral law now in force. By the proposed measure the number of members of the Second Chamber will be fixed at eighty-four, and the number of districts to be represented at seventy-five.

BELGIUM.

Yesterday week the Count and Countess of Flanders gave a ball, at which the King and Queen were present.

At the performance of Auber's opera "Masaniello," at the Ghent Theatre, on Sunday night, vociferous applause was given to the duet in the second act. Subsequently the "Chant des Gueux" and the "Brabançonne" were sung by the members of the Choral Society, who wore the dress of "The Beggars." They were enthusiastically applauded, and had to repeat both pieces several times.

GERMANY.

On the occasion of the introduction of Prince William of Prussia (son of the Crown Prince) into active military service, the Emperor William made a long and important speech on the past and present of the German army, and pointed out to his grandson the principles which ought to be his guiding star in the career in which he was about to enter.

A Cabinet Council was held at Berlin, on Sunday afternoon, under the presidency of the Emperor, at which the Imperial Crown Prince was present.

Count Münster, the German Ambassador in London, has been invested with the insignia of the first class of the Order of the Crown, together with the enamel ribbon of the Order of the Red Eagle.

Cardinal Ledochowski has been sentenced by the district court in Innsbruck to imprisonment for two years and a half and a fine of 300 marks, or, in default, three months' imprisonment, for having violated Prussian ecclesiastical laws and offered resistance to the authority of the State. The Cardinal is also found guilty of high treason.

Dr. Rudolph Meyer, a German journalist, was sentenced, on Wednesday, to nine months' imprisonment, by the Berlin District Court for a libel on Prince Bismarck. The libel imputed to the Prince that he was interested in the profits of a financial undertaking.

AUSTRO-HUNGARY.

The dual machinery is again out of joint, the Tisza Ministry having resigned. In Saturday's sitting of the Lower House of the Hungarian Diet the whole course of the Bank negotiations was reviewed by Herr Tisza, who held that they had been wrecked on the question of the formation of the Central Board of Management. On a motion made by him the sittings of the Diet were adjourned until a decision had been arrived at by the Emperor. Latest accounts state that all attempts to form a new Hungarian Ministry have proved fruitless, and that Herr Tisza remains in office.

An animated discussion took place in the Lower House of the Austrian Reichsrath, last Wednesday, on the question of granting a Government subsidy to assist Austrian manufac-

turers to send specimens of their goods to the Paris International Exhibition of 1878; finally, a sum of 600,000 fl. was voted for the purpose. From Pesth we hear that the Minister of Commerce has summoned a conference for the 26th inst., in order to decide upon the extent and manner in which Hungary shall participate in the Paris Exhibition.

SERVIA.

Prince Milan has issued a decree convoking the Great Skuptschina for Feb. 26, and fixing the 20th inst. for the elections. MM. Christics and Matics, the Serbian Plenipotentiaries appointed to negotiate with the Porte the conditions of peace, have left Belgrade for Constantinople. They are accompanied by M. Baccics, who is to act as interpreter.

GREECE.

In the course of the debate on the War Estimates in the Chamber of Deputies, M. Coumoundouros, the President of the Council, said that the necessity for military preparations rendered it indispensable that the House should continue its labours even after the voting of the Budget. The Minister added, however, that the interest of Greece and the policy of the Government were in favour of the maintenance of neutrality, and he guaranteed that tranquillity would not be disturbed in the frontier provinces.

The Budget has been drawn up for presentation to the Chamber. A telegram of Tuesday, says that the ordinary revenue amounts to 36,000,000 fl., and the expenditure to the same sum, exclusive of the extraordinary expenses for military preparations.

DENMARK.

With the view to prevent the introduction of cattle plague into Denmark, a decree of the Minister of the Interior has been issued, prohibiting the importation of cattle, sheep, and goats, either dead or alive, from Great Britain; the prohibition further extending to hides, fat, and all articles obtained from these animals.

The Minister of the Interior has issued a circular to the communes requesting them to adopt proper measures to relieve the poorer classes, who are suffering from want of work and the consequences resulting from the rise in prices of provisions.

AMERICA.

Yesterday week the Electoral Commission decided, eight against seven, that the Florida votes should be counted for Mr. Hayes, the Republican candidate for the Presidency. Next day the Senate and the House of Representatives reassembled for a joint Session, when the decision of the Electoral Commission was submitted, to the effect that the Florida votes should be counted for Mr. Hayes. Written objections were made thereto by six senators and twelve members of the House of Representatives. The House then separated, and the Senate passed a resolution sustaining the decision of the Electoral Commission; while the House of Representatives adjourned until Monday. On that day the House of Representatives rejected the decision of the Electoral Commission. But the decision stands good, as concurrent action of the two Houses is necessary to defeat it.

Two reports have been issued by the committee appointed by the House of Representatives to investigate the recent elections in Louisiana—that of the majority declaring the Democratic ticket to have been duly elected, and the action of the Returning Board illegal, fraudulent, and void; that of the minority declaring the Republican ticket to have been elected, and accusing the Democrats of fraud and intimidation.

The committee appointed by the House of Representatives to investigate the elections in South Carolina has decided that Mr. Hayes has a majority in that State of 700 votes.

The Government has dismissed the suit brought against Mr. Belknap, ex-Secretary for War.

The Senate has ratified the Treaty of Extradition with Spain; and a bill incorporating a company for the purpose of laying a telegraph cable between Baltimore and Europe has passed the Senate and the House of Representatives.

The importation into the United States of cattle and hides from Germany is prohibited by the Treasury on account of the prevalence of rinderpest.

There has been a serious ice block on the American coast. Seventy vessels have been locked in the ice about twelve miles down Chesapeake Bay, and the crews suffered much. It is reported that four of these vessels have gone down, having been pierced by the ice, and that the crews are lost. At Philadelphia the ice extended a long way down the Delaware, and a large number of vessels were caught in the ice. Near Pittsburg the damage done by the ice is very great.

CANADA.

The Dominion Parliament was opened on Thursday, the 8th inst., by Lord Dufferin, the Governor-General, who, in his speech on the occasion, observed that during the suspension of the Extradition Treaty with the United States he took care to urge its speedy resumption and enlargement. His Lordship regretted that the question of the settlement of the fishery claims made no progress. It was a matter for just congratulation that the Canadian exhibitors had been eminently successful at the Philadelphia Exhibition. Notwithstanding the loss of revenue caused by the falling off in the imports, the measures of retrenchment adopted had gone far to restore an equilibrium between income and expenditure. Great economy, however, would still be needful, and the Budget had been framed to meet the circumstances in which the colony was placed, while promoting efficiency in the administration. Alluding to his recent visit to British Columbia, Lord Dufferin said that, although the surveys there for the Pacific Railway were pushed forward with the utmost vigour, it was impossible yet to complete the location of the line.

Two of the members for British Columbia protested last Monday against the action of the Canadian Government in regard to the Pacific Railway, and threatened that British Columbia would secede from the Dominion.

A deficit of 1,900,785 dollars is shown by the Budget, which has been submitted to the Dominion Parliament.

The correspondence relating to the delay of the United States Government in acting upon the provisions of the Treaty of Washington has been published. It contains a vigorous remonstrance dated Nov. 24 last, which is also embodied in a minute of the Canadian Privy Council against the conduct of the United States.

THE CAPE COLONIES.

Lord Carnarvon's Permissive Bill, with his despatch, has been published at Capetown. The *Cape Argus* says:—"Lord Carnarvon has sent out a draught of a bill to be introduced into the Imperial Parliament for a union of the colonies as the State of South Africa. Certain general principles are laid down, and the details are to be settled by an Order of the Queen in Council. The bill follows in some respects the Canadian Dominion Act, but is unlike it in others."

According to official advices from the Transvaal Government received at Antwerp, the Kaffirs were more pacific. Secoceni was reported to be suing for peace.

INDIA.

A telegram from the Viceroy of India, dated Feb. 11, received at the India Office, states that the condition of the

distressed districts is practically unchanged. In Madras there is a further reduction of about 40,000 receiving relief, and there is a reduction on the Bombay works of about 25,000. Prices have improved slightly. The Government have authorised the commencement of the Dhond-Munmar Railway whenever the Government of Bombay considers it urgently necessary, but have directed the work to be confined to portions which will not commit the Government to immediate completion after the famine pressure has ceased. Sir R. Temple reports favourably of the Nizam's relief arrangements, and he is now inspecting Mysore. On the 7th inst. Sir R. Temple telegraphs that over the whole of the Madras Presidency the famine is successfully combated and starvation prevented. Some deaths, "partly or indirectly due to want," had, however, the telegram says, unhappily occurred, and some few may still occur, despite medical treatment.

The total State expenditure on account of the Delhi Assemblage amounts to £50,000, one fifth of which will be borne by the Home Government.

AUSTRALIA.

The Parliament of Victoria was prorogued by the Governor, Sir George Bowen, on Dec. 22, to reassemble early in February, but not for the transaction of any business, as the general elections are held in March. The *Melbourne Argus* of Dec. 23 contains the following items:—"The eighth Parliament of Victoria was brought to an end, so far as the transaction of business is concerned, on the 22nd inst., having been prorogued on that day till Feb. 1. The Government withdrew their Railway Construction Bill, which provided for the making of nearly 300 miles of new lines, the late period of the Session not allowing time for the settlement of the conflicting interests involved. The insecure condition of Hobson's Bay as regards liability to attack from a foreign enemy, has again been under consideration, and the Australian Governments have united in an application to the Secretary of State for the Colonies that a Royal Engineer officer of high standing may be sent out to these colonies to devise proper schemes of defence for each of them. Sir William F. D. Jervois, who is at present Governor of the Straits Settlements, is the officer whose services the colonists would like to secure. A proposition that the public library and museums be kept open on Sundays has again been negatived in the Legislative Assembly."

We learn from Sydney papers of Dec. 25 that a new Electoral Bill had been laid on the table of the House and read the first time. It provides for the increase of the members of the Legislative Assembly from seventy-two to ninety-eight, and the number of electorates from sixty to seventy-six. One of the clauses provides for additional representation to meet increased population on the self-adjusting principle. The bill adopts the English law in cases of disputed elections. Several other changes in the last Electoral Act of 1858 were proposed. On Dec. 21, in the Legislative Council, the Attorney-General introduced a Criminal Law Consolidation Bill, which was read the first time. A bill for the regulation of the Civil Service was read the first time. The estimates of expenditure for 1877 were laid before the Assembly. The expenditure for next year is estimated at £4,211,925. The sum of £100,000 is to be asked for immigration purposes, an increase of £50,000 over the vote for this year. A bill to amend the Customs laws having been read the first time, and leave for the introduction of several new measures having been obtained, the House adjourned, for the Christmas recess, to Jan. 9.—A Ministerial change is announced by telegraph. The Hon. Thomas Garrett, Secretary for Lands, has resigned. Mr. A. E. Baker, member for the Southern Gold-Fields, succeeds him.

The English Eleven played a cricket-match against the Wellington team, yesterday week, and, according to a Reuter's telegram, won in a single innings.

Dr. Schliemann, writing under date Athens, Feb. 1, reports some new discoveries at Mycenæ.

The appointment of Mr. Horatio James Huggins to be Chief Justice of Sierra Leone is gazetted.

Great inundations have taken place in Switzerland, and the traffic on many of the railways is interrupted.

Gordon Pasha (Colonel Gordon) has been appointed by the Khedive Governor of the whole of the Soudan, and is to leave Cairo for that province on Saturday next.

The *Morning Post* states that Mr. R. T. Goldsworthy, C.M.G., President of Nevis, one of the West India Islands, succeeds the Hon. F. P. Barlee as Colonial Secretary in Western Australia.

A rumour which has been in circulation to the effect that Queen Marie of Hanover had joined the Church of Rome, as well as the Crown Prince and Princesses, is contradicted.

Telegraphic intelligence has been received of the safe arrival at Port Jackson (Sydney) of the ship *Kapunda*, dispatched from Plymouth by the Agent-General for New South Wales on Nov. 20, with 341 emigrants on board.

Great preparations have been made in Rome for the reception of the Emperor and Empress of Brazil, who have arrived there, and intend to stay a fortnight. The Pope received the Emperor and Empress on Wednesday, and a conversation ensued upon the removal of ecclesiastical difficulties.

By the arrival of the South American mail we have particulars concerning the civil war in Colombia and the frightful scenes that were witnessed at Cali, which is a town of considerable size. During December the Conservatives held the place for six days, but they were driven out by the Liberal troops, whose General gave up the place to sack and slaughter by his troops for six hours. Two thousand five hundred men are said to have been destroyed. Plunder was general, and the troops, not content with this, seized the venerable Dr. Borrero, who was one of the earliest Presidents of the Convention, and shot him.

The Alexandria correspondent of the *Daily News* gives an account of the discovery of a new cotton plant, which he thinks is destined in a very few years to create quite a revolution in the cotton agriculture and business of Egypt. It was discovered on the cultivated property of a Copt in the Menutia district about two years ago. The new plant bears on an average from forty-five to fifty pods, whereas the usual cotton plant averages from twenty-five to thirty-five. The yield of the former has been from nine to fifteen cantars per feddan; the yield of the latter is usually from four to nine cantars. The crop is thus doubled. For sowing, too, a smaller quantity of the new seed is required. The only drawback to the new plant is that it requires more water.

The weekly return of metropolitan pauperism shows that the total number of paupers last week (the first week in February) was 86,225, of whom 39,396 were in workhouses and 46,829 received outdoor relief. Compared with the corresponding week in the years 1876, 1875, and 1874, these figures show a decrease of 2315, 12,992, and 21,076 respectively. The number of vagrants relieved on the last day of the week was 670, of whom 502 were men, 147 women, and 21 children.

METROPOLITAN NEWS.

Mr. George Robert Tyler was, on Monday, elected common-councilman for the ward of Queenhithe, in the room of Mr. Henry Hill, deceased.

Mr. C. M. Chichester has been appointed secretary to the Carlton Club, in place of Colonel Sutton, who has resigned, after occupying that post for fifteen years.

The Chinese Ambassador and suite, attended by Lieutenant Macartney, visited Madame Tussaud's Exhibition, on Tuesday, and were highly amused.

The Emperor of Austria, King of Hungary, has conferred on Mr. Nicolas Trübner, the well-known publisher, of Ludgate-hill, the Knight Cross of the Order of Francis Joseph.

The Circle, the members of which are chiefly painters and sculptors, held its annual dinner, or "supper," as it is customary to call the agreeable festival, on Monday evening, at the Pall-mall Restaurant.

The volunteer officers connected with the home district have resolved to hold a review of volunteers in the neighbourhood of Dunstable on Easter Monday, subject, of course, to the consent of the War Office.

The inaugural meeting of the Caxton Celebration will be held to-day (Saturday) at the Jerusalem Chamber, Westminster Abbey—the Dean of Westminster in the chair, supported by several influential noblemen and literary gentlemen.

The committee charged with arranging a scheme for lay representation in the Wesleyan Conference concluded its labours, last week, by passing a number of recommendations, the whole of which will be reviewed by the district meetings in May, and finally revised by this committee in June.

Inspector Butler has succeeded Mr. Scott in the office of Inspector of the House of Lords. Mr. Scott has been appointed as the resident Superintendent of the House of Lords—a new office, which was formerly discharged by the Gentleman Usher of the Black Rod.

The *Globe* understands that Mr. Harvey, of the Paymaster-General's office, has been appointed Assistant Accountant to the Treasury, in the place of Mr. Skinner, who has been promoted to the Accountantship, in succession to Mr. Turner, now Accountant-General of Inland Revenue.

The three Conservative members for the City, Alderman Cotton, Mr. Hubbard, and Mr. Twells, were present, on Monday night, at the annual dinner of the executive committee of the City of London Conservative Association, which was held at the Guildhall Tavern, under the presidency of Mr. R. N. Fowler.

Dr. Frankland reports, as the result of his analysis of the waters supplied to the metropolis and its suburbs during January, that the Thames continued in high flood, and the water delivered by each of the companies deriving their supply from that source was again polluted with organic matter, although to a somewhat less extent than in December.

Regarding the decoration of the walls of hospitals, Mr. Henry Graves, publisher to the Queen, states that he is willing to place 1000 guineas worth of engravings at the disposal of any committee of benevolent persons acting on the part of the London hospitals who may be willing to undertake the cost of fitting them into inexpensive frames. This gift is in addition to large presents of pictures previously made by Mr. Graves.

A large and enthusiastic audience assembled recently at the Victoria Hall, Archer-street, to welcome Mrs. Bancroft (Miss Marie Wilton), who had generously offered her patronage and aid in the interest of the St. Michael and All Angels' readings, which are being held this season at that building, on behalf of the church organ fund. So great was the demand for seats, that high prices were paid for accommodation some weeks before the entertainment.

The Dyers' Company, at their court on the 7th inst., voted £105 to be distributed among various charities; Lord Derby has sent £21 to St. John's Hospital for Diseases of the Skin, Leicester-square; the Gunmakers' Company have presented the North-Eastern Hospital for Children, Hackney-road, with £5; and the Merchant Tailors' Company have given thirty guineas in aid of the Royal Architectural Museum and School of Art, Westminster.

At the weekly meeting of the London School Board—Sir Charles Reed in the chair—it was resolved to borrow a further sum not exceeding £110,000, making up to the present time £2,401,580 to be borrowed from the Public Works Loan Commissioners. The report of the school management committee for the quarter ended Dec. 22 last was presented. A request from the educational endowments committee to enlarge their powers was complied with.

Sir John Karslake, Q.C., presided over the fourth annual meeting of the Barristers' Benevolent Association, which was held, on Tuesday afternoon, in the Middle Temple Hall, and in moving the adoption of the report expressed his satisfaction that the resources of the organisation had increased, and appeared in a fair way to maintain that condition. Baron Pollock seconded the motion, which was carried. A vote of thanks was passed to the chairman, upon the proposition of Sir H. James, M.P., seconded by Serjeant Parry.

The Seamen's Hospital has been removed from the Dreadnought to the Infirmary at Greenwich. The year 1876 left the society with a debt of £1539. The Duke of Northumberland advocates the claims of the hospital upon the support of the public in a letter to the papers. His Grace states that 170,000 patients have been relieved, and that to maintain the institution in a state of efficiency the annual subscription-list needs increasing from its present amount of £2500 to £6000.

The anniversary festival of the Dramatic, Equestrian, and Musical Sick Fund Association was held at Willis's Rooms, on Wednesday—Mr. J. W. Anson, the founder, in the chair. The proceedings were much enlivened by the performances of several vocalists, who gave their services gratuitously; and, it being Valentine's Day, Mr. Rimmel sent, for the delectation of the ladies, a number of valentines. Mrs. Stirling, as spokeswoman for her sisters of the stage, made one of her charming speeches. Many complimentary toasts followed, and dancing began at eleven o'clock.

The Chancellor of the Exchequer received, last Saturday, a deputation from the London Trades Council, which desired the Government to compel the railway companies to give cheaper and more convenient trains to suit the wants of the working classes who live in the suburbs of large towns. Sir S. Northcote was not disposed to think that merely accepting the suggestion in the report of the Select Committee with regard to urban and suburban districts in taking off the duty on all fares under 9d. would, without further legislation, secure the object in view. It might be possible to come to some arrangement. At the present moment the Government were considering the whole question of the relation of the railways to the State, and the legislation that possibly may be required with regard to them.

The *Standard* of Wednesday morning contradicts a paragraph that appeared in the *World*, stating that the *Standard* was about to change hands, and that the ostensible purchaser was an architect well known in City circles, who was acting on behalf of a Conservative M.P. The *Standard* says that "any rumours that may have been circulated about an impending change in the proprietary of the journal are groundless."

The infant daughter of the Marquis and Marchioness of Headfort was baptised, yesterday week, at Westminster Abbey, the ceremony taking place in Henry the Seventh's Chapel. The sponsors were the Countess of Bradford, Lady Adelaide Tylour, and Colonel Tylour, M.P.; and the infant was baptised by the Rev. Lord John Thynne, Sub-Dean of Westminster, the names given by its parents being Beatrix Tylour.

A selection from the works of Handel will form the principal part of the next concert of the Sacred Harmonic Society, on Friday, Feb. 23. The overtures to the Occasional Oratorio and "Athaliah," and airs and choruses from "Joshua," "Saul," "Athaliah," "Theodora," with the Gloria Patri from the "Jubilate Deo," will be included in the programme. An English version of Mozart's Litany in B flat will also be performed for the first time. The principal vocalists engaged are Madame Sinico, Miss Julia Elton, Mr. Vernon Rigby, and Mr. Lewis Thomas. Sir Michael Costa will conduct, as usual.

At the half-yearly meeting of the London and South-Western Railway Company, on Monday, the Hon. Ralph Dutton, in moving the adoption of the report, remarked that there had been a falling off in the first and second class passengers to a much larger extent than they had yet had to submit to. The decrease on the first class was 8355, and on the second 108,836. On the other hand, there had been an increase of close upon a million in the third-class passengers in 1876 over 1875. That was a matter which had been taken into consideration by the board. At the present moment all they could do was to take off first and second class carriages.

The annual festival of the Royal Masonic Benevolent Institution was held on Monday night, at Freemasons' Tavern. Prince Leopold, Provincial Grand Master for Oxfordshire, was to have presided, but in consequence of his illness his place was occupied by the Earl of Shrewsbury, Provincial Grand Master for Staffordshire. About 500 brethren and between 200 and 300 ladies were present. His Lordship said that Masons had great faith in charity above all things, and they were particularly proud of their three especial charities—the Royal Masonic Benevolent Institution, the Royal Masonic Institution for Boys, and the Royal Masonic Institution for Girls. The subscriptions amounted to £12,656.

An official and a clerk from a well-known bank in the City took their places in a railway carriage at Baker-street, on Wednesday, having with them bags containing £1200 in coin. On their alighting from the train at Bishopsgate-street station they left all the money in the carriage, in which there was no other passenger. The train had hardly moved out of the station before the loss was discovered; but, although the station-master telegraphed at once to Aldgate, the train had arrived and the money was gone before the message was delivered. The City police at once took active measures, which resulted in one of the railway carriage-washers being taken into custody, and the recovery of £1000 in sovereigns, which were found buried in the earth, near the rails, some distance down the line.

The Metropolitan Board of Works has decided upon the following alterations in the names of streets and numbers of houses within the limits of the metropolitan district:—Pullen's-row and Pierpont-row will be incorporated with High-street, Islington, under the last-mentioned name, and the houses renumbered. The subsidiary names will be abolished in Norfolk-road, Hackney, and the houses renumbered; Manor-road, Blue Anchor-road, Bermondsey, will be renamed Galley Wall-road, and the houses renumbered. The houses in Cromwell-road, Upper Holloway, will be renumbered; Cambridge-gardens, and Cambridge-gardens West, Kensington, will be incorporated under the former name and the houses renumbered. The houses in Rupert-road, Upper Holloway, will be renumbered; the houses at present numbered 129a, 130a, and 131a, London-wall, will be renumbered 128a, 128b, and 128c respectively; the houses in Milton-road, Upper Holloway, will be renumbered; the subsidiary names in Britannia-row, Essex-road, will be abolished and the houses renumbered; Dartmouth-place, Dartmouth-road, Hammersmith, will be renamed Banim-street and the houses renumbered. The houses in Hampden-road, Upper Holloway, will be renumbered. The houses in Edward's-road, Burdett-road, Mile-end Old-town, will be renumbered. The suggestions before the board include an application by the Chancellor of the Duchy of Lancaster that the new road from the Victoria Embankment through the Savoy be named Savoy-place, and that the new cross street may be incorporated and numbered with Savoy-hill.

M. Stephan, Director of the Observatory at Marseilles, notifies the discovery of a comet, by M. Borrelly, in the constellation Ophiuchus.

The trustees of the late Mr. Longmore, of Edinburgh, have presented to the Edinburgh Association for Incurables £10,000 for the erection of an hospital for incurables, and £300 a year for its maintenance.

By the appointment of Mr. W. E. Gloag to the sheriffship of Stirling and Dumbarton shires, a vacancy occurred in the office of Advocate-Depute, which post, the *Glasgow News* says, has been accepted by Mr. Alexander Blair. The place of Lord Neaves in the second division of the Inner House will not at present be filled.

Major-General Lyson represented the Duke of Cambridge, on Tuesday, at the inspection of the cadets of the Royal Military College, Woolwich. The reports read were very satisfactory. Of the thirty-eight gentlemen who had presented themselves to be examined for commissions, twenty-six passed, seven of whom will be recommended for commissions in the Royal Engineers and the remainder in the Royal Artillery.

Tuesday's *Gazette* announces the appointment of Mr. William Edwards, M.A., Fellow of Jesus College, Oxford, to be one of her Majesty's Inspectors of Schools. Mr. James Blaikie, M.A., Edinburgh University, and B.A., Fellow of Gonville and Caius College, Cambridge, and Mr. William Bathgate, M.A. of Glasgow University and B.A., Balliol, Oxford, are appointed Inspectors of Schools in Scotland.

The award of Mr. J. Chamberlain, M.P., as arbitrator between the coalowners and the miners in the Cannock Chase colliery district, has been issued. Mr. Chamberlain decides that the new wages scale must be adopted, based upon the average selling price of deep and shallow coal.—Mr. Davis, on Wednesday, presented his award in reference to the long-standing dispute as to wages in the Staffordshire potteries in favour of the men. The masters gave notice of a reduction, but Mr. Davis now awards that the wages are to remain as before the notice.

The Extra Supplement.

"A BEDOUIN ARAB RETREATING."

The subject of this picture, by Mr. R. Beavis, in the Exhibition of the Institute of Painters in Water-Colours, has been found in the Land of Moab, which lies beyond the Jordan and the Dead Sea. In the Rev. Canon Tristram's book, published about three years ago, which relates his travels and archaeological researches in that wild country, we meet with some adventures showing the character of the Bedouin Arabs there. His party were crossing the desolate sand swamp called the Sebha, to the south-east of the Dead Sea, when they were waylaid by the Beni Atiyeh, a notable tribe of marauders, with a few of the Ma'az from Orak, and of the people inhabiting the Safieh, leagued together for predatory enterprise. The party consisted, besides the reverend author, of three Cambridge University men and Oriental scholars, Mr. C. L. Buxton, Mr. W. A. Hayne, and Mr. Mowbray Trotter, Mr. R. C. Johnson, of Liverpool, surveyor and photographer, and the Rev. F. A. Klein, the Church Missionary Society's agent at Jerusalem. They got their Arab escort from the Jehalin, south of Hebron, instead of from the Ta'amirah, whose assistance is more commonly sought by the European traveller going that way. This led to a mistake which might have had serious consequences; for the Ta'amirah were in deadly enmity with the wild tribes above named on the frontier of Moab. Hence it came to pass that the Beni Atiyeh and their allies, supposing the Ta'amirah to be in company with Canon Tristram's party, encountered them in strong force, with hostile gestures and intent; some shots were fired, and there was a short personal scuffle between the leaders, but peace was happily restored with no loss of life. Any reader of this narrative will be prepared to look with interest on Mr. Beavis's picture, which represents one of the mounted Bedouin Arab warriors firing a last shot, as he is about to ford or swim the Jordan, in his retreat from an unsuccessful raid on the western side of that river.

"SETTLING THE EASTERN QUESTION."

"Our Boys," to quote the now proverbial title of a popular play, are shown in this picture, by Mr. Walter Severn, "Settling the Eastern Question" with their mimic artillery, to the discomfort of a puppet Turkish soldiery; which is one way, certainly, but not that of her Majesty's Government at present, to solve the most arduous political problem of the day. Mr. Walter Severn's picture is to be seen in the General Exhibition of Water-Colour Paintings at the Dudley Gallery, where it has deservedly gained the approving notice of art-critics; and one finds it, indeed, rather "pleasant to turn to this pretty little town idyll"—these jolly little fellows, with their toys and playful imitation of warfare, stretched on the smooth lawn of the secluded garden, surrounded with summer flowers. We who are now men, with all our cares and anxieties, may remember similar passages in our own boyhood, and let the young ones amuse themselves, as we once liked to do, in any harmless manner of their own fancy.

"CROSSING LANCASTER SANDS."

This is one of the works of the late J. M. W. Turner, R.A., belonging to the collection of Mr. Fawkes, of Farnley Hall, Yorkshire. The scene which it represents must have been familiar to ordinary travellers on the road to Carlisle in the old stage-coach days. Morecambe Bay, separating the Furness peninsula from the mainland of Lancashire, a few miles north of the ancient county town, is a vast piece of shallow tidal water, the upper part of which is daily converted at low tide into a plain of smooth sand, quite hard enough to bear the weight of carriages, horses, and people. The safe route across this space, on the way between Lancaster and Ulverstone, used to be marked by a line of branches of trees, called "bogs," which were stuck in the sand, from Hest Bank to Kent's Bank on the north shore towards Cartmel. The "Oversands" coach ran every day, weather permitting, at variable hours of the day, to take advantage of the low tide. There was also much local traffic of carts and packhorses, but disasters were not unfrequent. In the parish churchyard of Cartmel alone may be seen the graves of more than a hundred persons who were drowned in attempting to cross these sands, and there are many other sad memorials of that kind in other village graveyards on both sides of the bay. A guide was therefore appointed to wait constantly on the sands, and, meeting every party of unaccustomed travellers, to warn them of the most dangerous places. These are found near the outflow of the two small rivers, Kent and Keer, where the water passes beneath the surface of the sand, and saps or softens it in such a manner that, while it presents a deceptive appearance of firmness, it will give way to the tread. The sand here is from 30 ft. to 70 ft. deep. It is but twenty years ago, the spring of 1857, that a company of ten or twelve young men and women, farm labourers and household servants going to the hiring market at Lancaster, were overtaken by the rising tide, and all perished.

A railway has been constructed, of late years, all round the east and north shores of Morecambe Bay, which makes it unnecessary to encounter any such peril. The Ulverstone line branches off at Carnforth from the main Lancaster and Carlisle Railway, which gives to its through passengers to Scotland, as far as that point, a good view of the sands or the waters of Morecambe Bay. The old stage coach has thus been superseded; but the moods of Nature, on that level coast of the squally Irish sea, are quite as fickle, and sometimes violent, as they were in the great landscape-painter's time. A strong west wind, laden with moist vapours of the Atlantic Ocean, will very soon fill the sky with all that is displayed in Turner's drawing of this scene. The best commentary we can give is the following extract from Mr. Ruskin's "Modern Painters," the chapter on "The Truth of Clouds" in his first volume:—

"If the outline of the rain-cloud be visible, it is ragged and torn—rather a spray of cloud, taken off its edge and sifted by the wind, than an edge of the cloud itself. In fact, it rather partakes of the nature, and assumes the appearance, of real water in the state of spray than of elastic vapour. This appearance is enhanced by the usual presence of formed rain, carried along with it in a columnar form, ordinarily, of course, reaching the ground like a veil, but very often suspended with the cloud, and hanging from it like a jagged fringe, or over it, in light, the rain being always lighter than the cloud it falls from. These columns or fringes of rain are often waved and bent by the wind, or twisted, and sometimes even swept upwards from the cloud." The Engraving we present of Turner's "Crossing Lancaster Sands" is a good example of some of the natural effects which Mr. Ruskin has so accurately described.

Mr. Ward Hunt, First Lord of the Admiralty, accompanied by other members of the Board and several naval officers, arrived at Chatham on Monday, in order to inspect the armoured ship *Alexandra*, which left the following day.

"OUR BOYS—SETTLING THE EASTERN QUESTION." BY WALTER SEVERN.
FROM THE EXHIBITION IN THE DUDLEY GALLERY.

"CROSSING LANCASTER SANDS."
AFTER THE DRAWING BY J. M. W. TURNER, R.A., IN THE FARNLEY HALL COLLECTION.

PROSPECTS OF THE SESSION.

Notwithstanding the great pressure placed by the country generally upon her Majesty's Ministers last autumn in favour of an early meeting of Parliament, the Government delayed its convocation to the latest possible period. This is the more extraordinary when we consider the utter impracticability, as past experience has abundantly proved, of our Legislature disposing satisfactorily of the mere ordinary business that comes before it within the normal period of a six months' Session. It is an admitted fact that the functions of Parliament are stretched to the utmost tension in order to meet the demands made on it; that, though for about the last half of the Session the House of Commons is required to meet in the day time as well as at night; and that the sittings are often prolonged to the unfriendly hours of two or three o'clock of the morning; nevertheless there is invariably such a block of measures waiting for disposal about the months of June and July as to necessitate the summary withdrawal of, perhaps, one half of them by the process jocosely, but somewhat profanely, called "the Massacre of the Innocents." Now, what is the lesson which this state of things teaches? Why, obviously this—that a six months' Session, beginning and ending at the periods assigned to them by modern practice, is wholly inadequate to meet the legislative wants of the British Empire. In olden times it was an ordinary custom to call Parliament together in October or November, so as to enable it to dispose of the more pressing measures before Christmas. There is the greater necessity for the resumption of such a plan in the present times, when we know that the business of the Legislature has increased considerably, and is increasing more and more every year. There can be little doubt of the fact that our present system of Parliamentary life is discreditable to us, a great civilised nation, inconvenient and unhealthy to our representatives, vexatious and disappointing to the country generally, and a matter of ridicule and disparagement to even less civilised nations. The marvel at its continuance is the greater when we recollect that two, at all events, of the leading members of the Cabinet have placed upon record opinions utterly opposed to it. Lord Derby, before his elevation to the House of Peers, pronounced in favour of a Winter Session; and Lord Beaconsfield, when Mr. Disraeli, but a very few years ago, headed the majority of a Select Committee appointed to inquire into the business of Parliament in favour of a November meeting generally. So much for the consistency of those two illustrious statesmen! Well, the past Wednesday, being Ash Wednesday, as a matter of course, was only partially available for business in the House of Commons. But being early this year, we already find ourselves within a period of little more than five weeks of Easter. When Parliament reassembles after the holidays about one third of the prescribed limit of the Session will have expired, and there will be probably but little progress made in the business of legislation. A couple of months later we shall be landed within the sultry atmosphere of summer, when all kinds of labour, however light, become more or less irksome. We shall then, no doubt, see, as we have often before witnessed, the House sitting for hours after midnight, and represented by a few of the Ministers and a score or two of independent members—one half of the latter yawning or dozing in their seats after, perhaps, an eight or ten hours' exhaustive sitting, and occasionally one or two, after indulging in "potations pottle deep," making idiotic attempts to look wise, and vainly attempting a few incoherent observations upon the immediate subject under consideration, of which they have evidently but a hazy comprehension. Surely that is no time for work, when nature is attempting to reassert its right over its rebellious subjects who are violating its law by resisting that demand for rest which it imposes upon weak humanity.

The relative interest attached to both Houses has much changed within the last year or two. Heretofore the House of Lords has played but a very secondary part in the eyes of the general public, and its proceedings have been regarded with little attention as compared with those of the more popular assembly. The case now is very different. The elevation of Mr. Disraeli, as Lord Beaconsfield, to the Upper Chamber, the presence there, too, of Lords Derby, Salisbury, Granville, Russell, Lord Chancellor Cairns, the Duke of Argyll, the Bishop of Peterborough, &c., constitute a far greater debatable power than is possessed by the House of Commons, where, if we except such men as Gladstone, Bright, Lord Hartington, Sir Stafford Northcote, and a few of the *Dii minores*, there is really a great deficiency of ready rhetoricians.

In the debate which took place on the first night in the Commons, Sir Stafford Northcote, as the new Leader of the House, was by no means equal to the anticipations generally felt of his powers to sustain so responsible a position. In replying to the attacks of Lord Hartington, the titular head of the Liberal party, he was at times weak, hesitating, and somewhat puerile. For example, in his attempt to vindicate Lord Beaconsfield from the taunts of uttering bellicose and indiscreet language at the Civic banquet, the right hon. gentleman denied that the utterances of the Prime Minister were open to objection, it was only the interpretation that had been put upon them. The ironical cheers with which this obvious truth was received, must have suggested to the Chancellor of the Exchequer the weakness of his defence. Words of themselves are, of course, mere sounds; it is only their palpable meaning that gives them value or otherwise. The speech with which the noble Marquis opened the debate was really able, argumentative, unostentatious, and temperate, and was delivered with excellent taste and judgment. Mr. Gladstone's reply to the Chancellor of the Exchequer was sharp, short, and decisive. Although frankly admitting the inconvenience of raising a general discussion upon the Eastern policy of the Government in the absence of the official documents, he nevertheless betrayed the impatience of a combatant "eager for the fray."

The preliminary skirmishing being over, the great party battle is approaching, and a fair issue of the conflict is now looming before us. The questions put by the Duke of St. Albans in the Upper House, and by Sir H. Havelock in the Lower, respecting the employment of British officers in the East, give token of the preparations for the great encounter. The gauntlet, however, is cast by Mr. Gladstone in the face of his political foes, in the shape of a motion, on going into Committee on Friday, to call attention to a certain despatch of Lord Derby to Sir H. Elliot relating to our treaty engagements; and before the close of the week the mighty engagement between the two chief political parties will have begun and probably terminated.

Lord Beaconsfield bears his "blushing honours" with his usual grace, dignity, and ease. He fulfils the functions of his new position with as much ease and nonchalance as if he were "native and to the manner born." He is generally the first Minister to enter the House of Peers, and, occupying a seat between the Earl of Derby and the Duke of Richmond, he discharges the duties of Leader of the Government with his usual wonted skill and ability, thereby superseding the latter popular nobleman in that office.

PARLIAMENT.

The Parliamentary bill of fare on the first two days of the Session may be so far likened to the menu of a Ministerial or Civic banquet that the generally ponderous speeches on the Address, which may be said to resemble the heavy dishes of a feast, were soon followed by a light course to tickle the palate. Thus, public curiosity having been satisfied as to the manner in which the Earl of Beaconsfield and Sir Stafford Northcote would acquit themselves on their first appearances as Ministerial Leaders of the Lords and Commons (the Premier scoring a distinct success—from a party point of view—by his neat and caustic reply to the Celtic oratory of the Duke of Argyll), and the irrepressible Eastern Problem having served to prove that our senators' powers of digestion remain unimpaired, the Thursday was tidied over peaceably enough. But on the Friday there was administered to the Government a pill which the new Leader of the Lower House, with his blushing honours thick upon him, meekly swallowed. The report on the Address having been brought up, Mr. Grant-Duff justly censured the strange omission from the Queen's Speech of any mention of the deplorable cyclone which occasioned the death of some 250,000 persons in Bengal and a proportionate amount of misery. Sir Stafford Northcote cried *peccavi*, pleading, in excuse, that the omission was due to the enforced absence of the Secretary of State for India from the Cabinet Councils whereat the Royal Address was drawn up. After being presented with a solid entrée, in the shape of the Home Secretary's Prison Bill, which has a strong family likeness to last year's measure of the same name, the House was brightened up considerably by a few sentences from the two hon. members who might be supposed by a stranger to represent Dartmoor, so warmly do they appear to interest themselves in that notable spot. Will anyone be surprised to learn that Dr. Kenealy has "seen men weep and women fall into hysterics when they heard the enormities that had been perpetrated on the Tichborne prisoner?" Or that "the iron has entered into the soul" of Arthur by reason of the rigour of his treatment at Dartmoor? While this dreadful tale of the "Claimant's" woes was being related, Mr. Whalley rose "to order," and was greeted with the complimentary laughter to which he is no stranger. The hon. member for Peterborough called attention to the fact that during the "harrowing" statement of the hon. member for Stoke the Home Secretary had been deliberately occupying himself in speaking with the hon. member by his side! But the learned Doctor put in a word in defence of Mr. Cross, whose general attention to his lamentations he freely acknowledged. With the formal introduction of the Oxford and Cambridge Bill by Mr. Gathorne Hardy, the Irish Prisons Bill by Sir M. Hicks-Beach, the Scotch Prisons Bill by the Lord Advocate, and the first reading of a number of bills brought in by private members, the business for the second night of the Session ended comparatively early.

If the opening of Parliament by her Majesty in person, and the swearing in of the Earl of Beaconsfield as a peer of the realm, made the House of Lords the centre of attraction on Thursday week, the reaction of dulness that succeeded for the first few days—possibly, the lull before the storm—dissipated public interest in the doings of the Upper Chamber. The only thing to be noted yesterday week was the motion of the Primate for the reappointment of the Lords' Committee on intemperance. On Monday the cloud in the East threatened to break over the heads of those members of the Cabinet who sit in the House of Lords, Earl Russell having given notice of the following motion:—

To move that it is inconsistent with the duty of her Majesty's Government to maintain relations of amity with a state so barbarous and cruel as the Sultan's Government, and that the only relation we can maintain with the Sultan of Turkey is a relation of hostility.

But the cloud passed over. Earl Russell was not in his seat. Possibly, the notice given in the Lower House the same evening by Mr. Gladstone had something to do with the absence of the noble Earl. Still, it was hardly to be expected that the Lords should escape all mention of the eternal Eastern Question. Nor did they. The Earl of St. Albans ventured to hint, in putting a question on the subject, that it was scarcely politic of the Government to send out officers of the Royal Engineers last autumn to survey the defences of Constantinople. Earl Cadogan excused the action of the Government in the matter by assuring his interlocutor that the officers in question had been employed exclusively at the time in the service of her Majesty's Government. Then arose a discussion on a question which came home to their Lordships. Earl Fortescue, in the bland and apologetic manner habitual with him, called attention to a grave source of discomfort to Society in the London Season—namely, "the highly inconvenient block of vehicles at Hyde Park-corner," which, he suggested, might be relieved by opening a new communication between Piccadilly and Grosvenor-place, and by widening the roadway at the Corner. "The subject on which the noble Earl has spoken interests everybody," began the Earl of Beaconsfield (ironically?), in reply; but the Premier's answer may be summed up in his statement that the matter was "engaging the sedulous attention of the First Commissioner of Works." On Tuesday the inevitable Eastern Difficulty obtruded itself again when the Marquis of Hertford had brought up her Majesty's gracious reply to the Address and when Earl Granville had drawn from Lord Derby that, under the Extradition Treaty with America, the prisoner Brett had been surrendered to the United States authorities, on the understanding that he would only be tried for the offence charged against him at the time of his surrender. Why, asked Earl Granville, was it that, whilst the bluebook reported the conversations the Marquis of Salisbury had with the Emperor of Germany and the Italian and Austrian Ministers, during his journey to Constantinople to attend the Conference, there was no mention of the conversations the noble Marquis had with Prince Bismarck, Marshal MacMahon, and the Duc Decazes? Why, likewise asked his Lordship, banteringly, was the Marquis of Salisbury called "Special Ambassador" in the bluebook, when he was termed "merely a Special Envoy" in the Queen's Speech? The Foreign Secretary, knowing well that the noble Earl must have his little joke, did not deign to notice this quibble; but explained, with regard to the graver question, that, "as respects the conversations with the French Government and Prince Bismarck, those were undoubtedly of a more unreserved and confidential character; and I have no hesitation in saying we thought, if we did publish them, we should be doing that which would produce a very unpleasant feeling, and would be a breach of confidence." Rising, in answer to questions from Earl De la Warr and the Earl of Sandwich, the Premier said the Government had under consideration the report of the Royal Commission on Railway Accidents; but that, as the Royal Commissioners were by no means unanimous in their recommendations, the "voluminous evidence" on the subject would have to be carefully considered by the Government before a measure to remedy the evils could be introduced. In passing, it may be mentioned that, on Monday, Lord Balfour of Burleigh took the oath and his seat as a representative peer for Scotland, and that the Earl of Lonsdale took the oath and his seat on Tuesday.

Mr. Gladstone begins the battle on the Eastern Question in the House of Commons. His motion, on Monday, showed that he will lose no time in following up the vigorous preliminary attacks which the Marquis of Hartington and he delivered on the policy of the Government on the opening night. The right hon. member for Greenwich was cheered by the Opposition when he gave notice that on Friday he would direct the attention of the House to the despatch (No. 159 in the book) addressed by Lord Derby to Sir Henry Elliot, on Dec. 5 last, with the object of ascertaining the opinion of the Government on the treaty engagements of this country with respect to the Turkish Empire. Mr. Gladstone rose again shortly afterwards to continue a discussion which arose from the desire of Mr. E. Ashley to know whether the Turkish Government had complied with the remonstrances of Lord Derby, and made reparation for the atrocities in Bulgaria. Mr. Bourke had given an epitome of the despatches published in the bluebook. But, not satisfied with this, Mr. Gladstone inquired whether Cheik Pasha had been arrested, and whether it was true that he was related to Midhat Pasha. Mr. Ashley added the query, had Achmet Aga been executed? "Of course, if I had heard that Achmet Aga had been executed I would have mentioned it," responded Mr. Bourke, raising a laugh by his by-the-way allusion to an occurrence which the Pasha himself might deem of some moment. As for the alleged relationship of Cheik Pasha to Midhat Pasha, that had been contradicted; but Mr. Bourke thought he might say Cheik was under surveillance at Constantinople. The same evening the Turkish loan was briefly alluded to, and Sir Stafford Northcote seemed to intimate in circumlocutory phrase, replying to Sir George Campbell, that Sir Henry Elliot was still in her Majesty's service. Later, the Under-Secretary for Foreign Affairs promised Mr. Forster that he would lay on the table the despatch from Lord Derby alluded to in the following communication to Lord Lyons: "I told the French Ambassador so long ago as last summer that I had warned Musurus Pasha that the Porte must not expect material assistance from England in the event of a Russian war." Despite the opposition of the genial Major—the rising of the O'Gorman is always hailed as promising a welcome relief from the conventional manner and phraseology of the House—Mr. R. Smyth's Sunday Closing Bill for Ireland was read the second time by a majority of 171; and was then referred to a Select Committee (of which Major O'Gorman ought surely to be a member) to consider its applicability to Dublin, Belfast, Cork, Limerick, and Waterford. The remaining Government measures brought in on Monday were the bill to consolidate and amend the laws relating to valuation of property, by Mr. Selater-Booth; the bill for the consolidation and amendment of the Acts relating to patents, by the Attorney-General, who was reminded by Mr. Mandella of the bad state of the Patents Museum; the bill for amending the laws relating to the roads and bridges of Scotland, by the Lord Advocate; the Judicature Bill and County Courts Bill for Ireland, by Mr. D. R. Plunket. Notice of a noteworthy measure was also given by Colonel Sir J. Hogg—namely, a bill to amend "The Metropolis Management Act, 1855," so far as relates to the protection of the metropolis from floods and inundations caused by the overflow of the river Thames.

"Always Turkey" bids fair to supplant "Toujours Pédrix!" On Tuesday it was intimated by Mr. Bourke, in answer to an inquiry by Mr. Mills, that the Constitution of Turkey will not be affected by the exit of Midhat Pasha. The Royal Engineers who proceeded on a mysterious visit to Constantinople by direction of the Government formed the subject of a series of questions on the part of Sir Henry Havelock, who "wanted to know, you know," their names, the dates of their departure and arrival, and the reason why they were sent. The last question Mr. Gathorne Hardy could not answer, further than to repeat what was said in the Upper House on the question; but the Secretary for War saw no objection to the remaining information being given. Still harping on the irrepressible topic, Mr. Samuelson drew an emphatic "Yes, Sir; of course they had," from Sir Stafford Northcote, by a query as to the Czar's pacific assurances with respect to Constantinople having been "communicated to the Prime Minister on or before Nov. 9." To Mr. Fawcett will the credit be in no small measure due if Indian finances should come to be taken into consideration with more earnestness than has hitherto been the case. The hon. member moved for a Select Committee to inquire into the financial administration of India; and was ably seconded by Sir George Campbell, who appears determined not to hide his Parliamentary light under a bushel. Mr. Smollett indulged in some of his peculiar personalities in the course of a long speech, which closed with an amendment agreeing there was good cause for viewing with alarm the state of the Indian finances, but opining that no fresh public work necessitating a loan should be begun in India, and that the distinctions between ordinary and extraordinary expenditure should be discontinued. Mr. C. B. Denison and Mr. Anderson having delivered themselves of their opinions, Mr. Cave opposed the motion, in a conciliatory manner on behalf of the Government, and was succeeded by Sir George Balfour, Mr. Onslow, Mr. Dunbar, and Mr. Forsyth. Lord George Hamilton made an exceedingly effective reply in stating why the Government, though appreciating the gravity of the question, could not agree to Mr. Fawcett's motion for a Select Committee. The Under-Secretary of State for India argued, in a closely-reasoned and fluently-delivered speech, that a great improvement had been effected in the financial administration of India. Mr. Goschen having heartily congratulated Lord George Hamilton upon his "cheerful animation," and "the great ability he had shown, the lightness and vivacity with which he had handled the subject, and his great industry in dealing with his figures," and so on, hastened to do his best to demolish the noble Lord's arguments in ready speech, and with the business-like precision characteristic of the hon. member for the City of London. He pronounced decidedly in favour of the motion, which the Chancellor of the Exchequer as firmly opposed in a concise summing-up. Mr. Fawcett replied, and went to a division, which resulted in his being defeated by 173 votes to 123. Mr. Smollett's amendment was negatived without a division. Her Majesty's reply to the Address of the House of Commons was brought up by Lord Henry Somerset; and the rest of the sitting was taken up by a futile discussion of the "Half-past twelve o'clock Rule" for shortening the long-drawn-out hours of the Commons, and by the introduction of a fresh budget of bills.

Ash Wednesday saw, as usual, the hours of the Commons' attendance limited. Mr. Chaplin made the running with his humanitarian bill (read the second time) for rendering threshing-machines less dangerous than they are, and the reception the hon. member met with clearly showed he is a prime favourite with the House. Mr. Parnell's bill for granting the holders of Church lands in Ireland greater facilities for becoming purchasers thereof received the support of Mr. Butt and his followers of the Home-Rule party, but met with a mild opposition from Sir M. Hicks-Beach, who suggested, however, that increased facilities might be conceded by the Church Commissioners if they could see their way to do so. The bill was lost by

150 votes to 110. Mr. C. Wilson, considering, seemingly, that what is sauce for one bird should be sauce for another, introduced a bill for the suppression of drinking in English public-houses on Sunday; but Sir Charles Dilke and Mr. Locke (disregarding the fact that they thereby implied that Ireland and England were not "birds of a feather"), as well as other hon. members, stoutly argued against the bill even receiving the formal courtesy of being read a first time. Mr. Cross thought that it might be advisable as a general rule to revert to the practice of refusing to read a bill unless it was obviously impracticable, but remarked that it would not be exactly courteous to withhold from Mr. Wilson a formal privilege that had already been accorded this Session to a hundred private members. The wrath of the hon. member for Chelsea ("What! Rob a poor man of his beer!") was the pith of his animated protest having been allayed by this pouring of oil on troubled waters by the Home Secretary, the Bill for the Prohibition of the Sale of Intoxicating Liquors in England and Wales on Sunday was permitted to pass its first reading. Various other bills were introduced, unopposed, among them Sir Thomas Chambers's, to legalise marriage with a deceased wife's sister; and the House adjourned at about half-past six.

Thursday night.

In the House of Lords the Duke of Argyll gave notice that on Tuesday next he should direct the attention of the House to the instructions given by her Majesty's Government to Lord Salisbury, and ask her Majesty's Government if they had taken any measures to carry into effect the attainment of the ends contemplated by those instructions. Lord Redesdale moved the appointment of the Standing Order Committee and of the Committee of Selection, and that the House would not receive any petition for a private bill after Thursday, March 16. These motions were agreed to.

In the House of Commons, replying to Sir G. Campbell, Mr. Ward Hunt said that Captain Hobart was removed from the active list of the Navy, for entering the Turkish service without leave, in March, 1868, at the instance of Lord Derby, Foreign Secretary; he was restored in November, 1874, at the instance of his noble friend, under an Order in Council, and his retired pay was calculated in the usual way. Mr. G. Hardy, in answer to another question from Sir G. Campbell, stated that no officer on full pay could enter into a foreign service without losing his commission; the Government had no control over retired officers, and there was no intention to alter the existing regulations. Mr. Bourke, in reply to Mr. Gladstone, said that a telegram had been sent to Constantinople to obtain the results of the treaty and the execution of the sentences upon the persons implicated in the Bulgarian rising, and also in the atrocities committed in repressing it. In reply to Sir W. Harcourt, the Chancellor of the Exchequer said that there was no further information with respect to the simultaneous withdrawal of the Ambassadors from Constantinople. It was not intended as an expression of displeasure at the refusal of the Porte to agree to the proposed terms. Replying to Lord R. Montague, the Chancellor of the Exchequer said that Lord Salisbury went to Athens, on his return from Constantinople, for his own convenience, and not in consequence of any instructions from the Government. The Government had no cognisance of any conversations which Lord Salisbury had held there; but he was assured by him as a private friend that the statements in the *Times* of Feb. 13, as to political visits and sympathies with Greek aspirations were totally untrue. Sir M. H. Beach, in reply to Mr. O'Shaughnessy, stated that a bill was in preparation dealing with intermediate education in Ireland. Mr. Cross, in reply to Mr. Heygate, said that he fully agreed in the opinion that the law with respect to the state of young females and children employed in canal boats was most unsatisfactory, but he was not prepared to carry out the recommendations of the Factory and Workshops Commissioners without further inquiry. Responding to Sir R. Anstruther, Mr. Bourke stated that not only had the Sultan of Zanzibar carried out his treaty engagements, but he had also, of his own accord, suppressed slavery within his territory. There had been some disturbances in consequence, and her Majesty's ship *Thetis* had been sent out to assist in the suppression of the slave trade. In reply to Sir H. Wolff, the Chancellor of the Exchequer said that the Act provided that the reports of the Suez Canal Company should be presented to Parliament. The Attorney-General informed Mr. Serjeant Simon that a bill was in preparation to amend the law of corrupt practices at Parliamentary elections, which would give effect to some of the recommendations of the Royal Commission. The Chancellor of the Exchequer, in answer to a question from Sir W. Harcourt, said that there were no papers relating to the announcement to the Turkish Government of the simultaneous withdrawal of the Ambassadors beyond those in the bluebooks. Lord Salisbury was instructed, on Dec. 22, to inform Sir H. Elliot that the rejection of the proposals would be followed by their withdrawal; and that was the foundation of the communication made to the Porte after the eighth sitting of the Conference. The first communication with respect to their withdrawal was made by Lord Salisbury on Dec. 17, and replied to by Lord Derby on Dec. 22, before the conversation with Musurus Pasha on Jan. 14. It was not intended that there should be any distinction between the withdrawal of Sir H. Elliot and that of the other Ambassadors, and it had not taken place as a mark of the displeasure of the Government, as the circumstances had totally changed from those when the withdrawal was threatened in the case of the refusal to grant the armistice. Sir H. Elliot had not left on ordinary leave, but was directed to come to England to confer with the Government. Mr. Gladstone asked whether the Government had any objection to furnish a return of the trials, sentences, and executions of the persons implicated in the Bulgarian rising, and of those implicated in its suppression. Mr. Bourke was unable to say whether such information could be furnished until the Government received replies to recent telegraphic communications on the subject. On the conclusion of the forty-five questions and answers which were put and given during the early part of the evening, the House went into the consideration of the Prisons Bills, applicable to the three parts of the United Kingdom respectively, the second readings of which were proposed by the Government. The remainder of the night was occupied in their discussion.

The Secretary of State for War has directed recruiting for the Royal Engineers to be stopped, as that corps is now up to its full strength.

The committee appointed last year by the Admiralty to report upon the several sites suggested for the College for Naval Cadets have decided unanimously in favour of Dartmouth the site originally favoured by the Admiralty.

At Wilton, on Thursday, the Hon. Sidney Herbert, Conservative, was proposed by Mr. E. Hinxman and seconded by Mr. Giddings. Mr. John Freeman Norris, Liberal, was proposed by Mr. J. Kerby, seconded by Mr. W. Moore. The poll will be taken on Monday next.

LAW AND POLICE.

The Right Hon. G. A. May was, yesterday week, sworn in as Lord Chief Justice of Ireland by Sir Ralph Casack, Clerk of the Crown and Hanaper. Chief Justice May took his seat in the Queen's Bench, on Monday, for the first time; Mr. Heron, on behalf of the Bar, congratulated him on his promotion. Mr. Gibson, Q.C., one of the members for the University of Dublin, has been appointed Irish Attorney-General; he was re-elected on Tuesday without opposition. The Hon. David Plunket, Q.C., M.P., has resigned the Solicitor-Generalship for Ireland, and will, it is announced, be succeeded by Mr. Fitzgibbon, Q.C.

The newly-appointed Queen's Counsel (seventeen in number) attended, on Wednesday, by appointment, at the Lord Chancellor's mansion, 5, Cromwell-houses, and were sworn in before his Lordship. They afterwards appeared in "silk" in the several courts.

Mr. James J. Hooper, of the Western Circuit, has been appointed Recorder of Southmolton.

At the Judicial Committee of the Privy Council, on Wednesday, Lord Blackburn gave the judgment of their Lordships in an appeal from Newfoundland—"the Direct United States Cable Company v. the Anglo-American Telegraph Company." Mr. Fry, Q.C., and Mr. Bunbury were for the appellants; Mr. Benjamin, Q.C., and Mr. Beaumont for the respondents. Lord Blackburn said the appeal was from an order confirming an injunction granted against the appellants, to prevent them infringing the rights originally granted by the Act of the Legislature of Newfoundland, 17 Vict., to a company incorporated by the name of the New York, Newfoundland, and London Telegraph Company. The injunction granted prevents the appellants from using for the purpose of telegraphic communication either the dry land of the island of Newfoundland or a cable moored in a portion of Conception Bay. The case depended on the 14th section of the Act mentioned. His Lordship said the injunction was only till the hearing of the cause, and nothing had been shown to prejudice any defence; and therefore their Lordships would advise her Majesty that the order of the Supreme Court be affirmed, and that the appeal be dismissed with costs.

The council of the Incorporated Law Society have made the following awards of special prizes in connection with the recent final examinations:—To Mr. William Thomas Rogers, who from among the candidates from Liverpool in the year 1876 passed the best examination, and who attained honorary distinction, the prize, consisting of a gold medal, founded by Mr. Timpron Martin, of Liverpool. To Mr. Thomas Bateman Napier, who from among the candidates from Liverpool or Preston has shown himself best acquainted with the law of real property and the practice of conveyancing, has otherwise passed a satisfactory examination, and has attained honorary distinction, the council have awarded the prize, consisting of a gold medal, founded by Mr. John Atkinson, of Liverpool. Mr. John Dendy, jun., having, among the candidates, shown himself best acquainted with the law of real property and the practice of conveyancing, having passed a satisfactory examination, and having attained honorary distinction, the council have awarded to him the prize, consisting of a gold medal, founded by Mr. Francis Broderip, of Lincoln's Inn. Mr. Thomas Bateman Napier being the candidate best acquainted with the theory, principles, and practice of law, they have awarded to him the scholarship founded by Mr. John Scott, of Lincoln's Inn-fields. The examiners reported that among the candidates from Birmingham there was no one qualified to take the Birmingham Law Society's prize for that year. From among the candidates from Manchester and Salford in the year Mr. John Dendy, jun., passed the best examination.

The Benchers of the Inner Temple have awarded the pupil-scholarships of one hundred guineas each to Mr. B. P. Neuman, LL.B., London University, in the Class of Equity; to Mr. W. H. Solomon, St. Peter's College, Cambridge, in the Class of Real Property; and to Mr. H. R. Knipe, LL.B., Trinity Hall, Cambridge, in the Class of Common Law. These prizes are to be devoted towards enabling the successful competitors to complete their legal education in a barrister's chambers.

A claim for large damages for the infringement of a patent by Mr. Silber, in respect to gas-burners, which was successful on the trial before a jury, was overthrown, on Tuesday, by the Court of Appeal, on the ground of the insufficiency of the specification.

One thousand pounds damages were, on Monday, given in the Queen's Bench Division in the case of "Anstruther v. Stacpole," the action being brought to recover compensation for a malicious prosecution of the plaintiff for alleged perjury.

Proceedings having been taken in the Court of Arches against the Rev. C. Bodington, of Wolverhampton, for Ritualistic practices, that clergyman applied to the Queen's Bench, last Monday, for a prohibitory order staying the Dean of Arches from proceeding, on the ground that notice had not been given to Mr. Bodington within the twenty-one days specified in the Public Worship Regulation Act. The Judges unanimously dismissed the application.

In the Common Pleas Division judgment was delivered, last Monday, in the case of "Twycross v. Grant and others," upon a rule for a new trial which had been obtained by the defendants' counsel. Lord Coleridge said the plaintiff was entitled to recover whatever loss he had sustained, and the Court was of opinion that the amount of damages was right, as he had really lost the £700 which he had paid upon the shares. The verdict would, therefore, stand as it had been delivered, and there would be judgment for the plaintiff in accordance with it. It is probable, however, that there will be further litigation in connection with this case.

Mr. Melissich brought an action some time since against Lloyd's, for libel contained in a pamphlet report of a trial at Falmouth, and recovered £1000 as damages. The case was taken on appeal to the Common Pleas Division, on the ground that the report of a criminal trial was privileged. The Common Pleas sustained the verdict because the report is incomplete, and on Saturday the Lords Justices upheld the decision.

In the Probate, Divorce, and Admiralty Division, yesterday week, the case of "Baar (by his Attorney) v. Norris and another" was heard. In this case the plaintiff propounded the will of the late Mrs. Catharine Hodgson, of Breck-street, Liverpool, who was a lady of eccentric habits. The defendant opposed, alleging principally that the deceased was not of sound mind, memory, and understanding. It appeared that the testatrix was a person who spent but little on her attire, and used to go about dressed as neatly as a quakeress. She after her husband's death resided alone, and had a number of hens and cats at the house. When they died large boxes were prepared for their reception, and the carcasses were placed in them, the sides of the boxes being previously padded with flannel and wool. Mrs. Hodgson, according to the case for the will (which left as much as she legally could to the Jews' Hospital for the Sick of Jerusalem, and the remainder to the

plaintiff), was a lady of strong Conservative tendencies, and used to converse on Imperial topics in a sane and natural manner. It was, however, shown that she laboured under delusion that there was a communication between her husband and Maynooth, and she foolishly attributed many ordinary things to the machinations of the Jesuits. She also had impression that there was a galvanic communication under her house, of which she complained to the Corporation of Liverpool. Letters were put forward which showed that the deceased had delusions as to her communication with the Supreme Being. An arrangement was come to by which the will was to be pronounced against and the costs should come out of the estate, and the costs of Mr. Baar in coming over had been allowed. It was agreed that the proceedings were perfect bona fide, and that those setting up the will could not have known of the existence of the documents that had been brought forward. The jury then found against the will, and the learned Judge (Sir James Hannen) pronounced a verdict according with costs out of the estate.

In the Westmeath will case the jury, on Monday, entered the court with a verdict in favour of the defendants, declaring that deceased was not of sound mind and understanding, and that the will was obtained by undue influence and fraud. The effect of this finding is to deprive Lord Longford's son of the property. It was intimated that there will be an appeal.

A Lincolnshire farmer, named Hallam, who died in August last property worth about £8000 to his housekeeper. The testator's brother had caused him to become an inmate of lunatic asylum, in 1868, in consequence of the drinking habit to which he had given way, and he remained there till 1871. This brother opposed the will on the ground that Hallam was mad when he came out as when he went in; but the judge of the Probate Division, on Wednesday, thought otherwise, and established the will.

The Court of Bankruptcy has rejected a proof offered by widow upon the estate of her sons, on the ground that it was impossible to estimate the contingency of a lady of sixty-seven years marrying again. The counsel offered to produce statistics on the point, but the Registrar thought they were unnecessary.

Mr. Joseph Aspinall, one of the directors of the Eupion Gas Company, who was recently sentenced to twelve months imprisonment for participation in a conspiracy to defraud the public by fraudulently obtaining a quotation on the Stock Exchange, has been released, by order of the Home Secretary on the ground of ill-health.

Edwin and Maria Jane Flick were, on Wednesday, charged at the Mansion House with having been concerned in forging two bills of exchange, one for £285 on Messrs. Roberts and Co. and the other for £98 10s. on Messrs. Barclay. Sir Robert Carden committed the prisoners for trial.

John Gardiner and his wife were brought up on remand at Guildhall, on Wednesday, charged with having stolen a cheque for £339 and cashed it by means of a forged endorsement, and, the evidence having been completed, they were committed for trial.

Harry Benson, alias Andrew Montgomery, Charles Darnley, Charles Collins, Edwin Murray, and William Kerr or Kurl, charged with obtaining £10,000 from the Comtesse de Goncourt by conspiracy in connection with certain turf transactions, were again brought up at Marlborough-street, last Saturday before Mr. Knox, and finally committed for trial. Application made on behalf of Kerr to admit him to bail, was refused.

Two prosecutions for dealing with unwholesome meat were before London magistrates last Saturday. Thomas Dawes, butcher and poultryman of Salisbury, was summoned before Alderman Ouden, at the Guildhall, for sending four quarters of unwholesome beef to the London market for sale as human food. Alderman Ouden fined him £10 and two guineas costs. At Marylebone, James Hook, a butcher, of Kentish Town-road, was summoned for having in his slaughterhouse, preparation for sale for human food, the carcass of a diseased sheep; and David Lloyd, a cattle-dealer of Burghley-road, Kentish Town, was summoned for being the owner of a carcass. It was stated that Lloyd had bought about 300 sheep to send into the country. Five of them had been injured, and were unfit to travel, and he sent them to Hook's slaughterhouse to be killed. It was contended for the defence that Lloyd never intended the carcasses for the food of man. Mr. Mansfield dismissed the summons against Hook; but said he considered the charge against Lloyd made out, and fined him 40s.

Mr. Darbyshire, a tobacconist residing in Chelsea, has been fined £5 for selling lemonade without a license after ten p.m.

At Liverpool, on Saturday, Captain Simonds, of the steamship *Elmina*, was fined £10 and costs for having a naked oil-lamp burning in the fore-castle of his vessel while taking in gunpowder.

H.M.S. Firm was launched, on Wednesday last, at Hull.

The designs of a "torpedo ram" have, it is stated, been prepared in the construction department at the Admiralty, and provision will be made in the Navy Estimates for its construction at Portsmouth.

Mr. Henry Irving and Miss Bateman (Mrs. Crowe) gave a reading of "Macbeth," on Wednesday evening, in Birmingham Townhall, in aid of the Perry Bar Institute local literary institution. Upwards of 3000 persons were present.

The new municipal building at Manchester, of which the first stone was laid in 1868, and the cost is expected to be nearly a million, was first used by the council, last week, after a long debate between "City Hall" and "Town Hall" the latter carried the day by 35 votes to 23.

On Thursday the Wild Fowl Preservation Act, 1876, came into force. The Act protects woodcock, widgeon, sumpter snipe, teal, curlew, plover, wild duck, wild goose, stone curlew, sealark, sandpiper, redshank, purre, pochard, plovers, lapwing, mallard, dotterell, dinbird, oxbird, dun godwit, greenshank, peewit, phalarope, ruff, sandpiper, shoveller, stint, spoonbill, stonehatch, thickner, whimbrell, and snipe.

The first number of the *Portrait* (Provost and Co.) comes out with a capital subject—the members of the Constantinian Conference, photographed by Abdullah, of Constantinople, reproduced by the Woodbury process. The picture is an historic one, and has an interest apart from the half score of distinguished persons whose portraits it presents us with an effective group, as it is not unlikely that more serious consequences will result from the so-called failure of the Conference than if its deliberations had ended satisfactorily. Equally good with the photographic picture are Mr. Sutherland's lively résumé of so well-worn a subject as Eastern Question, and his witty remarks on the recent dramatic miscarriage, with the ludicrous finale presented by Sultan's toothache, and the storm in the Bosphorus, which prevented the discomfited Ambassadors from leaving in indignant haste they had determined on.

VALENTINE'S DAY: "WHICH SHALL I HAVE?"

VALENTINE'S DAY.

"Which shall I choose?" is the question here concerned in a very innocent little embarrassment. This pretty child, who seems to be taking counsel with her doll, has only to decide between the rival charms of two or three paper Valentines, the tasteful manufacture of Mr. Rimmel or Mr. Marcus Ward, or some other wholesale caterer for the seasonable provision of such elegant toys, given by friends of the young at the yearly festivals of customary joy. She cannot quite make up her mind, it seems, which of these equally attractive trifles she likes best; whether the one that displays a soft green nest of tiny birds, splendid in their crimson and yellow plumage, with their treasury of silver eggs; or the one inscribed with verses she cannot yet read, but exhibiting a picture of a small boy and girl dressed in bright-coloured silk, with golden shoes and belts, fondly addressing each other among the flower-beds of a miniature garden, where the bliss of mutual tenderness is further symbolised by the pair of doves billing and cooing overhead. Both have come by post this morning, sent by kind Aunty to her dear little niece, but Mamma has persuaded her to keep one of them, and give the other to a baby brother. So it must now be determined, by her own choice, which of them shall remain in her own possession. Mamma wisely declines to offer any advice, and there is no use in asking Nurse, who always says the same as Mamma. Baby Brother can't speak at all, so it won't do to ask him which he will have, and for her to take the other. Dolly is the only person in the nursery whom we have to consult; and she has a right to be consulted, for she knows that all our playthings are in common between us and her. "Come, Dolly! which shall I choose?"

THE LATE SIR HARDMAN EARLE, BART.

LATE SIR HARDMAN EARLE, BART.

Our last week's Obituary recorded the death of Sir Hardman Earle, of Allerton Tower, Lancashire, who was created a Baronet in 1869. He was in the eighty-fifth year of his age, but has within the past twelvemonth been able to follow the Cheshire hounds. This gentleman was the oldest of Liverpool merchants, and his family had been five generations settled in that town. He was also the oldest railway director in the world, having been on the first board of the Manchester and Liverpool Railway, and he still occupied a seat among the directors of the London and North-Western. He is succeeded by his eldest son, now Sir Thomas Earle, as second Baronet.

The portrait is from a photograph by Maull and Co.

The Alexandra Palace was offered for sale, at the Auction Mart, Tokenhouse-yard, last week, by Messrs. Norton and Trist, but was not sold. There was a very large attendance. The crowd outside the Mart was so great that the auctioneer and the solicitors connected with the sale had to enter the rooms by a ladder through the window. The biddings began at £300,000 and went up to £445,000, but the reserve price was not reached.—Mr. F. Sawyer, refreshment contractor to the Crystal Palace, has decided to withdraw his offer to lease the palace, "in consequence," he says, "of the unfair charges that have been made against the bona fides of the transaction and the undue opposition that the trustees have brought to bear" against him. Mr. Sawyer says that if the palace were conducted properly, and managed with even moderate care, dividends are to be made to the satisfaction of the shareholders.

NEW ASSOCIATES OF THE ROYAL ACADEMY.

MR. WALTER W. OULESS, A.R.A.

MR. MARCUS STONE, A.R.A.

Three esteemed artists—Mr. Peter Graham, Mr. Marcus Stone, and Mr. Walter Oules, were lately elected Associates of the Royal Academy. We present the portraits of these gentlemen.

Mr. Peter Graham was born at Edinburgh in 1836. He became a student of the School of Design in that city, and was trained especially for a figure-painter. He continued several years to paint figure-subjects and portraits, but felt more strongly attracted to landscape-painting, and so gradually passed over to that branch of art. In 1860 he was elected an Associate of the Royal Scottish Academy. He came to reside in London in 1866. In the Royal Academy Exhibition of that year he had a picture called "A Spate in the Highlands," which at once gained public attention, and was made the subject of much animated comment. Among the other pictures by Mr. Peter Graham which have from time to time been exhibited are the one sold by Messrs. Christie and Manson, from Mr. Gillott's collection, which is called "On the Way to the Cattle Tryst;" the picture entitled "Homewards," of which we gave an engraving at the time of its exhibition; "Autumnal Showers," which is now in the National Gallery, at Melbourne, in Australia; "The Cradle of the Sea Bird," "Wind," and "Our Northern Walls." The merits of these works have been generally acknowledged.

Mr. Marcus Stone is a native of London, a son of the late Mr. Frank Stone, A.R.A., who died in 1859. Mr. Marcus Stone is about thirty-six years of age. He was not a student of the Royal Academy. He has chiefly devoted himself to historical incidents and those of dramatic interest in social life. During the past nineteen years he has constantly sent one picture to each annual exhibition of the Royal Academy. Those which have been most admired, upon different occasions, were "From Waterloo to Paris," in 1863; "Stealing the Keys," in 1866; "Nell Gwynne," in 1867; "Princess Elizabeth forced by her sister, Queen Mary, to attend Mass," in 1869; "Henry VIII. and Ann Boleyn," in 1870; "The Royal Nursery," in 1871; "Edward II. and his favourite, Piers Gaveston," in 1872; "Le Roi est mort—vive le Roi," in 1873; "My

MR. PETER GRAHAM, A.R.A.

Lady is a Widow and Childless," in 1874; "Sain et Saué," in 1875; and, last year, "The Appeal for Mercy," and "Rejected," being the only time of his contributing two pictures to one exhibition. We hear that Mr. Marcus Stone intends to send one picture, of moderate size, to the exhibition of the present year. He gained a medal at the Vienna Exhibition for "Edward II. and Gaveston," and his picture of "My Lady is a Widow and Childless" won him a medal at the Philadelphia Exhibition of last year.

Mr. Walter William Oules was born at St. Helier's, Jersey, in 1848. His father, Mr. P. J. Oules, a local marine artist of some repute, placed him in London at first under the able teaching of Mr. Sparkes, head master of the Lambeth School of Art, but soon afterwards as a student of the Royal Academy, where he gained, in 1866, the silver medal for the best drawing in the antique school. The first picture he painted, "David brought before Saul," was in competition for the gold medal for historical painting. It did not gain that prize, but it was purchased by the States of Jersey to adorn the hall of Victoria College, where the young artist had been educated. He painted likewise for the Academy gold-medal competition, but unsuccessfully, "Ulysses and the Nurse," and "An Act of Mercy." In 1869 he had his first picture in the Royal Academy Exhibition, "Home Again," an incident of the French Revolution of 1789. Since that year he has been a constant exhibitor. One of his most interesting pictures, belonging to the same period of history, is that of Casotte accompanied by his daughter to prison, which was engraved for our Journal. Mr. Oules has during the last five years worked most successfully as a portrait-painter. Among his most successful portraits are those of Mr. J. Turner, Mr. Thomas Clarke of Knedlington, Lord Selborne, Mr. Sale, of Manchester, Lady Rachel Wyndham-Quin, Mr. Darwin, Mr. H. S. Marks, A.R.A., Mr. H. D. Pochin, Admiral Sir A. Milne, and the Right Hon. E. P. Bouverie. Mr. Oules has found favour in the sight of Mr. Ruskin. In his pamphlet on the pictures in the Academy, Mr. Ruskin drew special attention to the excellence of Mr. Oules's portraits. We have abundant reason for expecting

JOSEPH GILLOTT'S STEEL PENS.
Sold by all Stationers
THROUGHOUT THE WORLD.

VALUABLE DISCOVERY for the HAIR.
If your hair is turning grey, or white, or falling off, use "The Mexican Hair Renewer," for it will positively restore in every case Grey or White Hair to its original colour, without leaving the disagreeable smell of most "restorers." It makes the hair clean, healthy, and soft, as well as promoting the growth of the hair on bald spots where the glands are not decayed. Ask any Chemist for "The Mexican Hair Renewer," price 3s. 6d. Prepared by HENRY C. GALLUP, 493, Oxford-street, London.

FLORILINE.—For the Teeth and Breath.
Is the best Liquid Dentifrice in the world; it thoroughly cleanses partially-decayed teeth from all parasites or living "animalcules," leaving them pearly white, imparting a delightful fragrance to the breath. Price 2s. 6d. per Bottle. The Fragrant Floriline removes instantly all odours arising from a foul stomach, colds, and all other causes of bad breath, soda, and extracts of sweet herbs and plants. It is perfectly harmless and delicious as sherry. Prepared by HENRY C. GALLUP, 493, Oxford-street, London. Retailled everywhere.

JOHN GOSNELL and CO.'S CHERRY
TOOTH PASTE gives a beautiful Set of Teeth, makes the Teeth of pearly whiteness, and protects the enamel from decay.—Of all Chemists and Perfumers, at 1s. 6d. per pot.

TOM-BOY!—PIESSE and LUBIN'S
NEW PERFUME for the FESTIVE SEASON.
"Tom-Boy! Girls will be boys!"—Punch.
Kiss her gently, but be shy;
Kiss her when there's no one by;
Sneak your kiss, for then 'tis sweetest—
Bitten kisses are the sweetest.
Sold in Flasks, 2s. 6d., 5s., each; and in Cut Bottles, 21s. Laboratory—2, New Bond-street. Copyright.

TURKISH PASTILS.—PIESSE and LUBIN.—Through all my travels few things astonished me more than seeing the ladies of the East smoking Narghiles at breakfast. After smoking a sweet, aromatic lozenge or pastil is used by them, which is said to impart an odour of flowers to the breath. I have never seen these breath lozenges but once in Europe, and that was at PIESSE and LUBIN'S shop in Bond-street. "Lady W. Montague, in Boxes 2s.; by post, 2s. 2d." 2, New Bond-street.

GLYCERINE JELLY.—PIESSE and LUBIN.—A white and delicate hand is the first attribute of beauty and distinction. "The hand," says Sir Charles Bell, in the "Bridge-water Treatise," "distinguishes man from the brute. Be careful of it, for in polite society it is an index not only of the body, but of the mind." Too much cannot be said in favour of Glycerine Jelly for rendering the skin or hands white, delicate, soft, and for the body. Sold in Boxes 2s. 2d. 2, New Bond-street, London.

TO LADIES.—THE COMPLEXION.
Particulars of the only safe and successful mode of improving the Complexion sent post-free to any part. Address, E. K. LEBLANC ADAMS, 6, Burton-crescent, Tavistock-square, London, W.C.

ROWLANDS' ODONTO is of inestimable value in preserving the teeth. It eradicates tartar, removes spots of incipient decay, and polishes and preserves the enamel, to which it imparts a pearly whiteness. 2s. 6d. per Box.

ROWLANDS' MACASSAR OIL prevents hair falling off or turning grey, strengthens weak hair, cleanses it from scurf and dandruff, and makes it beautifully soft, pliable, and glossy. Price 3s. 6d., 7s., 10s., 6d., and 21s. per Bottle. Ask any Chemist for Rowlands' articles, and buy none but Rowlands'.

ROSSETTER'S HAIR RESTORER.
CERTAIN—HARMLESS—REFRESHING.
N.B.—Its success having led to many spurious imitations, the public are cautioned against substitutes.

TAYLOR'S WHITE FULLER'S-EARTH
is the only reliable and thoroughly harmless Skin Powder. Recommended by the most eminent dermatologists, and prepared by an experienced Chemist. It is the best dusting powder for infants. Used in the Nurseries of the Princesses of Wales, the Duchess of Edinburgh, the Duchess of Teck, and most of the aristocracy. Recommended by the Faculty of Medicine, and 13 or 14 stamps. Prepared only by JOHN TAYLOR, Chemist, 13, Baker-street, London, W. For winter use simply invaluable, and far superior to Glycerine or any greasy compound.

FOR THE TOILET, THE NURSERY, AND FOR SHAVING.
Pure, Fragrant, and Durable.

PEARS'S TRANSPARENT SOAP.
"Is an article of the most and most careful manufacture and one of the most refreshing and agreeable of balms to the skin."
"JOURNAL OF CUTANEOUS MEDICINE." Edited by MR. EDWARD WILSON, F.R.S.
Sold by Chemists and Perfumers everywhere.

THE COAL-TAR SOAP.
WRIGHT'S SAPO CARBONIS
DETERGENT.—Antiseptic, Detergent, Disinfectant. The most healthful, agreeable, and refreshing TOILET SOAP in the world. By its daily use, freedom from infectious diseases is secured; the complexion improved; pimples, blotches, and roughness removed; and the skin made clear, smooth, and healthy.
"In our hands it has proved most effective in skin diseases."—The Lancet.
"It is the only true antiseptic soap."—British Medical Journal.
In 1 lb. cakes, 6s. and 1s. each, of all Chemists.
W. V. WRIGHT and CO., Southwark-st., London.
Caution.—Beware of Spurious Imitations.

NOSE MACHINE.—A contrivance which,
applied to the nose for an hour daily, so directs the soft cartilage of the nose that an almost perfect straightness is secured. Sent free for stamps.—ALEX. ROSS, 25, High Holborn.

LAXORA.—The most pleasant Remedy for
Constipation.
One Shilling and Three Halfpence, by all Chemists and Druggists.

LAXORA.—Does not purge. It is a mild
Laxative.
One Shilling and Three Halfpence, by all Chemists and Druggists.

LAXORA, the most agreeable Remedy to
cure Constipation. Recommended by eminent Physicians. When you purchase, please see that you get the real American Tamar. Sold in Boxes at 1s. 10d., by all Chemists.
Special Agents in Foreign Countries:—Paris: A. Brunet, 93, Rue de Rennes; Brussels: L. Thyss, 68, Rue Anglaise; New York: E. B. Rugg, 7, City-place; London: J. Bell and Co., 51, Poultry; Melbourne: Felton, Grimwade, and Co.; Sydney: Elliott Brothers; Adelaide: A. M. Blackford and Sons; Dunedin: Humphreys, Prosser, and Co.; Auckland: Humphreys, Prosser, and Co.; Wellington: Felton, Grimwade, and Co.

WELL WORTH OF NOTICE.
A mild but efficacious remedy, without mercury, for headache, giddiness, indigestion, heartburn, and sluggish liver, is DR. ROBERTS' PILLS and LIVER PILLS. These Pills are a most valuable general family medicine, being mild in their operation; they create appetite, promote digestion, restore a healthy action of the various organs, and strengthen the whole system. Sold by all Chemists, in a square green package, 1s. 10d. and 3s. 6d. Take no other.

THROAT IRRITATION.
ROBERTS' GLYCERINE LOZENGES.
Sold only in boxes, and in 10s. 6d. and 21s. 6d. packets. JAMES FIFE and CO., HOMOEPATHIC CHEMISTS, 47, Threadneedle-street; and 170, Piccadilly.

LIEBIG COMPANY'S EXTRACT OF MEAT.—Finest Meat-flavouring Stock for Soups, Made Dishes, and Sauces. Caution.—Genuine ONLY with facsimile of Baron Liebig's signature across label.

NATURAL MINERAL WATERS
OF
VICHY.

Property of the French Government.
CELESTINS.—The water of this spring is very aerated, sparkling and slightly acidulated. Remedy for Complaints of the Kidneys, Gravel, Gout, Diabetes, Rheumatism, &c.
HAUTERIVE.—This spring contains a greater quantity of carbonic acid, and is especially recommended as a chalybeate.
GRANDE-GRILLE.—For Complaints of the Liver and Biliary Organs, Indigestion, &c.
HOPITAL.—For Stomach Complaints, &c.
VICHY WATERS are pleasant to the taste, and may be drunk pure or mixed with wine or spirits.
CAUTION.—See that the name of the particular water required is on the capsule.
Sold by all Chemists, Wine and Mineral Water Merchants. Price One shilling per Bottle.

TEETH.—Mr. WEBB, of 27, New Bond-
street, constructs ARTIFICIAL TEETH from one to a complete set, upon a well-known but hitherto exclusive system. Terms most moderate. Consultations free. (For many years with Mr. A. Clifford Esq., of 5, Grosvenor-street).

PAINLESS DENTISTRY.
MR. G. H. JONES, SURGEON-DENTIST, will be glad to forward his New Pamphlet, gratis and post-free, which explains the most unique system of the adaptation of artificial and extraction of natural teeth without pain, from his only London establishment, 67, Great Russell-street (opposite the British Museum).

"My dear Doctor.—I request you to accept my grateful thanks for your great professional assistance, which enables me to masticate my food; and wherever I go I shall show your professional skill, as I think the public ought to know where such great improvements in dentistry and mechanical skill can be obtained."
I am, dear Doctor, yours truly, S. G. HUTCHINS.
"By Appointment Surgeon-Dentist to the Queen."
"G. H. Jones, Esq., D.D.S."

HOLLOWAY'S PILLS and OINTMENT.
The Pills purify the blood, correct all disorders of the liver, stomach, kidneys, and bowels. The Ointment is unrivalled in the cure of bad legs, old wounds, gout, and rheumatism.

LAMPOUGH'S PYRETIC SALINE.
Have it in your houses and use no other. This Saline is the true Antidote in Fevers, Eruptive Affections, Sea or Bilious sickness, having peculiar and exclusive merits. For the protection of the public against fraudulent imitations I have applied for and again obtained a perpetual injunction, with costs, against the defendant. Observe the genuine has my Name and Trade Mark on a Buff-Coloured Wrapper.—115, Holborn-hill, London.

COUGHS, ASTHMA, BRONCHITIS.
Medical Testimony states that no other medicine is so effectual in the cure of these dangerous maladies as KEATING'S COUGH LOZENGES. One lozenge gives relief, one or two at bedtime ensure rest. Sold by all Chemists, in Boxes, at 1s. 1d. and 2s. 6d. They contain no opium or preparation thereof.

THROAT AFFECTIONS and HOARSENESS.—All suffering from Irritation of the Throat and Hoarseness will be greatly surprised at the almost immediate relief afforded by the use of BROWN'S BRONCHIAL LOZENGES. These famous Lozenges are now sold by most respectable Chemists in this country at 1s. 10d. per Box. People troubled with a hacking Cough, a slight Croup, or Bronchial Affections, cannot try them too soon, as similar troubles, if allowed to progress, result in serious Pulmonary and Asthmatic affections.—Depot, 493, Oxford-street, London.

GOUT and RHEUMATISM.—The
excruciating pain of Gout or Rheumatism is quickly relieved and cured in a few days by that celebrated Medicine, HALL'S GOUT and RHEUMATISM PILLS.
They require no restraint of diet or confinement during their use, and are certain to prevent the disease attacking any vital part.

DR. LELIEVRE'S ICELAND MOSS
FOULITICE (Patented) is exempt from all the inconveniences inseparable from Foulitices made with Linseed or Bread. These soothe the Itching, bedding, &c., dry up the edges, rapidly ferment, giving a most unpleasant odour; and no dependence can be placed on the quality and freshness of the linseed meal. This New Foulitice is instantaneous, for it is ready in a few seconds. Sold retail by all Chemists.
Wholesale, RIGOLLOT and CO., 82, Southwark-street, London.

HEALTH, TONE, AND VIGOUR.
THE LATE SIR ASTLEY COOPER'S
VITAL RESTORATIVE, for Strengthening the Nerves and Purifying the Blood, highly recommended for the loss of Nerves and Physical Force, pleasant to the taste, perfectly harmless, possessing highly reanimating properties. It removes pimples, blotches, purifies the blood, gives sound refreshing sleep, and restores the constitution to health and vigour in a short time. Sold by most Chemists at 2s. 6d., 4s. 6d., 11s., and 21s. per Bottle; sent, on receipt of price, by HILTON and CO., 9, Lower Belgrave-street, London. Particulars free.

"FOR THE BLOOD IS THE LIFE."
CLARKE'S WORLD-FAMED BLOOD
MIXTURE is warranted to cleanse the Blood from all impurities, from whatever cause arising. For eczema, Scoury, Skin and Blood Diseases, its effects are marvellous. In Blisters, 2s. 6d. each. Thin Cases containing six or twelve, 12s. 6d. each, of all Chem

LONDON: Printed and Published at the Office, 138, Strand, in the Parish of St. Clement Danes, in the County of Middlesex, by GEORGE C. LEITCH, 138, Strand, aforesaid.—SATURDAY, FEBRUARY 17, 1877.

THE QUEEN OPENING PARLIAMENT.

The ceremonial of the Queen opening the fortieth Parliamentary Session of her reign, on Thursday week, being an occasion of peculiar interest, was fully described in the last Number of this Journal. It is the subject of one of our illustrations; besides which another Engraving shows the scene at a later hour in the House of Lords when the Prime Minister, the Right Hon. Benjamin Disraeli, Earl of Beaconsfield, took the prescribed oaths and his seat, as a newly created Peer of the Realm; and we also present a group of portraits of the members of the Chinese Embassy, lately arrived in London, whose figures were conspicuous among the privileged spectators of the opening of Parliament.

The House of Lords was filled that day, at an earlier hour than in previous years, with its members on the benches, and with the peeresses and their daughters in the galleries, besides those who stood around or behind the throne. Until the arrival of her Majesty to occupy the throne, on which the Royal robes of ermine were ranged in order, the part of the House to which the spectators' gaze was most turned was that corner in which were the members of the diplomatic body. Here, in different rich uniforms, were the representatives of the Powers accredited to the English Court. Occupying the back seat but one in the Ambassadors' box were two personages whose features and costume at once marked them out for observation. These were the Chinese Envoys, attired in black silk tunics, with embroidery on the breast, and wearing peculiar-shaped caps of brown plush, decked with a long scarlet feather, and with a bright red patch in the middle of the cap. The representatives of China offered a striking

contrast to their diplomatic colleagues. The front row had for its occupants the Ambassadors of Germany, Turkey, Austria, France, Italy, and the Ministers of Spain, Denmark, and Holland; and near them was Mr. E. Pierrepont, the United States Minister, in plain "evening dress." Musurus Pasha was the last of the Ambassadors to arrive; and when he took his seat it was observed that he held a long conversation with Count Beust. The Archbishops of Canterbury and York and other Bishops, as well as the Lord Chancellor and the Lord Chief Baron and other legal dignitaries, were to be seen on the cross benches in the places occupied by the prelates and the Judges. In a far-off corner at the principal entrance to the house were the diplomatic secretaries and attachés, and the military and naval representatives of their respective Courts. Two others of the Chinese diplomatists were among them, clad similarly to their colleagues.

The red curtains draping the Royal entrance were drawn at two o'clock to admit the Prince and Princess of Wales. The Prince was in his peer's robes. The Princess wore a dress and train so light in hue that to the distant spectator they had the appearance of white. Her Royal Highness seated herself on the woolsack, and remained its only occupant throughout the ceremony. Princess Mary Adelaide (Duchess of Teck) was not present. The Prince of Wales took his accustomed seat on such an occasion—the state chair on the right of the throne. Ten minutes after the entrance of their Royal Highnesses the trumpet-blast was heard, warning all that the Queen had arrived. Almost immediately five heralds, in their emblazoned tabards, made their appearance, and, saluting the Prince and

Princess of Wales, took up their position to the left of the throne. A little group of other officials (among them Lord Alfred Paget) and two mace-bearers followed, and then it was seen that the peer bearing the sword of state in front of the Queen was the Earl of Beaconsfield.

Her Majesty, to receive whom all rose, wore a black velvet dress with a train and deep flounces of miniver, the dark-blue Garter ribbon, a collar of brilliants, and the small jewelled crown over her widow's cap. When the Queen had taken her place on the throne the picture presented to the spectators was this:—On the right of her Majesty, in the order described, were the Marquis of Winchester (holding the cap of maintenance), the Prince of Wales, and the Lord Chancellor. On the other side stood the Earl of Beaconsfield, in his peer's robes, and holding the state sword; Princess Beatrice, and Princess Louise (Marchioness of Lorne). The frame, so to say, was formed of military and civil officials, with here and there a member of the Queen's body-guard of Gentlemen at Arms. Nearest to the diplomatic corps stood Prince Christian, in his scarlet uniform, and the Duke of Teck, in his dark-blue volunteer artillery uniform.

By the Queen's command the assemblage seated themselves in order to hear the Lord Chancellor read the Royal Speech, which was given in our last. When its reading was finished, the Queen, rising, motioned to the Earl of Beaconsfield to precede her. Then, advancing towards the woolsack, her Majesty kissed the Princess of Wales previously to giving her hand to the Prince of Wales to be kissed by his Royal Highness. Prince Christian and the Duke of Teck paid similar

homage to her Majesty, who then left the House, and the ceremony, which had lasted about twenty minutes, was concluded.

At a quarter past four o'clock the Lord Chancellor took his seat on the woolsack. At this period there was but a sparse attendance of peers, but the House rapidly filled, and soon almost every bench in the body of the chamber was occupied, while the galleries and spaces in front of the throne and at the bar were literally thronged with members of the House of Commons and other privileged spectators. The peeresses' gallery was unusually crowded.

At half-past four o'clock the Earl of Beaconsfield was introduced. Preceded by the Yeoman Usher of the Black Rod (Colonel Clifford), Garter King at Arms, the Earl Marshal (the Duke of Norfolk), and the Deputy Grand Chamberlain (Lord Aveland), and supported by the Earl of Derby and the Earl of Bradford, the noble Earl, in his robes of state, advanced to the woolsack and placed in the hands of the Lord Chancellor his patent of creation as Viscount Hughenden and Earl of Beaconsfield. The patent and writ of summons having been read by the Clerk at the table (the Hon. Mr. Bethell), the noble Earl, having taken the oath and signed the roll of Parliament, was conducted to the Viscounts' bench, where, with his supporters, he took his seat. After the usual ceremonial bows had passed between them and the noble and learned Lord on the woolsack, the noble Earl took his seat on the Earls' bench, and then, having exchanged greetings with the Lord Chancellor, retired to unrobe. A few minutes afterwards he returned into the House, where he was warmly greeted by his supporters, and took his seat on the Ministerial bench, between the Duke of Richmond and Gordon and the Earl of Derby. Scarcely had the noble Earl been seated when the Marquis of Salisbury was seen advancing towards his place. The appearance of the noble Marquis was the signal for a spontaneous and generous burst of cheering from both the Ministerial and Opposition benches.

The two Chinese Ambassadors are named Kwoh-Sung-Tao and Lin-Si-Hung. The former is a Mandarin of the first or highest grade, as is shown by the red coral ball on the top of his cap. His assistant, Lin-Si-Hung, who wears a large pair of round tortoise-shell spectacles, is a Mandarin of the third grade. Their staff comprises a Chinese secretary, an English secretary (Dr. Macartney), and two interpreters, besides two under-secretaries, two clerks, and four attachés, with a numerous train of servants. His Excellency Kwoh-Sung-Tao is accompanied by his wife, a handsome and ladylike woman, with whom is an elderly female companion, and there are two young handmaids. Lady Kwoh, if she may be so styled, wears on the small feet, which are prized as an artificial beauty in China, a pretty little pair of bootkins, embroidered with gold. She is able, nevertheless, to walk at least a hundred yards. Her delicate finger-nails, likewise, though allowed to grow extremely long, do not absolutely prevent her helping herself. But she is, according to the manners and fashions of her country, a most accomplished person; and our Queen bids her welcome, with all the Embassy, to the English Court.

THE VOLUNTEERS.

Dunstable has been inspected and recommended by the committee of officers deputed to inquire and report upon an eligible ground for the proposed Easter-Monday review.

The champion gold badge of the 36th Middlesex was competed for, at Wormwood-scrubbs, last week. It was secured by Corporal Miller, with 76 points; the next highest scores being Sergeants Heath and Hancock, 74 points each.

The monthly competition of the 7th Surrey at Wimbledon, last week, was won by Private Broughton.

The annual dinner of the Cadet Corps of the London Rifle Brigade took place at the Guildhall Tavern, last week—Staff-Sergeant Banister in the chair.

The members of the 20th Middlesex received their prizes, yesterday week, at the Euston-square Station, from the hands of Colonel the Hon. Percy Feilding, C.B., Coldstream Guards. In opening the proceedings, Lieutenant-Colonel Gore Browne, the commanding officer, made a short statement with regard to the corps, from which it appeared that there had been a slight decrease in efficiency in 1876 as compared with the previous year, but that, since the returns had been sent in, there had been a large accession of recruits. The chief prizes were secured by Quartermaster Davidson and Quartermaster-Sergeant Williams. Colonel Feilding remarked on the careless manner in which some volunteers habitually handled their firearms.

The annual distribution of prizes to the members of the Queen's (Westminster) took place, last Saturday evening, in Westminster Hall. The winners received their rewards from the hands of Lady Beatrice Grosvenor, who officiated in place of the Duchess of Westminster, both her Grace and the Duke being prevented by illness from attending. Lieutenant-Colonel Bushby, who was in command, said that the regiment had increased by twenty-seven during the past year, and now mustered 832, including 83 first year recruits. The numbers for 1875 were 722, and for 1876 were 749; the efficiencies being 640 and 697. Captain Starkie's I company was the best shooting company, and L company (Captain Shoobred's) the next in order of merit. Private Hind, of the K company was the champion shot of the regiment.

Last Saturday the London Corps of Royal Naval Artillery Volunteers was officially inspected by Rear-Admiral Phillimore (Admiral-Superintendent of Naval Reserves), Mr. Ward Hunt, accompanied by Captain Codrington, R.N., being also present. The corps, about 200 strong, under the command of Lord Ashley, was drawn up in line in the drill-shed, alongside her Majesty's ship President, in the West India Docks. The men performed the manual and firing exercises and executed a few simple manoeuvres. A cutlass party was then told off and went through the drill. Pistol exercise followed, and the visitors then adjourned to the main deck of the President, where two guns' crews of fifteen men each went through various operations with the 64-ton muzzle-loading rifle guns on board that vessel, after which the men fell in and were addressed by the gallant Admiral and Mr. Ward Hunt, both of whom congratulated the men on the highly efficient manner in which they had gone through their exercises, and thanked them for their self-devotion. The prizes were presented to the successful competitors by Lady Ashley. Conspicuous among the prizes was the costly loving cup presented by the Commercial Union Assurance Company to a boat's crew of the corps in recognition of the services rendered by them at a fire on board the screw steam-ship La Plata, which was on June 14, 1873, saved from destruction mainly by their exertions.

A public meeting, convened by the Mayor, was held at Bristol, on Monday, at which it was unanimously resolved to invite the Royal Agricultural Society to meet there in 1878.

An inquiry was held at Brighton Townhall, last Saturday, by Mr. S. J. Smith, local government board inspector, into the application of the Town Council to raise a loan of £2500 in order to fence a public recreation ground called the Level.

NEW BOOKS.

RUSSIA AND ASIA.

Several new books have lately brought us fresh information, which is particularly desirable at the present crisis, about the condition of the Russian Empire, and those parts of Northern Asia which are coming more and more into its power. The most recent publication, and one of the most important, is the work of Mr. D. Mackenzie Wallace, entitled simply *Russia*, consisting of two handsome and very readable volumes, issued by Messrs. Cassell, Petter, and Galpin. We will endeavour to give a brief account of what is most valuable or remarkable in its contents.

Mr. Wallace lived in Russia nearly six years, to December, 1875, moving all over the country in the summer of each year, but spending the winters mostly at St. Petersburg, at Moscow, at Nijni Novgorod, or at Yaroslavl, a considerable town on the Volga, north-east of Moscow. He consequently saw Russia much more attentively and minutely than Mr. Hepworth Dixon could do in a hasty tour; he was accompanied, in various journeys through the provinces, by well-informed Russian friends; he learnt the language, studied the law and administration in places of high authority, and made extensive personal inquiries among all classes of the people. A book composed of the materials collected with such rare special opportunities, vigorously compared and digested, and set forth in a candid, truthful, friendly spirit, is just now most likely to do good service. Its worth for political instruction need scarcely be remarked; but the reprint of Cobden's famous essay, "Russia, Turkey, and England," after the lapse of forty years, reminds us how long the public mind has been a prey to irritating anxieties and animosities upon this subject.

The great expansion of the Russian dominion, which on the Continental maps of Europe and Asia has appeared rather alarming, may be explained by less obnoxious motives than have been often ascribed to its rulers. There is a spontaneous process of colonisation, of which the English race, in America, in Africa, in Asia, and in Australasia, have shown the most notable examples. There is a necessity of occupying new ground for self-defence, especially against lawless nomadic tribes, which our own nation has practically shown to be inevitable, by its experience in India and at the Cape, during the last fifty or a hundred years. There is also, for any large and important country with a growing civilisation, the urgent need of access to the seacoast, which has been in some measure denied to Russia, by the annual freezing of the Baltic, and by the Turkish sequestration of the Black Sea. It is but just to make allowance for all these conditions in the case of Russia, before we accuse her Government or her people of what Mr. Wallace calls "the foolish lust of territorial aggrandisement." He bears witness that such ideas as that of a Russian conquest of India, or even the annexation of the whole of Asia, are merely "the seductive dreams of a few amateur speculative politicians." All serious persons in Russia, certainly all with any official influence, reject these wild fancies. It is true, however, that with a view to the supposed commercial interests of Russia, the extent of their dominion is prized as enlarging the area of a rigid protective policy for the profit of their trade and manufactures; but "Russia will certainly not, for the present, at least, annex new territory for the simple purpose of obtaining new markets." Mr. Wallace, towards the conclusion of his book, examines more particularly the chances of any Russian attempt being made to gain fresh conquests in the East, at the expense of China or of British India, or to the south of her European position, in the Turkish empire. He thinks it not unlikely that, if China be unable to govern her own subjects on the Russian frontier, and to prevent their committing depredations, there will be, of necessity, some additional Russian annexations. For the same reason there may be a still further advance of Russia among the Turcomans and over the petty States of Central Asia, in the direction of the Hindoo Koosh and Afghanistan. "It is pretty certain," he says, "that the Russian and British frontiers will one day meet;" but it does not follow that these two great Empires should engage in a conflict with each other. In the event of hostilities, Russia might possibly cause us some annoyance by making a diversion in that quarter; but our military position in India would be incomparably superior, and we could easily repel the attack. With regard to Turkey, it is admitted that Constantinople, as the ancient metropolis of the Greek or Byzantine Church and Empire, has always been regarded with peculiar veneration by the Russian peasantry and priesthood. There is also a certain amount of enthusiasm for the Slavonic race, to which the Russian nation belongs; and this cannot be wholly ignored. But the only political motive which could actually prompt Russia to an attack upon Turkey is her wish, as a naval Power, to possess the outlet from the Black Sea into the Mediterranean. It must be very disagreeable to her that the Turks should have the power to blockade all her southern ports at their pleasure, by closing the Bosphorus and the Dardanelles; but the idea of taking Constantinople for the capital of the Russian Empire is never entertained for a moment. In any case, Mr. Wallace is of opinion that the Russian naval supremacy in the Black Sea, even with the outlet to the Mediterranean, could never endanger or embarrass our communications with India. A jealousy of Russian designs has been revived by the conduct of that Government upon the late occasion; yet it is credible that Alexander II. and his Ministers really wished to hold back Serbia and Montenegro, but were forced to show them some countenance, in order to preserve the influence of Russia among the Slavonic populations. These are the views of Mr. Wallace, and they are sufficiently reasonable to bid us lay aside the existing prejudices against Russia.

What is the actual state and character of Russia at home, we may learn from this interesting book, which invites and will reward a careful reading. Only a few of its pages, here and there, are occupied with mere anecdotes of travelling, lodging, and visiting. The descriptions of St. Petersburg and Moscow are deferred to a late chapter, and are kept quite subordinate to the estimate of their social and political influences. Mr. Wallace has rather sought to depict the habits, position, and sentiments of different classes and types of the Russian nation, and to give an exact account of the working of their domestic government. The peasant family, the nobility, the old and new school of landed proprietors, the mercantile townsfolk, the village magistrates, the parish priests, the dissenters and heretical sects, the lately emancipated serfs, the Fins, the Cossacks, the Tartars, the German, Jewish, and other foreign colonists, are separately portrayed in very life-like sketches. We find as much as we want to know about the old communal democracy of the villages in the management of their local affairs, by what is called the "Mir;" and the new institution of the "Zemstvo," with district and provincial elective assemblies, designed to complete the system of local self-government. The most amusing chapters, after the first three or four, which describe the incidents of some journeys into the country, and the rural scenery of a village called Ivanofka, with the clergyman, the doctor, and the German land-steward there, are the personal sketches, under fictitious names, of different characters among the landowning nobles, the merchants in towns, and the old class of peasants.

There is an air of substantial and living reality about these individual figures of Ivan Ivanovitch K—, the stolid country squire, and his wife Maria Petrovna; his brother Dimitri, a debauched idler and hanger-on of the family; the retired old General Nicolai Petrovitch B—, and his fashionable lady; Andrei Vassilitch the cruel serf-master, Pavel Trophimitch the jovial but not impeccable judge, and Alexei Petrovitch, a very mercenary rascal who gets on in the world. These are followed by the men of a modern school, ambitious of taking part in social reforms; Victor Alexandrovitch L—, the cultivated and philanthropic idealist; Vladimir his brother, a courtier and official aspirant to Imperial favours; then the sturdy champion of Russian nationality, Alexander Ivanovitch N—, and the democratic literary revolutionist, Nikolai N—, each a type of some existing class in Russia at the present time. The reader will not easily forget their peculiarities of mind, and will be assisted thereby to estimate the political tendency of such habits of life and thought. By this lively presentment of Russian society, more agreeably and forcibly than by abstract disquisition, Mr. Wallace helps us to understand the true disposition of Russian society. The Imperial Government, of which we are told so much in the newspapers, the Orthodox Church and Russian ecclesiastical hierarchy, the reigning dynasty, the late Emperor Nicholas and the present Emperor Alexander II., are spoken of with discreet appreciation, but in a tone of impartial judgment. An interesting chapter is taken up with the consequences of the Crimean War to the internal condition of Russia; but among the great reforms which have since been effected, the emancipation of twenty millions of serfs from feudal bondage, which is chiefly due to the Emperor Alexander himself, is fully discussed in three or four succeeding chapters. The recent improvements in the judicial administration are likewise explained. We advise everybody who presumes to talk about Russia to read Mr. Wallace's book.

The same publishers have already issued a sixth edition of Captain Burnaby's *Ride to Khiva*, which has quickly won high popularity as an interesting narrative of personal adventure in Central Asia. It is written in a spirited, pushing, dashing style worthy of the performance it relates, and of the active, hardy, and resolute English officer by whom this feat of travelling enterprise was achieved. He started from London at the end of November, 1875, hastened to St. Petersburg, thence to Moscow, and onward by the Orenburg Railway, which only goes as far as Sizeran; but he took a sleigh or sledge on to Samara, crossed the Volga, and got to Orenburg, from which place he again started, in the third week of December, to brave the extreme severity of winter on the dreary Asiatic steppes. Having arrived by sledge-travelling over the vast sheet of snow, hundreds of miles in extent, at Kassala, on the river Syr Daria or Jaxartes, beyond the Sea of Aral, he was obliged to do the remainder of his journey on horseback. He had determined to go to Khiva, in spite of an express prohibition, by the Russian Government, excluding all foreigners from the approach to that recently conquered Turcoman city and province. Captain Burnaby is master of the Russian language, and is the sort of man to succeed in doing what he undertakes. He actually contrived to get to Khiva, riding in January, with a single Tartar guide, four hundred miles across the desert between the Syr Daria and the Oxus, or Amoo Daria, evading the Russian towns and military posts. The Khan of Khiva, who still resides and nominally reigns in his fallen capital, received Captain Burnaby with great hospitality, not feeling, perhaps, exactly the same as the Russian authorities feel, towards an English visitor. After his brief sojourn there, it was Captain Burnaby's intention to go on to Bokhara, and thence by Merv to enter Afghanistan, and get into the Empress Victoria's dominion of India. But he was unexpectedly summoned home by an order from the Horse Guards, and had to retrace his steps, through the remaining winter months, across Tartary and Russia, in his hurried return to London. Few men in the Army could have borne the fatigues of this continuous succession of rapid long journeys, at that inclement season of the year, and in those rough countries, so well as the gallant author of this very interesting book.

Russian travellers, however, in the more easterly and northerly regions of Asia, have lately made important contributions to geographical science. One of the most valuable is presented in a work translated for the recent publication of Messrs. Sampson Low and Co., treating of *Mongolia, the Tangut Country, and the Solitudes of Northern Tibet*. It is a narrative of three years' travel in Eastern High Asia, by Lieutenant-Colonel N. Prejevalsky. We have had in our own day many travellers worthy of the great reputation attached to their names. Burton, Speke, Grant, Livingstone, Cameron, and Stanley are known to the ends of the earth. Yet it is doubtful if any one of these has accomplished more in extent of travel or in the difficulties they surmounted than was done by Huc and Gabet, two Roman Catholic missionaries, who about thirty years ago penetrated through Mongolia from Peking, and reached the sacred city of Lhasa. The account of the journey, written by the Abbé Huc, is one of the most charming books of travel that has been written, but, like Bruce's book, there have been doubts as to its truthfulness, and accusations of extravagant romancing have been made. To those who have read Père Huc's account of the long journey, it will be a great satisfaction to find in Colonel Prejevalsky's book some introductory remarks written by Colonel Yule, in which he defends the truthfulness of the Jesuit missionary. In a long course of reading and inquiries which Colonel Yule went through, identifying the localities in Marco Polo's travels, he has made himself familiar with the extensive region known as "Central Asia;" and his judgment ought to extinguish all scepticism regarding one of the most wonderful journeys ever made, and one of the most delightful books of travel ever written. Samdachiamba, the Mongol who accompanied Huc and Gabet, stands out as if the portrait had been drawn by Molière or Dickens, and it is like meeting an old friend when Colonel Prejevalsky tells us of seeing him at one of the towns he passed through. He is now fifty-five years of age; but, although in good health, he refused to accompany the officer of the *Tsagan-Khan*, as the Mongols call the Emperor of Russia. Although Colonel Prejevalsky's book is not so interesting to read as the one just alluded to, it is, nevertheless, an important contribution to our knowledge of a strange region. Geography, natural history, and botany were the objects in view, and information on these heads predominates; still, there is much in the two volumes which will interest the general reader. The third volume, which is not yet published, will be the most strictly scientific of the whole, for it will deal with the fauna and the flora in a classified form. The author gives very good word-pictures of most of the animals peculiar to Mongolia; that of the Bactrian, or two-humped camel—the only one known to the Mongols—is well worth reading. There is also a good description of the wild yak; and the statement as to the amount of bullets one of these animals can receive into its body, and yet walk about as if nothing had happened, is something wonderful. The curiosity of the natives was extreme. Europeans are scarce in Mongolia, and when at rare intervals a traveller does appear he is literally mobbed. Everything

is strange to these out-of-the-way people, and they inspect every article much as children would do. They come in such crowds that there is no keeping them out of the yurta or tent; and as soon as one mob has inspected everything other people force themselves in. This was one of the difficulties which Colonel Prejevalsky and his companion, M. A. Pytseff, had to contend with. The climate was another source of trouble to men who had maps to make, plants to lay down, skins of animals to preserve, and observations of many kinds to keep an account of. At one season they had an all but Arctic winter to live in, and at other times a tropical sun was blazing overhead. Whoever reads the accounts in this work of the vast solitudes of Thibet and Mongolia, and the conditions of life in them, will understand how China has been isolated from the nations of the West. The Mongols under Chinghis Khan were able to carry conquest out of their own region; but no army has ever been able to pass in the other direction. Alexander the Great felt his way as far as the country about Samarcand, and then turned down into India. The eastern wave of Mohammedanism, which made such a complete conquest of India, seems to have passed also over the deserts of Mongolia; but before it reached China it was only a ripple, without force, and totally incapable of influencing the ideas or institutions of the Celestials. The late insurrection in Yunnan was Mohammedan, and it has been suppressed; the Dungan revolt, so often referred to by Colonel Prejevalsky, is also Mohammedan, and it has seemingly expended itself also, and the Chinese troops are re-occupying the country. Steam navigation has entirely changed the position of China. The desert solitude of Mongolia is not now the highway to China, and, in considering the important political questions of Central Asia—so far, at least, as it relates to China and Russia—it should not be forgot that by means of the ocean all the Powers of Europe are nearer to China than Russia. We have a convincing illustration of this in the fact that the extensive tea trade, which used to go overland by Mongolia, is now finding its way through the Suez Canal to Odessa—and that, too, at less than a tithe of the cost of the old route. The path of commerce is the path of conquest and power. China is no longer isolated—she is face to face with the nations of the West; and it will be a curious problem to see how long that exclusiveness will be maintained under the new conditions.

We observe that Colonel Prejevalsky, the explorer of Mongolia, has started on another journey to the east of the regions lately annexed by Russia in Central Asia; and it was announced, in connection with his exploration, at a meeting of the Geographical Society, that fresh discoveries were expected by him. This was when Sir Douglas Forsyth read his papers on the buried cities of that region. Prejevalsky expected to eat his Christmas dinner at Lake Lob. This shows how actively Russia is pressing, by means of such missions, into all the corners of the Central Region of Asia.

M. GUILLEMIN IN TWO CAPACITIES.

Ocular inspection will prove that a written description can hardly do full justice to the beauty and worth of so fine, handsome, profusely illustrated, and instructive a volume as *The World of Comets*, by Amédée Guillemin, translated and edited by James Glaisher, F.R.S. (Sampson Low and Co.), a volume as desirable for ornament as it is acceptable for information. Nor is it easy to over-estimate the additional value which the book has derived from its editorship; for the editor, whose very name produces a feeling of confidence, has taken upon himself the task of supplying that additional explanation which from time to time, as he pursued his labour of translation, appeared to him to be seasonable, if not necessary; of providing notes, "whenever the researches of the two years that have elapsed since the publication of the original work threw further light upon the subject;" of correcting "in the text all errors which were evidently purely accidental, and such as always will occur in the first edition of any work." The editor warns the public that he must not, from the absence of a note at any particular part, be understood to endorse every view put forward, but, nevertheless, he acknowledges that very few opinions or theories are advanced from which he would "feel at all inclined to dissent." In two cases, relating, respectively, to Coggia's comet, which had only just left us when M. Guillemin's work was published, and to "the connection of comets and shooting-stars," the editor has thought it advisable to carry his supplementary observations to considerable length. No wonder the editor feels it incumbent upon him to express his thanks to Dr. Warren De La Rue, F.R.S., for placing at his disposal copies of two beautiful drawings representing two phases of the great comet of 1861, for the plates reproducing those two drawings are among the most exquisite of the many exquisite engravings. Chromolithography has here and there been pressed into the service of embellishment, and very striking indeed is the chromolithograph of "Donati's comet, as seen at Paris on Oct. 5, 1858." It is now time to describe the scope of the author's dissertations. There are fifteen chapters, divided into sections. The first chapter has for its very interesting subject "beliefs and superstitions relative to comets." In the second, "cometary astronomy up to the time of Newton" is the theme of discourse. In the third, "the motions and orbits of comets" are discussed. In the fourth and fifth, "periodical comets" are treated of. In the sixth, "the world of comets and cometary systems" are dealt with. In the seventh, the question of the "physical and chemical constitution of comets" is entered into. In the eighth, the "physical transformations of comets" are investigated. In the ninth, we are invited to consider the "mass and density of comets;" in the tenth, "the light of comets;" in the eleventh, "the theory of cometary phenomena;" in the twelfth, the connection of "comets and shooting-stars;" in the thirteenth, some relations between "comets and the earth;" in the fourteenth, the "physical influences of comets;" in the fifteenth, "some questions about comets." Nor let anybody, however innocent of astronomical knowledge, be deterred by apprehensions of dry science. There are anecdotes in abundance, and ascertained results or reasonable speculations are presented in a popular manner, such as can be appreciated by the least technically-informed intelligence. It is hard work for science to exorcise superstition and to enlighten ignorant minds. There are still multitudes who believe in their innermost hearts, as was believed in days long antecedent to the Christian era, that comets, like the comet which appeared in the year in which Napoleon I. was born, are heavenly messengers prefiguring disaster; and there are still multitudes who have the wildest ideas about what would happen, in all probability, if a collision were to take place between our earth and a comet. As regards all such points, and as regards the supposed effect of the comet upon the wine of 1811, it would be well for everybody to read what has been written by M. Guillemin. Some of the most curious results attributed to that said comet are ingeniously enumerated, without any shadow of doubt upon the point, in a letter which appeared in the *Gentleman's Magazine* for November, 1813: "through the influence of the comet of 1811," says the writer, as if he were stating indisputable fact, "the winter following was very mild, the spring was wet, the summer cool, and

very little appearance of the sun to ripen the produce of the earth; yet the harvest was not deficient, and some fruits not only abundant, but deliciously ripe, such as figs, melons, and wall-fruit. Very few wasps appeared, and the flies became blind and disappeared early in the season. . . . But what is very remarkable, in the metropolis and about it, was the number of females who produced twins, some had more, and a shoemaker's wife in Whitechapel produced four at one birth." We have, at any rate, in the course of rather more than half a century, eaten so much of the tree of knowledge as to have emerged from that stage of innocence and simplicity; at least, some of us have, though many, no doubt, have not.

In size, in instructiveness, in interest, in lavishness and beauty of illustrations, M. Guillemin's "World of Comets" is partly eclipsed and altogether run hard by his *Applications of Physical Forces*: translated by Mrs. Norman Lockyer, and edited, with additions and notes, by J. Norman Lockyer, F.R.S. (Macmillan and Co.), the illustrations, coloured and uncoloured, being almost, taken together, though the coloured are few, as the sand upon the seashore for multitude. Moreover, the huge volume has a great advantage over the other work in the possession of the ever desirable index. The subject too, is, if not more fascinating, at any rate more closely connected with the procedure of daily life, and more calculated to engross the attention of practical minds, teaching, as it does teach, some useful lessons about everything that goes on around us, in this busy world, day by day, hour by hour, minute by minute. The whole work is divided into five "books," whereof the first deals with "applications of the phenomena and laws of weight;" the second with "applications of the phenomena and laws of sound;" the third with "applications of the phenomena and laws of light;" the fourth with "applications of the phenomena and laws of heat;" the fifth with "magnetism and electricity." It is difficult to conceive that there can exist a book, when the competence of the editor and the endeavour which "has been made to bring the different subjects up to date" are considered, from which both old and young might be expected to derive more instructive delight and more delightful instruction, with the explanatory illustrations to aid the letterpress, even as hand washes hand. The best of such a book is that it does not require consecutive reading, and that you cannot look round your room, or out of your window, or take the shortest walk abroad without seeing something which will suggest to you the advantage of consulting its pages. It is, in fact, rather a work of reference than one for continuous perusal; a work to be kept always by you than one to be hastily scamped through and then dismissed as if it were done with. Not that everything to be found in it is to be considered final; and here again is, perhaps, another of its advantages, for its possessor may be incited, by the knowledge of that fact, to keep a watch on what is from time to time recorded about the progress of the scientific world, and to make such supplementary or corrective notes as may seem to be required. In any case, the volume is one which, wherever it may make its appearance, cannot fail to gratify the eye that sees it and to improve the mind that has recourse to it. For proper appreciation of it, however, it should be approached in the spirit of the student rather than of the mere reader—of the student who is anxious to know as much as he can learn about levels, whether water or spirit, about pendulums, about balances, about the hydraulic press, about artesian wells, about pumps, atmospheric railways, and letter-tubes; about the construction of violins and all manner of musical instruments, about acoustics applied to architecture, about the way in which the public were once cajoled by "the invisible woman," about bagpipes, about organs, about mirrors, about lighthouses, about microscopes, about the stereoscope, about photography, about "the art of warming," about the steam-engine and the plainest and simplest method of making it explode, about the origin of "horse-power" as a term of measurement; about electric telegraphy, electric horology and electro-plating. It appears that "the indication of true time by an audible signal, by means of the isochronism of controlled electric clocks was first practically carried out at Edinburgh, by Professor Piazzi Smyth, the Astronomer Royal for Scotland, between the Royal Observatory, Calton-hill, and the castle." The whole value of the professor's achievement can be fully acknowledged by none but a peaceful visitor who has unsuspectingly sauntered down Prince's-street, and, having arrived exactly opposite the gun upon the ramparts of the castle at one p.m., has found himself, wind and weather being favourable for the purpose, nearly blown through a shop window.

MUSICAL PUBLICATIONS.

Messrs. Enoch and Sons have recently added to their now extensive quarto series of "Litolff" editions much of the piano-forte music of Robert Schumann. Some of this has already been noticed by us, the latest numbers being the "Fantasie-Stücke," op. 12; the "Waldscenen," op. 82; and the "Album-Blätter," op. 124. These are excellently engraved and printed, at prices varying from fifteenpence to eighteenpence. Messrs. Enoch have also brought out a cheap octavo edition of Franz Abt's "Singing Tutor," consisting of four divisions: 1, "Scales and Intervals;" 2, "Exercises for the Cultivation of Fluency;" 3, "Twenty Solfege;" and 4, "Twelve Exercises on Vocalisation." The work is of intrinsic value, far beyond the small price at which it is issued.

"The New Graduated Method for the Piano-forte" (Messrs. Goddard and Co.), is a comprehensive, although condensed, treatise on the art of piano-forte playing, including explanations of time, scales, chords, the abbreviations of ornaments and embellishments, and exercises and lessons, altogether forming a good code of instructions for students from the earliest stage of pupillage.

"Royal Academy Pictures, Musically Illustrated by Charles Oberthur" (Duff and Stewart). We have here three piano-forte pieces, the titlepage of each being illustrated with a large and well-executed lithograph after paintings by a celebrated artist—the subjects being "Below the Doge's Palace," by Mr. Frith; "The Step," by Mr. J. Pettie; and "Looking Back," by Mr. A. Maclean. The idea is a good as well as a novel one, and Mr. Oberthur has given a distinct character to each of his musical illustrations in keeping with the subject.

The emigrants from the Mersey in 1876 numbered 66,446, a decrease of 28,593 on the figures for the previous year.

Snow fell heavily all over the north of Scotland on Monday night. The frost was intense.

The Ludlow Town Council have unanimously appointed the deputy clerk of the police, Mr. Theophilus Salway, as Clerk of the Peace of the borough, in place of his recently deceased father, Mr. Humphrey Salway.

Two ships have been dispatched by the Government in search of the missing smacks in the North Sea. Between thirty and forty vessels are missing, the crews of which would number more than 200 men and boys. Some of the smacks are reported safe.

MUSIC.

Last Saturday's Crystal Palace Concert brought forward two pieces for the first time—Berlioz's overture to "Béatrice et Bénédict" and a "Sarabande" by Massenet. The overture, which terminated the programme, is characterised by that skill in the command of varied orchestral effects, especially of a demonstrative kind, in which Berlioz excelled. It has also much piquancy of character and rhythm, and forms an effective prelude to the opera to which it belongs—a work written and composed by Berlioz for performance at Baden-Baden in 1862. It received every advantage in its performance by the fine band of the Crystal Palace, directed by Mr. Manns. The sarabande is a graceful trifle, in the quaint style of the old Spanish dance whose title it bears. Beethoven's noble fifth symphony (in C minor) was the most important feature of the concert; and, often as it had previously been heard at Sydenham, it came with all that freshness of effect which belongs to the works of high genius when worthily interpreted, as this was on Saturday. Another piece then given was also symphonic in form and style—Schubert's fantasia in C, originally composed for pianoforte solo, and adapted with orchestral accompaniments by Liszt. The work in its original state has so much of the orchestral tone about it, and indicates so many grand effects beyond the power of the pianoforte to realise, that sufficient justification may be found for Liszt's amplified arrangement of it, especially as this is effected with great skill. The pianoforte part was played by Mr. Walter Bache with much brilliancy and vigour. Weber's noble overture to "Euryanthe," splendidly played, opened the concert most impressively. The vocal music brought forward a débutante, Miss Nannie Louise Hart, whose efforts appeared to be somewhat impeded by nervousness, and on whom, therefore, it will be better to await a future opportunity for comment. The pieces set down for Madame Patey were, of course, finely rendered.

There was no Ballad Concert on Wednesday, on account of its having been Ash Wednesday. The fifth concert of the series will take place on Wednesday next.

"The Messiah" was given at the Royal Albert Hall on Wednesday (Ash Wednesday), conducted by Mr. Barnby, the solo singers announced having been Meadames Sherrington and Patey, Mr. Sims Reeves, Mr. Shakspeare, and Signor Campobello.

On Monday next the Prince and Princess of Wales are to be present at a performance of Verdi's "Requiem" by the Royal Albert Hall Society, conducted by Mr. Barnby.

The Borough of Hackney Choral Association is giving a high and special character to its concerts, which have been lately placed under the direction of Mr. E. Prout as conductor. At the second concert of the new season, on Monday evening, Mendelssohn's music to "Athalie" and that composed by Schubert for the drama of "Rosamunde" were given, at the Shoreditch Townhall, the arrangements having included the co-operation of a band and chorus of about 160 performers.

A special concert was given at the Crystal Palace on the afternoon of Wednesday (Ash Wednesday), when the programme comprised Mendelssohn's "Reformation Symphony;" a "Largo," by Handel, for organ, harp, violins, and violas; an instrumental selection from Rossini's "Stabat Mater;" and Chopin's pianoforte concerto in E minor, with Miss Josephine Lawrence as pianist. The vocalists were Misses E. Thornton and A. Paget. Mr. Manns was the conductor. On Tuesday evening Haydn's "Creation" is to be given at the Crystal Palace.

The Dean and Chapter of Gloucester having granted the use of the cathedral for the next festival of the Three Choirs to be held at Gloucester, meetings of the stewards have appointed committees to make the necessary preliminary arrangements. Mr. Lloyd, the successor to Dr. Wesley as organist of Gloucester Cathedral, has been appointed conductor, as usual, with instructions to draw up a musical programme for approval. The period for holding the festival has not yet been fixed, but it will be either at the end of August or beginning of September. Over one hundred stewards have already consented to act.

By the will of the late Mr. Edward Schulz, who died in September last, the Royal Society of Musicians of Great Britain receive a legacy of £1000. Mr. Schulz, although a Hungarian, had long been naturalised, and was proud to be considered and treated as an Englishman.

THEATRES.

Mr. and Mrs. German Reed are still diligent caterers for the public gratification. Their programme has been of unusual excellence. The "Matched and Mated" of Mr. Burnand is decidedly amusing, and the part of Captain Kirby, a naval sketch admirably filled by Mr. Alfred Reed, is a characteristic delineation which gives to the little piece a certain dramatic value. Mr. Corney Grain's musical sketch, entitled "Spring's Delights," is full of those surprises in which the skilled executant takes so much and such constant delight. The consequent public applause evinces that these meritorious labours are appreciated at their true worth. Nevertheless, these popular entertainers have thought it meet to strengthen their bill by a third piece, written by Mr. West Cromer, with music by Mr. German Reed, entitled "A Night Surprise," in which Mr. Corney Grain impersonates a German musical professor, who walks in his sleep, and rehearses an opera on which he is engaged, much to the annoyance of his host, a mesmeric doctor, with whom he is staying. The trifle is well calculated to please a refined audience, and has been well received.

The theatrical events of the week are few and comparatively unimportant. On Saturday Miss Bateman appeared at a matinée, as Julia in "The Hunchback," assisted by Miss Virginia Francis in the rôle of Helen. Both were seen to advantage in these most effective characters.

The Glasgow Institute of the Fine Arts was opened last week. The place of honour at the head of the centre room has been given to a picture entitled "In Waiting on Her Majesty's Grace, A.D. 1577," the work of Miss Frances Sutcliffe.

Mr. Harrison Weir, writing from Weirleigh, Branchley, Kent, relates the following signs of spring, which he thinks will interest naturalists:—"Feb. 1. First butterfly, the tortoiseshell, in fair condition. 6th. First wasp, strong on the wing; blackbird in full song. 8th. Another wasp; lady-birds about; found dormouse nest with stock of food inside, but the mouse out, though nest still warm; yellow banksian rose in bloom on the front of the cottage. 12th. First humble-bee, very large, black, with bright red extremity; Gloire de Dijon rose in bloom, and has not ceased throughout the winter; bees out and about like summer, also gnats and flies. 13th. Last year's geraniums out of doors still alive. A man cutting underwood, three weeks ago, found a thrush's nest with four young ones in it, but drowned through the rains. Flowers, wild and otherwise, too numerous to mention in full bloom."

OPENING OF PARLIAMENT: THE CHINESE AMBASSADOR.

CRISIS IN TURKEY.

inople has been in a very und excited mood since the downfall of Midhat Pasha, the rising and confident Prime Minister whose disgrace and exile, by order of the Sultan, was related last week. It is thought very doubtful whether Edhem Pasha, his immediate successor in the office and dignity of Grand Vizier, will long keep his place; but we give his portrait, from a photograph by the Brothers Abdullah, and we have a little to say about him. He was, our readers will remember, one of the two representatives of the Turkish Government, along with Safvet Pasha, at the late Conference of European diplomatists; he had previously been Turkish Ambassador at Berlin. Though a Mohammedan by religion and education, he is said to be a Greek by birth, a native of the isle of Scio, where he was born in 1823. One account, however, states that he is of Circassian parentage. While still a boy he was sold as a slave to the well-known Turkish statesman Khoarev Pasha, in whose house at Constantinople he some time performed servile duties. His master, however, soon perceived the extraordinary abilities of his young slave, and not only gave him his liberty but sent him, together with four other Circassian boys, to be educated in Paris. Here he remained at school from 1832 to 1835, and then, at the request of his patron, studied mining four years, during which period he travelled in France, Germany, and Switzerland. He returned to Constantinople in 1839, and was at once appointed a Captain on the general staff. In this capacity he was chiefly employed on topographical work, and showed such skill that he was rapidly advanced to the rank of Colonel. He was also teacher of French to the present Sultan Abdul Hamid. In 1849 he was appointed Aide-de-Camp to the Sultan, and, after being promoted to the rank of General, he successively became Chamberlain of the Sultan's palace and member of the Council of State. After the dismissal of Ali Pasha, Edhem became Minister of Foreign Affairs, and he subsequently represented his

EDHEM PASHA, THE NEW GRAND VIZIER.

country at various European Courts, including that of Berlin, whence he was called to take the post of second Plenipotentiary of the Porte at the Conference. He is said to belong to the Young Turkish party, of which the new President of the Chamber of Deputies, Vefik Effendi, is one of the most eminent leaders. The behaviour of Edhem Pasha at the late Conference was rather indiscreet. When the foreign Ambassadors spoke of the Turkish massacres in Bulgaria, he retorted by desiring them to remember the massacre of St. Bartholomew, at Paris, and those of the French Revolution in 1793; at which Count de Chaudordy and M. de Bourgoing, the representatives of France, expressed their surprise, regarding these historical allusions as an insult to their nation. It was understood that Edhem Pasha was a bitter opponent of Midhat's plans, and that outside of the Conference he would do his best to defeat them. We do not know that he had any objection to the Constitution as a form of government. Perhaps he saw that that experiment would not last long. But he objected to putting the Christians, even in theory, on an equality with Mohammedans. He regarded that feature of the Charter as a weak concession to the clamour of Europe, not in harmony with the true interests of the Empire, and contrary to the most sacred principles of a Turk. Edhem Pasha generally wound up his harangues by proclaiming war *à outrance*; war with Russia, war with Europe, war with all Christendom. But now that he is officially responsible for the fate of the Turkish Empire, he may show a more pacific disposition. He is said to have betrayed a particular ill-will to the Emperor of Austria. The latest rumours are that the Sultan had again examined the list of candidates for the post of Grand Vizier, as Edhem Pasha's dismissal or resignation seems to be imminent. Those having some chance of being appointed are Mahmoud Nedim Pasha, Damad Mahmoud Pasha, Ahmed Vefik Effendi, Safvet Pasha, and Yekhi Pasha.

M. Christies has been appointed Plenipotentiary of the Servian Government to carry on the negotiations for peace

A BATHING SCENE AT BENARES.

with the Porte at Constantinople. Montenegro has expressed a wish that its negotiations should be carried on at Vienna. The terms of peace offered by Turkey to Serbia are as follows:—Reinstatement of the Turkish flag. Building of fortresses to cease. Turkish agent to be maintained at Belgrade. Serbia to discourage in future all insurrectionary movements. Full religious liberty to be given to all Prince Milan's subjects. The other points to be settled upon the basis of the *status quo ante bellum*.

The Grand Vizier has repeated his assurances that the Porte is fully resolved to execute all the provisions of the Constitution. It is the intention of the Sultan to apply to England for administrators in the departments of revenue and customs. The Under-Secretary in the Ministry of Justice will be sent to England, in order to make a study of British legal practice. It is intended that all the laws dealing with the details of the new Constitution shall be ready for consideration on the assembling of the Turkish Parliament. We have a contradiction of the rumour that 4000 Sofas had assumed a menacing attitude, and that serious disturbances were likely. This rumour is said to be a mere invention, and the Turkish capital is declared to be perfectly quiet.

Our Special Artist at Constantinople furnishes two sketches of ordinary incidents in the social life of that city. One of them is the daily feeding of the flock of pigeons kept in the courtyard of the Mosque of Bajazid. This is regarded as a laudable act of piety, as well as of natural kindness and benevolence, in which many of the devout Moslem are willing to take part. The other sketch is at the door of the Hôtel de l'Angleterre, better known as Missiri's, at Pera, which is the favourite residence of European visitors to Constantinople. A lady, who may be English or French, is about to enter the sedan-chair, which is to carry her to a ball at the mansion of one of the Turkish Ministers of State.

ROYAL INSTITUTION LECTURES.

METALS AND THEIR USES.

Dr. C. R. Alder Wright, in his fourth and concluding lecture, on Thursday week, continued his account of the application of the metals, illustrated by numerous experiments and valuable specimens. The high temperature required to fuse platinum, and its inactivity towards oxidising agents, he stated, lead to the use of this metal in many chemical operations, such as the concentration of sulphuric acid; and its property, when finely divided, of absorbing gases and vapours is also employed technically. Spongy platinum causes the union of sulphur oxide and hydrogen, and thus helps the production of Nordhausen sulphur for the indigo dyer. In Döbereiner's "philosopher's lamp" a jet of hydrogen impinges on some platinum, this causes the hydrogen and absorbed air to act on each other, whereby so much heat is generated that the platinum becomes red, and ignites the jet. The absorption of gases was also well illustrated by hydrogen and palladium. After alluding to the magnetic qualities of certain metals (some, such as iron, nickel, and cobalt, being attracted by both ends of a magnet, while others, such as bismuth, are repelled), Dr. Wright described and illustrated the processes connected with coining, specially noticing the great care required in selecting the copper required to alloy gold and silver, and explaining the operations of assaying. The utilisation of the brilliant white light of burnt magnesium for signalling purposes and photography, and the application of the liquidity of mercury in the construction of thermometers, barometers, and Sprengel's air-pump, were fully illustrated, as well as the employment of the ordinary metals and their alloys, such as brass, pewter, Britannia metal, bronze, Queen's metal, and Muntz's metal, in articles of daily use. Among other examples, the gradual formation of a Britannia metal teapot was exhibited, and warning was given of the danger of poisoning by the action of acids upon articles made of cheap alloys. The production of white and red lead, vermilion, Prussian blue, and other pigments derived from the metals, and their use in the fine arts, in colouring glass, pottery, and enamels, and in dyeing, were explained and illustrated. After noticing the many technical uses of the salts of the metals, and showing, experimentally, that muslin and other fabrics can be rendered incombustible by tungstate of soda, the lecturer concluded by remarking that there are few substances in common use which are not wholly or partially composed of metals or of metallic derivatives, or are not made or obtained by means of metallic tools.

TYPICAL LAWS OF HEREDITY.

Mr. Francis Galton, F.R.S., began his discourse at the evening meeting, on the 9th inst., by stating that the processes of hereditary transmission work together with so much accuracy that each generation of every large population tends to be the exact equivalent of its predecessor, although different classes in each generation contribute very different quota of representatives to the next. Giants are almost sterile: their breed tends to be diluted by marriage and to revert to mediocrity; yet much the same number of giants will always occur in the population, and the same is observed in every plant and animal. How to solve this problem, hitherto unnoticed, was the object of Mr. Galton's discourse. He showed that the widest generalisation is admissible, because all deviations tend to conform to the mathematical law of frequency of deviations. Quetelet first proved by statistics that this conformity exists in respect to the height of men, and to all measurable characteristics of all plants and animals. Hence we are justified in imagining an ideal case to which the law of deviation strictly applies, and in which the statistical resemblance of successive generations is exact; and we may give the name "typical laws" to those by which the theoretical conditions are fulfilled. To obtain a just general idea of these "typical laws," Mr. Galton experimented largely with sweet peas, prolific plants, incapable of being cross-fertilised by accident, and easily reared; the seeds retaining the same weight in varying dampness of the air. He had careful weighings made, with a good balance, of many thousand individual seeds, and the results fully accorded with the theoretical requirements of the typical case. They perfectly explained the conditions of the simplest form of descent—viz., 1, from a single parent, and not from a couple (as in the case of sweet peas, not cross-fertilised); 2, differences of weight, or other characteristics having no effect on productiveness; 3, different weights, and being equally affected by natural selection. In "simple descent" we only have to deal with reversion and family variability. Reversion was found to act according to the simplest conceivable laws—the deviation of the weight of the parent seed bearing a constant ratio to the deviation of the mean weight of its offspring. The formula by which these laws are expressed was said to belong to the problems of the higher statistics; but their actions were exhibited and made intelligible by working models, one of which illustrated "simple descent," in which the processes of reversion and family variability are alone concerned; while others explained the laws of productiveness and natural selection. The effects of these latter and that of dual parentage were defined, in aiding reversion to bridge the step-by-step progress of dispersion in the race caused by family variability. The final result is

that, if four numbers are given, the variability of any typical characteristic in a race can be easily determined and its fixity accounted for. These are—1, the coefficient of reversion; 2, the value of 1 deg. of derivation, of family variability, of productiveness, and of natural selection. The genealogical progress of a race was shown to consist in a constant outgrowth from its centre and a constant dying away at its margin; while there was a tendency in the scanty remnants of all exceptional stocks to revert to that mediocrity whence the majority of their ancestors originally sprung.

FLORENCE AND THE MEDICI.

Mr. John Addington Symonds began his second lecture, on Saturday last, with a sketch of the life and character of the eldest son of Giovanni de' Medici, Cosimo, who was thirty years old when his father died, in 1429. He was a consummate financier, and devoted much of his great wealth to political purposes. Living himself very frugally, he lent money both to the State and to needy citizens, and became a leader of the plebeians, in strong opposition to the Albizzi family, one of whom, Rinaldo, then ruled Florence. At the same time, he gained to his side the nobles, discontented at their total exclusion from power. The conflict with the Government began in 1433, when Cosimo was suddenly declared a rebel and imprisoned, the city being held by armed men. This violence greatly increased his popularity in Italy. Venice interceded for his welfare, and when he went into exile he was honourably received at every place he came to. The error of the Albizzi soon appeared, and showed that their power rested upon artifice. On Sept. 26 Rinaldo himself was declared a rebel, and submitted to exile, having neither the courage nor cruelty for civil war; and on Oct. 2 Cosimo re-entered Florence in triumph. Disliking bloodshed and violence, he merely exiled his opponents; yet maintained an unflagging secret persecution. His government was by means of his party, and he chose to rule by subservient plebeians and organised corruption; and he used taxation as other despots used the dagger. His four sayings to friendly remonstrants against his policy were, "Better the state spoiled, than not ours;" "Government cannot be carried on with paternosters;" "An ell of scarlet makes a burgher in the place of one expelled;" and "I aim at finite aims." He reduced Florence to a rotten borough, and he gained favour by employing well paid multitudes on public works. He highly patronised literature and the arts. His palace became the centre of a literary and philosophic society, and he established the celebrated Platonic Academy. "Pater Patrie" ("the father of his country") was inscribed on his tomb at his death, in 1464, and he left to posterity the fame of a great and generous patron, with the infamy of a cynical, self-seeking bourgeois tyrant. His son Piero il Gottoso suffered from gout, and could not take an active part in government; but the errors of their opponents strengthened the Medici, and a plot against them failed. Lorenzo, the son of Piero, took the helm at the death of his father, in 1469; and the family began to live and be honoured as Princes. He assumed the motto of the Renaissance, "Le Temps revient," devoting himself to classic studies, and making Florence a home to the exiled Greek scholars. He composed for the Carnival lyric poems, such as "The Triumph of Bacchus and Ariadne" (of which Mr. Symonds read a translation); yet he never ceased being the consummate politician, governing like his father by moral corruption. Among other interesting incidents, Mr. Symonds described the assassination of Giuliano de' Medici by the Pazzi, Lorenzo himself narrowly escaping. The people rose and massacred the Pazzi and their partisans, including an Archbishop. The Pope Sixtus IV., who favoured the plot, excommunicated Florence and formed a league against it, which was soon dissolved by the policy and address of Lorenzo. The lecture concluded with remarks on the prevalence of tyrannicide in Italy at the time and the slight censure it met with.

HUMAN ARCHITECTURE.

Professor Alfred H. Garrod, devoted his fifth lecture on the Human Form, on Tuesday last, to the lower limbs, his remarks being illustrated by models and diagrams. He began with a description of the pelvic girdle, a strong mass of bone fused together, its three parts—the ilium, ischium, and pubis—meeting in the acetabulum or socket for the head of the femur or thigh-bone, the whole arrangement being well adapted to sustain the weight of the body and in harmony with locomotion in the erect position. The thigh-bone in man is very much larger proportionally than in any other animal, and, by its curvature at its upper end, the breadth of the body is increased. The thigh-bones incline towards each other from the pelvis to the knees, so that the leg and foot may be brought more directly beneath the centre of gravity. At the hip-joint also the depth of the acetabulum, and its fibrous rim and strong ligaments, give much security to the frame. At the knee-joint, a most perfect piece of mechanism, defended by the patella or knee-cap, the femur can be brought in standing in a straight line over the tibia or main bone of the leg, so that one bone is supported by the other like a pillar; and at the ankle the whole weight of the body rests upon its topmost bone, the astragalus. It has a slight lateral play; but its chief movement is of a hinge-like character, in which the tibia, as it were, rocks upon the astragalus. The foot also is admirably adapted for all its purposes. It forms a strong double arch, fitted together like the keystones in masonry; and the heel-bone is one of the marked distinctions of the human race. Thus all the parts of his structure demonstrate the intended erect position of man.

On Friday next, the 23rd inst., Mr. John Fletcher Moulton will give a discourse on Matter and Ether. On Saturday next Professor Henry Morley will begin a course of five lectures on Effects of the French Revolution on English Literature.

At the meeting of the Society of Arts, on Thursday week, under the presidency of Dr. Ernest Hart, a paper on Some Processes of Nature's Hygiene (leading to Improvements in the Production of Antiseptics, Disinfectants, and Albumen of Commerce), was read by Mr. C. T. Kingzett, F.C.S.

Mr. Augustus Babington, hon. secretary of the Society for the Encouragement of the Fine Arts, gave a lecture the same evening on some of the Causes of Greek Art Excellence—Dr. Doran in the chair.

At the Royal United Service Institution, Whitehall, Major-General T. B. Collinson, R.E., put forward, yesterday week, an elaborate paper on the Present Facilities for the Invasion of England and for the Defence thereof. Major-General Collinson was, from ill-health, unable to be present, and the paper was read by Admiral Selwin.

Mr. E. J. Reed, C.B., M.P., addressed a crowded audience in the lecture theatre of South Kensington Museum, last Saturday evening, on the subject of naval architecture, as illustrated by the plans and models exhibited in the Loan Collection of the Museum.

Professor Corfield gave a lecture, on Saturday, at the Society of Arts, the subject being the Air we Breathe. Cardinal Manning, who presided, said it was most painful to reflect

upon the number of young women who, while seeking to earn a livelihood, were obliged to work in close rooms where they were in danger of contracting disease. He was glad that the Government had directed its attention to this subject.

The concluding lecture of the course of four, on Work and Wages, was given, in the afternoon, by Professor Leone Levi, to members of workmen's clubs and institutes, in the large theatre of King's College. Mr. Hamilton Hoare occupied the chair, and the subject chosen was Savings Banks and Friendly Societies. The lecturer first enforced the duty of "thrift," and the saving up for unforeseen eventualities, urging that moderation enabled men to save and intelligence to apply the savings profitably.

The fifth meeting of the Geographical Society during the present session was held on Monday evening—Sir Rutherford Alcock presiding, as usual. A minute appended to a proposed resolution by Sir M. Wells regarding the distribution of tickets to visitors on Dec. 12 last gave rise to some little discussion, and eventually the chairman declared that a special general meeting would have to be called to consider the resolution. A paper was read by General Strachey on Scientific Geography, forming the first of a short series of lectures on that subject.

A paper on Personal Work among the Poor was read by the Rev. M. S. Walrond, at a special meeting of the Charity Organisation Society. The rev. gentleman said there were 130,000 poor people in three unions in the East-End, among whom some fifty bona-fide visitors circulated. He maintained that, in consequence of a want of system among these, it was impossible to properly apply relief, and he sketched out what he considered an improved plan, the main feature of which was a house-to-house visitation. This evoked an animated expression of antagonistic opinions.

In the course of a lecture delivered, on Monday evening, by Mr. William Harnett Blanch, author of the "History of Camberwell," before the members of the Shorthand Writers' Association, on "Edward Alleyn," the founder of Dulwich College, the lecturer mentioned that he had had occasion to search the old registers of several parishes, and a few days ago he found in that of St. Andrew's, Holborn, the register of baptism of the present Earl of Beaconsfield.

Mr. F. G. Hilton Price, F.G.S., read before the London and Middlesex Archaeological Society, on Monday, a paper entitled Notes on the Early Goldsmiths of London to the Close of the Seventeenth Century.

At the meeting of the Royal Colonial Institute, held at the Pall Mall, on Tuesday evening, under the presidency of Lord Carlingford, a paper by Mr. John Plummer on the Colonies and the English Labouring Classes was read by Mr. Young, the hon. secretary.

Sir James Paget gave the annual Hunterian oration on Tuesday afternoon, in the theatre of the Royal College of Surgeons, Lincoln's-inn-fields, in the presence of the Prince of Wales and a large company, which included Mr. Gladstone, the Duke of Westminster, the Duke of Argyll, the Dean of Westminster, Professor Huxley, Professor Tyndall, Professor Acland, Sir William Gull, and Mr. Brudenell Carter.

In a paper on the Lake Systems of Central Africa, read by Dr. Mann before the Society of Arts, on Tuesday evening, it was stated that inland routes 6000 miles in length were almost entirely navigable by water.

SKETCHES FROM INDIA.

We have pretty well exhausted the subjects for our Illustrations connected with the Imperial Durbar, or Assembly of the Native Indian Princes and Rulers at Delhi on New-Year's Day. The proclamation of her Majesty's new title of "Empress of India" was attended with all the grand ceremonial display which we have described. One interesting circumstance, which has not yet been mentioned, among the Viceroy's official receptions at Delhi in the two weeks of his stay there, was the address presented to his Excellency by the Anjuman-i-Punjab. This institution is a federal union of the several colleges and literary or scientific societies conducted by and for the educated natives of the Punjab, under the auspices of Dr. G. W. Leitner, president of the University of Lahore. It may, perhaps, be remembered that, on a former occasion, the Anjuman-i-Punjab sent an address of thanks to the Prince of Wales for the patronage of his Royal Highness, with their congratulations upon his recovery from illness. Lord Lytton, in his published reply to the address presented on Jan. 2, at Delhi, expressed his strong confidence both in the Anjuman-i-Punjab and in the University of Lahore, conducted, as he said, "under the presidency of my friend Dr. Leitner, whose fine abilities and successful services in the cause of education have already received at Vienna an international acknowledgment which is not only an honour to himself and your institution but also to India and to all of us." This was a reference to the contributions of Dr. Leitner to the department of educational appliances at the Vienna Exhibition. Dr. Leitner's unique and valuable collections of objects illustrating the ethnology, antiquities, and fine arts of the countries on the north-west frontiers of India, were exhibited at the Royal Albert Hall, South Kensington; and he lectured also upon the influence of Greek art on the Buddhist sculptures of India, and upon the history of the border races in the Himalaya valleys, to some of the learned societies in London.

Our clever correspondent and amateur artist in the Vice-regal camp at Delhi, Lieutenant C. Pulley, of the 3rd Ghooorkas, has supplied us with an abundance of Sketches; but we can give only one more of them, that of the Guicowar of Baroda's wrestlers displaying their skill and prowess to the assembled English and other spectators. With this, but merely as an ordinary example of native Indian habits and costume, we present one of Mr. Simpson's sketches, taken at some port on the Malabar coast, when the Prince of Wales, in the Serapis, was passing round the shores of India. It represents some of the native boatmen endeavouring to catch the eye of a passenger on board ship, and to secure the job of landing him. The illustration of a bathing scene in the river at Benares is likewise admitted for the sake of that interest which has lately been revived in all the affairs of our Indian fellow-subjects.

Senor Lerdo de Tejada, the fugitive Mexican President, has arrived in New York.

Next to London and Liverpool, Manchester contains the largest Welsh population of any English town, the number being estimated at 30,000.

Mr. James Gell, Attorney-General for the Isle of Man, and Mr. William Leese Drinkwater, first Judge of the island, have been knighted.

The Art-Loan Exhibition, at King's Lynn, which has been open during the past three weeks, was closed, last Saturday night, by the Mayor (Mr. J. D. Thew), accompanied by the Aldermen and members of the Corporation.

OBITUARY OF EMINENT PERSONS.

ADMIRAL SIR AUGUSTUS CLIFFORD, BART.

Sir Augustus William James Clifford, Bart., Admiral Royal Navy, C.B., Gentleman Usher of the Black Rod to the Queen, died on the 8th inst. He was born May 26, 1788, received his education at Harrow, and entered the Royal Navy in 1800. He served at the reduction of St. Lucia and Tobago, in the expedition to Egypt in 1807, and afterwards in the Mediterranean. In 1832 he was appointed Gentleman Usher of the Black Rod. He sat in Parliament for Dungarvan in 1820, and for Brandon in 1818 and 1831. Sir Augustus married, Oct. 20, 1813, Lady Elizabeth Frances Townshend, sister of John, fourth Marquis Townshend, and leaves three sons and two daughters. The eldest son, now Sir William John Cavendish Clifford, second Baronet, Vice-Admiral Royal Navy, C.B., was born Oct. 12, 1814.

SIR WILLIAM FERGUSSON, BART.

Sir William Fergusson, Bart., of Spittlehaugh, in the county of Peebles, and of George-street, Hanover-square, F.R.S., the eminent surgeon, died on the 10th inst. He was born March 20, 1808, the son of James Fergusson, Esq., by Elizabeth, his wife, daughter of A. Hodge, Esq., of Anstruther, Fifeshire, and was educated at Lochmaben Grammar School and at the High School and University of Edinburgh. Having studied surgery under the celebrated anatomists, Dr. Knox and John Turner, he became, in 1828, a Licentiate, and in 1829 a Fellow, of the Royal College of Surgeons of Edinburgh. For about nine years he was assistant to Dr. Knox; subsequently, in 1836, he was appointed Assistant Surgeon to the Royal Infirmary, and in 1839 he was made a Fellow of the Royal Society, Edinburgh. The following year he settled in London on becoming Professor of Surgery in King's College and Surgeon to King's College Hospital; he was afterwards Professor of Clinical Surgery in that hospital, and for some years Examiner in Surgery to the University of London. In 1870 he was elected President of the Royal College of Surgeons of England, where he was for a time Professor of Surgery and Human Anatomy. Sir William was Surgeon in Ordinary to the late Prince Consort and Sergeant-Surgeon to the Queen; he held also other important appointments, was consulting surgeon to many of the leading London hospitals, and a member of most of the prominent medical and surgical societies. Several of his lectures have been published, and his papers on surgical subjects. His "System of Practical Surgery" has reached a fifth edition, and is a standard work in the profession; and Sir William was the inventor of numerous surgical instruments. He was created a Baronet Jan. 23, 1866. He married, Oct. 10, 1833, Helen Hamilton, daughter of William Ranken, Esq., of Spittlehaugh, and leaves (with other issue) an elder son, now Sir James Ranken Fergusson, second Baronet, barrister-at-law. A portrait of Sir W. Fergusson was given in the Number of this paper for Feb. 24, 1866.

MR. BOYD.

William Boyd, Esq., of Pallydugan House and Glasstry, in the county of Down, J.P. and D.L., formerly M.P. for Downpatrick, died recently. He was third son of the late Richard Keown, Esq., of Downpatrick, by Mary, his wife, daughter of Henry Keown, Esq., of Tollymore, and assumed the name of Boyd in 1873, at the death of his mother, in compliance with the testamentary injunction of his great-uncle, Major David Hamilton Boyd, of Glasstry. He served as High Sheriff of the county of Down in 1840, and represented Downpatrick in Parliament from 1867 to 1874. He married, in 1846, Mary, daughter of the Rev. Robert Alexander, and leaves issue.

The deaths are also announced of—

John Stratford Collins, Esq., J.P. and D.L., of Wythall Walford, Herefordshire, barrister-at-law, on the 1st inst.

Lieutenant-General William Robert Andrew Freeman, late of the Madras Native Infantry, on the 7th inst., aged seventy.

Captain Rudolphus Boyce Oldfield, R.N., C.B., and A.D.C. to the Queen, on the 6th inst., aged forty-nine.

Lady Emily Charlotte Mary Ponsonby, sister of the Earl of Beborough, aged fifty-nine.

Stewart Blacker Roberts, M.D., F.R.C.S.E., of South Norwood, Surrey, late of Swineshead, Lincolnshire.

The Hon. Arthur Strutt, second surviving son of Lord Belper, on the 6th inst., aged thirty-four.

General Walter Nugent Thomas Smee, Bombay Army, F.R.S., on the 7th inst., aged seventy-five.

The Rev. W. Jordan Unwin, M.A., LL.D., late Principal of Homerton College, on the 4th inst., aged sixty-five.

The Rev. Richard Child Willis, D.D., at The Vicarage, Minster, Isle of Sheppey, in his seventy-eighth year.

The Rev. Sir H. W. Baker, Bart., on the 12th inst., at Monkland Vicarage, Leominster. His memoir will be given next week.

Sir John Edward Harington, Bart., of Ridlington, in the county of Rutland, late a Captain in the Coldstream Guards, a memoir of whom will be given in our next number.

Robert Lee, M.D., F.R.S., late of 4, Savile-row, on the 6th inst. He was author of "Pathology and Treatment of the Diseases of Women," "Clinical Midwifery," &c., and a frequent contributor to medical journals.

Lady Georgina Milner, on the 2nd inst., at her residence, 48, Eaton-square (sister of Richard George, ninth Earl of Scarborough, and widow of the late Sir William Mordaunt Milner, Bart.), in her fifty-seventh year.

Mr. John Morgan Cobbett, M.P. for Oldham, on the 15th inst. He was the second son of the celebrated William Cobbett; was born in 1800; was called to the bar at Lincoln's Inn in 1830, and subsequently went the Home Circuit. In 1850 he married the daughter of Mr. John Fielden, who was M.P. for Oldham from 1832 to 1847.

Thomas Bosville Bosville, Esq., J.P. and D.L., of Ravensfield, Yorkshire, on the 2nd inst., aged seventy-seven. He was son of the late Robert Newton Lee, Esq., of Coldney, Hants; by Harriet Elizabeth, daughter of the Rev. Joseph Warton, D.D., Head Master of Winchester College, and assumed by Royal license the name of Bosville on succeeding to the estates of his kinsman, Colonel Thomas J. Bosville.

Captain Hugh Campbell, who was appointed, on Jan. 1, to be the successor of Prince Leiningen in the command of her Majesty's yacht the Victoria and Albert, from typhoid fever, on the 12th inst.

Henry Baskerville, Esq., of Crowsley Park, Oxfordshire, J.P. and D.L., and High Sheriff of that county in 1847, lord of the manor of Shiplake, formerly in the Madras Civil Service. He was son of the late Oriel Viveash, Esq., of Calne, Wilts, by Sarah his wife, daughter and heir of Thomas Baskerville, Esq., of Woolley House, Wilts, and assumed the name of Baskerville by Royal license, 1838, on succeeding his cousin, the late John Baskerville, Esq., of Woolley House.

CHESS.

TO CORRESPONDENTS.

All communications relating to this department of the Paper should be addressed to the Editor, and have the word "Chess" written on the envelope.

Ica (Exeter).—There is no solution to No. 1719 in the way you propose. Please refer to the answer to S. F. in our last issue.

H. W. T. (University Hall).—It is unnecessary to give the variations in such detail. The way you indicate will answer very well.

T. L. (Sandbach).—Please to repeat your question. The second player in the French Opening cannot legally play P to K5th on his second move.

Jersey. —Your diagram of No. 1718 is incorrectly copied. The B at K R3d is White in our diagram.

W. L. (Leightonstone).—We have two amended problems of yours, both embodying the same conception. Kindly inform us which is intended for publication.

W. T. P. (Rochampton).—Both problems are very acceptable.

A. J. H. (Eccleston-square).—The King cannot, under any circumstances, be moved to any square within the scope of action of an adverse piece.

A. T. (Gloucester-road).—The correct move is B to Q3d.

J. C. (Glasgow).—The problem appears to be quite right now, and it is a very good one.

CORRECT SOLUTIONS OF PROBLEM No. 1719 received from H. Besson, G. F. Champney, J. Mubilly, P. M. Ralli, A. Little Boy, J. Oliver, Deep Be, Maggie Irwin, J. L. Radwaner, K. Brasmann, T. Guest, W. P. E. W. F. R. H. Hale, H. C. R. J. Byng, E. P. V. E. A. Dudgeon, Jane N. T. Letchford, C. E. B. Novice, Tredunnock, Eaton, Alex. H. Fritz, and H. Welham.

CORRECT SOLUTIONS OF PROBLEM No. 1720 received from H. B. T. Guest, W. P. Cant, E. W. F. O'Leary, A. Wood, East Marden, H. M. S. Brulser, W. F. Payne, J. Byng, Hereford, H. W. Trenchard, W. Leeson, J. De Houteyn, B. Hodge, Olive Cray, D. H. H. Stubbins, D. Vawdrey, K. Brasmann, Deep Be, H. Besson, E. Frau, H. Beumann, E. Clarkson, J. H. Skelton, W. V. G. D. Nantycrowd, R. H. Brooks, E. L. G. Sibbel, Rev. T. Smith, Benet, F. Myers, Draper's College, S. Western, Triton, R. Roughhead, B. R. Stone, Americanine, H. Bingham, Mechanic, E. Worsley, Littleton, Black Knight, L. S. R. W. Aston, Simpkins, Le-nora, T. R. Y. R. T. King, N. E. D. Paul's R. cost, J. N. Turton, J. K. Baz, J. E. Timbrey, E. P. Vulliamy, H. Welham, E. H. V. Una, Woolwich Chess Club, Le Cercle de l'Union a St. Etienne, Wanstead, and Dolly.

Problems received from E. C. A. Giggell, J. Crum, D. M. Tymbas and W. T. Pierce.

SOLUTION OF PROBLEM No. 1720.

WHITE. BLACK. WHITE. BLACK.
1. Kt to K2nd B to Q sq (best) 3. Mates accordingly.
2. Kt to Kt3rd Any move

PROBLEM No. 1722.

By J. A. W. HUNTER.

BLACK.

WHITE.

White to play, and mate in three moves.

THE ST. GEORGE'S CHESS CLUB.

The following is another game in the late Match between Professor WAYTE and Mr. MINCHIN.—(Scotch Gambit.)

WHITE (Prof. W.) BLACK (Mr. M.)
1. P to K4th P to K4th
2. Kt to K B3rd Kt to Q B3rd
3. P to Q4th P takes P
4. Kt takes P B to B4th
5. Kt to K B5th

White here adopts a line of play that has been out of favour for many years. The usual move is 5. B to K3rd; but we are unable to discover any serious objection to the move in the text.

6. Kt to B3rd K to K B3rd
7. Kt to K3rd P to Q3rd
8. B to K2nd P to K3rd
9. Castles Castles (Q R)

Apparently better than castling on the K's side. Black now threatens to play 16. B takes Kt; and if 11. B takes B, continue with 11. P to Q4th, obtaining at least an even game.

10. Kt to Q5th
Evidently with the object of preventing the advance of the Q P, and the consequent opening of the file to the adverse R.

11. Kt takes Kt (ch)
A necessary preliminary to B to Q3rd, as in reply to that move Black can win a Pawn by exchanging the minor pieces.

12. B to Q3rd Kt to B3rd
13. Kt to R4th Kt to Kt3rd
14. Kt takes B P takes Kt
15. Kt to K2nd Kt to K4th
16. P to K B4th P to B5th

Better than Kt takes B, because in that case the following:—
17. P takes Kt Q to Q5th (ch)
18. B to K3rd B takes Kt
19. White regains the Pawn.

17. P takes Kt P takes B

18. Kt to K3rd Kt to Kt3rd
19. Kt to K4th Kt to Kt3rd
20. Kt to K5th Kt to Kt3rd
21. Kt to K6th Kt to Kt3rd
22. Kt to K7th Kt to Kt3rd
23. Kt to K8th Kt to Kt3rd
24. Kt to K9th Kt to Kt3rd
25. Kt to K10th Kt to Kt3rd
26. Kt to K11th Kt to Kt3rd
27. Kt to K12th Kt to Kt3rd
28. Kt to K13th Kt to Kt3rd
29. Kt to K14th Kt to Kt3rd
30. Kt to K15th Kt to Kt3rd
31. Kt to K16th Kt to Kt3rd
32. Kt to K17th Kt to Kt3rd
33. Kt to K18th Kt to Kt3rd
34. Kt to K19th Kt to Kt3rd
35. Kt to K20th Kt to Kt3rd
36. Kt to K21th Kt to Kt3rd
37. Kt to K22th Kt to Kt3rd
38. Kt to K23th Kt to Kt3rd
39. Kt to K24th Kt to Kt3rd
40. Kt to K25th Kt to Kt3rd
41. Kt to K26th Kt to Kt3rd
42. Kt to K27th Kt to Kt3rd
43. Kt to K28th Kt to Kt3rd
44. Kt to K29th Kt to Kt3rd
45. Kt to K30th Kt to Kt3rd
46. Kt to K31th Kt to Kt3rd
47. Kt to K32th Kt to Kt3rd
48. Kt to K33th Kt to Kt3rd
49. Kt to K34th Kt to Kt3rd
50. Kt to K35th Kt to Kt3rd
51. Kt to K36th Kt to Kt3rd
52. Kt to K37th Kt to Kt3rd
53. Kt to K38th Kt to Kt3rd
54. Kt to K39th Kt to Kt3rd
55. Kt to K40th Kt to Kt3rd
56. Kt to K41th Kt to Kt3rd
57. Kt to K42th Kt to Kt3rd

The position is very curious and interesting. White has only one move at his disposal to avoid the immediate loss of the game, and, singularly enough, that move, if made, would have left Black almost without resource. He should have played 13. Q to Kt4th.

The Civil Service Estimates for the ensuing year, which were issued on Tuesday, show a total of £21,755,515, against £21,356,369 for the year 1876-7.

WILLS AND BEQUESTS.

The will, dated Aug. 10, 1868, of Lieutenant-General the Hon. William Arbuthnot, late of No. 20, Gloucester-road, Regent's Park, who died on Dec. 14 last, was proved on the 19th ult. by the Right Hon. John Viscount Arbuthnot and the Hon. Walter Arbuthnot, nephews of the deceased, and Frederick Walford, the executors, the personal estate being sworn under £50,000. The testator bequeaths to his great-nephews, the Hon. Hugh Arbuthnot, the Hon. William Arbuthnot, and Charles Arbuthnot, £5000 Three per Cent Consols each; to Mr. Walford, £400; and the residue of his property to his said nephew, Viscount Arbuthnot.

The will and codicil, dated Jan. 3, 1863, and July 21, 1876, of Mr. James Robert Aldous, formerly of No. 53, Oakley-road, Southgate-road, Islington, and late of No. 67, Marquess-road, Canonbury, who died on Dec. 7 last, was proved on the 8th ult. by Charles Evans and James Edward Aldous, the son, the executors, the personal estate being sworn under £35,000. The testator bequeaths to his wife £200, and, subject to a legacy of fifty guineas to Mr. Evans, the rest of his property for life; on her death it is to be divided between his children.

The will, dated Aug. 30, 1870, of Mr. John Edmonds, late of Plymouth, who died on Dec. 27 last, was proved on the 12th ult. by Robert Gard Edmonds, the son, the sole executor, the personal estate being sworn under £25,000.

The will, with two codicils, dated April 27, 1869, Oct. 13, 1874, and Feb. 8, 1876, of the Rev. William Gresley, Vicar of All Saints', Boyne-hill, Berks, who died on Nov. 19 last, was proved on the 2nd inst. by Francis Gresley, the brother, and Charles Gresley, the executors, the personal estate being sworn under £20,000. The testator gives the next presentation to the living of All Saints' to the Rev. Arthur Hislop Drummond, and £2000 upon trust towards the building of a church near the railway station in the said parish; and there are legacies to his sister, daughter-in-law, cousin, and others. The remainder of his property he leaves to his said brother.

A MODERN PACTOLUS.

Fancy the sixtieth part of a share being described as a "freehold estate" conferring upon the owner votes for two counties! Yet this is just the case with the New River Company, some separate "lots" at the sale consisting only of sixtieths of a King's share in the company, with "its main watercourse, its extensive reservoirs in and near the metropolis, landed and house property, ground rents, buildings, wharves, privileges, commodities and appurtenances," the dividends on the said sixtieths yielding last year the sum of £35 10s. 2d. each. How Sir Hugh Myddleton would stare if he could visit the pale glimpses of the moon and see to what gigantic dimensions his undertaking has grown; and even the mouth of King James or King Charles might water over the profits of the thirty-six shares which they once held, but which were given back to the company for the consideration of an annual payment of the insignificant sum of £500 yearly, which up to the present time is paid into the Imperial Exchequer under the style of the "King's Clog." A peculiarity of the company is that the income has never retrograded, which is not to be wondered at, seeing that they charge pretty much what they like for the water, and that besides supplying the liquid element to the City and the greater part of the northern side of the metropolis, they possess landed property to a large extent in Hertfordshire, and some fifty acres in London covered with houses, the leases of which are frequently falling in.—City Press.

The annual ball of the Royal London Yacht Club took place on Monday night at Willis's Rooms.

Last week 2717 births and 1504 deaths were registered in London, the former having been 168 more and the latter 178 less than the average numbers. The deaths included 90 from smallpox, 21 from measles, 14 from scarlet fever, 7 from diphtheria, 44 from whooping-cough, 20 from different forms of fever, and 11 from diarrhoea. Four of the fatal cases of measles occurred in Clerkenwell; and of the deaths from scarlet fever, two were returned in Eltham and two in Lewisham. Different forms of violence caused 51 deaths; 47 were the result of negligence or accident, including 20 from fractures and contusions, 4 from burns and scalds, 7 from drowning, and 8 of infants under one year of age from suffocation. Two deaths were caused by horses or vehicles in the streets. At the Royal Observatory, Greenwich, last week, the mean temperature was 46 deg., being 7 deg. above the average.

A correspondent of the *Daily Telegraph*, signing himself "H. P.," writes from Paris stating that he has for some years been interested in the butter trade carried on between England and the Continent. Without desiring to defend the sale of margarine as pure butter, he wishes to make public the composition of that article as manufactured in France and Holland. A patent has been taken out in France for the manufacture of margarine, and it is allowed to be retailed on the condition that it is not described as butter. It is asserted that from one manufactory in Paris, employing 400 men, margarine to the amount of £80,000 a month is sold. The following is the process by which this artificial butter is made:—A quantity of beef fat is procured daily from the abattoirs. It is then sorted and picked and thrown into a vat. Thence it is passed between revolving wooden cylinders. This grinding of the fat deprives it of all impurity. It falls into a tub, and, the fat being then melted, it is drawn off in a liquid state into moulds, where it is kept for a certain time to allow the evaporation of the stearine. It is afterwards mixed with milk and cream, and is worked in the same

NEW MUSIC.

ROYAL DEVONSHIRE SERGES,

woven from pure Wool, for LADIES' DRESSES, in Navy or Dark Indigo Blue, Black, Dark Brown, Fawn, and other solid colours, price 1s. 11d., 2s. 6d., 2s. 11d. per yard.

For CHILDREN a lower quality is made, very strong, price 1s. 6d. per yard.

For BOYS' HARD WEAR it is extra milled, price 6d. in wide, 3s. 6d. per yard.

Books of Patterns sent post-free by SPEARMAN and SPEARMAN,

Devonshire Serge Factors, Plymouth. The ROYAL DEVONSHIRE SERGE is the only true Yachting Serge. Sea Water cannot injure it. Any Length is Cut by the Factors, who arrange to pay the carriage of the Serge over Two Pounds in value to and as far as London.

A CORRECT IMPRESSION prevails among

the public that the Silks are generally dearer, and that they cannot now be bought at former prices; but this idea will be removed, so far as Messrs. JAY'S transactions are concerned, by an inspection and comparison of the undermentioned BLACK SILKS, which are: 2s. 10d. per yard, worth 3s. 6d. 3s. 6d. " " worth 4s. 6d. 4s. 6d. " " worth 5s. 6d. 5s. 6d. " " worth 6s. 6d. 6s. 6d. " " worth 7s. 6d. JAY'S, Regent-street.

FOREIGN VELVETS, from 4s. 6d. per

yard.—Messrs. JAY having had consigned to them before the rise in the price of silk a very large stock of these elegant dress materials, they are enabled to sell Black Foreign Velvets at 4s. 6d., 5s. 6d., 6s. 6d., and 7s. 6d. per yard. JAY'S, Regent-street.

EVENING DRESSES, 2 gs. and 2 1/2 gs.

The newest and most fashionable style, and made of non-crushing black tulle. Engravings of the same, postage free, on application. JAY'S, THE LONDON GENERAL MOURNING WAREHOUSE, Regent-street, W.

A SPECIALITY.

CAPPER, SON, and CO.'S INITIAL DAMASK TABLECLOTHS and NAPKINS of pure White Linen.

FAMILY INITIAL-LETTER WOVEN. These Cloths and Napkins can be sent home in three days, hemmed, washed, and ready for use, if desired.

To be had only of CAPPER, SON, and CO. Entrance, 65 and 70, Gracechurch-street: 165 and 170, Fenchurch-street, London.

Sizes, prices, and designs of cloths sent post-free on application. Indian Outfit, £25. Lists free. Mrs. ADDLEY BOURNE, 37, Piccadilly.

LORNE } "THE PERFECTION OF

HIGHLAND WHISKY. UNRIVALLED FOR "TODDY." Wholesale of the Sole Proprietors: GREENLEES BROTHERS, 1, Graham-buildings, E.C. Distillers, Argyleshire.

KINAHAN'S LL WHISKY.

KINAHAN and CO., London, finding that, through the recommendation of the Medical Profession, the demand for their OLD LL WHISKY for purely medicinal purposes is very great, submit with pleasure the following analysis by Dr. Hassall:—"I have very carefully and fully analysed samples of this well-known and popular Whisky. The samples were soft and mellow to the taste, aromatic and ethereal to the smell. The Whisky must be pronounced to be pure, well-matured, and of very excellent quality. The medical profession may feel full confidence in the purity and quality of this Whisky."

COCKS'S READING SAUCE

is the best and most economical Sauce ever manufactured FOR FISH, ENRICHING SOUPS, GRAVIES, &c. It only requires a trial to convince the purchaser of its excellence.

CAUTION.—The genuine is protected by Trade Mark—viz., CHARLES COCKS'S Signature on a white ground across the Reading Arms.

In consequence of Spurious Imitations of

LEA and PERRINS' SAUCE, which are calculated to deceive the Public, Lea and Perrins have adopted a NEW LABEL, bearing their Signature, "LEA and PERRINS," which signature is placed on every bottle of WORCESTERSHIRE SAUCE, and without which name is genuine. Sold wholesale by the Proprietors, Worcester; Crosse and Blackwell, London; and Export Oilmen generally. Retail, by Dealers in Sauces throughout the World.

G R A T E F U L — C O M F O R T I N G .

EPPS'S (BREAKFAST) COCOA.

JAMES EPPS and CO.,

HOMOEOPATHIC CHEMISTS.

C A C A O I N E

(QUINTESENCE OF CACAO) posesses the essential principle of Cacao, theobromine, unclouded by the excess of nutritives, as found in the natural cacao-nibs and in chocolates and prepared cocoa generally. A high-flavoured, unsweetened, cocoa beverage. JAMES EPPS and CO. HOMOEOPATHIC CHEMISTS, 65, Threadneedle-street; and 170, Piccadilly, London.

AMERICAN CENTENNIAL PRIZE MEDAL.

FRY'S CARACAS COCOA.

Its pure flavour, delicate aroma, and invigorating qualities have established its position as a first-class dietetic article.

FRY'S CARACAS COCOA.

"The Caracas Cocoa of such choice quality."—Food, Water, and Air (Dr. Hassall). "A most delicious and valuable article."—Standard.

FRY'S EXTRACT OF COCOA,

"than which, if properly prepared, there is no other or more wholesome preparation of Cocoa."—Food, Water, and Air. Edited by Dr. Hassall. Tenth International Medal awarded to J. S. FRY and SON.

THE ILLUSTRATED LONDON NEWS FOR FOREIGN PARTS.

Subscribers to the ILLUSTRATED LONDON NEWS who live abroad are particularly desired to order copies of the ordinary stout paper edition, as in those printed on thin paper for foreign postage the appearance of the Engravings is greatly injured on account of the print at the back showing through. The postage of the ILLUSTRATED LONDON NEWS printed on stout paper is double that of the thin paper edition for places abroad.

THE ILLUSTRATED LONDON NEWS.

LONDON: SATURDAY, FEBRUARY 24, 1877.

Two Debates have attracted and absorbed the interest of the country within the last few days. The first, initiated in the House of Commons by Mr. Gladstone, on the Treaty Rights and Obligations of England in respect of the independence and integrity of the Ottoman Empire. The second, introduced to the House of Lords by the Duke of Argyll, who, after due notice, put an interpellation to the Ministry, grounded on the instructions furnished to Lord Salisbury in November last, asking her Majesty's Government whether they intend to take any further measures for the attainment of the ends contemplated in those instructions. The debates in both Houses upon these subjects were, each of them, worthy—more especially that in the House of Peers—of the traditional reputation of the respective branches of the Legislature. Neither of them, indeed, dissipates entirely the obscurity which still shrouds the policy which ought to govern the British nation in dealing practically with the Eastern Question. Neither of them has issued in a result which can be looked at as the Polestar which may be accepted as a guide to future action. Both of them were sustained by vigorous logic and by impressive eloquence. Neither of them, however, conducted to a clear and distinct expression of the mind of the country. One gets confused in wading through the mass of conflicting opinions brought together on these occasions by the diligent study and the various analyses of the two Bluebooks containing the diplomatic correspondence which has passed upon the subject. One is perplexed, moreover, in regard to the best line of policy to be adopted for the future. But no man of ordinary intelligence and culture, we think, can study these debates without being put into a much superior position to any which he has previously occupied for arriving at an honest, and perhaps we may add a sound, judgment of the duty of the country in the momentous crisis to which the progress of events has brought it.
